Holiday Gift for Campus

Although Christmas gifts are normally exchanged on the 24th or 25th of December, members of the College community will be getting one gift early this year.

Beginning Monday, December 13, a special Bicentennial Christmas tree, the gift of President and Mrs. Graves, will be on display in the Great Hall of the Wren Building for the College community, area residents and visitors to Williamsburg during the holiday season.

The giant 18 foot Canadian Swamp Balsam will be placed in the center of the Great Hall, decorated with Americana from across the country in keeping with the theme, "From Sea to Shining Sea."

On display until January 1, the community Christmas tree on campus replaces the traditional tree in the President's House, which has been the focal point of receptions and parties for segments of the College community during the holiday season. As an economy measure, the receptions and entertainments have been cancelled this year.

Decorating the tree will be more than 200 handmade ornaments designed by Mrs. Virginia Hughes, area coordinator for Ludwell Residence Halls. Mrs. Hughes has been trimming the College tree each Christmas for the past six years.

Fifty of the ornaments this year will each represent a state in the union. With the help of alumni, students and friends of the College, Mrs. Hughes has collected tobacco grown in Virginia, lava from Hawaii, miniatures of the Maryland crab, Maine lobster and New Mexico roadrunner; a corn-husk doll from Iowa, aspen from Colorado, a Mickey Mouse doll from Disneyland in Florida, a scrap of wood from a prospector's cabin in Nevada and other items to symbolize each of the 50 states.

Tiny American flags--one for each state and one for each of the original American colonies--will ornament the Bicentennial tree, as will a Betsy Ross doll and a diorama of the winter at Valley Forge.

International Scholars Gather Here For Bicentennial Literary Conference

"American Literature of the Revolutionary War Era" is the focus of a major international conference of scholars here, December 8-10, in observance of the nation's Bicentennial.

The conference is being sponsored on behalf of the Modern Language Association of America by the College with the support of the National Endowment for the Humanities, and the public is invited to attend. Registration inquiries should be made to Conference Director Carl Dolmetsch, Professor of English. Headquarters for the conference will be the Williamsburg Lodge Conference Center.

Some 250 literary scholars from the United States and several foreign countries will participate. Alfred Owen Aldridge, professor of comparative literature at the University of Illinois at Urbana-Champaign, will give the opening address at 9:30 a.m. Wednesday. Aldridge, who is the author of books on Benjamin Franklin and Voltaire and who is currently at work on a new book on the life of Thomas Paine, will speak on "Paine and Dickinson."

Robert E. Spiller, Felix E. Schelling Professor of English Emeritus at the University of Pennsylvania, will present the second major address to conference participants at 9 a.m. on Thursday. Considered the dean of American literary scholars in this country, Spiller will discuss "The Cycle and the Roots: Toward a National Identity in Literature."

A third major address will be given by Lewis Leary, who is William Rand Kenan Jr. Professor of English Emeritus at the University of North Carolina at Chapel Hill. Leary is known internationally for his contribution to American bibliography. His address, on "The Dream Visions of Philip Freneau," begins at 9 a.m. on Friday, Dec. 10.

Seminars during the three days of the conference will include discussion of a variety of topics, including American Puritan literature, resources for the study of literature, drama and theatre, women in literature and new approaches to the study of literature as each relates to the Revolutionary War era.

Several papers to be presented deal with topics ranging from myth and the American Revolution to British views of the American Revolution. Two illustrated talks scheduled for Wednesday evening will consider almanac-makers as "trumpeters of sedition" and revolutionary broadsides.

The conference will also include a concert, "Some of Jefferson's Music," performed by Martin Robbins and James Yannatos of Harvard, Mrs. Yannatos, and by James S. Darling, lecturer in music at the College and choirmaster and organist at Bruton Parish Church. Robbins and Yannatos are the composers of an original oratorio, "To Form a More Perfect Union," which was presented here last week as part of the 200th anniversary of Phi Beta Kappa.

Arrangements have been made for three special exhibits to be mounted for the conference. "Rebellion and Reconciliation: Satirical Prints on the Revolution at Williamsburg" will be on display in the Conference Center Gallery, while "The Road to Independence," an exhibit of maps of North America printed between 1763 and 1797, will be shown in the Public Records Office. Rare manuscripts and books from Swem Library and American University Press books are included in the "Manuscripts and American Imprints of the Revolutionary War Era" exhibit in Rooms D and E of the Conference Center.

The committee on arrangements, which is chaired by Dolmetsch, includes Margaret C. Cook, Earl Gregg Swem Library; Joan Downing Dolmetsch, Colonial Williamsburg Foundation; Michael McGiffert, Institute of Early American History and

Culture; Parke Rouse, Jr., Virginia Independence Bicentennial Commission; James R. Short, Colonial Williamsburg Foundation; and Leroy W. Smith and Walter P. Wenska, both members of the English department at William and Mary.

A critique of the conference and assessment of its implications for the future of scholarly and educational endeavors, will form the program of the Early American Literature division of the MLA at its annual meeting in New York, Dec. 26-29.

Participants in the post sessions will include Alfred Owen Aldridge, Ursula Brumm, Professor of American Studies, John F. Kennedy Institute, Freie Universität, Berlin; J.A. Leo Lemay, Professor of English, University of California, Los Angeles; and Thad Tate, director, Institute of Early American History and Culture in Williamsburg.

W&M Law School Begins Plans For its Bicentennial in 1979

Preliminary plans for the bicentennial of legal education in the United States--dating from establishment of the chair of law at the College in 1779--were formally announced at the Founder's Day luncheon of the Marshall-Wythe School of Law on Friday, Dec. 3.

The luncheon, attended by law faculty and other guests in the Great Hall of the Sir Christopher Wren building, marked the 250th anniversary of the birth of George Wythe, the colonial and revolutionary lawyer who became the first professor of law at William and Mary. E. M. "Tiny" Hutton, administrative assistant to Congressman Thomas N. Downing and longtime student of Wythe's life and career, was the main luncheon speaker.

A bicentennial gift of a volume reprinting the Virginia colonial code of 1764 was presented to the law school at the luncheon by R. Harvey Chappell, Jr., former rector of the Board of Visitors, on behalf of the Virginia State Bar. The reprinted eighteenth-century volume was commissioned by the bar group as part of the Virginia observance of the national bicentennial this year.

William F. Swindler, John Marshall professor of law and chairman of a law faculty steering committee on 1779-1979 bicentennial plans, announced the opening phases of the anniversary program. These include

preparation of three scholarly volumes on the role of the College and its alumni in eighteenth-century law, and the raising of funds to reconstruct the original law library of Thomas Jefferson.

As governor of revolutionary Virginia, Jefferson led the reorganization of the William and Mary curriculum which established the new law course on December 4, 1779. The three volumes projected for the anniversary will document the role of Jefferson and others, identified with the College, in colonial, revolutionary

and post-revolutionary law and government.

The Jefferson law collection--part of a large library which the third President gave to the nation to rebuild the Library of Congress after the burning of Washington in the War of 1812--will provide the law school with one of the major sets of rare English law books in the United States. Swindler pointed out that it will include all or most of the volumes which were accessible to Wythe when he began his first classes in law at William and Mary.

Society Honors Frances Robb

Frances Lightfoot Robb, an alumna of the College, was honored Friday night at the opening dinner of the Phi Beta Kappa Bicentennial meeting for her 25 years of service to the Society.

Miss Robb received a gift from John Hope Franklin, President of Phi Beta Kappa, at a colonial-style dinner in the Virginia Room of the Williamsburg Lodge at which the annual Phi Beta Kappa Gauss, Emerson, Science Book awards were presented.

Alpha of Virginia Chapter at the College took the occasion to present a resolution thanking Miss Robb for her assistance to the Chapter and to express its appreciation for her many contributions to the Society.

Miss Robb, daughter of Mrs. R. G.

Robb and the late Robert Gilchrist Robb of Williamsburg, attended Sweet Briar College and graduated from William and Mary in 1948 with a B.A. degree in English. She joined the staff of Phi Beta Kappa when its offices were located on the William and Mary campus and later moved to the United Chapters office in Washington. During her tenure she has worked with the Visiting Scholar program, arranging visits for speakers at colleges and universities throughout the country.

Her father was a member of the chemistry department of the College and served as chairman for fifteen years. He was also a treasurer for Alpha chapter.

