Sinfonicron Presents 'Ruddigore'

For its eleventh annual production, the Sinfonicron Opera Company will present Gilbert and Sullivan's "Ruddigore" on Oct. 22-25 at 8:15 p.m. in Phi Beta Kappa Hall.

The company represents the combined efforts of students in Phi Mu Alpha Sinfonia and Delta Omicron music fraternities.

Tickets will be available starting Oct. 20 in the Phi Beta Kappa box office, Ext. 272, during the following hours: Monday-Friday, 3-5:30 p.m.; Wednesday-Saturday, 7:30-8:15 p.m.; and Saturday morning, 9-12 noon. Tickets may also be ordered in advance by writing to the music department. General admission is \$3; students and children, \$2.

Mark Basile '76, Baltimore, Md., is director, Larry Allen '76, Richmond, music director and conductor, and Anne Wainstein '76 of Alexandria; is producer of "Ruddigore." Tom David '76 of Williamsburg has choreographed the dances. Costumes were designed by Tric Wesp '76, Olney, Md., sets by Ted Hogan '76, Lynch Station, and lighting by Becky Riley '76 of Danville.

Cliff Williams, a balladier for

Colonial Williamsburg, portrays Robin Oakapple, while Anne Gore '78, McLean, is the heroine, Rose Maybud.

Other leading cast members include Jeffrey Mincks '75, who is currently a law student at

the College; Francis Hankey '76, McLean; Beverly Tourdo '79, Bernardsville, N.J.; Sharon Peake '77, Rochester, N.Y.; David Robbins '76, Richmond; Rae Ann Lindberg '76, Richmond; and Steve Rudlin '76, Richmond.

W&M News Mailing To Employee Homes Will Stop, Nov. 4

Effective with the Nov. 4 issue, the William and Mary News will no longer be mailed to employees' homes. Campus distribution will be expanded to insure continued service to all members of the College community.

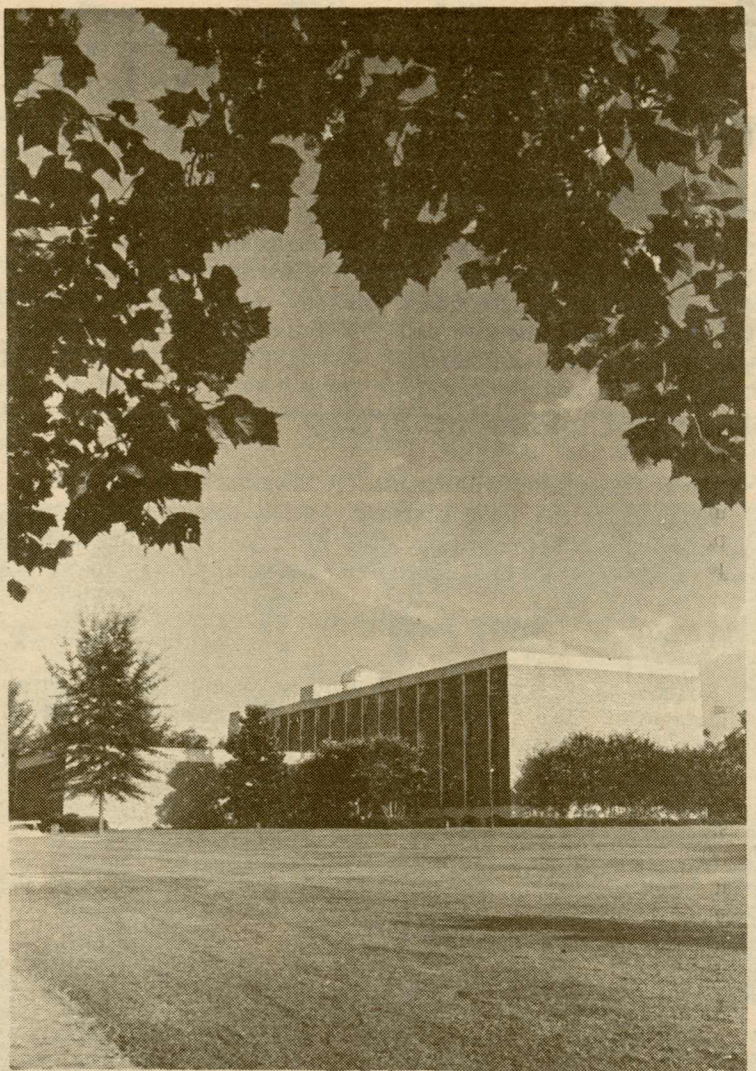

Cost savings will amount to more than \$2,000 annually in postage and will lighten the scheduling load of the College mailroom.

