Camp VC -

Aug - 1917.

Aug-2. Left Clearwater 9 a.m. to Tampa & Byrne via aut. to camp
leaf per S.O. A.G.O., W.D. 1914, p. 8.
route, train on time. Arrived
Chattanooga 11 a.m.
to camp. P.M. Sam Dr. J.W.D.

4" Reported to C.O for duty. Assigned
Co. 8, Lt. Robbins C.C.

5" Sunday - in camp all day trying
to get my bearings & wear off the
blues.

6" Monday. Up. 5:30. 1st drill 7:30. Got
started in routine duties.

7" Tuesday. Impressions of camp life
very good and duties appeal.

8" Wednesday. Catching on to drill fairly
well, but paper work a "peach".

9. Thursday. Routine work becomes quite
fascinating. Compulsory drill announced for to-morrow to select Corp's

10" Fri. Among the 12 to stand up, I
appointed Corp.

11." Sat. First ½ holiday. Ditty came.
Met her at Patten Hotel P.M.
Stayed there. Mighty glad to see her.
Paid at C.C with Cole.

12. Sun. About hotel all day get four
walks in P.M. Left for Camp 8:30.

13. Mon. Ditty went to Mrs. 461 Oak St.
for board. Nothing unusual at camp.

14" Tues. Appointed acting duty Serg.

15" Wed. Routine with Review in P.M.

16" Thurs. Routine. Appointed Right Guide

17" Frid - Routine

18" Sat. To town with D- in P.M.

19" Sun. To Lookout Mt. by incline.
Came down surface road.
Back for camp 8 P.M.

20" Mon. Routine
21" Tues. Routine
22" Wed. Routine
23" Thur. Routine
24" Frid.
Col. Goodwin of Eng. Army & Col. Dercle of French Ar. visitors. Col. G. makes fine talk & grand impression. Great personality.
25" Sat. In town P.M.
26" Sun. " " left for camp after supper
27" Mon. Routine at Camp. Made 1st Serg.
28" Tues. Top Sarg. S.O. 92 Hdq. Camp. G.
29" Wed. Routine duty.
30" Thur. Routine "
31" Fri: Ordered to Evac. Hosp. Personal report.

SEPTEMBER.

1. On duty Evac. Hosp. Assigned to tent with L.L. Griesemer, Roselle, N.J.
8. In town P.M. Reba came. In town
2 Sun. Ferger apt. No 4 - 117 McCaulie
in town, hearing news from home.
Back to camp after supper at cafe.
3" Life at Evac. Hosp. quite different than at barracks life it much better.
4" Tues. Routine at camp.
5 Wed. Routine at camp.
6 Thur. Routine at camp.
7 Fri. Routine at camp.
8. Sat.
In town in P.M. Show at night.
9 Sun In town, Good home dinner. Golf in P.M.
10 Mon. Routine duty. Nothing P.M. Prize-fights.
11" Tues. Routine duty. Picture show night with Gries. Baugh pr. blankets, quite a drop in temperature, so had uncomfortably cold night. Alright with added blankets.
12" Wed.
O.D. Ditty, Reba & Amelia Jones out to camp in P.M. after supper. Another night quite cold.
13. Thurs.
Routine duties.
14. Fri.
Routine duties
15 Sat.
In town at noon, Show at night. Heavy rain during night.
16 Sun.
Took it easy at flat.
Left 8:30 for camp.

SEPTEMBER. 1917.

17" Mon. Regular duties. Drilled platoon. Weather cool & pleasant after rain.

18" Tues. Routine duties

19" Wed. Routine duty. Ditty & Reba out. Case, fine

20 Thurs. Capt. Chambers birthday, some dinner. O.D. 6 P.M. Brents mother died

21 M. Usual duties

22 Sat. To town after dinner. Met Mr & Mrs. Dodge, & took ride & had pleasant time at their apt. Rain P.M.

23 Sun. Riot on Market St. about 4/30 P.M. in St. car strike, one man killed by strike-breaker, much excitement Back to camp 9 P.M. Rain in night

24 Mon. Rain - short drill - 1" time to drill Company.

25 T. Routine duty

26 W. Routine duty

27 T. Rain all day, no drill or lect.

28 F. Clear day but every thing mud. Musser leaving for Hattiesburg. Griesemer, Mess. Off.

29 S. In town after dinner & enjoyed the rest & change from camp-life

30" S. a quiet day, had lots of good sleep, a walk in the afternoon. Wind came up & began to grow much colder. Back to Camp ab. 8 - quite a cool ride & that night piled on all the blankets I had & with help of bedding roll managed to keep snug & warm

October

1. Weather quite cool & all boys grunting about it. Reg. duties

2. Still cold but warming up a bit in middle of day.

3. Just before dinner orders came for Shaker, Shannon, Ketzky & I to report to Hdq. 2nd Div. for duty which of course caused much excitement for those concerned. However had dinner, dressed up & went on a hunt for Hdq. Could find no one who knew where they were so had a ride about all over the park, finally locating & reported to Maj. Derby, who informed us that we were to sail on 18th Oct. Some news. Hard to say how it struck us, first as a surprise then, elation & depression had their turns. But on the whole all seemed anxious to start. Most of the boys at Evac. Hosp. envious. Advised to get our equipment together!

4. No more duties at Camp so packed up our luggage & only report by phone to Hdq. awaiting orders. Bought to which coat & coat-sweater, 15.00 each. Expect to fix for warmth & comfort as far as I can.

5. Wire from Byrne the he & Krom arrived Camie Sat. 10.55 a.m.

6. Met the boys at station, & surely glad to see 'em. Had lunch fixed for 'em at apt. Long auto ride over park & to the country club in P.M. Dinner at Patten. Spent evening at rooms. They to leave 5.15 in a.m.

7. Have lolled about the room all day, reading & sleeping. Enjoyed very much having Krom & Byrne with us. Inactivity while waiting for orders quite dull after the active life at Camp, but suspect when they do come there will be plenty to do & too short a time in which to do it

Copy.

Headquarters, Camps Greenleaf.
Fort Oglethorpe, Ga. Oct. 3. 1917.

Special Orders } Extract.
No 128

1. In compliance with telegraphic authority A.G.O. W.D., dated Oct. 2, 1917. the following Medical Reserve Corps officers, are relieved from duty at this Camps and will proceed to Chickamauga Park, Ga. reporting upon arrival to the Commanding General, 2d Division Regular Army for duty with organization specified, and by letter to the Commanding General Southeastern Department.

1st Lieut. Luciano B. Ducceschi
Headquarters Military Police.

The travel directed is necessary in the military service

By Order of Colonel Page.
Damon B. Pfeiffer. Capt. MRC
Adjutant.

9 Wed. The past two days have been a case of loaf & a hard job after such activity as was at camps.
Went out to see the boys yesterday changed bedding roll, sold Ted one to Cressler.
Reported at Hdq. this A.M. tho no orders but expecting some news in A.M. so of course will be there Got boots, & 2 coats as part of equip. Weather cooler 40°.

10-14. These were days of restless anxiety. Waiting for orders & having to report each morning. All baggage moved over & were assigned quarters but went back to town to be with D— each day. From all information obtainable this evidently a nice assignment and are think we'll be lucky to be with Hdq. Have met most of the

10-14
officers & all seem very pleasant.
Have about all of equipment &
like the rest — that know were
to sail, all are anxious to have
it hurry & start. Unable to get
any definite information as to
exact date or place of sailing.