Sorority Presents \$500 Award To Swem Library

In recognition of the 200th anniversary of the founding of Phi Beta Kappa at William and Mary--the beginning of the fraternity system in the United States--Delta Delta Delta sorority last week presented a \$500 check to Swem Library.

Tri Delta national president Mrs. Jeanne Grimes of Arlington, Texas, presented the award to Librarian William Pollard in a brief ceremony Wednesday afternoon in Botetourt Gallery. Local chapter president Martha Earl of Norfolk, alumnae advisor Jan Tomlinson, and several members of the William and Mary chapter attended.

The award was made from the Delta Delta Delta Century Fund, which was begun on the 75th anniversary of the sorority in 1963 and will be continued until 1988. The sorority was founded at Boston University in 1888. Money for the fund is derived from voluntary contributions by individual members, friends and collegiate and alumnae chapters.

W&M News Holiday

The December 14 issue of the *William and Mary News* will be the last before the Christmas holidays. Publication will resume with the January 18, 1977, issue.

PBK Initiation, Oratorio Highlight Weekend Events

Photos by Lyle Rosbotham

At its annual meeting Sunday, Alpha of Virginia Chapter of Phi Beta Kappa initiated 31 new members and honored past presidents of the chapter.

Four past presidents, Robert H. Land (67-69), chief of the general reference and bibliography division of the Library of Congress; Theodore R. Dalton (64-67), U.S. District Judge of the Western District of Virginia; John Garland Pollard, Jr. (56-59), Lancaster, Va.; and James Wilkinson Miller (72-75), Williamsburg, were recognized at the Chapter's annual banquet held in the Campus Center ballroom and attended by over 200 persons. Current president of the chapter is John Melville Jennings of Richmond.

A public initiation was held earlier in the day at Phi Beta Kappa Memorial Hall. New initiates received their keys from President Graves, and certificates of membership from John R. L.

Johnson, Jr., of Chadds Ford, Pa., rector of the Board of Visitors and a member of Alpha Chapter. (Photo at left.)

Thomas Heacox of the English department, chosen as Phi Beta Kappa poet this year, read two of his poems at the banquet. The one composed especially for PBK was entitled "Talking Animal." There was no speaker at this year's ceremony because of the bicentennial meeting of the United Chapters of Phi Beta Kappa, which included an address by Edward H. Levi, Attorney General of the United States, on Sunday evening.

Delegates to the bicentennial meeting of the United Chapters attended a presentation Saturday evening of the original oratorio "To Form a More Perfect Union," which was composed for PBK by Martin Robbins of the Radcliffe Institute and James Yannatos of Harvard. (Photo below.)

President's Report 1975-76

(Note: In previous years, the annual President's Report has been published in booklet form and made widely available. The 1975-76 President's Report is being published and distributed in this format in order to minimize printing and binding costs, while still making the text of the Report easily available to those who are interested in reading it.)

TO: Members of the Board of Visitors

Ladies and Gentlemen:

I have the honor to present my fifth annual report, for the academic year 1975-76, the 283rd year of the College.

My annual report for the 1974-75 academic year focused primarily on the Faculty of Arts and Sciences, and its varied programs and related and supporting activities, at both the undergraduate and graduate levels. It is here that the great bulk of the College's undergraduate students study, and where most of the College's faculty members teach and conduct research. As the official statement of mission, approved by the State Council of Higher Education, makes clear, the heart of the educational mission of William and Mary and the way through which it makes its primary educational contribution to Virginia and to the nation, is the Faculty of Arts and Sciences.

The College of William and Mary, however, is much more than Arts and Sciences. Its objectives as a small university provide undergraduate students with an opportunity, beyond the sophomore year, to enter a program of study in the School of Business Administration leading to the Bachelor of Business Administration Degree, and to elect a concentration in either elementary or secondary education with the School of Education, leading to the Bachelor of Arts degree.

In addition, within the School of Business Administration, the School of Education and the Marshall-Wythe School of Law post-baccalaureate students may pursue professional programs leading, respectively, to the degree of Master of Business Administration; the Master of Arts in Education degree, the Master of Education degree, the Certificate of Advanced Study and the Doctor of Education degree; and the Juris Doctor degree.

I see the programs leading to these professional degrees as fully compatible with the liberal education undergraduate program. Strong academic programs offered within the professional schools are an important part of the College's mission. As I stated in my report last year, these professional programs are growing in size, stature and contributions each year and play an increasingly significant role in William and Mary's mission as a state university.

In my annual report for the 1975-76 academic year I intend to focus primarily on the School of Business Administration, the School of Education and the Marshall-Wythe School of Law.

Thomas A. Graves Jr.

II

The history of Business Administration as an academic field at the College is of interest. Business Administration as a recognized field of study at William and Mary goes back fifty-seven years to the beginning of that era of expansion of the College under the leadership of President J.A.C. Chandler. A School of Finance and Business Administration was established by act of the Board of Visitors in June, 1919, and a four-year course of study led to the degree of Bachelor of Arts in Business Administration.

During the 1920's this School's name was changed to "School of Economics and Business Administration," to "School of Business Administration," and then back to "School of Economics and Business Administration." But after 1935 the School disappeared, with only remnants of its curriculum being continued within the Department of Economics. Then in 1941 a business course of study again appeared in the curriculum, with the inauguration of a Department of Business Administration.

The degree of Master of Business Administration was first offered in 1966 by the Department of Business Administration. In the meanwhile, the Bureau of Business Research had been started within the Department in 1958.

Under the new university organization of William and Mary in 1968, on the recommendation of President Davis Y. Paschall, the School of Business Administration was established. Two years later in 1970, the Board of Visitors authorized the School to award the degree of Bachelor of Business Administration, thus adding to the School's jurisdiction the BBA degree, as well as the MBA degree. Both of these programs soon received the full professional accreditation of the American Assembly of Collegiate Schools of Business, the BBA degree in 1972 and the MBA degree in 1974. It is a great tribute to the energy and vitality of the School of Business Administration that its two major degree programs received their professional accreditation so rapidly.

The growth of the School of Business Administration in recent years, along almost any dimension, has been strong. Of the 966 students receiving the bachelor's degree from the College in May, 1976, 105 of them, or 11%, were awarded the Bachelor of Business Administration degree. Of

Professor James E. Smith addresses a class in the School of Business Administration.

these BBA degrees, 70% went to men and 30% went to women. Those men who received the BBA degree represented 17% of the men in the total graduating class, while the women being awarded the BBA degree constituted 6% of the women in the total class.

The undergraduate degree program in Business Administration, which in junior and senior years builds upon a strong and broad base of arts and sciences, offers students three major options, each having as its prerequisite for graduation a minimum of sixty semester credits in arts and sciences. Students may follow a sub-program in Management; they may focus on a sub-program in Accounting with a Certified Public Accountant orientation; or they may opt for a sub-program in Accounting that is not C.P.A. oriented. In each of these sub-programs students have common course requirements that ensure a broad understanding of Business Administration, and each sub-program provides an opportunity for electives.

The C.P.A. oriented sub-program has an outstanding record of its graduates successfully completing the requirements for the C.P.A. and those who graduate from William and Mary in the other sub-programs in Business Administration do well in the current job market. At the same time, each student in the undergraduate program in Business Administration is receiving a first-rate general education, not only in his freshman and sophomore years but also in his junior and senior years.

As I stated above, 11% of the 1976 graduating class received the BBA degree. I believe that the student interest in pursuing work toward the Bachelor of Business Administration degree will increase over the next several years at William and Mary, probably leveling off somewhere below 20% of the senior class. In addition, the School of Business Administration will continue to serve a large number of students pursuing BA and BS degrees in Arts and Sciences (including Education students) who wish to enroll in electives in Business Administration. Recent trends suggest that this number will also increase.

In September, 1975, the School of Business Administration registered 302 full-time equivalent students at the undergraduate level (in junior and senior years), and this number may well rise up toward four hundred over the next several years.

The progress of the program leading to the Master of Business Administration degree is equally encouraging. At the May, 1976, Commencement Exercises MBA degrees were awarded to seventy students, 67 men and 3 women. In September, 1975, there were 254 full-time equivalent students registered in the MBA program, the majority of them pursuing their work on a full-time basis. This number is still too small to generate the breadth and depth of elective courses which the MBA program should ideally provide for its students, but each year progress is being made. I anticipate that eventually, when adequate faculty and space resources become available, the number of FTE students enrolled in the two-year MBA Program will number approximately four hundred.