Quantities of the News will be placed at key locations around campus as well as

distributed through campus mail and through supervisory personnel for all employees. Copies are also available at the News Office on Richmond Road, across from the President's House.

The News is published weekly on Tuesdays and will be distributed on campus that afternoon.

To insure a wide distribution of the News throughout the College community, staff, faculty and administrators are being asked to take copies home for their families.

The William Small Physical Laboratory. Thomas Jefferson became a student at William and Mary in 1760, and later wrote in his autobiography, "It was my great good fortune, and what probably fixed the destinies of my life, that Dr. William Small of Scotland was then professor of mathematics."

Fowler Lecture Oct. 22 To Cover King Henry VIII

Harold L. Fowler, Professor of History, Emeritus, at William and Mary, will lecture on "Henry VIII: A Renaissance King" at 7:30 p.m. Oct. 22 in Millington Hall.

The public is invited to attend the lecture, which is part of this year's Project Plus Forum. Mr. Fowler earned his Ph.D.

at Harvard in 1934 and in the same year joined the College's history department. Appointed Dean of the Faculty of Arts and Sciences in 1964, he continued to teach the course that lay in the area of his special interest--Tudor and Stuart England--until his retirement from William and Mary in 1974.

Early Professor Made Lasting Contributions

The professor to whom Thomas Jefferson gave credit for having "fixed the destinies of my life" was a relatively unknown Scotsman who, ironically, returned to Britain after only six years in Virginia.

The Professor was William Small, who crossed the Atlantic in 1758 to teach at William and Mary. He had earlier obtained his master of arts degree from Marischall College, Aberdeen, studying under Joseph Black and developing a friendship with James Watt, the inventor of the steam engine.

Small took over the chair of natural philosophy, becoming one of a half-dozen professors and masters at the College. About 100 students were then enrolled in the grammar school, the philosophy school, the divinity school and the Indian school.

The unassuming Scot enlarged his duties in 1760 from teaching physics, metaphysics and mathematics to the field of moral philosophy, which included rhetoric, logic and ethics.

Lecture system new

Small brought to William and Mary the lecture system of teaching, which had become fashionable in Europe. It was believed to be the first time a professor gave regular lectures in a colonial college. He also was instrumental in introducing classroom demonstrations of physics principles to the American form of higher education.

Jefferson's favorite professor left little recorded information about himself. He consciously spurned honors, societies, publications and the other trappings of the professional academician. He appeared to have preferred anonymity, exerting himself to help improve others instead.

Jefferson tribute

One outstanding testimony to Small's talent and influence does remain, however. It is a paragraph in the autobiography of Thomas Jefferson, author of the Declaration of Independence. Jefferson enrolled at William and Mary at the age of 17, two years after Small's arrival. At the age of 77, Jefferson wrote:

"It was my great good fortune, and what probably fixed the destinies of my life, that Dr. William Small of Scotland was then Professor of Mathematics, a man profound in most of the useful branches of science, with a happy talent of communication, correct and gentlemanly manners, and an enlarged and liberal mind.

"He, most happily for me, became soon attached to me, and made me his daily companion when not engaged in the school; and from his conversation I got my first view of the expansion of science, and of the system in which we are placed. Fortunately, the philosophical chair became vacant soon after my arrival at college, and he was appointed to fill it per interim, and was the first who ever gave in that college, regular lectures on Ethics, Rhetoric and Belles Lettres," Jefferson continued.

Small also introduced Jefferson to attorney George Wythe, who later became the first American professor of law when the post was created in 1779 at William and Mary. By then, Jefferson -- as governor of Virginia -- was on the college's board and directed a reorganization which led to the establishment of the chair in law.