14-21.
The past several days have been
ones of anxious expectancy — Equip.
for men only thing holding us up
Simply marking time. fixing
things up slowly.
In town with Capt Donnelly
Sat. night. Best bill yet at Rialt.
Past 4 days unusually cold at
night. Slight Colitis for 2 days.
Rain & mud 17-18

22-28
Another busy week of getting
clothing equipment distributed.
Helped Maj. Carson in Q.M. Corps.
Dished out Capt. Bowens Co.
1st Co. Mil. Pol. Capt. Roberts, &
1st Casson Co. Capt. Reed. Enjoyed
being kept busy. Inactivity
beginning to get my goat &
loafing is a hard job
In town Sat. P.M. with Maj.
Carson. Man spoke to me in
Patten whom I had not the
slightest recollection of — turned
out to be Charlie Robert. whom
I hadn't seen for 20 years.
Certainly never would have
known him, is a Capt. in 1st Co.
Sanitary. Have written to Dot
every day.
Much disappointment mongst
boys as all had impression we
were to sail 18th, but delays in
receiving equipment seem to
pile up. Each day a new lot
of dope abroad as to sailing
date but Q.M. says wait for
10 days yet. Ordnance
late, requisitions misplaced.

29" Beautiful weather for past two days & enjoyable.
Many of boys out for pleasure ride, tho I didn't care for it.
About all talk one hears now is relative to leaving time.
Have missed very few days in writing to Ditty.

30" Saw Charlie Chaplin, & had a good laugh. Another long day finally passed. This anxiety about leaving begins to pall on everyone. Had our muster to-day. Whole headquarters trains turned out in full equipment. Quite imposing sight. Impresses one much more that were in real war. Still shy of some Ordnance equipment which holds us back. Shaw, Kelly to town.

31. Personal Report in, pay-voucher goes to Bank of C'water.
Big doings in Chattanooga celebrating Halloween.

November 1917.

1-5 Duties light & time hanging heavily on hands. Col. said Friday that barring things unforseen we should start to get out Tuesday P.M.
I to go with Col. Herringshaw in 1st section. Whole outfit taking 4 secs. Looks to me as if impossible to get started Tuesday as all outfits not completed. Uncertainty keeps one unsettled, anxiety makes one restless.

6-11. Idea of leaving Tuesday a myth and even a week from then seems very improbable. Ordnance property not coming in holds us.
Col. said "The minute that Ord- gets in I'm going to wire that we are ready & we should get out in 48 hrs."
One more listless week gone.
18 - 1st Lts reported Sat. for train.

November - 1917.

12-19. Merely another week of idleness. with no definite dope as to leaving time. The more one sees of the army the less his opinion is of the administrative end. Seems a crime to subject men to such unnecessary conditions. No winter clothing yet, barracks all cold & not protected from rain adequately. Personally expect to see much Pneumonia unless conditions change. Ordnance not up yet & if our getting equip is a fair sample of supplying men then one half million will not be outfitted for many many months. One month on 18th past sailing date.

19-30. To date nothing has occurred that might any thing of importance to a diary. Ones impressions of army life & withinness for it gradually wane as he learns more of the inner workings & more so when compared to affairs in civil life. The system appears alright with slackness & its companions abound. Apparently whats everybodys business is nobodys business. We are now practically 2 mos. past sailing date due to unbusiness-like methods in furnishing supplies. Efforts to do so appear pitiful.

December.

1-8 Mighty happy to have Dutley come by on way to Fla. Arrived Friday & left following Friday night to start off for short visit with Julia. Shirley a happy affair for me, had room at Park Hotel Tyler. Brought along some B & L. which the boys enjoyed. Weather tasks quite a change Sat. growing much colder with wind & snow. Temp 26 Friday night. Much colder Sat.

December - 1917.

Rumors of leaving still afloat Col. inspired readiness & to-date all glad end of stay here is near. Men growing restless & anxious. Non yearly enup to. Keep 'em busy. Some companies quarantined, account Mumps & in dog-tents. Tho certainly is a shame to keep 'em there this kind of weather. I could blame mine for "going over the hill" under the circumstances. Rather think I might under similar circumstances. Due to the city Fri- to see Dilly off 6:5- P.M.

9-14. Has been the same old story about leaving, all arrivals and have marched hard to get ready and a week ago Last Wed. the Col. inspired readiness & to-date we have heard of no results. Seems to me discontent afloat among the men & who could blame 'em, 3 companies still under sheds & in stables & have been all during this Cold weather which got to 6°- Looks like very poor management to me & approaching the crucial stage. From the outlook apparently we will be lucky to get off before Xmas.

15-19. Nothing as a departure from the ordinary duties until Monday about 4 P.M. when order came to leave which naturally created much excitement and all seemed quite happy. Much hustling about that and next day till noon when those companies that were to go on Dec. 1 had all goods packed & ready for train. Just after lunch word sent that cars had not arrived & would not be in till Sat. so imagine the fall of hope of all.

December.

15-19. concerned, certainly quite a jolt as our leaving has already become quite a joke & none do we have any great hopes of getting away Sat & we dwaddle dubiously to see what that day will bring forth.
Dirty reached home Saturday the 15th

20-24 These days full of excitement over prospect of leaving as twas quiet out wed get away 22 so all began to pack up & get straightened out and for the first time actually began to believe we were going to get into the game, so could hear expressions of joy on every hand. Sunday night before leaving no one hardly went to bed. All packed except bedding-roll & up before daylight & eager to be off. Several changes made as to what section Med. Off. to go with.
Had slow and rather uneventful trip to Camp Merritt. N. J. getting glad hand from Red Cross ladies at Phila & a welcome from every whistle when going thru Jersey City - arrived Camp. 5 P.M. afternoon 24th. Found nice Camp - Good barracks, officers steam heated & everything very nice. Expected to be there for 4 or 5 days but delays kept us till Monday Jany 7th - meantime we went thru Xmas and New Year waiting as at Christ - but all of a sudden we were aff at 11 a.m. to take Erie R.R. Ferry Jersey City to Pier 54 Hoboken where boarded R.M.S. Aurania 13,000 Tons and were off about 6 next A.M. passing Liberty about 7.30. heading NNE. & kept at it till we dropped anchor in Halifax N.S. about 11 a.m Jany. 10th

January- 1918

Temp. dropped as low as 22° below while at Camp Merritt & ground covered with about 8" of snow while there.

All on the qui vive while entering Halifax Harbor as great explosion happened just 1 mo. ago. Signs of devastation and wreckage all about area of explosion. Belgian Relief Ship into which ran into the one carrying explosives laying on our starboard, going in & as harbor here only about ¾ mile wide we passed quite close, she lay more than ½ out of water on beach, yet apparently not so very much damaged, a 4 master. Saw other large steam vessels that are complete wrecks, whole sterns torn to scrap-iron & superstructure a mass of wreckage.

All houses along both sides of harbor wrydolesk and noticed one area of perhaps 20 acres which was once peace of 1500 homes, swept absolutely bare. Saw many houses jumbled up like a pile of kindling & one's imagination can hardly conceive of any explosive force so great as to produce such rash havoc & wreckage.