"The Faculty of the School of Business Administration . . . deserve great credit for the way in which they have spread themselves in depth and in breadth across two rapidly growing and evolving academic and professional programs."

This degree program is soundly conceived, requiring sixty credit hours which include thirty-six credit hours comprising the common body of knowledge fundamental to basic knowledge, understanding and skill in the professional practice of business management. The remaining twenty-four credit hours are selected from four elective areas, with a student required to take a minimum number of credits in each such area, again ensuring the breadth essential in a truly professional program of study.

At right, Dean Charles L. Quittmeyer (left), awards the first Business School medallion to Thomas J. Watson Jr., chairman of the executive committee of the board of directors of International Business Machines Corporation (IBM). Above, students take notes in business class.

The Faculty of the School of Business Administration in 1975-76, numbered twenty-seven, of whom five were part-time and four had significant administrative duties. They deserve great credit for the way in which they have spread themselves in depth and in breadth across two rapidly growing and evolving academic and professional programs. Despite crowded space conditions, insufficient staffing and heavy teaching and student loads, they are carrying out their teaching and research responsibilities with dedication and skill. They are accepting with good grace the current lack of resources which inevitably is inhibiting to some extent their progress as a faculty and as a School; and they are utilizing well the limited resources of budget, space and staffing now available to them.

The Faculty of the School of Business Administration is active in many ways beyond the BBA and the MBA programs. The Bureau of Business Research, under the direction of Dr. Leland E. Traywick, Chancellor Professor of Business Administration, is recognized as making a major contribution to economic and business knowledge and understanding in this State and region. Faculty members are actively involved in the business community and government, as consultants, teachers, researchers and advisers. Through these activities they make an important and continuing contribution to the practice of management in Virginia and beyond. Many of them are publishing actively in professional journals, and are leading seminars and programs for business organizations and governmental agencies. The extension of the faculty in these many facets of activity is encouraging and important; for William and Mary, as a State university, has an obligation to be of educational and professional service to Tidewater, Virginia and the Nation.

The business community is also reaching back toward the School and is making important contributions of its own. Numerous business managers participated actively in class sessions during the 1975-76 academic year, supporting and enhancing the faculty's efforts to bring the reality of the active world of business to the students. Associate Professor William H. Warren's "telephone visitors" has received national publicity as part of these efforts.

Business executives from across the State and Nation have joined together in support of the School through the School of Business Administration Sponsors, Inc., organized formally in 1970, and dedicated to expanding and strengthening the relationship of the School with the business community. The financial and professional support which the Sponsors, both individually and corporately, give to the School, is sincerely appreciated, and makes an enormous difference to its vitality and progress. Sponsor's Board

members such as Roy R. Charles and W. Brooks George have given unstintingly of their time and effort to the new School over its early years.

Mr. Thomas Roy Jones, one of the most active leaders on the Board of Directors of the Sponsors since its founding and a key influence in the establishment of the School itself, received from the College of William and Mary an honorary degree of Doctor of Laws at the 1976 Commencement Exercises.

The School of Business Administration has made substantial progress since its formal establishment in 1968. Dean Charles L. Quittmeyer, its founding Dean, deserves great credit for this achievement. His enthusiasm, dedication and energy have known no bounds. As a result of his efforts, and those of many others, this School, which is one of increasingly high academic and professional quality, has taken its place as an important and integral part of the College. It is performing increasingly a service and making a contribution, on a Statewide and regional basis, to the practice of business management.

I am encouraged as I consider the School's future. With the appointment of Dr. Thomas H. Williams as the first incumbent of the J. Edward Zollinger Professorship of Business Administration, there is a prospect that there may be greater emphasis on research at the School. The faculty is giving increasing attention to how the School may be of professional service to business organizations through management development programs and consultation. There is evidence of a larger number of cooperative relationships between faculty members at the Business School and elsewhere in the College. The emphasis in admissions, as the number of applications for the MBA Program grows, is increasingly on high quality. As the size of the School's degree programs grows to an increasingly effective resource level, the emphasis of faculty curriculum planning can be more upon integrated and inter-related professional curricula and programs of high quality, responsive to the management needs of business. Contribution to knowledge and skill in management, service to business and government organizations and to the citizens of Virginia and this region, and emphasis on a professional approach to management are attributes that I see the faculty of the School as having an increased opportunity to emphasize in the years immediately ahead.

Great progress has been made, with some truly remarkable accomplishments in a brief period of time. Now the School of Business Administration is in a position to consolidate its gains and to move into the front ranks of education for business management, given adequate resources to do the job.

III

The beginnings of the present School of Education go back to 1693, for since its founding, the College of William and Mary has educated teachers. The Assembly of the Commonwealth reasserted teacher training as a primary objective of the College at its re-opening in 1888, by appropriating \$10,000 for programs designed to strengthen the public school system of Virginia. After 1906, when the College became a part of the State system of higher education, the training of teachers and school administrators continued here, until in 1963 a School of Education was formed. The present School of Education continues in that long tradition and commitment, growing today in programs and purpose.

It is committed in its undergraduate program, in the junior and senior years, to the preparation of young men and women interested in teaching careers. At the graduate level the School is dedicated to the instruction of educational specialists equipped to draw upon both theoretical and practical resources in order to perform in a true professional manner in the classroom. The primary objective of the School of Education thus is to provide high quality degree programs for a limited number of well qualified students in teacher education and educational specialization, with all students admitted to the School having strong backgrounds in the liberal arts and sciences.

The 1975-76 academic year, the second year in the tenure of Dr. James M. Yankovich as Dean, was one of substantial progress in the School of Education.

The School gave evidence of increasingly embracing a high level of purpose and achievement, with the surrounding educational and academic community responding creatively to the School's initiatives. Important steps were taken toward eventually bringing all members of the Faculty of Education together into Jones Hall. New policies were adopted to encourage scholarship and interdisciplinary cooperation.

Several programs were reviewed and updated. Approval was received for an elementary education concentration in Early Childhood Education and an Administration concentration in Special Education. The Special Education Administration degree, drawing its strength from two well established degree programs, has generated considerable interest among state and national universities and educators, and has been taken as a model for similar programs in other institutions. Similarly the response locally to the Elementary Education Concentration in Early Childhood Education has been very high and encouraging.

Program and degree emphases introduced in 1974-75 have been increasingly well received. The Counseling emphases in Community College Counseling and Student Personnel Services show a healthy level of applicant interest. The program in School Psychology gives the School an increasingly significant impact upon State educational policy.

One quality that typifies these new programs is that each is multi-disciplined, both within the Faculty of Education and in the Faculty of Arts and Sciences. The course offerings are coming to reflect directly the multi-disciplinary nature of education, and I personally find this development very gratifying.

The process of change in the undergraduate education programs has led to and has provided real evidence of increased cooperation between the Faculties of Arts and Sciences and Education. There have been modifications in policies and procedures related to academic credits and grading. There also have been initiatives on the part of the Faculty of Education to involve members of the Arts and Sciences Faculty in education programs. The Science Speakers Bureau is one example that has been especially successful and well received. The trend toward cooperation between the two faculties promises to provide a most beneficial opportunity for intellectual cross-contact and for developing mutual respect.

The faculty members of the School of Education have had a very productive year in their professions. In research and publications, in the sphere of public policy, and in professional educational organizations the Faculty has been especially active.

In 1975-76 the School's community impact changed somewhat from past years. Discussions in community forums have centered on interdisciplinary questions and matters of educational philosophy. The sphere of influence of the School has expanded beyond professional educators to include the parents of school-age children. Dean Yankovich has encouraged the faculty in its public activities toward programs that might have a wide as well as a local impact. The involvement of the faculty in programs focusing on broad public policies gives William and Mary an opportunity to participate in the formulation of educational policy at a state-wide and even a national level.

Placement in educational institutions is no longer the sure thing that it once was, and the School of Education is vigorously adapting its programs to be responsive to existing needs while intensifying its pursuit of and dedication to quality. The response from the educational community to this current thrust of the School's programs has been gratifying.

All of the efforts at the School of Education during the past year have been based on the commitment to the pursuit of professionalism in a true sense within the field of education. It is Dean Yankovich's conviction, in which he has my full support, that William and Mary should take a leadership role in the Commonwealth of Virginia, in the demand for true professional training, stature and standards. This institution, by virtue of its history, personnel and student body, can be the most significant force in education in Virginia, calling for increased training and higher standards. An education degree from William and Mary, as a result, will have its own special significance.

