GENERAL INFORMATION

The College of William and Mary received its charter in 1693 from William and Mary, Sovereigns of England. Its colors, of which it is particularly proud, were also derived from these sovereigns who granted its charter, orange for William of Orange, and white for Mary of York. William and Mary is the only American college to be granted a coat of arms from the Herald's College of England.

The College Bell—The college bell sounds a warning five minutes before the meeting of each class. The bell is rung also for all student meetings and chapel services. It is important that each student should find out why the bell is being rung, and if there is a meeting at which he should be present, he should go at once. There is little excuse for lateness.

Meal Hours

Breakfast	7:55 A. M.
Lunch	1:15 P. M.
Dinner	6:30 P. M.

Library Hours—The library will be open daily from 9:00 A. M. to 10:00 P. M., except on Sunday. The library hours on Sunday will be from 2:00 P. M. to 6:00 P. M.

Bulletin Boards—A bulletin board will be found at the entrance of the Main Building, another inside at the rear entrance, and special bulletin boards will be found in the halls of the women's dormitories. The board inside the Main Building is reserved for use by the faculty. Other bulletin boards are free for student use.

Text Books—Text books may be secured at the College Shop, located on Duke of Gloucester Street, to the left at the entrance of the college campus.

Laundry—The college laundry is done by the Williamsburg Steam Laundry. The laundry will be taken from the rear of the Deanery every Monday morning and can be secured from the same place by the following Thursday or Friday.

Infirmary—Medical attention and drugs may be secured free during the consultation hours. In cases of emergency, the college nurse, Miss Ross, may be found in Jefferson Hall. Dr. King will be at the infirmaries during the morning consultation hours. Excuses from classes on account of sickness may be secured only during consultation hours.

Men's Infirmary

Consultation Hours:

9:00 A. M. to 9:45 A. M.
2:00 P. M. to 2:30 P. M.
7:00 P. M. to 7:30 P. M.

Women's Infirmary

Consultation Hours:

9:45 A. M. to 10:30 A. M.
2:00 P. M. to 3:00 P. M.
7:30 P. M. to 8:00 P. M.

CAMPUS AND BUILDINGS

Main Building—The large ivy-covered building in the center of the campus is the Main Building and lecture hall of the college. The original building was erected in 1694, having been designed by Sir Christopher Wren, the great English architect who designed St. Paul's Cathedral in London. This building has been burned three times, but rebuilt each time on the same spot, for the most part on the same foundation and walls.

Brafferton—The second oldest building at the college is the Brafferton, located on the front campus to the left of the Main Building. It was built in 1723 and was used as the first Indian school in America. The Brafferton was a gift from the estate of the famous English chemist, Honorable Robert Boyle, and was named after his estate in Yorkshire, England. The building now contains the offices of the dean, the registrar, the secretary of the alumni, the college President, and the treasurer.

President's House—Across the campus and facing the Brafferton, is the house in which the presidents of the college have lived since 1732. This house was used by Lord Cornwallis as his headquarters before his surrender at Yorktown in 1781, after which the house was occupied by French soldiers. While thus occupied the house was accidentally burned, but was restored from the personal funds of King Louis XVI.

Lord Botetourt—In the center of the front campus stands the statue of Norbone Berkley, Baron de Botetourt, who was one of the most beloved of the royal governors of Virginia. This is the first statue in America to be erected by an act of a General Assembly.

Spotswood Cannon—Near the statue of Lord Botetourt stands an old cannon which was used at Fort Christina, Brunswick County. This fort was established by governor Spotswood in 1712 for the defense of the frontier against Indian attacks.

Science Hall—To the right of the Main Building is the Science Hall in which are located the physics, home economics and philosophy and psychology departments. The biological laboratories and lecture rooms are located in the Penniman Building.

Chemistry Building—Situated to the rear of the Main Building is a temporary, tin structure known as the Chemistry Building. All chemical laboratories and lecture rooms are located in this building.