Historians have suggested the Declaration of Independence is formulated on principles enunciated by the foremost logician of the time, William Duncan. Duncan was Small's teacher at Marischall.

Small's return to Britain, where he took a medical degree and obtained a practice in Birmingham on recommendation of Benjamin Franklin, has been attributed to his yearning for the refinements of city life. In Birmingham, he joined such notables as Boulton, Priestley, Watt and the potter Josiah Wedgwood. His moral and financial support of Watt's work helped his inventor friend through the frustrations of completing the first steam engine.

Small also continued to support William and Mary, even from England. He purchased and shipped an elaborate set of "philosophical apparatus," as it was then called, including barometers, telescopes, lenses, an electrical machine and prisms. At the time, it was the best collection of its sort in America and helped further the application of Small's teaching style throughout the colonies.

He died in February 1775 at the age of 40. Three months after Small's death, Jefferson sent him six dozen bottles of Madeira wine as an assurance of his personal affection despite the revolutionary thunderstorms against England which were brewing in the colonies. Jefferson had not been aware of Small's death.

Today the physics building on campus bears Small's name in recognition of his early academic contributions to William and Mary and to the young American colonies.

Campus Wrap-Up

Filing Deadline Oct. 15

Filing for the office of Student Association President will be open until 5 p.m. tomorrow in the SA office in the Campus Center. The election will take place Monday, Oct. 20. For further information, call the SA office at Ext. 350, or Dave Nagle, elections chairman, at 220-0977.

Physics Colloquium Friday

David Hafemeister will discuss "A Physicist's View of Energy Legislation in the 94th Congress" at the physics department colloquium at 4:30 p.m. Friday, Oct. 17, in 109 Small Hall. Coffee will be served in the conference room at 4 p.m.

Women in China Lecture

Roxane Witke, professor of Chinese history at the State University of New York at Binghamton and research associate at the Harvard East Asian Research Center, will speak on her recent interviews with Chiang Ching (Madame Mao Tse-tung) and the role of women in the People's Republic of China at 8 p.m., Oct. 23, in Asia House.

The public is invited to attend.

Holiday Trip to Russia

Students interested in a trip to Russia during Christmas vacation should plan to attend a meeting at 7:30 p.m., Wednesday, Oct. 22, in Jefferson Lobby. The tour, which will depart Dec. 29 and return Jan. 12, will focus on highlights of Leningrad and Moscow. Gilbert McArthur of the history department, 335 Morton, Ext. 500, has further information.

Works Available For Office Display

Thomas E. Thorne, Professor Emeritus of Fine Arts, has recently placed a number of his paintings and other works of art on permanent loan with the College Art Collection.

Mr. Thorne has specified that these art works may be lent, with the supervision of the registrar of the art collection and the chairman of the department of fine arts, for decorative use in offices located in College-owned buildings.

Consequently, these items are being made available, for an indefinite period of time, to campus offices where there is a reasonable degree of security and supervision.

The collection will be available for examination and selection.

Society Has New Initiates

Seven students have been elected to membership in the Eta Rho chapter of the German Honorary Society, Delta Phi Alpha.

They are: Elizabeth Bartman '77 of McLean; Pam Byam '76 of Williamsburg; Melissa Locke '77, Alexandria; Robin Stanley '77, Roanoke; Helen Taylor '76, Williamsburg; Lisa Van Divender '76, Richmond; and Ellen Williams, '76, Falls Church.

The students have accumulated a grade average of 2.2 or better in German.

Law Society Sets Program

The Mary and William Women's Law Society will hold its second speakers program on Thursday, Oct. 16, in Rooms A&B of the Campus Center.

The title of the program is "State Client Involvement Committee: An Alliance of Welfare Clients, Welfare Workers and Community Residents Dedicated to the Improvement of the Welfare System in Virginia."

The business meeting begins at 12:30 p.m. and the program at 1 p.m.

Borrowers will be responsible for the moving and hanging of the paintings borrowed and any expenses incurred in the process. To apply for a loan and to make an appointment to see the objects being offered, call Louise Kale at Ext. 650.