As Dean Yankovich has expressed it, within the educational community the professional school is unique and necessary. Only the professional school is in a position to maintain a delicate

balance critical to evaluation and improvement in education; to stand back far enough from day-to-day practice to maintain philosophical perspective without drawing away so far from educational institutions that a realistic understanding of their operations is lost. This position offers a professional school of education the opportunity and charges it with the responsibility to examine and question practice and underlying theory, necessary levels of training among practitioners and the importance of continued education within the profession. Hence a school of education has the opportunity to transcend its important role of training or preparing teachers, to develop in addition the character of a regional center for creative problem-solving. It can reach out and make a contribution far beyond its own walls.

In a special way, within a college such as William and Mary, the School of Education can be an agency that unifies the various elements of the entire institution and brings each discipline, in combination with others from throughout the College, to bear upon the improvement of learning conditions for youths. The Faculty of the School of Education, working with intelligent and well-prepared students, is developing a program emphasizing the behavioral and philosophical underpinnings of learning. Surely this emphasis is appropriate within an institution committed to liberal education.

What the School of Education is striving for is helping it, and indeed the College, to act up to its image, and indeed above its image, which is what leadership is all about. In the past two years, through the enthusiastic and skillful efforts of Dean Yankovich and the Faculty, the School of Education has moved strongly toward a position of professional leadership. Now it is increasingly in a position to exert that leadership in the development of higher standards and deeper understanding of the education profession.

Above, Dean James M. Yankovich. At right, Professor Armand J. Galfo instructs students in educational applications of the computer. Below, a student teacher works with her students during her practicum.

Dean William B. Spong Jr.

IV

The academic year 1975-76 was a year of transition for the Marshall-Wythe School of Law, whose beginnings rest upon a venerable tradition. Antedated only by the Vinerian Professorship at Oxford and the chair at Trinity College in Dublin, the Chair of Law is one of the oldest in the English-speaking world and the oldest in the United States. Through the efforts of Thomas Jefferson, the Board of Visitors created a professorship of Law and Police on December 4, 1779.

The first occupant of the Chair was George Wythe, a leader in the struggle for independence, a signer of the Declaration of Independence, a member of the Federal Constitutional Convention, and an inspirational force in the development of legal education. Those who studied in his offices included John Marshall, the second Chief Justice of the United States. From these two men—Wythe and Marshall—the School of Law gained its present distinguished name.

The current modern program at the College of William and Mary in the professional study of law was established in the 1920's. Over the past fifty years it has grown markedly in size and quality. The program is now structured to prepare graduates to meet the manifold needs of our society, whether it be in the modern practice of law in Virginia or across the nation or in such allied endeavors as business, politics, or public service. It is the aim of the Marshall-Wythe School of Law to prepare its graduates for a career in the law, marked by significant legal achievement and adherence to the highest ideals of the profession.

Over the past fifty years the School has grown from a few basement rooms to its present overflowing quarters. Thanks to a highly competitive admissions situation with 2006 applicants applying for 156 places in the entering class in 1975-76, and as a result of careful selection, the student body is of the highest quality. The median grade point average of the entering class in the fall of 1975 was 3.39 and the average LSAT was 617.

The students are taught by an able and dedicated faculty that has determinedly held standards of academic performance high and has patiently endured the most difficult conditions of overcrowding in the present facility. It is a tribute to the high quality and character of both students and faculty that the School is at the present time so professionally healthy and sound, given the circumstances under which it has been forced to operate.

Great credit is also due to Professor Emeric Fischer, who served for the 1975-76 academic year as Acting Dean, accepting this position at my urging on very short notice just before the start of the session. He has conducted the affairs of the School with equanimity, wisdom, good humor and skill, providing an environment in which the educational program maintained its high quality and balance in a surrounding atmosphere that at times was bleak and often discouraging. The School and the College owe Professor Fischer, as he returns to his first loves of teaching and research, a lasting debt of gratitude.

A major factor in the life of the School of Law through this transition year was, of course, the threat to its professional accreditation brought by the action of the Council of the Section of Legal Education and Admissions to the Bar of the American Bar Association. The Board of Visitors is fully aware of all of the details related to this difficult situation and I shall not recite them here.

As of this writing I believe that the School of Law has come through the transition year of 1975-76 with renewed confidence and strength, and with clear expectations for encouraging developments in the future. The Law School Association of the Alumni of the School has remained steadfast and loyal in its support and leadership, both morally and financially. The 1976 General Assembly acted with wisdom and foresight in an extremely tight budget situation in appropriating funds for site preparation for the new building for the Law School. Governor Godwin gave this action and the Law School's request for urgent and special consideration his full support. The construction of the new building for the National Center for State Courts was started in the spring of 1976, and as of this writing ground has been broken, adjacent to that site, for the new Law School building. The American Bar Association has been most encouraging in view of this progress, and has indicated its continuing support as long as progress continues to be made on the construction of the new building. The new Dean of the Law School, former United States Senator William B. Spong, Jr., with full support from students, faculty and alumni, is devoting every effort toward that end. I feel confident that under Dean Spong's leadership the School will continue to move forward to new high levels of

service to the legal profession in the Commonwealth and the nation.

The curriculum of the Law School continued to develop well during the 1975-76 academic year. Increasing emphasis was placed upon clinical experience within the academic program, and the faculty devoted substantial attention to the development of that component. There was also special emphasis placed upon interdisciplinary offerings which are of increasing interest to students. Another innovation was the introduction of the Admiralty Law Seminar which was, from all reports, highly successful.

The Exeter Program was also substantially improved in the past year, and has a most encouraging future.

Dean Fischer and his faculty colleagues went out of their way to attract to the School throughout the academic year visiting legal scholars and distinguished jurists as guest lecturers, and these individuals made a great contribution, in depth and in breadth, to the educational experience of the students.

"I feel confident that under Dean Spong's leadership the School will continue to move forward to new high levels of service to the legal profession in the Commonwealth and the nation."

The prospect of such exposures and relationships being increased many fold is, of course, most encouraging for the future, as we look forward to the Law School being directly adjacent to the National Center for State Courts and all of the latter's varied resources.

I see Williamsburg becoming a major center in the United States for legal education, research and administration. If the present planning for the Law School and the National Center is implemented to our high expectations, and if these activities in turn attract other judicial and legal organizations of national and regional character and reputation, as we believe they will, the future does indeed appear bright.

The academic year 1975-76 has, I believe, been a turning point in that direction. The Marshall-Wythe School of Law is in a position now to fulfill its historic promise of becoming a center of first rank for legal education in the State and Nation.

Law students discuss a case assignment in the law library.

V

Over the past several years each of the three Schools--Business Administration, Education, and Law--has been seriously handicapped by problems of inadequate space, physical facilities inappropriate to its education and professional needs, and the lack of a central facility about which all of its members--faculty, students, and staff--could focus their interests and energies. At the Law School this problem has reached crisis proportions that has threatened accreditation; at the Business School it has resulted in the School's inability to expand its services, faculty, and programs at projected and approved levels; at the School of Education it has meant different parts of the School being in such diverse locations as the basement of James Blair Terrace, the first floor of Washington Hall and the second floor of Hugh Jones Hall. Faculty, students and administrators have suffered through these difficult spaces and times with patience and restraint, as the College has mounted a comprehensive renovation and building program designed to bring its total physical facilities up to a level where they truly support William and Mary's mission.

There is still more time that must pass, for reasons beyond the control of the Board of Visitors and the College, but the plans are clearly drawn and the end is coming into sight. It is my expectation that the new Law School building will be completed in the 1978-80 biennium. It is my hope that Old Rogers Hall will be renovated as the new home for the School of Business Administration in the 1978-80 biennium. Just as soon as that is accomplished, Hugh Jones Hall will be remodeled to accommodate all of the School of Education. All of our capital outlay requests are focused toward those goals. There is a relationship between the quality of the environment and the quality of education, and we intend that it be a strong and positive one.