Great many ships in harbor all camouflaged, one U.S. War Vessel & many flying British flag. Too cold to be out on deck long at a time but its a bleak barren desolate looking country tho busy appearing city.

All beginning to wonder now how long we will lay here before starting across.

Began life-boat drill yesterday as all having been assigned to a boat - I to #16 with 11 Offs & 35 men. To-day got to them with life belts on in 2 min.

First mail censored, put ashore at Halifax

January - 1918.

Quite cold while laying in harbor. About 2000 troops aboard, 600 Y.M.C.A.'s & 50 casual officers, who had to stand all watches. Weighed anchor 12", nine vessels on armored Cruiser S. Dakota in the convoy. Sea moderately rough and many sea-sick. Crossed Banks of Newfoundland the 13"-14". Got sick while at Halifax. Pain hepatic region with fever, continued till reached Eng. One boat dropped out of convoy on 16" last seen of her. First officers posted as boat duty the 18" 6 to 8 a.m. in 2 hr. watches. Destroyers began showing up about 4 P.M. 21" and a most welcome sight to all, giving one an added feeling of security, sea quite rough Sighted land - North Coast of Ireland morning of 23" and as usual was a most welcome one tho we were in the most dangerous part of zone. Convoy split up, we zig-zagging thru Irish Sea headed for Liverpool. Justicia of our convoy attacked but missed - no one saw "sub" but torpedo passed within 8 ft. astern. Capt. changed our course four times in afternoon. Anchored in Mersey River, Liverpool early A.M. 24". Off boat 7 to 8 P.M. & took train for Winchester. Greatly disappointed as had hoped for day-time ride across Eng. Reached Winchester before daylight & marched to N. Area Down Rest Camp, arriving there in time for breakfast. A beautiful camp, & lovely surrounding country, rolling & farms of the cleanest cultivation. Enjoyed our stay there greatly. Camp 2.5 mi. from town which is one of oldest towns in Eng. Many interesting places to visit & sights to see. One house built by Wm. the Conqueror

Jan'y - 1918

A lovely cathedral where several of us attended services, Church of Eng: on Sunday P.M. 27th. Isaac Walton's tomb there. Saw King Arthurs Round Table, first yard stick, set of weights & other interesting & historical relics. Visited Red Cross Hospital 1000 beds. Left the camp at 9.30 A.M. 29th for Darth Stampton, reaching there before noon. Went to South-western Hotel for lunch but did not get to finish as orders came to get aboard boat sooner than expected. Crossed Channel on S.S. George arriving Le Havre France 10.30 P.M. but did not leave boat till next morning 7.30. Hiked To Rest Camp #2. In town that night. Had dinner at Cafe & went to theatre. Back to Camp at midnight & spent a miserable night, never could get warm. Saw patrol dirigibles about all day.

February

1- Orders to leave for our post came & got off 9.30 P.M. Two night & one day trip and the most miserable one I ever had. Very cold & an uncomfortable compartment which was 3rd C. One stop for coffee which certainly was welcomed. Heavy frost that night & covered everything. All next day Passed thru' Paris during the night but no stop. Second night even more miserable than first. Reached our destination early Sat. morning - Gevicourt - hiked to Doncourt 1.5 mi. where 2 Caisson Co's were billeted. Supply Train with Cal. Herring Train to Bourg & Ste Marie, & Truck Co's. to Madison-celles with Maj. Fairfax. Wagon Co. Capt. Hospital Medical supplies all rush & not able to get away.

February.
Division headquarters at Bourmont - 5 mi. Unable to get any supplies. Have been feeling quite badly, having fever & much soreness.
Billeted with Madam Sudre had lovely room, good bed &c. Still miserable - temperature all time, night sweats & considerable pain, trying to get things straightened out, did get auto but no supplies.
Went to Base Hosp. #18 at Bazoilles, Johns Hopkins Unit, the 11th to Ward G. Examination & observation till 21st when diagnosis still somewhat in doubt, exploratory laparot, advised to which I consented. Operation morning of 22nd R. Rect ~~median~~ incision, adhesions about Gall-bladder, abscess of liver discovered - R. Rect. incision closed, Rib resected & abscess opened & drained. Did fine for two weeks when had set-back, Drainage of Pus & debris then later 3rd [illegible], pure bile. Did fine till first week in March and

April. 1918.

Pneumonia base of both lung, which gradually cleared. Dr. Hailes, surgeon, Dr. Guthrie medical. Drainage tube out 20th Mch. Propped up in bed the 19th Mch. Continued to be up a bit each day. Lifted into wheel chair 3rd & improvement gradual & steady, tho have poor sleep & much pain in back especially when lying down. Left 23rd in Hospital Train for Base #9. N.Y. Hospital Unit at Chatteauroux, day & night trip. Weather warmer tho no sunshine. Large Hosp. good mess but poor service.

A tough time indeed for the past two months and a hydf.
Quite tough to go thru such a siege, tho when consented to an operation was willing for any means to be undertaken for relief. Suffered very much for the first three but able to be held up in bed the 12th p.o. day and doing fine when too much pressure used in irrigating cavity caused agonizing pain & collapse which caused a great lot of suffering and a back-set of about 3 weeks, recovering very slowly. Latter part of Mch: a double Pneumonia developed which caused much pain and suffering - terminating by lysis. Adhesions causing much discomfort & still unable to sleep more than 3 hrs. at a time. Hoping for improvement by removal to warmer climate.

MAY - 1918.

1 - Improving gradually in Base Hospital #9 a.P.O. 738, Chateauroux. Especially sleepable now to do 4 or 5 hrs. without waking. Out of hospital for first time since Feby. 31st or 6th when went into town 1.45, returning at 7.30, standing trip well & did lot of walking. The cleanest city I have seen in France. Weather fairly warm but not as much sunshine as I hoped for.
8 - 15 - Very little improvement in weather conditions. Sunshine a rarity. Sleeping somewhat better & pain in side practically gone tho muscular spasms about side wound continue to make much discomfort. In Chateauroux again 10th Letter from Ditty 11" - the first for a month, date of 3/28.
Mothers Day the 12th, wrote Mammy. Decided at time of going to hospital not to tell Ditty or folks at home of my troubles as they worried only worry &

MAY. 1918.

8-15. 'twould not do me any good. So don't intend saying about it till I get home. Am dissatisfied at Base #9 so hope to be transferred to Bordeaux

16-23" Rather an uneventful week. Quiet at hospital, one train in with 122 patients. Stafford, Barrows Ross, Bradley, Apperson, Carbin Chamberlain, Powers, left on S.L for Biarritz. Only diversion has been to sit in yard & watch aeroplains, there being several aviation fields near here. Largest at Issoudun, 18 mi. Am continuing to improve, sleeping better less muscular spasms and back ache about gone. Go to the city once. Several letters from D- last one date Apr. 13. Greatest pleasure is daily letter to D. Am about back now to normal weight but not strength which seems to come slowly. Dr. advises sick-leave but I prefer going to duty when leave there. Wound closed except small sinus.

24-30"

Uneventful week. No letters from home. Usual methods of killing time - To Movies at night, loafing about during the days. Sinus persists, probably from end of rib. All fairly quiet at hospital. All who felt like it were off for somewhere on Decoration Day. Pay Voucher in 100 to Bank of Cleardwater, Cash 75.13.