The Phi Beta Kappa Memorial Building (Under Construction)

To the rear of the old Main Building, under construction, is the Phi Beta Kappa Memorial, commemorating the founding of the organization at William and Mary in 1776. This building when completed will furnish the college with a handsome auditorium. The memorial is the gift of the national organization.

Monroe Hall—Fronting on the Richmond road and back of the library is the handsome new dormitory for men which has just been completed. It is a modern fire proof structure built along plans of Jefferson Hall. It contains memorials to many distinguished alumni and has accommodations for 168 men.

Practice House—To the rear of the President's house on the Richmond road is an attractive residence which is used for a practice house in Home Economics.

Ewell Dormitory—Across the Jamestown road from the Brafferton Building is the Ewell Dormitory and Abbex for men.

Next Door to Cafe

Taliaferro Dormitory—To the right of Ewell is Taliaferro, also used as a men's dormitory. Taliaferro was built with funds appropriated by Congress in payment of damages done the college by Federal soldiers in the War Between the States.

Infirmary—To the right of the Taliaferro, is a two-story frame building which is the men's infirmary and dispensary for medicines. The women's infirmary is located in room seven, first floor, of Jefferson Hall.

Power Plant—To the rear of the infirmary is the power plant which supplies heat, light and water to all the college buildings. Electric light bulbs may be secured there.

Library—To the rear of the Science Hall is the library, which contains many treasures of colonial history. The splendidly equipped building was made possible by the generosity of Andrew Carnegie and other friends of the college. The building has been recently enlarged by funds from the Carnegie Foundation.

Citizenship Building—The old gymnasium to the left of the Main Building has been converted into class rooms. In this building are housed the Marshall-Wythe School of Government and Citizenship, the School of Law, the School of Economics and Business Administration, and the Department of Journalism. The "Flat Hat" and "Colonial Echo" offices are also in this building.

Jefferson Hall—Fronting on Jamestown Road and back of the old gymnasium is situated the handsome new dormitory for women. In this building is located the offices of the Social Director of Women, the women's swimming pool and gymnasium, social rooms, and rooms for 150 women.

George Preston Blow Memorial Gymnasium.

Fronting on Richmond Road immediately adjacent to Monroe Hall is the handsome new gymnasium, a gift of Mrs. George Preston Blow, of Yorktown, Virginia. The building is of the latest model and is modern in its equipment.

Dining Hall—The Main Dining Hall of the college is situated to the rear of the Taliaferro and Ewell Dormitories. Another dining hall is on the second floor of the Penniman Building, directly behind the Main Dining Hall.

Penniman Building—To the rear of the dining hall is a temporary building used as a men's dormitory. In this building are also situated a dining hall, and the biological department.

Deanery—On the left side of the dining hall is the house formerly occupied by the Dean, now used as a women's dormitory.

Tyler Hall—On the corner of the left front campus is the women's dormitory known as Tyler Hall.

Tyler Annex—To the rear of Tyler Hall and on the left of the Deanery is a temporary dormitory for women known as Tyler Annex.

Located on Boundary Street, not far from the campus, are two temporary dormitories for men. The Institute is another men's dormitory located about four blocks from the campus on Scotland Street.

Plans for several new buildings on the campus are under consideration, namely, a Science Hall, the Phi Beta Kappa Building, a new dormitory and dining hall for girls.

Cornwallis Cannons—The two cannons appearing on either side of the entrance to Main Building, were taken from Yorktown at the time of Cornwallis' surrender. By a special act of Congress, William and Mary has been made their custodians.

It is a William and Mary custom that when passing a man or woman on the street you greet them whether you know them or not. The phrase "Ladies" or "Gentlemen," and a smile with it go a long way to increasing the spirit of co-operation among the students. Above all don't be snobbish, nothing makes against a man any more than snobbishness. "Smile and the world smiles with you, frown and you frown alone."

