In the News

"For too long, physical education has been looked upon as a waving of arms and legs with good intentions," says physical education department chairman Howard Smith.

For a look at what physical education really involves, see the special insert in this week's *William and Mary News*. The insert is the second in a monthly series on campus buildings and the people and programs associated with them.

JAPANESE AMBASSADOR LECTURES

The Honorable Masao Kanazawa, Ambassador Extraordinary and Plenipotentiary and Deputy Permanent Representative of Japan to the United Nations, will give a public lecture at 8:15 p.m., April 18, in the Campus Center Little Theatre. His lecture is being sponsored by the Department of Government.

Ambassador Kanazawa is expected to discuss Japan's role in the United Nations and its efforts to promote international economic, social and cultural cooperation. A question and answer period will follow.

A graduate of Tokyo Imperial University, Kanazawa entered public service in 1942 with the Ministry of Foreign Affairs. He has held embassy posts in the United Kingdom, and Iraq, and in 1962 was named Counsellor of the Japanese Embassy in Washington, D.C. He served with the Japanese embassy in the Philippines from 1966-67 and in 1972 was named Japanese Ambassador to Romania. He was named to his present post in 1974.

SENIOR RECITAL--Robert Frank Yahley will present his senior piano recital, Sunday, April 17, at 8:15 p.m. in Phi Beta Kappa Hall. His program will include works by Scarlatti, Chopin, Barber, Ravel and Schumann. The public is invited to attend.

A music major from Richmond, Yahley was the winner of the first piano concerto competition held by the College-Community Orchestra and was a co-recipient of the Anna B.K. Nimmo Music Scholarship last spring.

Yahley studied piano with Jean McConnell before attending William and Mary; he is currently a student of Sandra Owen.

Wilson Fellows Address Classes, Project Plus

George W. Romney, former secretary of Housing and Urban Development and three-time governor of Michigan, will speak on "The Real City Crisis" at the Project Plus Forum, Wednesday, April 13, at 7:30 p.m. in Millington Auditorium.

Mr. and Mrs. Romney are on campus this week under the Woodrow Wilson National Fellowship Foundation program.

Both Mr. and Mrs. Romney take an active interest in current social and human problems. Mr. Romney is chairman of the board and Mrs. Romney is a member of the executive committee of the board of directors of the National Center for Voluntary Action (NCVA). They have long been vigorous proponents of using voluntary cooperative efforts to involve private resources in solving public problems.

The Romneys are visiting numerous classes throughout the week in the departments of religion, economics, government, sociology, and psychology and with classes and faculty members in the schools of business, law and education.

Meetings have also been planned with students interested in careers in volunteer services, the Mormon student group, members of Mortar Board and Omicron Delta Kappa, and Project Plus.

The Wilson Foundation program was initiated at William and Mary in 1975 with the visit of T. Vincent Learson, former chairman of the board and chief executive officer of International Business Machine Corporation.

At Open House Saturday

Campus Greet New Students

The College will welcome newly admitted freshmen and transfer students to campus this Saturday, April 16, for a day-long open house and preview of life on campus.

The Admissions Office has invited the students to William and Mary to give them an opportunity to learn more about the College before deciding whether to attend, explained Robert Hunt, dean of admissions for undergraduate students.

Hunt expects the largest number of visitors to be Virginians, since State residents make up approximately 70 per cent of the admitted students. He hopes, however, that a number of students and their parents from the

mid-Atlantic, Southern and New England states will also be able to attend.

On Saturday morning prospective students will meet with faculty members of the academic departments which interest them and will tour the library and other academic buildings. Following a barbecue lunch at the Commons with student guides, the visitors will tour the residence halls.

Those who are spending the weekend in Williamsburg will be encouraged to attend the sports activities, jazz band concert, William and Mary Theatre production and other events scheduled Saturday evening on campus.

Films, Gallery Talks Planned

Lecture Opens Rubens Exhibit

Frances Huemer, distinguished Rubens scholar, will open the campus celebration of Rubens International Year Monday, April 18.

Huemer, professor of art history at the University of North Carolina at Chapel Hill, will lecture on "Rubens and the Baroque Prince" at 8 p.m. in 101 Andrews Hall. Following her lecture, the audience will walk to Swem Library to officially open an exhibition of prints created under Sir Peter Paul Rubens' supervision or after his works.

Miss Lucie de Myttenaere, cultural counselor of the Belgian Embassy, will also speak at the exhibit opening. The public is invited to attend.

Sponsored by the department of fine arts, the exhibition "Rubens in Prints" will be on display in the Zollinger Museum of Swem Library from April 18-May 13. Museum hours are 9 a.m.-4 p.m. Monday through Friday, and 9 a.m.-12 noon on Saturday.