JUNE.

1-7. No events of importance. Lots of dope from front but none verified. Wound still draining but feel much better, muscular spasms and pulling sensation about gone so slept well at night. Had several attacks which tired me considerably but no ill effects. Start in Emetine again Gr. 1 per day.

JUNE - 1918.

9-15 Another uneventful week of hospital life - pain about wound gone but sinus persists requiring daily dressing. Sleeping well & feeling fine - Anxiously anxious to get back to unit & feel fit for duty of some kind. Move than ever does one see inefficiency and lack of system about here. Certainly would hate to be really sick in a hospital of this type. Majority of Drs. seem uninterested in their patients. K.O. ordered to other command & raised to Lt. Col. the general opinion of him so far from good. Saw Hispano Liberty motor air-plane humming 16th, two flew over hospital at about 7000', a delightful sounding engine. Monotony broken by one picnic in woods on Friday 14th having supper there. Into the city 15th visiting Musee places and Museum, seeing many interesting relics and original paintings, among them Henry Saddle &c, tea set - medals sword & some letters of Napoleon the dog of his stuffed & in Glass Case (Coach-dog). The original life size painting of "Murder of Abel". Egyptian relics, pieces of statuary, busts &c. All quite interesting. Queen Anne furniture

16-23 Routine life in hospital varied by occasional visit to town yet very little there of interest. Daily dressings continue. The 20th Saturday being the 15th anniversary of my wedding to the best & sweetest girl, everything even to the weather seemed to help me celebrate, a most perfect day - best meal we've had for some time & seven letters arrived from Ditty. Past 15 yrs convinces me that no one ever loved a more deserving girl.

June - 1918.

24-30" Wound apparently no nearer healed. Sinus persists requiring daily dressing. Routine life in hospital. In town Friday, supper at Tasson with Kuhn & Cadet, Robinson walked in Sunday P.M. with Slade to Faud-Comdt, 23rd Eng. had supper at T. Room, met Kuhn, called out - Spilled it's salad-dressing.

July - 1918.

1-7. As wound no better I asked for transfer to Biarritz where could receive just as good attention as at Chateauroux & under much more pleasant surroundings. As a hospital #9 is a farce, no system whatever. Orders finally fixed up so left in company with 1Lt. Slade & Capt. Shuddemagen, on July 3 for Biarritz, going via Paris, arriving there about 6 P.M. I with a good dose of Influenza, but kept going. Stopped at small hotel in old student quarter & saw as much of the interesting part of the city as was open to the public. Early next A.M. began our tour & visited many places. Luxemburg Gardens, Louvre, Kings Palace, Queens Palace. Army Museum, Opera & one ups Champs Elysee, Eifel Tower, Bridges over Seine, Place des Invalides. &c. To see a musical comedy night of 3rd The 4th was a big day. U.S. flags flying everywhere & a parade of about 5000 Amer. troops with other Allies. Magnificent spectacle. Left the night of 4th arriving Bordeaux next A.M. Where we spent 8 hrs. seeing the city.

leaving 2-15 for Biarritz, reaching there 6 P.M. finding a most beautiful place. & a nice Comfortable Red Cross Convalescent Hospital Hotel Regina - the most comfortable place I've struck in France & a city far cleaner & nicer than any I've seen. Beautiful rocky Coast-line & a most delightful summer climate, very much pleased with the place.

Base Hospital N°9. A.E.F.
Special Orders July. 2nd 1918
N° 182.
Extract

5. Under authority contained in Paragraph 2, G.O. N° 7, Headquarters S.O.S. dated March. 30. 1918, the following officers will proceed to Biarritz, France and upon arrival report to Commanding Officer American Red Cross Convalescent Hospital for treatment.
1st Lt. Lucian B. Dickerson, 2nd Divis. Am. Train
The travel directed is necessary in the military service.
By order of Major Hawley -
G. Walter Zulauf
(Official) Captain Medical Corps U.S.R.
Adjutant.

8-15. Well settled at Hotel Regina, nice room with bath & well served meals. The city one of the most beautiful summer resorts, very rocky Coast, bathing-beach municipally controlled. Hotel on edge of city overlooking it & the Atlantic, Pyrennees in the distance & Spanish border but short ride. Many beautiful hotels, Palais Calton, Grand, Victoria, Continental & one of the most up-to-date towns of its size I've seen. Weather very tender for few days but better. Discharge continues

June - 1918.

July - 1918.

16-31 Enjoying life as much as possible limbered physical conditions. Wound still discharging tho lessening, & at times quite uncomfortable. Have seen the city of Biarritz and all its attractions. Arrums to get well & go to duty. Had several letters from Dotty tho wined of course like make.
Only drew $75.13 of April pay sending $100 to bank. Drew all of May pay home. The month has been rather uninteresting are as life this far back is quite dull. Aside from enjoying the wonderful climate at B & also the scenery it has been a month of restless waiting.

August - 1918.

1-7. A trip to Bayonne, 1/2 hrs. ride on the tram to breast mountains. Many interesting places it being an old fortified city with wall & moat well preserved. Castle built 1130 still stands, also a part of old Cathedral built in 12th century.

Drew $75.13 of April pay.
Drew all of May "
Sent all of June " to bank
Allotment to begin with July pay - for six months ending June 31 - ending.

8-15. Just another week of killing time in hopes & expectations that this Xmas would heal but practically no difference as to amount of discharge tho much more comfortable as to soreness and stiffness about wound.
Spend time of morning in bed

August - 1918.

going to beach or town in P.M. or evening - a poor way to kill time. While I have enjoyed being at such a lovely place as Biarritz & the good quarters provided by the R.C. I am very restless, anxious to get well & back to work. Think I have given the sinus sufficient time to close if it is going to of its own accord, so will leave the 24th for Base Hospital #6 at Bordeaux and see if I can have something done to make it close.

Pay this month 998.24 francs. deducting W.R.I. 18.20
Mileage from Chateauroux 114. - Fr.
Two letters from Dutty on 23rd dated June. 22.23.
The most wonderful spell of weather I've ever seen.
Fighting the War ie S.O.S. is a very unsatisfactory way for me
Left Biarr. in P.M. arriving at Bordeaux in time for supper which ate in cafe short ways from station & was a very good one, then took car out to Stop. (Mass. Gen) but only ran short way to where had to change then found no cars running after 8 P.M. So had to hunt up a cab, finally found a drunken one & after a wild ride with beaucoup speeding & whipping of the poor old horse by the cabby, arrived safely & was assigned ward.
Saw Dr. next A.M. but could get no satisfactory exam. till next week No X Ray - only daily dressings - & still quite sore & unable to move about much. Moved over to officers barracks 4th day, walking to main building for chow.
It has surprised me to see my name posted to go duty so being tired of hospital outfit & desired taste

September - 1918.

I took advantage of the mistake & got my orders to report to Saint Urginan, 1st replacement depot, le ruig Bordeaux that P.M. arriving St. Urgnan before breakfast of 7th ate at Bakery Co. Mess. Reported at Adj. Of. and had orders sending me to Maron - division depot. Reaching there late P.M. Bedding - roll & trunk failed to arrive St. A - so had to leave without them. Camp at Maron in woods about 2 mi. from station. Had no cover & unable to get any that night so had rather uncomfortable night tho not so very cold. Met 2 Marine Lts. who were going up front. Gallivan & Shelton.

