## No Bark, But More 'Byte' In College's New Computer

A brand new one-and-a-half million dollar computer has been installed in the basement computer center in Hugh Jones Hall.

The IBM system/370 model 145, which ranks as one of the most sophisticated computer series in the state's educational system, operates with more than twice the speed of the old 360 series and will enable the presently over-loaded computer center to catch up on a backlog of jobs.

Although the new IBM computer is extremely compact, it has a potential storage capacity of more than 16 million "bytes", the official unit of computer storage, as compared to the 1.4 million byte capacity of its predecessor.

It also has the ability to operate in a "virtual mode," which computer center director Raymond W. Southworth explained would "allow users more flexibility to run larger, more complex programs."

Even with many of the computer center's 33 staff members working weekend shifts, the center was formerly unable to keep up with the

growing number of jobs requested from educational institutions throughout the eastern part of Virginia. Southworth now reports that the new machine has enabled the center to complete most jobs within a single hour and all jobs within 24 hours.

Approximately 40 percent of the new computer's time will be utilized for special research projects that need highly sophisticated statistical correlations. Currently the computer is facilitating College research projects that range from the economics department's analysis of urban problems and labor mobility to a study of

### A Bicentennial Event

## Scholarly Conference Is Planned

A major international conference of literary scholars will take place in Williamsburg in December 1976 as an observance of the bicentennial of American independence.

To sponsor this conference on "American Literature of the Revolutionary War Era," William and Mary has been awarded a grant of \$33,700 by the National Endowment for the Humanities.

The College will host the conference on behalf of the Early American Literature Section of the Modern Language Association, bringing together in Williamsburg approximately 100 leading research scholars and teachers in the Early American field from throughout the

United States, Europe and Japan.

The main purpose of the three-day meeting will be to advance scholarship and improve university teaching in the political and belletristic literature of the American Revolution.

### Dolmetsch named administrator

Named as principal administrator in the NEH grant is Carl Dolmetsch, chairman of the English department, who will serve as conference chairman. Dolmetsch, a specialist in Colonial and Federalist literary history, was appointed by the MLA group in 1973 to organize such a conference here.

He is being assisted by a program committee composed of Professors Alfred Owen Aldridge (University of Illinois), William Hedges (Goucher College), Lewis Leary (University of North Carolina) and Kenneth Silverman (New

York University). A local committee on arrangements, to be announced later, will have representatives from the College faculty, the Institute of Early American History and Culture, the Colonial Williamsburg Foundation and the Virginia Bicentennial Commission.

The conference, to be held December 8-10, 1976, in the Williamsburg Lodge Conference Center, will involve scholarly papers, discussions and workshops on the writings of such well-known Revolutionary War figures as Franklin, Freneau, Hopkinson, Jefferson and Paine, as well as lesser-known writers of the period, and on such general topics as the rise of American literary nationalism, the teaching of Revolutionary War literature and research in this field.

Performances of American music and drama composed during the Revolutionary War are also being planned as part of the conference program.

## 'Common Glory' Invitation

William and Mary employees and members of their immediate families are invited to attend an *outdoor* performance of "The Common Glory" without charge during the period Monday, June 23, through Saturday, June 28.

In order to obtain admission, employees should present and identify themselves at the Common Glory box office between 7 and 8:30 p.m. on the evening of the performance they wish to attend.

The performance begins at 8:40 p.m.

### Registration Today in W&M Hall

## Summer Session Begins Tomorrow

Registration for the summer session is being held today in William and Mary Hall from 9 a.m. to 3:30 p.m. Over 230 courses are being offered this year.

### Orientation Program

An orientation program for all students new to the College will be held tonight at 7 p.m. Participants will meet on the steps of the Campus Center on Jamestown Road. The program includes a bus tour of the campus and an informal session in Rooms A and B of the Campus Center, where refreshments will be served.

### Classes

Classes for the first session begin tomorrow and continue through July 18. *No classes will be held July 4.* All classes will meet on Saturday, June 21.

Second session classes begin July 21 and continue through August 22. Graduation will be held August 23.

### Course Changes

Students may change courses before the fourth scheduled class

day (Friday, June 20), with the approval of the director of the summer sessions. No such changes will be approved after the second class meeting of courses of less than a five week duration.