Women Divers Needed

Earl McLane, associate professor of philosophy, is coaching the women's diving team this year.

Women interested in diving who would like to come out for instruction are asked to contact Mr. McLane at his office, Ext. 656, 657, 658. No previous experience is necessary.

McLane has been interested in diving for some time and has coached his son Shawn to national ranking in both high and low board diving.

As his son's coach, he has attended top diving clinics including those held by Dick

Kimball, University of Michigan coach, in Florida; and Ron O'Brien, Ohio State University diving coach.

Divers will practice Monday, Wednesday and Friday at Adair pool from 3:30 to 5 p.m. and Thursday in the gym on the trampoline.

Candidate's Fair Is Next On Club Agenda

Members of the College Women's Club will attend the League of Women Voters Candidates Fair Tuesday, Oct. 21, at 8 p.m. at the United Methodist Church.

Mrs. Mark Littlefield, club vice president, has announced that the club is one of the sponsors of the Fair, and she especially urges members to bring newcomers to the community to the event.

Candidates for the General Assembly, James City County Board of Supervisors, York County Board of Supervisors from Bruton District and other local offices will be present to discuss issues on an informal basis with the voters.

The Candidates Fair is open to the public free of charge and all are invited to attend.

Workshop On Printing Set

The Botetourt Bibliographical Society will sponsor a printing workshop Friday, Oct. 24, at 2 p.m. in the Rare Books room of Swem Library for students and other members of the college community.

The workshop will include instructions on how to set type, ink plates, take proofs and operate a hand printing press.

Robert P. Maccubbin or David C. Jenkins of the English department faculty may be contacted for further details.

SA Head Resigns Post

Student Association president Paul Jost '76, Hampton, has resigned his post for health reasons.

Jost, presently hospitalized in Portsmouth, announced his resignation to the student senate Oct. 8.

He will be replaced temporarily by SA vice president Peter Garland '77 of Scotia, N.Y. New elections will take place Oct. 20.

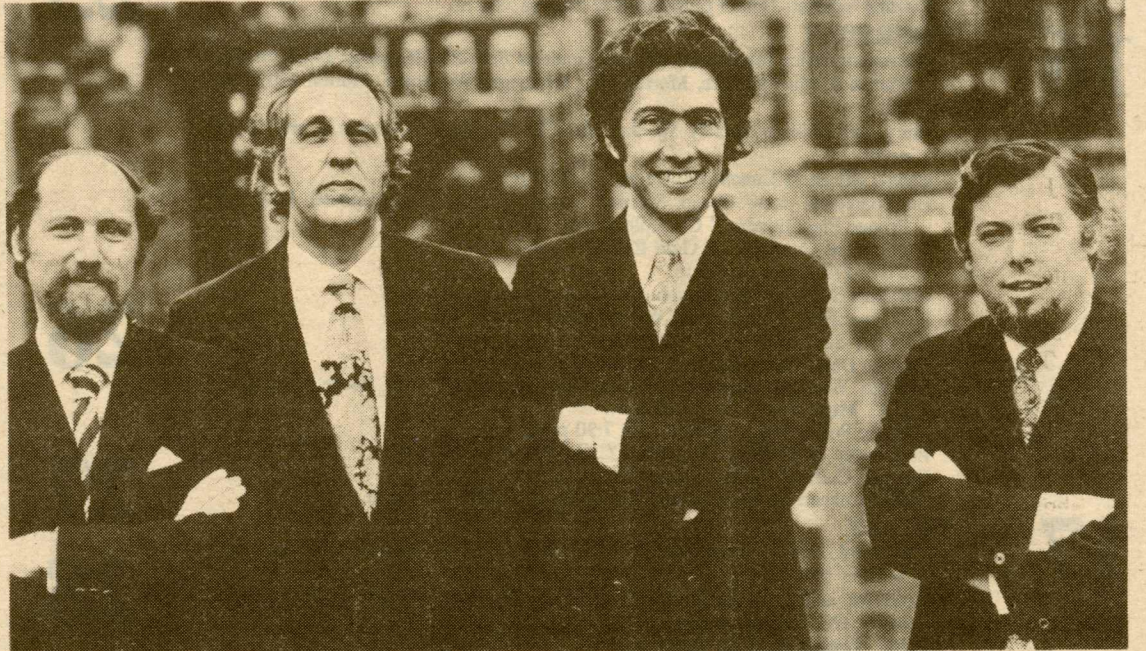

Opera Preview Slated

Leading singers from the Puccini opera Tosca will perform Monday, Oct. 20, at 1 p.m. in Phi Beta Kappa Hall.

