The Scientific Courses of the Institution commence on the last Monday of October, and with the exception of the Law Course, terminate on the 4th of July of every year.

Besides the Studies required for graduation, the Moral Department embraces the subjects of Criticism in reference to the Fine Arts, and the Philosophy of the Passions,—and the Political Department the subject of History. Each of these Departments has both a Junior and a Senior Class, making, with the Physical and Mathematical Courses, *four Junior and four Senior Classes.*

In general the Student is deemed capable of attending, and is required by Statute to attend, all the classes necessary for a Degree, unless the Faculty should see cause to allow him to attend fewer. With their consent he may attend the four Junior Classes in the first, and the four Senior Classes in the second year. If this be deemed inadvisable, he has it in his power to graduate in two years by omitting the classes not required for graduation, or he may embrace the eight courses above mentioned, together with studies in the Department of Ancient or Modern Languages by continuing at College for three years.

The necessary expenses of a regular Junior Student for the whole Course are as follows:

Board and Lodging	\$ 100 00
Washing, Fuel, Candles, &c.	20 00

Matriculation Fee, which entitles the Student to the use of the General Library	5 00

The expenses of a regular Senior Student are *ten dollars* less than the above amount—inasmuch as he is required to enter only *three* classes.

The *Law Course* commences at the opening of the College, and terminates on the Saturday before the last Monday in April.

The subjects upon which Lectures are delivered in this Department, are Law and Police, the Constitution of the United States, and that of Virginia.

The Grammar School opens on the first of October, and closes on the first of August.

The subjects taught in this Department, are the French, Spanish, and Italian Languages, with Historical and Philosophical Observations. The Elements of Philology applied to these Languages are likewise taught.

The studies in all the Scientific Departments are conducted by means of Lectures and Recitations, from appropriate Text Books, The Students are examined minutely at each Lecture, when additional explanations and illustrations are furnished by the Professor.

Students and Scholars are also questioned circumstantially on the details of their studies, in the presence of the Faculty, at frequent periods in the Course, and at the Public Examination.

President and Professor.
