"Tempest" Shuffle

■ Ten Methods of Play

CHICAGO—C. B. (Bill) DeSelm, executive vice president in charge of sales, United Manufacturing Company demonstrated considerable enthusiasm this past week when he announced the release to the coin machine trade in the United States and in the European markets of United's new "Tempest" puck shuffle alley bowler. He stated that the firm's new, highly styled cabinet is receiving unprecedented popularity and acclaim wherever it is viewed or placed on location.

For example, the mahogany finished, sturdy Formica (extra wide) siderails, add much to the external appearance of "Tempest," according to DeSelm.

"United's designers were lavish and farsighted in their illustrative work on the ultra-styled backglass, which certainly complements the richness in the cabinetry," DeSelm added.

As a new innovation, United fea-

United's "Tempest" Shuffle Alley

tures "Flash Bonus Scoring," and the skill bowling game, "Bonus Scoring."

In "Flash Bonus Scoring" the strike and spare scores are indicated by rapidly flashing lights. Frames one through ten advance the bonus scores 400 for a strike, and 200 for a spare. After the tenth frame each player shoots an additional frame to collect the accumulated bonus score. A strike scores full bonus. A spare scores one-half bonus. And, of course, a 'blow' (or miss) loses the bonus score.

The game, in "Bonus Scoring," is as indicated on the backglass. Frames one through seven score 300 points for a strike, and 200 for a spare. Frames 8 through ten score 600 points for a strike, and 400 for a spare.

In addition, frames one through ten advance the "Bonus Score," 400 for a strike and 200 for a spare. The "Bonus Score" on the backglass shows only the accumulated bonus of the player who is up at the time.

After the tenth frame, each player ("Tempest" is a six-player) shoots one additional frame to collect the accumulated "Bonus Score." The full bonus is transferred to the player's score for a strike. One half of the bonus is transferred to the player's score for a spare.

Other scoring games in "Tempest" include "Dual Flash," "Flash Scoring" and "Regulation" bowling. In "Dual Flash," strikes and spares are indicated by flashing lights across the playfield near the pins. The lights stop on the first shot if a strike is made by the player. If a strike is not accomplished, the lights continue flashing for a possible spare score.

In "Flash Scoring," strikes and spares are also indicated by flashing lights. Differing from "Dual Flash," the lights always stop flashing whenever the pins are struck on the first shot.

Top score in "Flash Bonus Scoring" is 9600 points. "Bonus Scoring's" top

Diamond Coin To Distribute Bally In Vir. and N.C.

CHRIS CHRISTENSEN

CHICAGO—Bill O'Donnell, president of Bally Manufacturing Company, this week announced appointment of Diamond Coin Machine Exchange, Inc. as Bally distributor in Virginia and North Carolina.

"Chris Christensen and Jim Donnelly of Diamond," O'Donnell said, "are a successful team of coin-machine veterans. With their offices in Norfolk and Charlotte they are prepared to give the best of service to operators. We at Bally are happy to add them to the roster of Bally distributors, and, if I may make a pun on their well-known name, we expect sparkling performance from the Diamond of Dixie."

Diamond Coin recently introduced the industry's first Mobile Parts Truck, to tour the State of Virginia. In addition, the firm purchased a 'Bonanza' airplane for speedy coverage of the Virginia-Carolina territory.

The move was completed February 28, two days ahead of the planned March 1 date, Granger announced. Though the street address remains the same, the new space is large enough to permit the installation of a mimeograph, addressograph, additional files and other equipment necessary for a more self-contained operation.

"Expansion is a must to keep pace with MOA's plans for greater membership contact," Granger stated. "This means keeping the members better informed through bulletins and progress reports about services, legislative matters and 1964 convention developments," he concluded.

"fumble-proof"

snap-in needle cartridge

...no screws!

You can count on Rock-Ola for design simplicity!

A firm grip on profits depends on fast, easy servicing, long-term dependability.

Which is our big reason for telling you about our "snap-in" needle cartridge.

It isn't a new Rock-Ola feature. It isn't even the kind of feature most people would shout about . . . with so many other *big* features we could talk about. But it illustrates a very important point: that no matter how "insignificant" a single operative feature may seem, we've given it the same consideration we'd give, for example, to rebuilding the entire phonograph. If we can eliminate "nuts and bolts," we do it. If we can eliminate "spaghetti wiring" and improve a component by making it entirely mechanical, we do that, too.

Take our Mech-O-Matic changer. It lets you mix 33 $\frac{1}{3}$, 45 rpm, stereo, monaural, and *now* even 7" LP records in any sequence, any bank of records . . . with no use of wires or complicated mechanisms. It's so simple, so entirely mechanical, you'd probably have to see it to believe it!

We could tell you more . . . *much more* about the simplicity of design . . . the dependability . . . the fast, easy servicing of our new phonographs. But why not *see* them all . . . the Rock-Ola Rhapsody II and Capri II, now at your Rock-Ola distributor's!