Sponsored by the Virginia Opera Association in Norfolk as part of its opera education program, the performance will be heard by York County and Walsingham Academy students as well as students at William and Mary. Faculty and staff are

also invited to attend. There is no fee.

Appearing in the Tosca preview will be Alexandra Hunt, a leading soprano of the La Scala and Hamburg Statsoper companies; Aaron Bergell, leading tenor with the National Opera of Israel; Frederick Burchinal, Metropolitan Opera baritone; and Cary Archer Smith, a Virginian now performing with the San Francisco Spring Opera.

Michael Tree, David Soyer, Arnold Steinhardt, and John Dalley, members of the Guarneri String Quartet, will open the 1975-76 Concert Series with a performance at 8:15p.m., Oct. 16, in Phi Beta Kappa Hall.

New Rogers Offers Better Lab Facilities

The new tenants of Rogers Hall for chemistry and philosophy are adjusting to their new quarters.

The building was completed just in time for faculty members to move into their new offices before fall semester classes began.

A month later, the confusion caused by 23 faculty members and approximately 43 tons of equipment and supplies moving to a new location--all in the space of 13 days--has abated considerably. Faculty members

have settled into their offices, books in the departmental libraries have been transferred from cartons to shelves, and bulletin boards are gradually being prepared with academic notices.

Official ceremonies to dedicate the building were held last weekend as part of the Homecoming festivities.

Moving into a new building with handsome new furnishings and facilities is exciting in many respects, but some adjusting is necessary, as Richard Kiefer, chairman of the chemistry

department, and David Jones, chairman of the philosophy department, pointed out last week.

The philosophy departmental offices occupy the first floor, along with a large classroom, the departmental library, several chemistry labs and a chemical storeroom. The philosophy department, which moved from the second floor of Jones Hall, has about the same amount of space in its new quarters.

Because the building houses only two classrooms, however, both philosophy and chemistry classes are also scheduled in other locations around campus and professors find themselves walking more now.

Faculty members in philosophy are adapting to their new ground level perspective. One innovative faculty member who found the high window sills blocked his view, built a platform for his desk. Other professors quickly dubbed his office "the throne room."

New Rogers was originally designed to house chemistry only. The philosophy department was added to the plans sometime later to optimize space utilization.

Both departments have rooms set aside as departmental libraries, which Jones described as being used steadily by students.

The chemistry department is generally very pleased with its new home. Faculty offices occupy the second floor, along with several teaching and faculty research laboratories and the department's library.

Kiefer cited improved lab services and increased safety as

the chief advantages of the new Rogers Hall.

The new laboratories are equipped with such devices as emergency eye wash fountains and safety showers. Although the old Rogers labs were also equipped with the fountains and showers, Kiefer expressed doubt that they would have functioned properly in an emergency.

Safety shields built to guard against minor explosions spreading, separate lab tables in the new building. Each table is also wired with electrical outlets. In old Rogers extension cords had to be run along the ceilings and dropped to the tables because of lack of outlets.