Remained at Maron for 3 days leaving 9th. Went to Marne via Jouarre, Paris, spending night of 7th in Paris leaving 8 A.M. on 8th

Got 3 blankets, some underwear, socks &c. at Q.M.

Left Maron after dark & traveled in trucks over the darkest road I ever saw with no lights - arriving Hdqrs. 2nd Div. about midnight. Slept on floor in office, ate breakfast with Reed. Dunn & Thy lunch, Donnelly, Clapnagh & others, Manonville.

Got orders for temporary duty with F.H.#1 on Sep. 11th. St. Mihiel drive just starting, hospital at Nouvant - Reported morning of 11th as hosp. was ready to move into Thiaucourt. Big naval gun just 1 kil. Upwind tent & with each shot the tent would quiver & shake and it sounded as if the earth would crack - Seemed rather strange that the shell couldn't be seen as could follow its whine so clearly.

Many planes over the first night & dropped 8 bombs near us trying to hit dump but did no

Left for Thiaucourt after lunch. Passing thru Limey, Regnieville & other towns in barrage area, all completely wiped out - merely a pile of stone remaining & that all broken to pieces. Road thru no mans land completely destroyed, mined, shell-fire, worse traffic congestion I ever expect to see, apparently the whole A.E.F. trying to get to the front. Shelling roads continually tho none of our units got hit. Two 4 mule teams blown up & 4 men killed about 400 yds. ahead.

Reached Thiaucourt about 4 P.M. & unloaded in Chateaux formerly Hun. Hdqrs. Fine & safe cellar which looked good. Shells falling in town continually & roads being shelled steadily. Three men killed & 7 wounded one block from hosp. gate just as we arrived. The screech of the whiz-bang is the most unnerving one I've heard yet. Saw Amer. balloon fired before supper. Slept in cellar on a stone bunk that was too short & the place full of fleas. Didn't shell so much at night. Up early & watching shells burst on road tho couldn't help but duck each time I heard one, they all sound too close for comfort. Another balloon down this a.m. Division relieved so left after lunch for Ausonville via Benney, Commes. Roads all torn to pieces & 5 tons on way out, no casualties.

17th Quiet day - camped - no planes over last night, very pleasant camp.

18th Orders came sending me to F.H. 16 at Minonville, six kms of mud near large French hospital. Still very sore & unable to move about much. Notice no change in sinus, still daily dressing.

19th Maj. LaVake in command. 6 wks. tents up - mud everywhere. Assigned to Ward # 4, 40 beds. Weather, rainy & cold on 20th orders for move came & up early on 21st - finish of outfit

off about 9 a.m. I remained behind to work after patients, & following in rear with 10 ambulances at 4 P.M. for camp at Pagny sur Meuse where we found good barracks at old French hospital. Expected to be here some time but comparative comfort was not to be ours for long, some rain but not such a muddy place. Prison camp at this place holding 1500 Huns. 22nd Col. Hanner, D.S. sent to Corps. as Consulting surg. Maj. Derby taking charge as D.S.

Evacuating from here to B.H. 45

Weather better on 23rd & rumors that Div. is to go in Verdun sector, orders came in 24th leaving by train on 26th so hiked to Sorcey where entrained, leaving 11 P.M. arriving Chalons detrained, hiked to Omey about 7 o'k reaching that place late in P.M.

Patients in quantities, 210 first 12 hrs.

Billeted in town & had good mess. worsening here till 30th when moved by trucks thru Chalons to Suippes. Where set up in side of large French hosp't. destroyed by Huns. arriving in time in night, tried to sleep in Ford but too cold so had to keep moving set up tents next to road early in A.M. & function as hosp. for Disc - Gas, & Venereal. 216 patients first 24 hrs. tho no bad gas cases.

Big air raid on Chalons, night of 7th. 1st and as we were only 3 miles from Chalons, caused here it all, sky swept with search lights, Hun planes everywhere overhead, no shells dropped near us. Three shells burst just overhead as we were preparing for lunch next day & that night continued shelling of troops about 2 K. below us caused many casualties. Wounded began to come in very freely - moved down road to next Evac. Hosp't. but about 1 mile had tents up were relieved by Evac. 3 when we moved back to Suippes

October
Passed in F.H. 16 during day and at night in F.H. 23 during surgery
Many gassed arriving but none severe, Mobile 7 came in but were a helpless outfit - F.H. from 36th Div. also here & a Gum Lot. Very busy and every thing filled with patients evacuating to Chalons.
About 155 gas patients daily.
Nights quite cold.
9", 10" 11" 12" out so more quieted down
Went into Suippes, a wrecked town
Had a joy ride leaving in R.C. jitney
six a.m. of 13th for Reims and passed thru some beautiful country till struck battle zone where all was desolation & destruction, the city of Reims about 100,000. The most desolate & deserted, such a lonesome woe-begone appearance, not a soul living in the city and not a single house untouched by Shell-fire The Cathedral all but ruined - What feelings produced by a city of such size absolutely deserted.
Spent 3 hours there then drove to Epernay where had lunch, leaving about 4 P.M. drove into Paris, butted around for a few hours when left for camp reaching there in time for breakfast via Chalons.
14" - 15" very quiet, Div. in rest area receiving about 125 patients daily.
On 23rd left on 72 hr. pass for St. Aignan to get baggage, found trunk & bedding-roll there, got what I wanted from roll & started back via Paris spending night at Tours - arriving Paris morning spent day & night there but as baggage did not show up had to leave without it.
Bought ticket to St. Menehould as heard Div. had moved there, however got off at St. Aignan Chalons & found R.C. car going to F.H. 16, which we found at Les Islettes reaching there for supper, moved noon next day 27th to Charpentry - Div. back in line.

October.

Moved in trucks to location in top of hill by road-side, in field full of shell-holes, ammunition dump at Cross-roads. Great activity about here, much shelling & aerial activity. Air-fights & two balloons brought down in flames, plane fell about 200 yds. from position, both pilot & observer buried where they fell.

178 bombing planes over at one time a great sight & must have put the fear of God into the hearts of the Huns.

29th Pte. Reese killed by H.E. was writing to wife when shell landed near dug-out. Planes over every night & many bombs dropped, saw several land tho heard of no particular damage. Valley being shelled constantly & many casualties, Aerial activity continues, counted 10 balloons up - saw 2 brought down by one flyer - observers down in parachutes. Many air-fights & Hun planes over every day, anti-aircraft blaze away at 'em but evidently do no damage. tho shooting at 'em looks to be good sport.

Gassed began - a terrific 31" heavy barrage starting just after midnight. Here the 2" had center of push & were expected to take Landry St. George which the 4.2" had tried 3 times to take & failed - considered the strongest part of the line but 2" gained 1½ K. 1" day, Rt & Lt. could not keep up. 4" Quiet day at F.H.16, no shelling or planes out last night. Bad reports from 80th Div. Austria capitulates. 5" Rather quiet tho heavy firing all night.