THE HONOR SYSTEM AT THE COLLEGE OF WILLIAM AND MARY

Among her many priorities, William and Mary justly claims that of leading the way in formulation and the adoption of the Honor System. Early in when no other idea of college days when no other idea of college government prevailed throughout America than that the student should be watched like a suspected criminal for offenses, either actual or potential, the faculty of William and Mary appointed a committee, whose head was the distinguished jurist, Beverly Tucker, to draw up a statement of the spirit and content of an honor system by which the conduct of the students of the old college was to be guided. At once put into operation, this system has continued in actual and successful working without interruption until the present day.

But glorious and inspiring as is the historical origin of the Honor System, it is with its operation now and in the future that the men and women of the new day at the old college are primarily concerned. In the first place, it is of vital importance that every new student enrolling, should clearly understand what the Honor System really is and what it means in his life and in the corporate life of the College. Ignorance of it may bring the possibility—even the probability—of breaking it, and at once there follows a well nigh irreparable injury to the character, the reputation, and the future of the individual student and an equally grave lowering of the morale of the student body, for this must always suffer by the disgrace of any of its members. It is in this spirit that the present serious attempt is made to set forth, especially for the benefit of the new students, just what the Honor System is and what is required of each in order to translate it into his life.

The Honor System may be defined in a word as individual responsibility. It brings home to the individual man or woman who would stay at the noble old college and get the advantages she offers, his personal responsibility for her fair name and honor. It emphasizes two things; first, that the student must recognize that he is answerable in the very fullest degree for every one of his actions and dealings with the members of the faculty and with his fellows, in his or their rooms, in the dining halls, the athletic fields, the social centers, and in the class rooms, and second, that he must recognize his personal responsibility for the well-being of the college in every phase of life in which he touches her existence.

Such phases, in the large, will at once suggest themselves to every one. They include, primarily, everything which touches the securing of aid, assistance, or profit in scholastic work of whatsoever kind, whether in term class work, periodical tests, or in the work handed in to the instructor, though it is to be regretted that in the formal examinations, as well as in all latter respect, students otherwise most sensitive to the Honor System do not seem to feel its demands so keenly as in regard to

the others. A slight reflection, however, will convince one that work of this kind should also be included in the scope of the Honor System. It is a source of pride to all lovers of the college that public opinion of the students is now, and has always been, most healthy, vigorous, and uncompromising in its condemnation of all infractions of the Honor System falling under the heads just enumerated.

As to all offenses touching the taking of property which is not one's own, in any form, it goes without saying that these come most completely under the condemnation of the Honor System, and find swift and deserved punishment at the hands of the student body itself.

PRIORITIES OF WILLIAM AND MARY

The first American college to receive a charter from the crown: this was dated 1693, under seal of the Privy Council.

The first and only college to be granted a coat of arms from the Herald's college, 1694.

The first American college to have a full faculty of president, six professors, writing master and usher.

The first medals awarded in America as collegiate prizes were those donated by Lord Botetourt, 1771.

The first Greek letter fraternity was founded at William and Mary on December 5, 1776. This fraternity, the Phi Beta Kappa, is the great honor society of the foremost institution of learning in America.

The first honor system.

The first elective system of studies, 1779.

The first school of Modern Languages and of Law were established in 1779, under the influence of Jefferson.

The first college to teach political economy was William and Mary, in 1784.

The first school of history was founded here in 1803.

Student government means student honor.

SOME PLACES OF INTEREST

The Foundation of the Colonial Capitol is located by the marker at the east end of Duke of Gloucester Street.

The Office of the Secretary of the Colony is immediately across the street and to the north of this.

The Old Colonial Jail is not far north of this building. Many Royalists, including Governor Hamilton, of Detroit, were imprisoned here.

The Home of Peyton Randolph is one square south of the Capitol site.

Bassett Hall, the home of President John Tyler, may be seen from here.

The Famous Old Raleigh Tavern stood on the site now occupied by Lane and Christian's store. In the Apollo room of this Tavern was organized the Phi Beta Kappa Society on December 5, 1776.

The First Printing Office in Virginia stood on the lot opposite Mr. Hitchen's store.

The Old Court House still stands in the center of the Court Green.

The Powder Magazine, built in 1714, is immediately opposite the Court Green.