This year marks the 400th anniversary of the birth of the Flemish painter in 1577. Some 25 engravings, etchings and woodcuts are on loan for the exhibit from private collections, the University of North Carolina at Chapel Hill and from the Plantin-Moretus Museum, Antwerp, Belgium. Items from

Continued on page 2

"Pictures at an Exhibition", with music by M. Moussorgsky, as performed by the Claude Kipnis Mime Theatre. The troupe will present their evening of mime Monday, April 18, at 8:15 p.m. in Phi Beta Kappa Hall. For ticket information, call 253-4272.

Lecture Considers Religious Dilemmas In Scientific Culture

A lecture by one of the leading philosophical theologians in America today will conclude the 1976-77 Visiting Scholars Series.

Langdon Gilkey, professor of theology at the University of Chicago Divinity School, will discuss "Religious Dilemmas of a Scientific Culture," Tuesday, April 19, at 8 p.m. in Botetourt Theatre of Swem Library. The public is invited to attend.

A graduate of Harvard with a doctorate from Columbia, Gilkey is the author of several books relating theology to such concerns as science and politics.

His books include "Religion and the Scientific Future," "Catholicism Confronts Modernity," "Maker of Heaven and Earth," "How the Church Can Minister to the World Without Losing Itself" and "Naming the Whirlwind: The Renewal of God-Language."

In another work, "Shantung Compound," he relates his experiences as a Japanese prisoner of war.

Gilkey has studied in England under a Fulbright grant, was a Gugenheim fellow in Germany and has received awards from the National Council of Religion and Higher Education, the American Council of Learned Societies and the Japan Society for the Promotion of Science.

L. Curry Worsham (left) and Richard Bannin in a rehearsal of Edward Albee's *The Zoo Story*. This drama will be presented in a double bill with Albee's absurdist comedy *The American Dream*, April 13-16 by The William and Mary Theatre. For ticket information, call 253-4272.

English Professor Is Speaker For Honors Convocation

John H. Willis Jr., associate professor of English, will give the address at the 1977 Spring Honors Convocation, April 19 at 8:15 p.m. in Phi Beta Kappa Hall.

Students will be recognized at the convocation for outstanding scholarship, leadership, excellence in journalism and athletic ability.

Awards which will be presented include the Alpha Lambda Delta and Phi Eta Sigma awards, Kay Gary-Charles McDowell journalism award, the Athletic Educational Foundation and L. Tucker Jones athletic awards, the Mortar Board award and the Omicron Delta Kappa Leadership award.

Members-elect of Beta Gamma Sigma and Phi Beta Kappa, the heads of campus media, and new members of the Society for Collegiate Journalists, Mortar Board, Omicron Delta Kappa and F.H.C. Society will be presented.

James C. Livingston, dean of the undergraduate program, will preside, and President Graves will give closing remarks.

Exhibit Celebrates Rubens Year

Continued from first page

the College Collection will also be included.

Professor Huemer has written several articles on Rubens and on 16th and 17th century architecture and painting. Her article on Rubens' portraiture for the royal courts will be published soon as part of the "Corpus Rubenianum," an international research project devoted to the works of Rubens.

A graduate of Duke University, Huemer received M.A. and Ph.D. degrees from New York University. She has also studied in Italy under Fulbright and American Association of University Women fellowships.

Films and gallery talks have also been scheduled in celebration of Rubens International Year.

Films on Rubens' paintings will be shown in Botetourt Theatre, Swem Library, at 12:30 p.m. April 19 and 21, and at 12 noon on April 20 and 22.

Fine Arts Department Chairman Miles Chappell, who organized the exhibition, will conduct gallery talks at 4 p.m. on April 20, 21 and 22 in the Zollinger Museum. A specialist in Renaissance and Baroque art, Chappell holds a B.S. degree from William and Mary and Ph.D. from the University of North Carolina at Chapel Hill.

"The exhibition is designed to illustrate the many sides of Rubens' career and works," said Chappell. "The prints show Rubens as a Humanist with his love of the Classical tradition, as a diplomat and painter to the leading rulers of the 17th century, and as a painter for the Counter Reformation Church Triumphant."

"Rubens took the art of printmaking to new heights of pictorialism. He achieved effects in monochrome and on a small scale that suggest the color, texture, dynamism, grandeur and expression of his paintings. The prints done by artists working under Rubens'

supervision can be admired simply on the grounds of technical execution as some of the most accomplished works in the history of printmaking," he said.