Undergraduate students who drop a course or courses after the fifth scheduled class meeting will receive a "no credit" for the course. This includes the School of Business Administration. Graduate students in the Schools of Education and Law may drop a course prior to mid-term with no grade. After mid-term the student must have permission from the instructor to drop the course.

### Second Term Applications

Students enrolling in the second term only must file their applications by Tuesday, July 1. Registration for these students will be held in the Summer Sessions Office, Room 111, James Blair Hall, Monday, July 21, the first day of classes for the second session.

### Campus Activities

Information on campus activities, the College calendar and announcements of special interest to summer sessions students will be printed in the *William and Mary News* July 8 and 22 and August 5 and 19. Copies of the *News* are available at the Campus Center, Swem Library, College News Office, Post Office, Summer Sessions Office and James Blair Switchboard.

Paul Clem, director of summer sessions, encourages students having questions or problems relative to the summer sessions to contact his office, Ext. 238 or 338.

### Meals

The Commons is offering 5 day and 7 day Board Plans this summer, in addition to a la carte meals. The fees are \$105 per 5-week semester for the 7-day plan; \$89.25 for the 5-day plan. Tickets may be purchased at the Commons.

*Continued on Page 4*

## Board Approves Change In Registrar Position

An upgrading and expansion of the role of the Registrar in the administration of the College was approved June 10 by the executive committee of the Board of Visitors.

The reorganization is aimed at improving the use of computer capabilities for administrative purposes.

The Board's executive committee approved the new position of Registrar of the College and Director of Administrative Information Services, responsible to the Vice President for Academic Affairs. The former post of Registrar was re-titled Director of Registration and Student Records.

The reorganization stems in part from the return of Dudley Jensen, Registrar since 1969, to full-time teaching effective September 1. At the same time, it concludes a long-term goal of bringing into a single office the numerous ways in which College administrative offices utilize the Computer Center, so that overlaps can be reduced and usage priorities established. An in-depth study of administrative data requirements and processing, completed this spring with the assistance of the

International Business Machines Corp., concluded that a high-level coordinating office was necessary if effective use were to be made of the Computer Center and the data processed by it.

The Computer Center serves the research and administrative needs of a variety of State agencies and institutions in eastern Virginia, including William and Mary.

The executive committee of the Board met in the Richmond law offices of its Rector, R. Harvey Chappell, Jr. Last summer, the Board began the practice of holding summer executive committee meetings in order to approve the offering of faculty contracts and transact other business. Its regular meetings are in January, May, September and November.

At Tuesday's meeting, the executive committee approved a number of prospective faculty appointments, including the two individuals to occupy the key positions in the Registrar's office reorganization. However, the executive committee's actions are not final until contracts are offered and signed by the persons involved.

## Personnel Bulletin

The following positions at the College are or will be vacant. Qualified employees who wish to be transferred to these positions may receive additional information at the Personnel Office. The College is an Equal Opportunity Employer. Accordingly, women and minority employees are encouraged to apply for those positions for which they feel they are qualified.

Inquiries about vacancies should be directed to the Personnel Office and not to the department where the opening exists.

Call 229-JOBS (5627) for an updated listing of job vacancies on campus and 24-hour service.

### JOB VACANCIES

CLERK STENOGRAPHER B: Student Health Service (9 mos. position); \$5400-6720; deadline 6-20.

CLERK STENOGRAPHER D: Development Office; \$6720-8784; deadline 6-20.

ACCOUNTANT A (TEMPORARY): Buildings and Grounds (Property Control Program); High School graduate with 4 years clerical experience, including one year of accounting, auditing, or responsible bookkeeping experience; \$3.23 per hour; deadline 6-20.

OFFSET DUPLICATING MACHINE OPERATOR A: Printing Office; Completion of high school or equivalent and at least six months of experience in the operation of offset duplicating machines; \$5400-7680; deadline 6-19.

RESEARCH ADMINISTRATIVE OFFICER B: Development Office; College graduate with 3 years of experience in public administration, accounting, or business management, one of which involved supervisory responsibility; \$10,512-14,328; deadline 6-20.