At the start of this report I stated that I see the programs leading to graduate professional degrees in the three Schools as fully compatible with the liberal education undergraduate program. I see a BBA degree and a Bachelor of Arts degree in education as compatible with the central thrust of the College. The key to this compatibility to me is the commitment of faculty members in all schools and faculties to the fundamental values of a liberal education, support for the principles of a general education at the undergraduate level, in depth and in breadth, regardless of the discipline or profession with which they are associated. An important part of this commitment is a willingness and interest in reaching out beyond one's own field, to build bridges, to take advantage of other resources of the College, in combining skills and knowledge, for the benefit of the student.

I see increasingly evidence of this commitment, among the schools, and between the schools and the Faculty of Arts and Sciences. In important ways this is our hope and our strength for the future of William and Mary.

The progress of the three schools over the past several years is the result of the dedication and skill of many faculty members and administrators, and is greatly assisted by student bodies of high motivation and quality. Great credit must also go to Dr. George R. Healy, Vice President for Academic Affairs and Provost, who has been and continues to be the strong link among the schools and between them and the rest of the educational enterprise. In a period of continuing scarce financial resources, of inadequate space, of not enough faculty and staff to do well all that is desirable and needed, his are the crucial and

The 1976 Charter Day was marked by an address by British Ambassador Sir Peter Ramsbotham (left) and the publication of Their Majesties' Royall Colledge by Jack E. Morpurgo (center). Also taking part in the ceremony were (from left) Governor Mills E. Godwin Jr., President Graves and Harvey Chappell Jr., then rector of the board. On May (photo below) the Campaign for the College was announced. John R. L. Johnson Jr., current rector of the board, addresses an audience of College faculty and staff and friends of the College who gathered for the official announcement.

critical judgments on priorities, budgets and allocations that sometimes are "yes" and often must be "no." He continues to work patiently, quietly and very effectively with deans and faculty alike, with good humor, a sense of balance and perspective that is a great asset to this College.

VI

In the 1975-76 year there have, of course, been many other developments, of great significance and import at the College, beyond those on which this Report has focused.

We have had our full share of festivities and have made important contributions, through programs and initiatives of our faculties, students and administrators, to the celebration of the Nation's Bicentennial. Charter Day 1976 was a highlight of the year, with an address by British Ambassador Sir Peter Ramsbotham and the publication of *Their Majesties' Royall Colledge* by Dr. Jack E. Morpurgo.

In May 1976, we launched, after months of careful consideration and planning, the *Campaign for the College*, with a comprehensive goal of \$19,000,000. As of this writing, I am encouraged by our early progress, despite continuing recession and inflation and despite less than adequate resources to mount fully the effort that is called for. To me the important facts will not be just how much money is raised over what period of time; rather they will be that we are raising to a new high level of visibility and support the needs of this College, for endowment, annual giving and testamentary gifts, on a continuing basis, from the alumni and friends of William and Mary. It is this support from the private sector, on a *high and continuing* level, that will make the difference, in faculty development, student assistance and program enrichment, in those critical areas that speak to the College's unique mission and quality. To those in leadership and volunteer positions in the *Campaign for the College* I am most grateful.

I do not need to dwell on the financial constraints with which we have had to deal in the past year. They have been serious and continuing, and they have had an impact upon every part of this institution. Individual faculty members, academic departments and educational programs have been hindered in many significant ways from carrying out their jobs and their objectives. The environment in which faculty members teach and students study has been severely affected in quality, for lack of sufficient financial resources in a period of rising costs.

There is every reason to believe that this situation will continue, for there continues to be a substantial shortfall, at the State level, with financial needs increasing across the State. At this writing there is no provision in the 1976-78

"Over the past several years each of the three Schools . . . have been seriously handicapped by problems of inadequate space, physical facilities inappropriate to its education and professional needs, and the lack of a central facility about which all of its members . . . could focus their interests and energies."

Chemistry students, accustomed to cramped quarters in Old Rogers Hall, now have new facilities and equipment in the new Rogers Hall laboratories on the new campus (at left). At right President Graves (center) discusses William and Mary's financial problems in a meeting with (from left) Academic Vice President George R. Healy, Vice President for Business Affairs William J. Carter and Budget Director Dennis K. Cogle.

Below, Jack D. Edwards, dean of the Faculty of Arts and Sciences, addresses the Alumni College Commencement in the Wren Chapel.

Biennium Budget as appropriated by the 1976 General Assembly, for faculty salary increases or for classified salary regrading in 1977. This is at a time when, according to the most recent AAUP data, faculty salaries at William and Mary are in the bottom fifth of the average of our Class I university peer group. The situation in regard to fringe benefits is even more discouraging. We must continue to make every effort, as the top priority of the College, to turn this situation around.

Despite these dismal data and the inevitable debilitating effect which they have on both pocketbooks and morale, the faculties of the College continue to fulfill their responsibilities as teachers and researchers with skill and care. It has been a very good year at William and Mary, in its essential mission of education, thanks to their loyalty, creativity and commitment to their profession and to the College.

Despite predictions to the contrary in some circles across the country and in Virginia, the quantity and quality of applications for all major programs of the College held up very well in 1975-76. William and Mary continues to have an excellent reputation, thanks in part to a first-rate student body that is already here, and they tend to attract young men and women of equal calibre. Nevertheless, the situation can never be assumed to be static, and we must never fall back toward complacency. In all educational programs we are making special efforts toward active and affirmative recruitment of outstanding applicants, especially in areas where we anticipate that some softness may develop.

The administration and staff of William and Mary are here primarily to support the educational mission of the College, to help provide an effective environment for good teaching and learning to take place, to run interference for faculty and students where they can be helpful, to deal with the complexities of the surrounding environment, and of simply administering a community of more than 1300 acres and 100 buildings where 6500 diverse individuals live and work and relate to each other. They receive more complaints than kudos at times; are often confronted with more problems than solutions; have less resources than they need to do their jobs well and still are understandably accused of drawing resources away from the educational side of the enterprise; are faced more and more with the increasing needs and requirements of the state and federal governments for data and reports, in the interest of coordination, control and accountability.

Much of what the administration and staff does, day in and day out, does not show, is not even known by most of us. This makes it no less

important and essential to the forward movement and good health of the College community.

I am sincerely grateful for the hard work, devotion, creative management and support of the educational mission of the College, on the part of members of the administration and staff. I feel privileged to be associated with them.

This past year, under the leadership of Mrs. Jean Bruce and her colleagues on the Board of Directors, the Society of the Alumni has been of enormous support to the College. My only regret is that financial constraints have largely prevented my getting out to the alumni chapters across the state and nation to say thank you to the members of the Society on a personal basis. The close relationship between the College and her alumni, in compatibility of interest in mutual support of our objectives and our programs, and in financial support during a critical financial period, is very gratifying. Out of this relationship came the development of the highly successful Alumni College in June of 1976.

The Board of Visitors, now with a new Rector and several new Board members, has continued in

the past year to provide the wise and creative governance to the College, that is so essential to its mission. Your support and leadership are sincerely appreciated.

I find an increasingly close working and personal relationship between members of the Board and members of the faculty and student body; and, as you know, we are seeking new ways to foster these relationships still further. The Board, the administration, the faculty and the student body each has its own distinct role at the College, and it is important that we keep these differentiations constantly in mind if each of us is to carry out our responsibilities effectively in the interest of the College. But this principle of separation of authority and responsibility is entirely compatible with the most encouraging relationships and communications that are developing among these several groups. The environment of mutual support that is thus fostered is clearly in the interest of William and Mary as we face together the opportunities and problems of the late 1970's and early 1980's.

Addendum

The Addendum is a record of some of the significant occurrences and facts of the period between July 1, 1975 and June 30, 1976.

FACULTY NECROLOGY

The College community noted, with sadness, respect and affection the following death among members of the faculty during the 1975-76 academic year.

John H. Long, Associate Professor of Physics, Emeritus

FACULTY RETIREMENTS

The following members of the faculty retired at the conclusion of the 1975-76 academic session.

- Alfred R. Armstrong, Professor of Chemistry, Emeritus
- T. Carter Gleysteen, Lecturer in Business Administration, Emeritus
- Frank A. MacDonald, Professor of Philosophy, Emeritus
- Fraser Neiman, Professor of English, Emeritus
- Howard M. Scammon, Jr., Professor of Theatre and Speech, Emeritus
- Bernice M. Speese, Associate Professor of Biology, Emeritus
- Burton M. Woodward, Associate Professor of Business Administration, Emeritus

FACULTY PROMOTIONS

The following faculty members were promoted by the Board of Visitors during the academic year just passed.