Law School Expands Program On Law, Taxation

The Marshall-Wythe School of Law will expand its Master of Law and Taxation program next fall to include special evening courses for practicing lawyers and accountants.

The nighttime program will permit practicing lawyers and accountants from both the Richmond and Tidewater areas, who are unable to attend daytime classes, to improve or refresh their tax knowledge and also enable lawyers to obtain a master's degree.

Marshall-Wythe's law and taxation program offers the only master's degree of its type in Virginia.

Courses in Estate Planning and Pension and Profit Sharing will be offered during the next academic session on weekday nights. Future course schedules will depend on response to the evening program.

The Master of Law and Taxation program began at William and Mary in 1954 to train people in the tax field who can render not merely technical tax assistance but also public service in the field of taxation, said Emeric Fischer, who directs the program. Students in the program are required to have a law degree and most have experience as certified public accountants or economists.

Notices

ACTORS WANTED--The National Park Service and the "Scotch Tom" Nelson Corporation are looking for actors and actresses to bring to life the people who lived in the historic Nelson House in Yorktown, for visitors to the 18th century Georgian mansion this summer. Auditions will be held at the National Park Service Visitor center, Yorktown, on April 16 from 2-4 p.m. and on April 17 from 2-4 and 7-9 p.m. Two memorized one-minute acting selections, one serious and one comic, are required. For information, call 229-6970.

William Raspberry

'Post' Columnist To Discuss Affirmative Action

Washington Post columnist William Raspberry will discuss "Affirmative Action: One Man's Opinion" in a public lecture Friday, April 15, at 7:30 p.m. in Millington Auditorium.

A question and answer session will follow Raspberry's talk, which is sponsored by the Black Student Organization.

Raspberry's column on urban affairs and minority issues has attracted national attention since it first appeared in the Washington Post in 1966.

Raspberry's coverage of the 1965 Watts riot earned him the Capital Press Club's "Journalist of the Year" award. In 1967 he received a citation of merit in journalism from Lincoln University. Raspberry has also won several Guild awards for interpretive reporting, and he was the recipient of the Washington/Baltimore Newspaper Guild's 1968 Front Page award.

Prior to joining the Post staff in 1962, Raspberry was a reporter, photographer and editor of the Indianapolis Recorder for six years.

Concerts Feature American Music

Members of the Sonneck Society will focus on "100 years of Recording in America" at their annual meeting, to be held here April 15-17.

As part of the meeting, the Queensborough Symphonic Band of the City University of New York will give public concerts Saturday afternoon. "The Band in America, 1754 to 1917" begins at 2:45 p.m. in Phi Beta Kappa Hall, and "An Old Fashioned Concert in the Park" begins at 4 p.m. in front of the Wren Building. In case of rain, the concert will be moved to Andrews Hall. The band is under the direction of Raoul Camus, who has conducted civilian and military bands for the past 20 years.

On Sunday, Alan Mandel, pianist, and his wife Nancy, violinist, of American University, Washington, D.C., will give a "Concert of Music from New England" at 1:30 p.m. in Phi Beta Kappa Hall. The Mandels have appeared in concert in major capitals in Europe, the Middle East the Far East and Northern Africa, as well as the United States.

The public is invited to all three events; there is no admission charge.

Named after the first critical scholar and bibliographer of American music, Oscar Sonneck, the Society was organized several years ago to study and promote American music.

Arthur Schrader, visiting professor of music at the College, is a member of the Society's board of trustees and is chairman for the conference this year.

Local arrangements have been made by Frank Lendrim, chairman, department of music, Jock Darling, music lecturer, and Donald Truesdell, professor of music, with assistance from members of Phi Mu Alpha and Delta Omicron honor music societies.

Alpha Chi Chapter Marks 50 Years

The Beta Delta chapter of Alpha Chi Omega sorority at the College celebrated the 50th anniversary of its installation as a chapter on April 8. The chapter was founded on campus in 1927 by Althea Hunt, who also founded the William and Mary Theatre that same year.

To commemorate the anniversary, members held a Bowl-a-thon in February and donated the more than \$500 in proceeds to the Music Department. Alpha Chi Omega began nationally as a music sorority.

Chapter members also attended church together March 27 and on April 2 held a banquet, where 50 year members were given special recognition.

Jim Hicks, a senior from Falls Church, works out on the "Universal Gym," a weight-lifting machine in the adapted sports room in William and Mary Hall.