RESEARCH ADMINISTRATIVE OFFICER C: Development Office; College graduate with 4 years of experience in public administration, accounting, or business management, one of which involved supervisory responsibility; \$12,000-16,400; deadline 6-16.

### INDEPENDENCE DAY HOLIDAY

In accordance with the holiday schedule as revised by the 1970 General Assembly, Independence Day falls on Friday, July 4, 1975.

The administrative offices, the plant department (except for those employees required to maintain essential services), and the mail room of the College will be closed on July 4. The Security Office and the College Switchboard will maintain regular hours.

Summer Session classes will not be held on Friday, July 4.

The names of permanent classified employees who are required to work on July 4 should be reported in writing to the Personnel Office in order that they may be credited with Compensatory Leave. Permanent classified employees who are required to work on any of these days should take compensatory leave earned as soon thereafter as possible in order to avoid excessive leave accumulation. Hourly employees who work on any of these days will be paid at their regular hourly rates.

## Carter Stresses Summer Energy Conservation

Vice President for Business Affairs William J. Carter has issued a memorandum reminding all College employees of the critical need to continue the Energy Conservation Program at the College. He notes that demands for electric power during the summer are the highest of the entire year and points out that the increased cost of fuel oil has offset savings realized in the amount of fuel conserved during the past winter, which has severely taxed on the operating budget.

"If we are to realize our objective of minimizing operating costs so that the primary objective of the College—the effectiveness of the instructional program—continues to receive the essential level of support it deserves," says Carter, "all of us must work together."

To conserve energy, Mr. Carter states that "all buildings equipped with central air conditioning or cooling devices will have thermostats set to begin cooling cycles when inside temperatures reach 77°F." Only authorized maintenance personnel are to readjust the thermostats, once they have been set. Carter points out that the cost incurred during the last heating season of replacing thermostats that were damaged when unauthorized personnel tampered with them "should demonstrate this need to all of us."

Where window units are used for air conditioning, Mr. Carter asks that everyone use thermostatic controls rather than the "constant cold" setting and turn air conditioners off when not needed.

He notes that requests for lower minimum temperatures required for laboratory or clinical conditions will be honored, where such requests are submitted in writing and with full justification to Ervin Farmer, Director of Buildings and Grounds.

Carter suggests that, during the summer, "an important measure that should be followed is the maximum use of window coverings (shades, venetian blinds, drapes, etc.) to prevent transmission of solar heat into interior space."

He also suggests the following ways in which to save electrical energy and operating costs:

## Biologists Study Deermice Systems For Population Control Information

W&M biologists will receive grants over the next three years totaling approximately \$100,000 from the National Institutes of Health to conduct extensive studies of population control mechanisms.

Although the Institute usually limits funding to projects directly associated with human health, the College's research into the neuroendocrine systems of deermice could lead to discoveries that might be significant in the overall understanding of population

control.

"There's not necessarily any parallel between deermice and humans," said Eric Bradley, who is the principal investigator for the project. "And we're not saying we can find a solution here for the world's population problems. But clearly understanding the physiology of how deermice control their population growth will help us to better understand the regulation mechanisms per se."

Bradley will be joined in the project by Professor C. Richard Terman, who has worked extensively with deermice in both controlled communities and open field tests.

The project will receive \$42,800 in funding from the Institute during the first year for equipment and laboratory purchases, faculty summer salaries and the hiring of a full-time laboratory specialist. The amount of funding for the remaining two years of the project period has yet to be finalized, although the Institute has recommended nearly \$60,000 in additional aid.

William and Mary's research team, which will include several undergraduate as well as

graduate students, will do much of its investigation at the Laboratory of Endocrinology and Population Ecology here in Williamsburg. Researchers will study the behavior of hundreds of deermice as they mature and reproduce over a span of several years. Previous studies have indicated that deermice have the ability to limit the growth of their population before overcrowding occurs, by producing young that fail to mature reproductively and are incapable of mating.

"We think it's something the animals perceive in their environment," said Bradley. Current studies suggest that the nervous systems of the mice apparently cause a change in the production of hormones by the pituitary gland, which is in part responsible for the sexual maturity of the animals.