Left Charpentry 6th for Bauluy - Flesselles Commerence, Landry St George - Heart of Armes. Barrage created havoc with Hun trenches, dug outs &c. Thru Remonville, Bayonville where spent night, to Buzancy in A.M. to Quart then back to Buzancy - to Commanche where set up tent in sea of mud. on P.M. of 8th

October.

Patients piled in thick + fast. 185 before 9 P.M. and more than 500 in next day. Continued shelling of Beaumont - church steeple being great target for Hun artillery. By the 10th had 876 patients, 14 ward tents up + using all available houses in town.

11th The great and happy day. Haven't heard a shot since last night. Every body happy over the Armistice.

Hiked to Beaumont using church and all available buildings. More patients than can care for - Much better quarters. Town not so badly shot up.

12-13-14-15-16th Routine work - cleaning out patients and all who think can't stand march into Germany to start 17th, occupy Coblenz area.

Have seen great many prisoners coming thru, especially at St. Michiel Suippes and Charpentry. German dead along road on all this part of front. Saw more than at Thiaucourt or Suippes.

Left Beaumont on 17th first hike 3K beyond Stenay where pitched tent in field. Very cold night. Stenay shot to pieces and not a bridge left - 3 in the town blown up and valley flooded.

Evidence of hasty retreat of Huns everywhere.

18th Left 11 A.M. hiking thru Boual- just beyond which saw last shell- hole, + where battle-line was when Armistice was signed.

On to Chauteny - meeting many refugees and returning Eng. prisoners, expected to billet here but ordered on to Verneuil le Grand via Montmedy. Outfit quartered in large house used by Huns.

Quantities of Ger. material at Montmedy "Verboten" signs all about. In house with old priest whom Gers. had held prisoner in one room for 4 yrs.

November.

20th left V. le G- crossing Belgian border at 1.20 P.M. and just across saw our first chickens, country noticeably cleaner and free from wars ravages. Ecouvier, Virton E.the. 18 K. hike. Spent night in chateau Leclaireau, Count De Briey Gov. of Province- arriving after dark. Well treated and great bed, beautiful place.

21" left 1.30 P.M. for Arlon- On previous day saw many houses that had been fired by Huns and heard horrible tales of their military rule.

Reached Arlon about 5 P.M. a place whose inhabitants had suffered cruelly at hands of Huns- more than 400 civilians of this neighborhood had been shot, many taken for factory work. Weather cold but clear.

Out of Arlon 22" where we had been royally received and treated on hike to Hobscheid - Lux. Beautiful winding road along base of hills - fairly good hills here.

Off 2 P.M. 23" for Kruchten, following valley- a most beautiful trip. Everything has typical Ger. appearance Good quarters and fair mess.

25" rain- 1" since 19th, days very short about dark at 3.30

Remained here till Dec. 1", leaving at 1.30 P.M. -or Ferstweiler across Ger. border going over bridge at Wollendorf at 8.05 P.M. lovely road thru beautiful narrow valley.

Spent one night here up at 5 A.M. walked 3K down hill to where outfit was camped, leaving for Oberweis, trip to this point by far most beautiful yet.

Established hosp. in school-house and had good quarters.

Here from 3-5" finished evacuating patients at noon, leaving for Gerolstein via Bitburg and Prum arriving 2 P.M. Barracked in Schloss Brunen Bottling works.

6" December.

Heavy fog, cold day. Great roads in perfect condition - grades excellent. 1st Left noon - Maj. LaVake relieved Saylor, C. O. for Adenau, one truck broke down - thru Kelberg - into Adenau 6 P.M. Bridal Chamber in hotel Eifeler Hof. Best billet yet and good mess. Hosp. in school-house. Evac. patients to Prum and to F. H. 15 Clear of " 10th leaving 11" at 2 P.M., for Rech. passing thru grape-growing section which was most picturesque truly a work of patience as vineyards are on steep mountain sides. First used for vineyards 400 yrs. ago. Arrived Rech 3 P.M. where stayed till 13" leaving - for Neumahr thru Abrweiler Found here the best yet - grand hotel Kurhaus about 300 rooms - a great Spa. Sulfur baths &c. Hospt. in hotel Good room and excellent mess prepared by Ger. Chef.

Had been sick for wk. with old trouble which had not been giving any trouble as Sinus closed last of Nov. no dressing since Thanksgiving, having temp. and pain - loosing weight. began taking Emetin 2/3 gr. daily, hypo. Three hundred patients from F. H. 15 In bed while here feeling rotten, Cleared out patients on 18" leaving next day for Trich.

Hotel averaged 2400 guests daily during season. A very clean and pretty city. Left 20" traveling over a fine road thru narrow but picturesque valley. Mountain sides covered with terraced vineyards - in sight of the Rhine at 9 A.M. road following its banks Thru the valley which widened as go up river -

Passed thru many prosperous looking towns - by Apollinaris Bottling works &c. reaching bridge between Enders and Neuwied, going to former place which is seat of Ger. War College.

December.
The large and magnificent bridge built by war prisoners.
Had nice room and mess at Ehrlich but bed too short - still running temp. and feeling rotten - tho Emetin seems to be doing good.
On 26th left Ehrlich doing to Engers and occupying one bldg. of college to operate hosp't. for Skin and Contagious cases opening on 27th. Feeling some better - temp. falling. Good billet in annex. Warm & comfortable room.
Can care for 200 patients - operated till Jan. 6 when took over F.H. 1 which was doing triage-work -
Keeping now all Pneumonias
Mail beginning to come regular.
Beginning to feel better - no more temp or night sweats, yet not sleeping well.

January. 1919.
Took over F.H. 1 on 6th doing triage and taking care of other cases.
LtCol. Derby left 4th accpt. Roosevelt's death.
Averaged death daily from auto and truck accidents - 5 citizens killed, one jeweler who'd just returned from 4 yrs. service and opened his shop "Traumatic Rupture of lung".
Averaging 80 patients daily.
Weather has been fine - fairly cold but clear and dry.
Usual hospital duties during the month.

February -
Month started with much more sickness - 190 patients on 5th
9th Memorial Services for Teddy.
River full of ice.
14th First crop of "cuts" from 9th and 23rd Inf. passed thru.
Wine-supper by Brandenburger - leaving for states on 15th
Averag no. patients still high - for the month 180 daily.
Feeling fine lately, gaining weight and sleeping better.

February-
Much light rain recently and front yard is a mud-puddle.
Have had hard work whole of this month, great lot of paper-work.

March.

Fridge work not so heavy averaging about 75 daily - 140-160 patients in hospital - several deaths from Pneumonia
Col. Brown reported as D.S. The best one we have had.
Varied hospital life and broke monotony by occasional trips to Coblence or Neuwied.

April.

Weather good tho occasionnal misty days.
Bought Kodak 10" - 309 M.
Tow bridge to M.G. Bn.
Capt. Hussey - Holyoke, Mass. "Eyeman" reported but could get no equipment.
Recd letter on 7th dated Apr. 7, 1918.
and one dated Aug. 5-1918.
Work gradually grew less during month.
Orders 8" F.H. 16 to be relieved by F.H. #1, 16th to go to Sayn.
Left Engers, Eger. for Rengsdorf when 2nd Div. took over area occupied by 32nd Div. occupying a delightfull location in this beautiful summer resort and officers have best billets yet in Haus Preyer Pension - a high-class boarding-house owned by Preyer sisters - two elegant ladies.
Operated here till

May - 1919.