Associate Professor to Professor:

- Henry Aceto, Jr., Department of Biology
- Donald L. Ball, Department of English
- James W. Coke, Department of Modern Languages
- Tom A. Collins, Marshall-Wythe School of Law
- Robert J. Fehrenbach, Department of English
- Franz L. Gross, Department of Physics
- John F. Lavach, School of Education
- Michael T. Madison, Marshall-Wythe School of Law
- Roy L. Pearson, School of Business Administration
- Charles F. Perdrisat, Department of Physics, effective 1 July 1976
- Douglas R. Rendleman, Marshall-Wythe School of Law
- James E. Smith, School of Business Administration, effective 1 July 1976
- Richard E. Walck, Marshall-Wythe School of Law
- Alan J. Ward, Department of Government

Assistant Professor to Associate Professor:

- James R. Baron, Department of Classical Studies
- Robert B. Bloom, School of Education
- Marion M. Brown, Department of Theatre and Speech
- Randolph A. Coleman, Department of Chemistry
- John H. Drew, Department of Mathematics
- Joanne B. Funigiello, Department of Modern Languages
- Ronald A. Hallett, Department of Modern Languages
- Ann T. Lambert, Department of Physical Education for Women
- Donald J. Messmer, School of Business Administration
- Patrick H. Micken, Department of Theatre and Speech
- William G. Poole, Jr., Department of Mathematics
- James B. Savage, Department of English
- Joseph L. Scott, Department of Biology
- Gary A. Smith, Department of Modern Languages
- Ronald R. St. Onge, Department of Modern Languages
- Jesse S. Tarleton, School of Business Administration
- Janet Tomlinson, Department of Physical Education for Women
- Ronald C. Wheeler, School of Education

FACULTY RESEARCH

Listed below are those faculty members who were awarded 1975-76 Faculty Research Fellowships, totaling \$68,840, enabling them to devote one full semester on the listed projects; following that group is the list of faculty members receiving 1975-76 Summer Research Grants, totalling \$31,465. Both research assistance programs are funded and administered by the College through the Committee for Faculty Research.

Faculty Research Fellowships:

- Bradley, Eric, *Studies on the Relationship of Stress to Reproductive Inhibition.*
- Brown, Richard M., *American Violence in Comparative Perspective: England, France, Canada, Australia, and the United States.*
- Brush, Stephen B., *Green Revolution in Potatoes: The Peasant Response.*
- Conlee, John W., *A Critical and Historical Study of Middle English Debate Poetry.*
- Faia, Michael, *Functionalism: Some Thoughts on Strategy and Tactics.*
- Harris, James F., *Words and Deeds: J.L. Austin's Philosophy of Language.*
- Madison, Michael, *Federal Assistance to and Regula-*

- tion of Real Estate Financing*
- Soest, Jon F., *Paramagnetic to Ferromagnetic Transitions as a Function of Composition in $U_xY_{1-x}B_4$ Compound Alloys.*
- Stockmeyer, Paul K., *A Combinatorial Investigation and Evaluation of Sorting and Merging Algorithms.*

Summer Research Grants (including those sponsored by the Society of the Alumni)

- Black, Robert E.L., *Biochemistry of Encystment and Dormancy in Lower Animals*
- Brion, Denis J., *Utilitarian Doctrine in American Natural Resource Law*
- Byrd, Mitchell A., *Population Dynamics of the Osprey in Virginia*
- Capelli, Gregory, *Distributional Ecology of Four Sympatric Species of Crayfish*
- Coleman, Henry, *Exhibition of Paintings Exploring Certain Aspects of the Properties of Color for Visual and Teaching Purposes*
- Cox, R. Merritt, *Biography of Fray Martin Sarmiento*
- Freeman, Alvin Z., *The Bones of the Kingdom: English Castles Explained*
- Fuchs, Alan E., *The Limits of Liberty: A Philosophical-Legal Study*
- Guenther, Anthony L., *Police Detectives: Criminal Investigation in an Urban Setting*
- Haulman, Clyde, *Evaluating Environmental Decision-*

- Bradley, Eric L. Department of Biology: "Endocrine Bases of Reproductive Inhibition in Deermice," National Institutes of Health.
- Byrd, Mitchell A., Department of Biology: "Herons as Indicators of Environmental Quality," U.S. Department of the Interior.
- Carlson, Carl E., and Gross, Franz L., Physics: "Topics in Theoretical Physics," National Science Foundation.
- Delos, John B., Department of Chemistry: "Theoretical Studies of Chemical Reactions Involving Excited Electronic States," National Science Foundation.
- Diggles, Walter, Metropolitan Criminal Justice Center: Institute for Criminal Justice for Chesapeake, Norfolk, Portsmouth and Virginia Beach, U.S. Department of Justice, Law Enforcement Assistance Administration, and cities of Chesapeake, Norfolk, Portsmouth and Virginia Beach.
- Eckhause, Morton; Siegel, Robert T.; Welsh, Robert E.; and Kane, John R., Department of Physics: "Experiments on the Interactions of Muons, Kaons, Antiprotons and Sigma Hyperons," National Science Foundation.
- Garland, William, Department of Education: "Exploring Human Nature Implementation Project," Education Development Center.
- Gary, S. Peter, Department of Physics: "Theory of Plasma Waves in the Earth's Bow Shock," U.S. Energy Research and Development Administration.
- Gibbs, Norman, Department of Mathematics: "Sparse Linear Systems," Department of the Navy, Office of Naval Research.
- Kerner, Jon S., Marshall-Wythe Institute for Research into the Social Sciences: "Improving Environmental

Biology Professor Garnett R. Brooks nets a fish during a research project.

- Making: The Virginia Wetlands Act and its Impact on Marsh Despoilment*
- Hoak, Dale E., *Policy-Making and Government in England 1540-1558*
- Jack, Marlene, *Form and Surface: A Further Investigation of the Raku Technique of Firing*
- Kornwolf, James D., *Towards a Theory of the Visual Arts in the Modern World*
- Maccubbin, Robert, *Sheridan's "A Trip to Scarborough," or, Another Relapse, Chapter 3 of a projected book on the plays of Rd. B. Sheridan*
- Maddocks, W.J., *Optimization of Operations Planning, Scheduling and Control Through Computer Simulation Techniques*
- Savage, James B., *The Allegory of the Fall in Milton's Paradise Lost*
- Scholnick, Robert J., *Post-War Criticism and the Emergence of American Literary Realism*
- Smith, Gary, *Meaning and Development of the Term "Genie" in the Age of Goethe*
- Smith, Leroy, *Jane Austen and the "Drama of Woman"*
- Tiefel, Hans O., *A Testing of Christian Ethics: The Rise of National Socialism and German Protestantism*
- Ward, Alan J., *The Westminster Model and the Varieties of British Government*

Research Activities funded by Federal Grants:

William and Mary received \$1,305,397 in federal grants during fiscal 1975-76 for the support of research, instructional program development, conferences and other programs, and for student aid.

The following research activities during 1975-76 were funded by various federal agencies with new grants totalling \$972,563.

- Decision-Making in Virginia's Wetlands," State Agency for Title I, Higher Education Act of 1965.
- Kossler, William J., Department of Physics: "Positive Muon Precession in Solids," National Science Foundation.
- Kranbuehl, David, Department of Chemistry: "Degradation and Molecular-Weight-Property Relationships of High Performance Polymers for Adhesives and Composites," National Aeronautics and Space Administration.
- Mangum, Charlotte P., Department of Biology: "Adaptations of Marine and Estuarine Invertebrates to Low Oxygen Conditions," National Science Foundation.
- McKnight, John L. and von Baeyer, Hans C., Department of Physics: "Restoration of 18th Century Scientific Apparatus and Public Lecture Demonstration: A Bicentennial Science Project for Williamsburg," National Science Foundation.
- McKenna, Virgil V., Department of Psychology: "Age at Marriage and Time to First Birth: A longitudinal Study of Parental Attitudes and Children's Personality," National Institute for Child Health and Human Development.
- Moriarty, John A. and Sher, Arden, Department of Physics: "Theory of the Properties of Materials Used in Solid State Sensors," National Aeronautics and Space Administration.
- Park, Jae H., Department of Physics: "Analysis of Remote Sensors for Pollution," National Aeronautics and Space Administration.
- Poole, William G., Department of Mathematics: "Collaborative Research-Operational Test of the Linpack Project: Validation of Mathematical Software for Linear Systems," National Science Foundation.