What intrigues researchers the most, however, is the ability of the sexually immature mice to become fertile almost immediately when removed from the overcrowded population. It is also a mystery why a few deermice born in a stable population become sexually mature while others do not.

## 1975 Walsingham Graduate Receives Trosvig Award

Theresa A. Chalkley, who graduated fifth in her class at Walsingham Academy's commencement recently, has been named the first recipient of the Trosvig Scholarship at William and Mary.

She is the daughter of Mr. and Mrs. Leslie Chalkley of Williamsburg.

Established in February in memory of educators Ida and

Milla Trosvig, the scholarship provides financial support to a graduate of Walsingham or Lafayette High School planning to concentrate in either mathematics or social sciences at William and Mary. The scholarship award was made possible by a recent bequest of approximately \$45,000 to the College Endowment by Alma and Clara Trosvig to honor the long and illustrious teaching careers of their sisters.

Miss Chalkley graduates from Walsingham with 12 years of honors grades to her credit and a desire to concentrate in higher mathematics.

The scholarship award holds special significance for the Chalkleys as both of Theresa's parents were taught by Ida Trosvig during the early 1940's at Matthew Whaley High School. Mrs. Chalkley remembers her eleventh grade social studies teacher as "an exceptionally good one."

## College Extends Bicentennial Invitation

As a gesture of bicentennial hospitality, the College is offering visitors to Ash Lawn, historic home of President James Monroe, a free ticket for a return visit in 1976.

Ash Lawn was recently acquired by the College, Monroe's alma mater, as part of the bequest of Jay Winston Johns. It was reopened as an historic shrine for public educational benefit in April, 1975, in accordance with Mr. John's expressed wishes.

While the estate is open to the public, the College is conducting concurrently programs of restoration, refurbishment and research.

Because of the interest shown by the visiting public in the work being undertaken and inquiries about future projects, the College is offering the bicentennial ticket to encourage visitors to return and have another look at how things have progressed.

### Electricity:

- Turn off lights in offices and classrooms when not in use.
- Reduce lighting levels in corridors and peripheral areas of buildings where appropriate.
- Turn off all appliances and instruments when not in use.

### Transportation:

- Do not exceed 55 mph speed limit on interstates and highways.
- Do not leave car engine running (burns gas unnecessarily).
- Avoid long warm ups (late model engines do not require long warm ups).
- Use air conditioners moderately and only under hot weather conditions.
- Consolidation of trips should be considered whenever possible.
- State employees using State-owned vehicles should pool riders whenever possible.
- Use smaller engines and cars (4 and 6 cylinder engines burn less gasoline).
- Avoid "jack rabbit" starts.
- Keep engines tuned for peak performance.

"The Full Conservation Sub-Committee of the Campus Environment Committee will be working with the Department of Buildings and Grounds on a continuing program of conservation and economy," he adds. "We certainly are counting on your usual fine support to help control our operating costs, which are mounting at an alarming rate."

## W&M NEWS

Volume III, No. 35

June 16, 1975

Published weekly through the Office of Information Services by the College of William and Mary for faculty, staff and students. Produced by the College News Office, 125 Richmond Road. Inquiries should be directed to Marjorie N. Healy, Information Officer. Mailed to addresses of employees as on record at the Personnel Office, James Blair Hall, to which office address changes should be directed.

## New Administrative Position Created By Board of Visitors

The increasing complexity of the data required for effective administration of the College, and for periodic reports to federal and state agencies, creates a large and immediate need for development and continuing supervision of automated administrative information systems. The return of Mr. Jensen, College Registrar since 1969, to full-time teaching has simultaneously created a need for a replacement and suggested the desirability of a reorganization of the Registrar's Office, so as to provide better service through more automated systems of registration and record keeping and retrieval. The qualifications expected of a registrar and a director of administrative information services are very similar, and the relationships between the two functions are necessarily closely interrelated.

It accordingly seemed reasonable and efficient to combine responsibility both for the Registrar's Office and for administrative information services in one person; and to employ another person, whose title would be Director of Registration and Student Records, to whom responsibility would be assigned, under the supervision of the Registrar, for the immediate administration of registration and academic records of the College. As far as internal personnel records are concerned, the Director of Registration and Student Records would occupy the existing vacancy created by Mr. Jensen's resignation as Registrar; the position of Registrar of the College and Director of Administrative Information Services would be a new position.