8" being sent in reserve at Sayn.
Catching up on paper-work principal duty.
Appointed Summary Court
2nd Sanitary Train.
Left on Special Duty with F.H. Co. 1 - Maj. Taggart till 24th

May- 1919.
A most pleasing location, on a hill overlooking immense stretch of valley, but no streetcar or railway connections hence felt rather isolated.
Left Rengsdorf 24th V.O. Co. 1. Inf. Bde. Sent first night in Sayn at Hotel. Krupp.
Moved next day to private house- nice clean room and good bed.
Hosp. Co. quartered about Krupp plant. Office in home of Supt. Karthäuser.
Good messing-room.
Krupp Works here does casting of large stuff principally, many big guns cast during war.
The first smelter in Ger. built 1750- still in use.
Town in very narrow valley- sides almost precipitous.

June-

A spell of drizzly rainy days. Quite cool, greatcoat felt good.
Birthday Cake and much decorated table on 5th also Herbert Saylors at Sayn-
Ball-games frequent, good ones. 2nd having good team.
Much restlessness evident amongst men. Peace Conference actions causes much dissatisfaction.
Interest in company gone.
Co. billeted in Krupp Works- office in house of Director, Herr Karthäuser. Officers mess in dining room and food.
Got four lace collars for Dolly.
7th M. Very pretty.
Have good billet, nice clean room comfortable bed. Weather delightful after 1st week.
19th Leaving S- at 2 P.M. for outpost- A & O moving up- preparatory to going "On to Berlin."
Camp in woods near Dierdorf- Very bad place account of dirt-road

June -

Entire San. Tr. here, much mix-up. First time in tent since Stenay in Dec. on hike to Ger.
Orders to move to Gr. Maischeid on 21" where found better camping place and some few decent billets, arriving in time to get supper - billeted at #47. Straw mattress but nice, clean room etc, far preferable to cot in tent.
Rec'd my order for trip over S.O.S. and expected nice time but was cancelled same day.
Changed billet to 106 better bed.
Weather cold and rainy.
Orders on Sunday 29" to move back to Sayn. as Ger. signs terms 3 P.M. 28"; so started on our first retreat - first leg on going home and everyone happy. Left Gr. M — 7.45 a.m. reaching Sayn 9.45. Took old quarters for company. I took billet in № 223 - Frau Eichoff aunt of Krupp - nice, big room good bed, bath & toilet.
Rainy weather continues.
On S.O.S. #115 at noon 29"

July.

Back to Co. noon 3" and to ball-game in P.M. 2" vs Nantes. lost.
Big preparations for celebration of 4".
1 Ball-game - double-header, vs Nantes - 2" winning both. Fire-works at night. Salute of 48 guns at Ehrenbreitstein, prize-fights etc.
Big blowout at Schloss in Sayn.
In bed at 1.30. much celebration in Ct of O.
To Coblenz P.M. of 6" with Chap. Bought microscope etc. 800 m @ 16.25
Supper there.
Ball game vs Tours Sunday. Rain.
Orders transferring Divis. to S.O.S. on Sat. P.M. July - 6"
All property to be turned in by 6 P.M. July 9.

July 1919.

Going home does indeed seem a reality at last, Hear 1st train to leave on 16th, bring 2 that day then 4 daily afterwards till completion, all of which sounds good.

Much rejoicing naturally - all anxious to be on the way - Mail evidently being held up as none received for past week. Impressions of Army have not improved on closer acquaintance - Reg. being about the poorest conducted institution I can think of both as to methods of administration & and control.

9th Turned in salvage yesterday. Busy with paper work, inspections etc. Hear today that San. Train is to entrain on 16th, a 3 day trip to Brest & probably there for 48 hrs. before embarking, which sure sounds good. Continued rainy weather

13th Entraining orders rec'd today San. Tr. to leave from Angers on Thursday 17 at 5 P.M. 1st Amb. Co left behind - One Co. 23rd Inft. on same train.

BENEDICT'S REAGENT FOR SUGAR

Endorsed by and used at

The Sheffield Scientific School

Yale University

Advantages: More sensitive than Fehling's Solution. Is not affected by urates or creatinins; does not deteriorate on standing; only one solution to handle.

℞ Copper Sulph. Pure Cryst.	8.65	grams
Sodium Citrate	86.5	grams
Sodium Carb. Anhydrous	50.0	grams
Dist. Water	q. s. to 500.cc.	grams

Dissolve Sodium Salts in 300 cc. aq. by aid of heat, filter, ad q. s. aq. 425 cc. Dissolve copper in 50 cc. aq. filter ad q. s. aq. to 75 cc. Mix by pouring Copper Sol. into Sod. Sol., stirring constantly.

Technique: To 5 cc. of Reagent add 8 drops suspected urine; boil 2 minutes and allow to cool spontaneously.

Precipitate (if dextrose present) either red, yellow or green, according to amount present. 0.5% or above, red; less than 0.5%, yellow or green; the latter color indicating a mere trace.

This is the formula originated by

Lactic Acid

1/2 gtt aq. + gtt ij Carbol. Ac. 1% sol. + gtt j Tr. Ferri chlor. gives Violet color.

Thru filter gast. contents add some to test-tube gives Yellow color if Lact. ac. present.

Chancre & Chancroid

Calomel
Zinc Sul. aa 10.
Chlonne aq

Blood in Urine

Acidify Ur.
5% Guiac Gum in Alcohol.
Old Turpentine, few gtts, added gives blue ring at point of contact.

Bile.

Urine overlaid c 10% Tr. Iodine gives green ring on contact.

Sugar – Quantitative

25 CC. Benedicts Quan. Sol.
Volumet + Sodii Bicarb 5.
Heat, use hot to titrate –
50 mg. Sugar reduces 25 cc of sol.
Urine titrated from Burette, reading of amount of Ur. used to produce fenture loss of color.
.05 x dilution x 100

Gastric Contents.

Lactic Acid – Two test tubes one c aq. dest. 3/4 gts 10% Ferric chlor. 1 to slight yellow, empty 1/2 into other tt, as control of color, add gast. contents 9 tt by gtt Canary Yellow is pos.

Presence of Lact. Ac. generally means Cancer – Best Lab. test.

High Acidity means less mucous, vice versa

Esbachs Tube for Quantitative albumen.

CHO changes thru digestion to Glucose & Dextrose
Enters blood as Sugar 1/10 of 1%
Split into CO_2 & H_2O, & excess stored up as fat.

Proteins split up into Amino-acids: Creatin, Creatinin, and eliminated as Urea, Uric Ac. & Nitrogen

Urine: Centrifuge 5 min @ 2000
X Am. Uncovered ē low power
" Cover-glass ē high " "
Epithel & Pus cells (w.B.C.)
R.B.C, Casts, Miscel.

No way to tell which part of Urinary Tract Epithel cells come from, as are alike from all parts, but smaller cells are from deeper layers.

All casts are from Kid. Tubules

1. Hyaline, Granular, Waxy
(Non-cellular)
2. R. B. Cast- Pus Csts, Epithel.
(Cellular)

Epithel casts mean distruc. of lining of Tubes

Indican.