Rublein, George T., Department of Applied Science:
 "Research in the Applied Science Program," National
 Aeronautics and Space Administration.
 Tyree, Sheppard Y., Department of Chemistry:
 "Chemistry of the System: A12O3 (C)-HC1.aq.,"
 National Aeronautics and Space Administration.

Whitney, Scott C., Marshall-Wythe School of Law:
 "Environmental Law and Marine Affairs," National
 Oceanic and Atmospheric Administration, sub-
 contract with VIMS.

NEW ENDOWMENTS

New endowments (including gifts of personalty) were established during 1975-76 by alumni, parents, and friends. These gifts will be of perpetual benefit to students of the College. They are listed below by donor's name, the endowment fund designation, and the purpose for which the income will be used.

The list omits the many generous additions which have been made to previously established endowments, for which the College is indeed grateful.

FOR THE YEAR ENDING JUNE 30, 1976 (FY-1976)

Bequests

Ruth M. Hogue - College Collection; Jay W. Johns - Jay W. Johns Fund (Numerous College Projects, including Ash Lawn); Carolyn M. Sutherland - James W. and Carolyn M. Sutherland Fund (Richard Bland College).

Outright Gifts (Cash/Securities)

Anonymous - The Writer's Fund (Scholarship); Richard C. Bechtel - John A. McDonald Fund (Scholarship); Anna Dorsey Cooke and Anna C. Allison - Dr. Giles B. Cooke Scholarship Fund (Scholarship); Serge N. Evanow - Serge N. Evanow Fund (Scholarship); W. Brooks George - Elizabeth S. George Fund (Fellowship); Friends of Deirdre Jo Gerda - Deirdre Jo Gerda Fund (Scholarship); Thomas A. and Zoe Graves - Steven McGinnis Scholarship Fund (Scholarship - Washington Program); Friends of Linwood B. Tabb - Judge Lindwood B. Tabb Fund (Fellowship); Alumni, Faculty and Friends of the College Memorial Fund - J. Edward Zollinger Alumni Memorial Fund - in memory of Dr. Garrett Dalton.

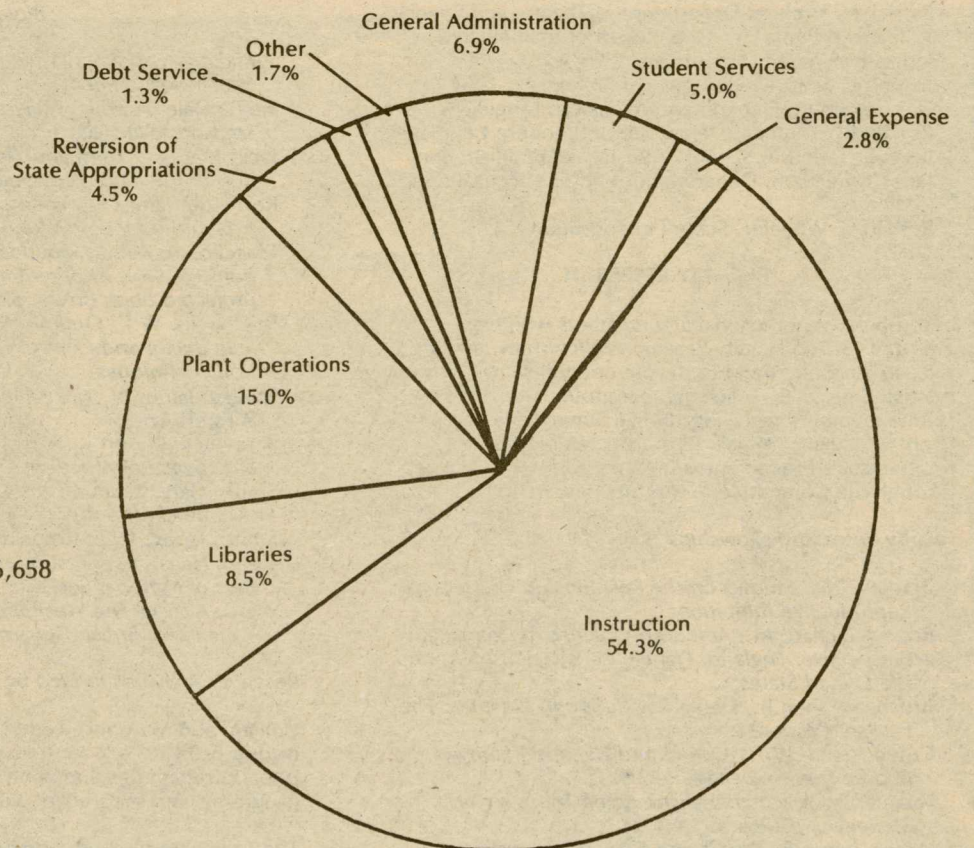

Outright Gifts (Real Property)

Walter J. and Betty C. Zable - Walter J. Zable Fund (Scholarship).

Outright Gifts (Other Personalty)

William D. Eppes - Antiques (College Collection); Mrs. Seth Barton French - Conway Whittle Family Papers (College Collection); Loren P. and Rose A. Guy - Weber Baby Grand Piano (Music Department) and Olympic Stopwatch (Track); Inta Roto, Inc. - Camera (Fine Arts Department); Mr. and Mrs. Ralph Lamberson - Two Ming Audience Chairs (College Collection); Miss Miriam R. LeVin - Painting and Books (College Collection); Joseph Lonas - Numerous Pieces of Sculpture (College Collection); Irving Lowens - Numerous Music Albums (Music Department); Mrs. James Mann, Jr. - Painting (College Collection); Mrs. Dwight G. Moorhead - Etchings (College Collection); Gertrude Perrin - Paintings and Collages (College Collection); Mrs. Willard P. Smith - Books (Swem Library); Mario Zamora - Oriental Carpets (College Collection).

THE COLLEGE OF WILLIAM AND MARY IN VIRGINIA
 SUMMARY OF SOURCES AND USES
 OF
 COMMONWEALTH EDUCATIONAL AND GENERAL REVENUES
 YEAR ENDED JUNE 30, 1976

Newsmakers

William and Mary was well represented at the recent annual meeting of the Southern Business Administration Association in Atlanta last month.

Charles L. Quittmeyer, dean of the School of Business Administration, was elected president of the Association for 1976-77.

Walter J. Zable, chairman of the board of Cubic Corporation of San Diego, gave the main address on "Business Views Academe." Zable is a William and Mary alumnus, class of 1937, and a member of the Business School Sponsors Inc. **Karl F. Lanier**, former chairman of the board of First & Merchants National Bank of the Peninsula and now a lecturer in the School of Business Administration, also spoke on the business-academic theme.

The SBAA has a membership of over 200 four-year and graduate colleges and universities located primarily in the South. The object of the Association is to encourage higher quality education for business in colleges and universities. It is closely affiliated with the American Assembly of Collegiate Schools of Business.

President Graves' pre-holidays calendar includes a number of meetings with administrators in higher education. Last month he served as a panelist discussing "Challenge: Quality, Quantity and Accountability" at the annual meeting of the American Association of State Colleges and Universities in New Orleans. On December 2 he welcomed and spoke informally on alumni relations with Virginia Alumni Administrators, meeting in Williamsburg.

Later this month he expects to participate in the Southern Conference meeting in Williamsburg, the annual meeting of the Southern Association of Colleges and Schools in Atlanta, and a meeting with HEW Secretary David Mathews on the "Changing Agenda of Higher Education" in Washington, D.C. The Washington meeting is co-sponsored by the U.S. Office of Education and the American Council on Education.

Scholarships For Study In Britain

Juniors interested in studying next summer at a British university are invited to apply for the \$1,000 scholarship awarded annually for that purpose by the Richmond branch of the English-Speaking Union.

The courses, which are given in July and early August, are Drama and Theatre in the Age of Shakespeare (University of Birmingham at Stratford-on-Avon); English Theatre, Literature and Culture of the 20th Century (University of London); Britain, 1870 to present: Literature, History and Society (Oxford); and Britain, 1840-1940: Change and Challenge: Literature and History (University of Edinburgh).

Qualifications include U.S. and preferably Virginian citizenship, current junior standing, age 18-22, literary and scholastic achievement, character and social responsibility, leadership ability, interest in physical activity and pleasant personality.