The Palace Green is the long, narrow park running north from Duke of Gloucester Street and, in colonial days, extended to the Royal Governor's Palace.

The First Theatre in America was built in 1716 on the lot near to Audrey House.

The Home of Governor Dinwiddie is immediately across the Palace Green from Audrey House.

Bruton Parish Church is on the corner of Duke of Gloucester Street at the Palace Green. The present building was erected in 1715 on the foundations of the former church which had been built in 1683.

Washington's Headquarters was in the square brick house immediately across the Palace Green from Lafayette's Headquarters. This was the home of George Wythe.

Lafayette's Headquarters was in the St. George Tucker House standing next to the site of the first theatre.

The Blair House is on the Duke of Gloucester Street opposite T. F. Roger's clothing store.

Audrey House, made famous by Mary Johnston's novel "Audrey," faces the present high school building from the east.

The Galt House, on East Frances Street, is perhaps the oldest residence in Williamsburg, being more than 100 years old at the time of the American Revolution.

Carter's Grove is located on the Newport News highway between Williamsburg and Lee Hall. It was built by King Carter and used by General Tarlton during the Revolution as his headquarters.

JAMESTOWN

The first permanent colony of the English people, the birthplace of Virginia and of the United States.

May 13, 1607—The first permanent English settlement in America was made at Jamestown by colonists sent out by the London Company.

September 10, 1608—Captain John Smith began to serve as president of the council, the chief executive official of the colony.

October 4, 1609—Captain John Smith took passage for England, leaving George Percy as his successor. Captain Smith never returned to Virginia.

October, 1609-June, 1610—The starving time. Of about 500 settlers 60 survived.

June 7, 1610—Every one embarked from Jamestown for England. Two days later all of the colonists returned with Lord De La Ware, who brought supplies and additional settlers.

May 10, 1611—Sir Thomas Dale arrived in Virginia.

September, 1611—The town of Henrico founded by Dale.

1612—John Rolfe began the cultivation of tobacco.

April 1, 1614—About April 1, 1614, Pocahontas was married to John Rolfe; peace with the Indians prevailed until her death.

June 12, 1616—Sir Thomas Dale arrived in Plymouth, England, having left the colony in "great prosperity and peace, contrary to many men's expectations."

July 30, 1619—The first legislative assembly in America met at Jamestown.

July 31, 1619—The General Assembly of Virginia petitioned the London Company to send workmen for erecting the university buildings at Henricopolis.

March 22, 1622—The great Indian massacre occurred. Three hundred and forty-seven were slain out of a population of 1,240.

June 26, 1624—The charter of the London Company was declared null and void, and Virginia became a royal province.

August, 1641—Sir William Berkeley commissioned governor of Vir-

March 12, 1652—The colony surrendered to representatives of Parliamen-

ment.

March, 1660—Sir Willam Berkeley elected governor of the General Assembly.

1676—The year of Bacon's rebellion. Jamestown was burned by Bacon, September 19, 1676. Nathaniel Bacon, Jr., died October 26, 1676, in Gloucester County.

October 31, 1698—State house at Jamestown destroyed by fire.

April, 1699—Middle Plantation, now Williamsburg, was made the seat of government by act passed at the April, 1699, session of the assembly.

July 6, 1781—A battle was fought between the forces of Lafayette and Cornwallis in the region between Green Springs and Jamestown. On July 7th Cornwallis, with all his troops, crossed the river at Jamestown.

1861—The island was occupied by about 500 Confederate soldiers. An earth fort was constructed near the church.

ANNOUNCEMENT
OF THE
Fourth Annual Meeting
OF THE
Virginia Academy of
Science

TOGETHER WITH THE
VIRGINIA SECTION OF
THE AMERICAN CHEMICAL SOCIETY
Functioning as a Chemical Section of the Academy.

AT THE
UNIVERSITY OF VIRGINIA

May Seventh and Eighth

1926

FOREWORD

This program is being sent, not only to members of the Academy, but also to certain others who are interested in science or engaged in scientific work.