Lifetime Sports

Education For Health, Fitness, Leisure

Lyle Rosbotham

It's one of the themes of academy award-winning film "Rocky."
 It's influenced fashion design with a new trend towards easy, loose-fitting, sporty-looking clothing.
 It's causing more people to stumble out of bed early enough in the morning to get in ten minutes of exercise or to log some jogging time down neighborhood streets.
 What is it? It's a renewed interest in getting in shape and staying fit.
 "There has been a tremendous re-awakening about physical fitness," said Howard Smith, chairman of the men's physical education department. "More people are bicycling and jogging. If you watch television, you almost can't avoid seeing some program that relates to health, recreation or fitness at some time during the day."
 At William and Mary last fall, registrations for physical education courses totaled 2,990. Many students put in extra hours in intramural sports and varsity programs.
 Classrooms and faculty offices are located in W&M Hall, Adair Gym and Blow Gym. But that's

only the beginning of where physical education instruction takes place. Students play field hockey on Barksdale fields, tennis at Adair Courts, and golf at Kingsmill. They canoe on Lake Matoaka, run on the Cary Field track, practice archery skills on the range behind William and Mary Hall, and play rugby, soccer and a variety of other sports on the intramural fields near the Hall.
 The physical education programs for men and women both stress the importance of physical activity and "lifetime sports."
 "We try to provide a total program of activities and offer something that everyone can find to enjoy at their own level," said Millie West, chairman of the women's physical education department. "We want to help those with skills to develop them and give them the opportunity for competition to refine them further. For those with minimal skills, we try to help them reach the point where they can enjoy a sport after they leave college," she said.
 Associate professor Mont Linkenauger, majors advisor, emphasized the range of appeal of the physical education program.
 "Health and fitness are important," he said, "but so is one's ability to use recreation time. Our program is geared to both ends of that spectrum and each is equally important."
 Several courses that focus on leisure sports and outdoor living skills have been added to both departments in recent years, in addition to traditional sports and dance activities.
 Students can now sign up for recreational or whitewater canoeing, for backpacking, orienteering, cycling, for skiing in New England or winter camping in the Adirondacks.
 "Some recreational courses have been paired, so that students can combine canoeing and camping, or bicycling and backpacking on weekend field trips.

Archery classes practice on the range behind William and Mary Hall.

Moderation, Enjoyment Keys To Being Fit

What's the best approach to getting in shape and staying that way?

Several faculty members in the physical education departments offer their advice.

"The main thing is to get started," says Millie West, chairman of the women's physical education department. "I'd urge people starting out on a new program to begin slowly. It's hazardous to overdo it, and the older you are, the more slowly you should start."

"Anyone interested in personal conditioning," says swimming coach Dudley Jensen, "should begin with a good physical examination from a qualified physician. Do something you enjoy, because that's the only way you'll keep it up. Set reasonable goals. And don't try to do it all at once. Moderation and enjoyment are the key."

According to Howard Smith, chairman of the physical education department, jogging and swimming are two of the best ways to be physically fit. "Start gradually after a good physical examination," he advises, "and increase your endurance. When the muscles say 'stop,' go a little bit further. Don't be spasmodic; once you embark on a program, do it regularly."

Women's track coach Debbie Hill admits she may be biased in her choice, but she advocates running and jogging as "the simplest and best forms of exercise. There's no equipment involved," she says, "just get-up-and-go."

Lyle Rasbotham photo

Students are evaluated for their modern dance technique during a proficiency test in the dance studio at Adair Gymnasium. A variety of courses are available in modern dance technique. Many students also join the dance interest group, Orchestis.

Courses are now offered at three levels of whitewater canoeing. During the third level course, students build their own kayaks.

Chris Jackson photo

There's More To P.E. Major Than Thrill Of Victory Or Agony Of Defeat

"For too long physical education has been looked upon as a waving of arms and legs with good intentions," says Howard Smith, chairman of the men's physical education department.

While many physical education courses are geared toward teaching fundamental athletic skills, the program for majors is heavily slanted toward the sciences.

Majors are required to take several biology courses, including laboratory courses in human physiology and human anatomy, in addition to such physical education courses as therapy techniques and applied anatomy and kinesiology (the study of human motion).

Advanced courses in a variety of sports, in coaching and sports officiating, and in administering physical education programs are also a part of the curriculum.

Although the greatest number of majors go into teaching, many choose related fields in physical, occupational or corrective therapy, according to majors advisor Mont Linkenauger.

"Most students don't stand a chance of getting into therapy schools without some experience in the field," said Linkenauger. Consequently, William and Mary instructors have arranged with Eastern State Hospital for internships in physical and occupational therapy, and with Kecoughtan Veterans Center for internships in corrective therapy.

Linkenauger expects careers in sports medicine to attract increasing numbers of physical education majors in coming years. "It's a wide open field and it will grow by leaps and bounds in the next ten years," he said.

