

its meeting with encouragement, when com is Dull;
from actual experience, I find that with this plough
a boy shou can plow 10 Acres of ground in the day
of 8 feet rows; It is unless for me to explain to ~~the~~
the principle, ^{to our} who is so well acquainted with ~~the~~ me-
chanical principles, ^{generally} suffice to say, it is the greatest
saving labour Machine in husbandry that I have seen
It not only lay off & Dig the row, but covers it up
at the same time, leaving every fall at equal distance
from each other.

You will please try it (should the
in the practice of Dulling) & upon mek tryal find
it of sufficient importance to adopt it, then will
know doubtless keep it, I remit me 18 Dollars the price
through P. Gibson; if there is not in want of such
a Machine, then will return it free of any cost, then
the same channel, that she receives it.

It will render me a singular favor
(should it not be too much trouble) to give me they
Dollars on the property of obtaining a patent as I
have it in contemplation; Its ~~simplicity~~ simplicity
may induce most farmers to use it in preference to
any other, if I met with sufficient encouragement
I intend having the axle & roller (in which the
cups are that drop the stone) made of Cast Iron
which will make the ploughs of more durability &
less subject to get out of order, I have ploughs for following
that I should like to send thee on tryal, should thee
feel disposed to add to they, without already large
reply.

With great respect I am thy
aff friend