These others will be interested in the work of the Academy as soon as they know more about it, because its purpose is to foster, encourage and develop scientific work and spirit in Virginia.

They will be cordially welcomed at this meeting and the receipt of this program is intended to serve as a special invitation to them to attend the meeting and join the Academy if they so desire.

E. C. L. MILLER,
Secretary.

ROB. E. LOVING,
President.

Members of the Council:

WM. M. BROWN,
IVEY F. LEWIS,
R. C. YOUNG.

Notices

Hotels

There are three hotels in Charlottesville, The New Queen Charlotte and Hotel Gleason, both located near the Union Station, and The Monticello, near the Chesapeake and Ohio Railroad Station. All three are within easy access of the Main Street car line which connects with the University.

It is suggested that those expecting to attend the meeting make reservations as soon as they can on account of at least two other gatherings in Charlottesville, which are scheduled also for May 6, 7 and 8. The rates of the hotels are as follows:

Hotel Gleason: Single—Without bath, \$1.50 and \$2.00; with bath, \$2.50. Double—Without bath, \$2.50; with bath, \$3.50.

The Monticello: Single—Without bath, \$2.00 and \$2.50; with bath, \$3.00 and \$3.50. Double—With bath, \$5.00, \$6.00, \$7.00.

The New Queen Charlotte: Single—Without bath, \$1.50 and \$2.00; with bath, \$2.00 and \$2.50. Double—Without bath, \$2.50 and \$3.00; with bath, \$3.50 and \$4.50.

The last named hotel will scale down the rates where ten persons or more identified with the Academy appear, the reduced rates to be determined on arrival.

To Reach the University

Take a car marked "University" and get off at Madison Hall, which is opposite the Rotunda. In the lobby of Madison Hall will be found a bureau of information and the registration desk, where the visitors registering will receive a guide map of the University. The first meeting of the Academy will be held in Madison Hall.

Notices

Entertainments

Friday

Afternoon Tea. Pavilion 2, East Lawn.

Reception, Colonnade Club.

Saturday

Lunch. University Commons.

Length of Papers

The number of titles submitted for the sectional meetings has been so large that the Program Committee has encountered a number of problems in allotting sufficient time. It has, therefore, been compelled to adopt the policy of setting a limit of **fifteen minutes** to the time occupied by the formal presentation of each sectional paper, except in the case of a few papers of a general nature given by invitation. Further, it is suggested here that each author arrange to present his principal conclusions in a still shorter time in order to allow for discussion. A need for discussion has been felt and expressed in many quarters.

MAURICE JETER, *Salem, Va.*
- Electrolysis through Glass. 5 min.
C. R. LARKIN, introduced by L. G. Hoxton.
- The Spectra Oscilloscope. 5 min.
A. J. WEED, introduced by L. G. Hoxton.
-

Section of Astronomy, Mathematics and Physics

SATURDAY, 9 A. M.

Rouss Physical Laboratory, Room 20.

Binaural vs. Monaural Sensibility of the Human Ear. 10 min.
R. C. YOUNG, *College of William and Mary.*

A Comparison of the Wave-Length of the Red Cadmium Line
6438 in the Vacuum Arc and in the Discharge Tube. 4 min.

F. L. BROWN, *University of Virginia.*

The Absorption Lines of Various Metals when used as Electrodes in the Under-Water Spark. 6 min.
F. L. BROWN and J. W. BEAMS, *University of Virginia.*

Simple Experiments to show the Relativity of Velocity and Acceleration. 15 min.
C. M. SPARROW, *University of Virginia.*

The Radioactivity of the Lighter Elements. 10 min.
WILLIAM GEORGE GUY, *College of William and Mary.*

The Measurement of Time Intervals of the order of a Hundred-millionth of a Second—Experimental Demonstrations. 15 min.
L. G. HOXTON and J. W. BEAMS, *University of Virginia.*

The Time Interval between the Appearance of Certain Spectrum Lines in the Visible Region. 5 min.
J. W. BEAMS, *National Research Fellow*, introduced by
L. G. HOXTON, *University of Virginia.*