BE IT RESOLVED, That the Board of Visitors of the College of William and Mary approves the establishment of a new administrative position, known as Registrar of the College and Director of Administrative Information Services.

## NSF Funds Equipment Purchase

The National Science Foundation has awarded three professors grants totaling nearly \$50,000 for purchase of scientific equipment needed to improve undergraduate instruction.

Associate professor of geology Stephen C. Clement, assistant professor of mathematics Michael K. Donegan, and associate professor of biology Henry Aceto are among 547 professors nationwide who were selected for equipment awards totaling \$4,571,900. The colleges receiving the grants are required to match NSF funds by providing at least 50 percent of the equipment cost.

Clement's \$20,000 grant, the maximum awarded for a single project, will go toward the purchase of an energy-dispersive x-ray spectrometer. Donegan's \$19,700 award will help the mathematics department establish a computer learning lab for undergraduates, while Aceto's \$900 grant will provide

funds toward the purchase of a new liquid scintillation system. Together the NSF grants to William and Mary rank among the highest awarded to 388 colleges and universities across the nation.

Clement describes the energy-dispersive spectrometer, which does an immediate chemical analysis of more than 75 natural elements, as "a super machine." The spectrometer will provide William and Mary geology students with a quick method of chemically analyzing rocks, minerals, and soil, which Clement says "are notoriously difficult to analyze chemically." Access to the sophisticated capabilities of the spectrometer will allow students to investigate a variety of new research topics, including studies of air and water pollution.

Students in the mathematics department will soon be able to experiment firsthand with a macro-programmable computer. Donegan will direct a new program that will allow

undergraduates to "understand what's going on inside the machine by modifying and experimenting with their own programs." The hands-on lab will provide an alternative for students presently working through the multi-million dollar computer center in the basement of Jones Hall.

Donegan said that the new computer lab would open the way for expansion of the computer science program and eventually the establishment of a computer science undergraduate degree. The system should be in operation by next January and will provide computer experience for approximately 130 undergraduate concentrators.

The purchase of a liquid scintillation system, said Aceto, director of the Virginia Associated Research Campus, would help introduce a new course in tracer methodology in the department of biology.

## Marionette Performances

Several William and Mary alumni have formed a marionette company called the "Moxie Marionettes" and will be performing weekly this summer in Williamsburg.

Performances are at 2:30 p.m. Saturdays and Sundays. Admission is \$1.50 per person. For groups of 20 or more the rate is \$1 per person.

The current feature is "The Magic Shoes" written by Dave Ballard, a 1974 graduate of the College.

## Faculty/Staff News

### CHEMISTRY

The following paper has been accepted for publication in the *Astrophysical Journal*:

"Rate of the Reaction  $N_2H^+ + CO \rightarrow HCO^+ + N_2$  and Its Significance for the Interstellar Chemistry of  $N_2H^+$ ," by Assistant Professor E. Herbst in collaboration with D. K. Bohme, J.D. Payzant, and H.I. Schiff of York University, Ontario, Canada.

Herbst has given invited lectures during the 1974-1975 school year at the following places: American Chemical Society--Midwest Meeting, Iowa City, Iowa; Joint Symposium--Departments of Chemistry and Space Science--Cornell University, Ithaca, N.Y.; Annual meeting of the Canadian Association of Physicists--York University, Ontario, Canada.

During the month of July, Mr. Herbst will be pursuing research at Harvard University in interstellar molecules under a William and Mary research fellowship.

The French government has invited Mr. Herbst to spend the month of August in Paris at a scientific conference concerning interstellar molecules.

### MARSHALL-WYTHE SCHOOL OF LAW

Emeric Fischer, professor, conducted a one-day seminar in Huntington, W. Va. for the West Virginia Society of Certified Public Accountants, May 16. The topic was "Income Taxation of Estates and Trusts."

Scott Whitney, professor, attended the Coastal Zone Environmental Law Conference at the Asilomar Conference Center in Monterey, Calif., May

28-30. He was chairman of a panel on "Key Legal Issues of Coastal Zone Management" and presented a paper on "Legal Issues Related to Siting Energy Facilities in the Coastal Zone." The conference was sponsored by the National Oceanic and Atmospheric Agency (NOAA) and the Sea Grant Lawyers Association.