An elevator makes transferring equipment, especially glass supplies, to the second floor laboratories easier and safer. In old Rogers everything had to be

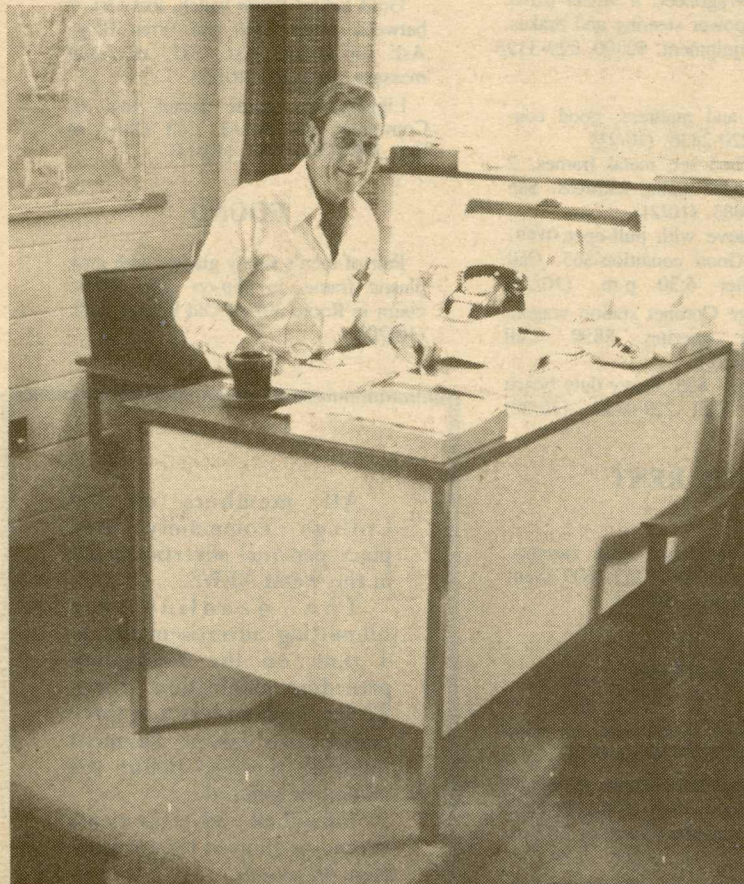

carried up and down several flights of stairs.

Two special storerooms for solvents and gas cylinders will considerably minimize the danger of explosions and fire. Each room is equipped with such safety features as fire sensors, safety lights and switches and good ventilation.

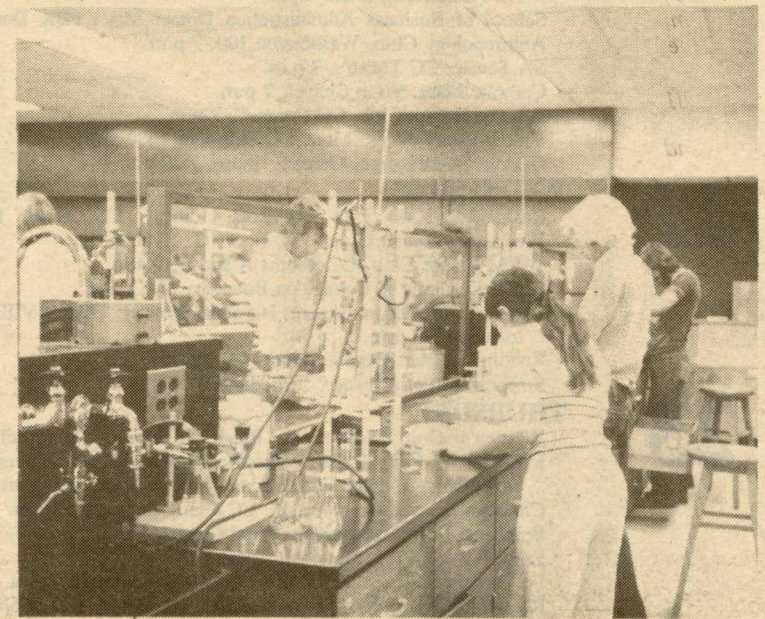

A glass shop provides facilities for repairing and constructing necessary apparatus.

Instructor Ed Katz, who also oversees the chemical storeroom, is trying to keep tabs on what is stored where and to keep up with the demand from the laboratories until shelving units that do not meet specifications for acid-resistance can be replaced.

Once the storeroom has been set up properly, it will be a definite improvement over old Rogers facilities, said Kiefer.

Lewis Foster of the philosophy department in his "throne room."

Adequate electrical outlets and protective safety shields are features of new chemistry laboratories.