The Time Interval between the Appearance of Certain Lines in Spectra of the Condensed Discharge in Helium and in Mercury. 5 min.
J. W. BEAMS and P. N. RHODES, introduced by
L. G. HOXTON, *University of Virginia.*

An Electro-Optical Device for obtaining Light Flashes of Short Duration and Uniform Intensity. 5 min.
J. W. BEAMS, *National Research Fellow*, introduced by
L. G. HOXTON, *University of Virginia.*

The Reflections of Electrons from Metallic Surfaces. 10 min.
ROBERT L. PETRY, introduced by
D. R. CARPENTER, *Roanoke College.*

Design of a Mirror System for Returning a Ray along a Parallel Path. 5 min.
L. G. HOXTON, *University of Virginia.*

Biological Section

FRIDAY, 2:00 P. M.

Biological Laboratory, Room 3

WM. DAY SMITH, Chairman

IDA SITLER, Secretary

- Conservation of Wild Life in Virginia.
H. C. OBERHOLSER, *Bureau of Biological Survey, Washington.*
- Preventive aspects of pneumonia. 15 min.
HARRY T. MARSHALL, *University of Virginia.*
- The metabolism of creatin in rabbits. 15 min.
ALFRED CHANUTIN, *University of Virginia.*
- Quantitative study of the testis. 15 min.
K. F. BASCOM, *Medical College of Virginia.*

Section of Psychology and Education

FRIDAY, 2:00 P. M.

Cobb Chemical Laboratory, Room 29

GEO. O. FERGUSON, Jr., Chairman

WM. M. BROWN, Secretary

General Program

Psychological Classification of Odors.

L. R. GEISSLER, *Randolph-Macon Woman's College.*

Memory for Olfactory Stimuli.

MISS CORA L. FRIEDLINE, *Randolph-Macon Woman's College.*

Psychic Roots of Altruism.

E. C. WILSON, *Lynchburg College.*

The Modern School Health Program.

MISS PAULINE B. WILLIAMSON, *Metropolitan Life Insurance Company, New York City.*

Importance of Experimental Psychology.

W. A. GARRISON, *King College.*

Some Observations on Education and Democracy.

R. G. CAMPBELL, *Washington and Lee University.*

Child Training in the Home.

MISS ELLEN A. REYNOLDS, *Virginia Polytechnic Institute.*

Creative Synthesis in Psychology.

D. MAURICE ALLAN, *Hampden-Sidney College.*

SATURDAY, 9:00 A. M.

Cobb Chemical Laboratory, Room 29

Symposium on Student Personnel Work

Introductory Statement of the Problem of Personnel Accounting.

WILLIAM M. BROWN, *Washington and Lee University.*

Student Personnel Research and its Application to Student Development.

MISS SARAH M. TAYLOR, *Southern Woman's Educational Alliance.*

A Tentative Testing Program of the Entering Class of the Fredericksburg State Teachers College.

MISS ETHEL SUMMY, *Fredericksburg State Teachers College.*

Predicting Academic Success.

GEORGE O. FERGUSON, JR., *University of Virginia.*

Report of Committee on Social Sciences.

W. E. GARNETT, *Virginia Polytechnic Institute.*

Virginia Section
of the
American Chemical Society

H. K. McCONNELL, Chairman

WM. CLIFT, Secretary

FRIDAY, 2:00 P. M.

The Auditorium, Cobb Chemical Laboratory

The Effect of Hydrogen Ion Concentration on the Viscosity of
Sols of Hydrrous Aluminum, Chromic, and Ferric Oxides.

JOHN H. YOE, *University of Virginia.*

Platinum Gel.

ARTHUR F. BENTON, *University of Virginia.*

A study of Some Factors in Colorimetry by Means of a For-
mula of General Application.

ROBT. F. MCCRACKAN, *Medical College of Virginia.*

The Catalytic Synthesis of Water Vapor in Contact with Me-
talic Silver.

JOS. C. ELGIN, *University of Virginia.*

Introduced by PROFESSOR BENTON.

Reduction Kinetics of Copper Oxide.