For information and application forms, contact Professor Cecil McCulley in Old Rogers 208 as soon as possible. Applications and faculty recommendations are due December 10 and outside recommendations, December 20. One nominee from the College will be chosen, who may be interviewed by the selection committee of the Union in Richmond early in January.

Bruce Melchor, a second year graduate business administration student from Norfolk, has been appointed by Norfolk City Council to the board of trustees of Tidewater Community College. At 27, Melchor is the youngest member of the college's board of trustees. He is a 1972 graduate of Roanoke College, where he is also a member of the board of trustees.

Two members of the anthropology department attended the annual meeting of the American Anthropological Association last month in Washington, D.C. **Vinson Sutlive** presented a paper entitled "Where Do We Go From Here? Urbanization in Sarawak and the Philippines?", while **Mario D. Zamora** spoke on "Three Colonial Pioneers in Philippine Anthropology: Context and Critique", or "What Happened to McKinley's Imperial Dream?"

Sutlive also chaired two sessions of the Borneo Research Council, in which reports on recent research in Borneo were presented.

Zamora's paper concerning "American Anthropology in the Philippines: Innovation, Institutionalization and Indigenization" will be published in *Papers in Anthropology*, a commemorative volume in honor of Morris E. Opler, one of America's outstanding theorists in anthropology, on his second retirement from the University of Oklahoma.

Catalog Librarian **Mary Lou Cobb** has been elected chairman of the Potomac Technical Processing Librarians for 1976-78. Librarians from Maryland, Virginia and the District of Columbia who are interested in the technical services offered by libraries comprise the group. Cobb served as the Virginia representative on the PTPLE Executive Board during 1973-75.

Assistant Reference Librarian **Beth Bliler** was elected secretary of the Junior Members Round Table at the annual conference of the Virginia Library Association, Nov. 18-20, in Roanoke. The Round Table is a special section of the VLA for younger members. Bliler will serve a one year term.

Berna Heyman, assistant catalog librarian, met with others on the ALA-SELA membership committee during the conference, while VARC Librarian **Nancy Harris** met with the special libraries committee. Also participating in the VLA conference were **Kathryn Blue**, assistant catalog librarian; **Mary Lou Cobb**, catalog librarian; and **Ailene Zirkle**, acquisitions librarian.

Bob Maidment, School of Education, will attend the annual meeting of the Southern Association of Colleges and Schools, December 12-15, in Atlanta, Ga., and will moderate a panel on "Public School and College Cooperation for Inservice Training."

Regional managers of a number of data-processing and information systems activities have been visiting the campus this semester to talk with students enrolled in **W.J. Maddocks'** graduate Information Systems course in the School of Business Administration.

Speakers include **W.R. Medford**, vice-president of Management Information Systems, United Virginia Bankshares Inc.; **John Madison**, manager of Management Information Systems, Bendix Corporation; **Julian Cox**, director of the Corporate Computer Division at the Newport News Shipbuilding Company; and **F.R. Kurminsky**, director of Processing and Management Information Systems for Philip Morris. Each discussed the problems and challenges of these systems in his own business environment.

Vernon Colbert, supervisor of Operations at William and Mary's Computer Center, also made a presentation to the class, concerning the hardware and software applications at the W&M Computer Center.

Bruce Locke and **Richard Croot** of the College Bookstore attended the fall conference of the Virginia College Stores Association, Nov. 17-19, at Afton Mountain, Waynesboro. Locke, who is president of the association, opened the conference and chaired the business session, while Croot served as chairman of a workshop session concerned with publisher relations.

Three members of the mathematics department made presentations before professional groups last month. **Carl M. Andersen** presented a paper on "Free Vibrations of Laminated Composite Elliptical Plates" at the 13th annual meeting of the Society for Engineering Sciences in Hampton. The paper was co-authored by Ahmed Noor of George Washington University and is published in the proceedings of the conference.

Paul Stockmeyer gave an invited address on "New counter-examples to the digraph reconstruction conjecture" at the fall meeting of the American Mathematical Society in Columbia, S.C.

"Bandwidth and Profile Reduction Algorithms" was the subject of a talk by **Norman E. Gibbs** at a University of Virginia computer science department colloquium, Nov. 4, in Charlottesville.

In his capacity as chairman of the Council of Presidents for State institutions of higher education, **President Graves** has agreed to serve on the Postsecondary Education Advisory Committee of the Virginia Postsecondary Education Commission.

Economics faculty member **Leonard G. Schifrin** attended the Economic and Social Outlook Program at the University of Michigan in Ann Arbor on November 18. The following day he presented a paper on Drug Regulation

New Members Join ODK Society

Sixteen new members have been elected to Omicron Delta Kappa leadership society on campus. They include law students Mark S. Gregory of Falls Church, Ardath A. Hamann of Lake Forest, Ill., Richard Dulaney of Charlottesville, and Lea L. Buchanan of Algona, Iowa.

Seniors elected were Curtis Bobbit of Yale, Va., Jeffrey Hosmer and Lisa Williams of Pittsburgh, Pa., Deborah McCracken of Cincinnati, Ohio, Donna Szuba of Pottersville, N.J., Constance Ritter of Parkersburg, W.Va., Karen Yanity of Ridgefield, Conn., Eli Alkalais

to the Graduate Seminar, School of Pharmacy, at Ohio State University in Columbus. While in Columbus, Schifrin attended Professor Hayes' Saturday Seminar on Conflict Resolution, at which Professor Schembechler of the University of Michigan presented his research on "Forward Mobility of Young Males in the Midwest Labor Force."

Lawrence Wiseman of the biology department and **William Hammond**, 1973 honors graduate in biology, have recently published "The Reacquisition of Cell Adhesiveness Following Tissue Disaggregation by Eleven Different Agents" in *The Journal of Experimental Zoology*.

John E. Donaldson, professor of law, is planning consultant for a series of seminars on "The Tax Reform Act of 1976," being conducted in Alexandria, Norfolk, Richmond and Roanoke by the Continuing Legal Education Committee of the Virginia State Bar and the Virginia Bar Association.

Robert L. Saunders, a 1976 graduate, has been selected by the Editorial Board of American Collegiate Publications for inclusion in the 1976 edition of *Who's Who in Poetry in American Colleges and Universities*. Saunders, an undergraduate English major, received several collegiate literary awards including the Tiberius Gracchus Jones Literary Award in Poetry for 1975. He has published work in several collegiate literary journals, and in two national anthologies of poetry. A selection of Saunders' poetry entitled "fall," which appeared previously in the *Parallax of The William and Mary Review* will be published in this edition of *Who's Who*, along with a short biography. Saunders is currently enrolled in the Graduate School of Business at William and Mary.

Scott C. Whitney, professor of law, is the author of a book review, *Capital Needs in the Seventies*, by Barry Bosworth, James S. Duesenberry and Andrew S. Carron and published by the Brookings Institution. The review appears in the current *William and Mary Law Review*.

Applicants must be residents of the metropolitan Washington, D.C. area, must have completed two years of college work, and must pursue studies toward a degree in a fashion related field. Up to \$2,000 will be awarded to recipients. For information, write to: Mrs. Virginia S. Ogilvy, 4017 48th Street, NW, Washington, D.C. 20016, or see the flyer in the Student Affairs Office. Application deadline is January 1, 1977.

Official Memorandum

Students Told of Billing Change

This year Spring Semester bills are being mailed to students' local addresses (dormitories, general delivery, and campus or city P.O. boxes) before the Christmas vacation, as requested by students.

If your bill is not received prior to departure, please stop by the Treasurer's Office for a copy of the bill. This is extremely important, since all bills must be paid in full on or before the January 3, 1977, due date. If someone other than yourself is paying the bill, then it is your responsibility to forward the bill on to that person.

The instruction sheet enclosed with the statement contains several policy changes which have a direct bearing on your bill. One such change is that students must pay for their meal tickets in advance of picking up the card. The cost of the ticket you purchase should be added to your bill and included with your payment.

With the Fall Semester ending before Christmas and Spring Semester bills due on or before January 3, 1977, we solicit your full cooperation in meeting this payment time table.

To avoid being held at Registration or Validation, PLEASE MAIL EARLY AND CAREFULLY; be sure to address envelope legibly and completely.

The Treasurer's Office would like to wish you all a very HAPPY HOLIDAY SEASON!!