### PHYSICS

The department has received a grant in the amount of \$13,300 from the National Science Foundation. Assistant Professor Carl Carlson and Associate Professor Franz Gross are principal investigators for the grant, researching "Topics in Theoretical Physics."

### RELIGION

Dean James C. Livingston's study on the "Ethics of Belief: An Essay on the Victorian Religious Conscience" was published recently by the Scholars Press. The monograph is included in the Studies in Religion Series of the American Academy of Religion.

Mr. Livingston's remarks on "Arnold, Religion, and the Counter-Culture," given at the Modern Language Association annual meeting, were published in the Winter 1975 issue of the Arnold Newsletter.

### SWEM LIBRARY

Robert L. Burr, circulation librarian, has been awarded first prize in the first national library research competition for a paper entitled "Toward a General Theory of Circulation." The research competition was sponsored by the Library Research Round Table of the American Library Association.

Burr's paper, based on research conducted at Swem Library during 1974-75, will be read at the ALA annual conference in San Francisco, June 29-July 5, prior to being published under the auspices of the ALA.

Kay Domine, college archivist, attended the annual workshop on College and University Archives in Cleveland, Ohio, June 9-13. The workshop was sponsored by Case Western Reserve University.

### W&M HALL

Lester Hooker, Jr., director, has been selected to direct a new managers seminar for the International Association of Auditorium Managers at the association's annual meeting in the Detroit-Windsor area July 19-24.

Bettie Adams, assistant director, will be coordinator for the national scrapbook at the meeting. This year the IAAM will celebrate its 50th anniversary at the July meeting.

### SCHOOL OF BUSINESS ADMINISTRATION

George D. Cole, Jr., associate professor, in association with Professor Richard Dunsing of the University of Richmond, conducted a two day "Networkshop" during May at the Donaldson Brown Center, V.P.I. & S.U. The workshop was for members of a network of consultants from the colleges and universities in Virginia working with the Management Development and Training Service of the Commonwealth. The focus of the workshop was on management and organizational effectiveness, and the development of teams from

the Network to work in such projects for state and local government personnel.

Dean Charles L. Quittmeyer will address Richmond and Roanoke businessmen at luncheon meetings June 17 and 18. He will give a progress report on business education at the College and on the active involvement of business leaders in the State and nation in that program.

### Summer Research

Carl R. Dolmetsch, professor of English, has been awarded a summer research grant for a collected edition of St. George Tucker's "Hermit of the Mountain" essays.

James F. Harris, Jr., associate professor of philosophy, has also been awarded a summer research grant for a project entitled "Words and Deeds: J.L. Austin's Philosophy of Language."

## Clarence Burreall Retires

Clarence Burreall retired June 1 after serving the College as a custodian for over 17 years.

When he first joined the College staff in March 1958, Mr. Burreall worked in the then recently opened Phi Beta Kappa Hall, the first building on the new campus. He later worked in Washington Hall for many years. Shortly after Millington Hall was opened in 1968, Mr. Burreall was reassigned to that location and was put in charge of the custodial team responsible for the building.

"Burreall has given the College good and faithful work, and we hate to see him go," says Ernest Boyce, executive housekeeper. "He has been very

Clarence Burreall

dependable, and we will miss him."

Before joining the College staff, Mr. Burreall worked at Cheatham Annex for eight years in transportation and landscaping, as well as housekeeping.

A widower, he has a daughter in Williamsburg, Mrs. Laverne Tisdale, and two grandchildren.

Burreall has for the past 18 years been an active member of the Odd Fellows. He is a member of the St. Johns Baptist church.

During his retirement Mr. Burreall plans to devote more time to his favorite hobbies--gardening and fishing. He also hopes to travel, visiting relatives outside the State.

# THE CALENDAR

Events of interest to the College community are listed as scheduled on the Campus Calendar, Campus Center, Ext. 557.