EDWIN C. MARKHAM, *University of Virginia.*

The Oxidation of Compounds Possessing the Primary Amino
Group, Di-phenyl-methyl-amine. 15 min.

MISS AGNES GRAHAM SANDERS, *Hollins College.*

The Industrial Applications of Chemical Microscopy.

L. C. LINDSLEY, *F. S. Royster Guano Co., Norfolk.*

A Comparison of the Catalytic Activities and Adsorptions of
Nickel, Cobalt, Iron and Silver.

ROBT. N. PEASE and LELAND STEWART, *University of Virginia.*

Medical College of Virginia

STATE INSTITUTION

W. T. Sanger, Ph. D., *President.*

Thorough training in Chemistry and allied sciences is the best possible background for the professions of Medicine, Dentistry and Pharmacy.

The Medical College of Virginia offers complete courses in all three of these professions. Its laboratories are ample, well equipped and in charge of full time instructors. Richmond furnishes excellent clinical facilities.

CHEMISTRY—

Is an exact science

GUESSWORK has no place in chemistry. Laboratory scales, measuring beakers, titration apparatus, are all checked with meticulous care before they ever leave the manufacturer's hands. Otherwise they would be useless.

Gradually chemists have come to realize that the purity of their reagent chemicals is just as important as the accuracy of their apparatus, if they are to secure determinate and conclusive results. That is why the use of C. P. "Baker's Analyzed" chemicals and acids has increased so rapidly in up-to-date laboratories.

They are accurately

compounded, they are analyzed in the making and they are protected from the introduction of foreign substances in packing and shipping. The label shows the analysis even to the slight impurities present. Insist on having C. P. "Baker's Analyzed."

*Send for catalogue
and price list.*

The Label Tells the Story

**"Baker's
Analyzed"**

BAKER & ADAMSON QUALITY REAGENT CHEMICALS

In 1884 "Baker & Adamson" were the pioneers in the domestic manufacture of C. P. Acids and Re-agents. The words "Baker & Adamson Quality" still represents the highest achievement in chemical purity.

*Baker & Adamson Reagent Chemicals
are always available through the nearest

ALBERENE STONE

QUARRIED FOR OVER 40 YEARS FOR LIFETIME SERVICE NO ARTIFICIAL SUBSTITUTES

Non-absorbent and non-staining—acid-proof and alkali-proof—heat-proof and flame-resistant—hard and smooth—non-chipping, non-splitting, non-sealing—easily machined and assembled with liquid and gas-tight joints, with no exposed metal—Alberene Stone is the pre-eminent material

For

Table Tops Fume Hoods
Sinks and Tanks
Peg Boards Shelving
Acid-Proof Flooring
Base Trim Wainscot
Cabinet Work
Etc.

Send for the Laboratory Equipment Bulletin, containing detail drawings.

PYREX

FLASKS AND BEAKERS

In the spring of 1915, after witnessing in the research laboratories of the Corning Glass Works a series of conclusive tests of the physical characteristics of Pyrex glass with reference to its suitability for laboratory use, we placed a stock order for 150,000 pieces. Upon this order the selection of shapes and quantities for the first factory production was based and the ware delivered against it—in October, 1915—was the first available for sale.

During the intervening years we have stocked no other brand of Flasks and Beakers of either European or American make—with the exception of those made of the excellent Nonsol glass until manufacture was discontinued—and, during recent years, we have experienced absolutely no demand for any other brand. Most specifications now read, "Pyrex, no substitute acceptable." *It is, therefore, our opinion that at least 98% of the U. S. consumption of Flasks and Breakers is now Pyrex.*

We maintain the largest available stock of Pyrex ware for immediate shipment and we were for 1925, as for all preceding years, the largest distributors, and this by a large margin.

Industrial and educational establishments are encouraged to anticipate their needs by taking advantage of the following quantity discounts:—

Quantity discounts for large consumers

10% discount in original case lots

10% and 10% discount in lots of 100 cases (truckload)

10% and 20% discount in lots of 400 cases (carload)
