

Sir

Washington July 14. 1902

I am to thank you for the specimens of waterproof cotton and cloth which you were so good as to send me. The former was sent me. I had before reviewed as much of the cloth as made me a great coat, which I have so fully tried as to be satisfied it is waterproof except at the seams. I shall be glad when such supplies come over as will enable me to get our common articles of these & should suppose they would sell very readily. The silk must be valuable for summer great coats, perhaps the best thing I have seen for the purpose. I have also received some of the water proof paper & recommended to the Secretary it was to import a quantity for cartridges. Accept my respects & best wishes.

I am to thank you for the specimens of waterproof cotton and
 cloth which you were so good as to send me. The former is not so
 good as I had before received as much of the cloth as made me a great deal
 of trouble. I have to tell you that it is water proof except at
 the seams. I shall be glad to hear from you when you have
 had your specimens of these materials prepared. They would sell
 very readily. It will not be necessary for summer dress. For
 coats the material is not so good. I have also received some of the water
 proof paper & recommend it to be sent to you. I report a
 quantity for your consideration. I am very respectfully,
 your obedient servant,
 Wm. H. W. W.