Diacetic Acid

Urine plus 10% Ferric Chlor. gives Cherry red which disappears on heating.

Acetone,

Acidify Urine ē Acetic Ac. add few Crystals Sodii Nitro-Prusside, heat to 60.

from Bladder is Papilloma
Brown-Burger Cystoscope
Terminal Dysuria practically diagnostic of Cystitis or sometimes Urgonitis
Never Cystoscope acute Cystitis
Rest in bed-sitz bath
Alkaline Urines, then if don't clear up use instillation.
4.0 of 20-25% Argyrol
Suppos. Opii gr. 55
Ft. Bellad gr. 1/4
Ichthyol gr. 1/5
Cocoa Butt - q.s. One q.4.h.
Sodii Bicarb 4.0 t.i.d.
In Coffee, Tea or Fruit

296 diff Kinds Bacteria found in human mouth
Only 6 found in fecal discharges.

about 3' day. Peristalsis controled
c opii

Nephrectomy

Should always cauterize
ureter ureal so as to destroy
mucus lining as mucus to
mucus are never heal

Exposure – delivery of up. pole
first.
When unable to deliver Kid-
may leave forceps on vessels

Complete rupture of Spinal
Cord means complete Sp aral.
at once.
Paralysis coming gradually
after injury to spine is best
indication for Laminectomy
Cord ends 2" Lumb. Vert.

Hematuria

1. Renal
2. Ureteral
3. Vesical
4. Prostatic Vesicles
5. Urethral

From drugs:
Tumor of K. B. of Kidney
Stone in K rarely cause of hem.
tho when moving down Ureter
may cause hem.

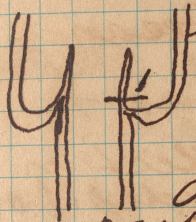
Most frequent cause is Hydro-
nephrosis & T. B. where hem.
is usually sudden & fairly
profuse

Polycystic Kid also cause of hem.
these are congenital & generally
bilateral.
Hemorrhag. Pyelitis
Papilloma pelvis of kid may
give hemm.

Most frequent cause hemm.

Intussception

Operation not indicated until evidence of Obstruction



Peritoneum
Gut may slough at 1, when have natural cure.

Cut into bowel at 2, amputate intussepted at 1 part & close 2. with over & over & Lembert.

Obstruction & Ileus.

Pick up first loop of bowel come to & with purse string suture use Pauls Tube or heavy tubing, milking gut on tube 1/4 to relieve gas &c.

When find Gangrenous gut in Hernia generally have Ileus so safer to do Laterostomy so as to drain source of infection Excise gangrenous portion & suture ends to Parietal Peritoneum & over & over suture — put tube drain in each end of gut coming out thru ring

In Obstruction where pt. in extremis open up first loop of gut, push tube in each end & suture to parietal peritoneum which acts as drainage — obstruction to be relieved later if this helps out pat.

Colostomy.

Mc Burney incision on left side — loop pulled up thru incis. — Parietal & Visc. Peritoneum sutured — Tube under loop tube peritoneum united & gut ready to open This for temporary or permanent where drainage desired. Gut opened & cautery or Knife

Heart-block due to some pathology in Bundle of His which interferes with path of contractile stimulation to Ventricles

Eggleston's Digitalis Dosage.

1 CC. for aa 7 lb c. ℔.

6 P.M. 10 cc
12 M. 5 "
6 A.M. 2.5 "
12 N. 2.5 "

Let toxic effect in one pt. in every 7.

Fl. Dig. aa XV q. 4. h. first day
" " " XV " " " 2" & 3" "
" " " t.i.d. " 4 & 5 days

Magnesii Oxide four times neutralizing effect of Soda Bicarb & is laxative

Position of Ut. has nothing to do with pains of Dysmen. 40% women carry Ut. in retro-positions, so is of no import unless tied down by adhesions.

Inflamed & irritated Ovary may give pain as far down as Knee due to irritation or pressure on Obturator nerve, as it only goes that far — differentiate from Sciatica.

4. May or may not ligate Sac.
5. Mattress sutures - pleynes of Fascia overlapping.

Not necessary to ligate Sac - pay no attention to Peritoneum.

Inguinal Hernia

1. Cut down to Sac.
2. Open Sac. before relieving constric. Cut up & out at int. ring.
3. Dissect up Sac & tie off as high as possible

Cov. Sac.[1] Infundib[2] Cremasteric[3] Intercolum

Indirect thru Ing. Canal.
Direct thru Hasselbachs Traing. (Internal to deep Epigast. Art.)

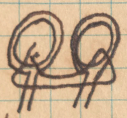
10% Iodoform in Ether for Chronic Sinus Tract. Mackechnie

Use some system in exam. for intest. Obstruction.
1st Lift up Trans. Col. &c. following up.
For Volvulus, relieve twist then shorten Mesentery.
Search for Obstruction from known points

ty
essary.

" Lessened Urine toxicity means increased blood toxicity — which means increased blood pressure due to irritation of arterioles, thus impeding circulation which brings on cortical irritation, which means Eclampsia" Stopping on such a theory the proper treatment of Eclampsia is if B.P. is over 140 use Vaso-motor dilators

Examine Urine — if Urea below 2% increase elimination



Angle suture first =

No indication for open Operation in fract. Patella if pat. able to flex & xtnd leg which shows that Quadricep. xtn. is intact.

If unable to xtend then open oper. must be done: Capsular & Lat. lig. cut strate across — Lat. lig. sutured first thus opposing bony fragments — then sut. across top — then purse-string — skin closed

Gastro-enterostomy

1. Deliver Gr. Omen. & Trans. Col.
2. Open Trans. Meso-col. into les. Sac. Cav.
3. Deliver post. surf. Stomach
4. Place clamps on Stom.
5. Deliv. first loop of Jejunum
6. Place clamps on Jej.
7. Stay Syt. at proximal angle
8. Start Lemb. sut. at opposite angle & sut. to stay sut & tie, leave need. on.
9. Open
10. Start over & over sut. to opp. angle & out at angle then Comell sut.
11. Pick up other needle & complete Lembert.

Re-inforce angles

Umbil. Hernia.

1. Transverse incis. below & above Umbil down to fascia
2. Expose ring & free
3. Open Sac & Reduce Cont.

1

If Acute Ot. Med. does not heal in 3 wks - oper. is strongly advisable. Tho no danger in waiting till more definite indications come on.

In nearly every chronic ear dischrg - Mastoid Oper. is only way to clear it

Evidence of bone-dust or ~~spic~~ culae in disc. is positive indication for Op. Try Staphloc Anat. Vaccines in ear discharges

ty
essary.

Varicose Ulcers.

℞. Glycerine ℥XXVIII Mix Glyc & Aq.
Aq. Pur ℥ XL ℥3 inc Ox.
Zinc Ox. ℔ ¼ Boil slowly, add
Gelatin ℔ ¼ Gel. & constant stir.
Warm again when ready to use
+ soak bandage. Fresh band. wkly.

Specific Vaginitis very rare

Since Gonococcus only attacks where glands none in Vagina also due to character of epithel + gg. membrane. Have only Bartholin glands which are not in Vagina.
First part of tract attacked is Cervix because has glands.

Tetanus Bacil normally in 95% intest of horses & cattle + in intest tract of 5% mankind