## MONDAY, JUNE 16

Beginning of Summer Session, First Term.  
W&M Karate Club Meeting, Blow Gym-Old Handball Court, 6-7 p.m.  
Summer Session Orientation, CC Rooms A and B, 7:30-10 p.m.

## WEDNESDAY, JUNE 18

Graduate Studies Meeting, Swem Conference Room, 4-6 p.m.

## FRIDAY, JUNE 20

Hillel, Temple Beth El, 7:30 p.m.

## SATURDAY, JUNE 21

Organ Recital, Wren Chapel, 11 a.m.

## MONDAY, JUNE 23

Reception for Common Glory Cast, PBK Dodge Room, 6:30-8 p.m.  
Common Glory, Premiere Performance, Matoaka Amphitheatre, 7:30-11 p.m. (Performances continue nightly, except Sunday, through August 23. In case of rain, performances will be moved to PBK Hall)

## FRIDAY, JUNE 27

Summer Band School Concert (Senior Division), Wren Yard, 6:30 p.m.  
Hillel, Temple Beth El, 7:30 p.m.  
Summer Band School Movie, CC Ballroom, 8-10 p.m.

## SATURDAY, JUNE 28

Organ Recital, Wren Chapel, 11 a.m.  
Summer Band School Movie, CC Ballroom, 8-10 p.m.

## SUNDAY, JUNE 29

Summer Band School Concert (Senior Division), Wren Yard, 2:15 p.m.  
Summer Band School Movie, CC Ballroom, 8-10 p.m.

## THURSDAY, JULY 3

Summer Band School Solo and Ensemble Recital, CC Ballroom, 8-10:30 p.m.

## FRIDAY, JULY 4

School of Education Faculty Picnic, Matoaka Shelter, 3-7 p.m.  
Summer Band School Concert (Senior Division), Wren Yard, 6:30 p.m.; reception, Rear Porch of Wren Building (In case of rain, Blow Gym), 8-9 p.m.

# Summer Events On Campus

A number of events and exhibits have been scheduled on campus for the summer months, and students and College employees are invited to take advantage of them.

Summer Band School will run from June 22 until July 18, under the direction of Charles Varner. Band school students will present a number of concerts. Check the *W&M News* Calendar for time and place. There is no admission charge.

The Student Association has expanded its Film Series to the summer on a trial basis. They plan to show 10 popular films, each being shown twice Wednesday evenings. Admission is by series pass only. Consult the "Summer Film Series" schedule for further information.

The Summer Sessions office has arranged, as part of its recreational program, for canoe rentals from the Lake Matoaka Boathouse, beginning Thursday, June 19, from 2-8 p.m. The charge is \$1 per afternoon.

Performances of "The Common Glory," Virginia's bicentennial outdoor drama, will be presented nightly at 7:30 p.m., except Sundays, at the Lake Matoaka Amphitheatre. Performances continue through August 23. In the event of rain, production will be moved to Phi Beta Kappa Hall.

Earlier this month the College opened a visitor information center in Room 100 of the Wren Building. General informational literature about the College is available there, and displays of contemporary College programs will soon be mounted in a part of the room.

The Virginia Center for Archaeological Research recently opened an archaeological exhibit in the basement of the Wren Building. The exhibit is open free of charge Mondays through Fridays from 1-5 p.m. Buried treasures from more than 20 locations throughout the state are on display.

Old Master Prints illustrating aspects of the history of printmaking are on display in the Botetourt Museum of Swem Library. Museum hours are Monday through Friday, 9 a.m. - 5 p.m., and Saturday, 9 a.m. - 1 p.m.

Fine arts faculty members are exhibiting their works during the summer in Andrews Gallery. Hours are 9 a.m. - 4 p.m., Monday through Friday.

## NEW COMPUTER *Cont. from First Page*

voting patterns conducted by Southworth reports that the new the Marshall-Wythe Institute for Research in the Social Sciences. machine costs no more to rent than the old 360 series. The IBM

The remainder of the computer's operating time is divided between administrative tasks for a variety of College offices and the needs of undergraduate and graduate students enrolled in computer-oriented courses. Despite the advantages of the Model 145, it may not stay at William and Mary for much more than a year. Southworth said that the long-range plans for the center include the purchase of a more advanced machine in

Although the Model 145 is faster and more compact,