He sees a tremendous opportunity for women in the field, as women's sports events become more competitive.

Three women students are already working as assistant trainers learning to treat minor athletic injuries and to recognize major injuries under the supervision of head trainer Ed Christman. Certification by the National Athletic Trainers Association, however, is not easy to come by. It requires some 2,000 hours of training under a qualified supervisor.

The physical education department keeps track of its majors after graduation and is proud of their records. "Students have always been able to pretty much take their pick of what they want to do—graduate school, teaching, therapy or other options," says Linkenauger.

The majors program is currently administered through the men's physical education department, although it is open to both men and women. Representatives from the men's and women's departments are currently studying the majors program to see if it is in compliance with new requirements of the Department of Health, Education and Welfare.

In the cycling class students learn to care for and maintain their bicycles, in addition to doing a lot of peddling.

The sport of rugby is becoming more popular on campus.

Walker photo

Physical education majors and others interested in teaching spend time at area elementary schools working with children under the supervision of a movement education specialist.

Early Classroom Teaching Stresses Movement Education

Do children have to be taught to play? "Playing is something children do spontaneously," says Pat Crowe, "but you do have to teach children how to move effectively in the environment—both on land and in water."

Professor Crowe and Joseph Agee alternate in teaching the course "Health and Physical Education for Elementary Classroom Teaching."

"The idea is that children should be able to move without failure," says Crowe. She tells her students who will be teaching in elementary schools that children should not have to move to someone else's standards but to their own. Instead of asking a child to jump two feet, she explains, a teacher would ask the child to jump as far as he can. "Children should be skilled only in terms of their own potential and satisfaction," she said.

Crowe encourages her student teachers to recognize that children's abilities vary considerably and to offer them alternatives in using their skills. Rather than asking children to do a headstand, Crowe suggests a better approach is to ask them to experiment with different balancing exercises. Eventually many will do headstands, but those who cannot are less

likely to feel they have failed.

Giving children choices is also important, Crowe feels, because it encourages them to use their imagination.

Among children in kindergarten through the third grade, emphasis is on movement education—learning to run and stop quickly, to throw, catch and kick balls and other basic skills, she said.

Structured games come later, usually in about the fourth grade, she said. "A game," said Crowe, "is just the formalized action of everything a child has learned in movement education."

Competition in games and sports "should be encouraged, but not too early," she said. "At the lower grade levels, children just are not interested in it; they are not even interested in groups, much less organized games."

Parents can help their children develop their physical skills, Crowe said, by taking time out to play with them. Parents should encourage children to develop skills but not push them to do specific skills for which they are not yet ready, she said.

Newsmakers

At the annual meeting of the Mid-Atlantic Regional Business Law Association, March 10-11 at the University of Maryland, **Karen A. Emden** and **Henry E. Mallue** of the business school faculty presented papers on two topics of current interest. Emden spoke on "Union Electric Company versus Environmental Protection Agency, State Implementation of the Clean Air Act: A Possible Approach to National Fuel Conservation." Mallue discussed "Revenue Sharing for Education: From Wagoner County, 1953 to 1977."

At the American Personnel and Guidance Association convention in Dallas, **Kevin Geoffroy**, School of Education, received a special award for his work with the Association for Specialists In Group Work. The award cited Geoffroy for his work as journal editor and workshop director.

An article entitled "Three Colonial Pioneers in Philippine Anthropology: Context and Critique," co-authored by Anthropology Professor **Mario D. Zamora** and **Susan Haulenbeek**, a senior from Martinsville, N.J., has been accepted for publication in *Folk*, Denmark's Anthropological Journal, Copenhagen, Denmark.

"Election Outcomes: Whose Money Matters?" is the title of an article co-authored by **Alan I. Abramowitz** of the government department, and **Stanton Glantz** and **Michael Burkart** of Stanford University, published in the *Journal of Politics*.

English Professor **Carl Dolmetsch**, to leave this semester as Fulbright Visiting Professor at Friedrich-Alexander University in Erlangen, Germany, participated last week in selecting finalists for the Deutscher Akademischer Austauschdienst (German Academic Exchange Service) "Anglistenprogramm" for 1977-78. Dolmetsch met with members of the DAAD select committee to interview candidates in Bonn. Under the "Anglistenprogramm," German students of English who are preparing to teach in secondary schools receive full scholarships and are sent to one of twelve American universities, including William and Mary, for a year's study. Dolmetsch has served as faculty advisor to the German students at William and Mary.

Employment

The following positions are open to all qualified individuals; however, current faculty and classified employees will receive first consideration. Except where noted, inquiries and applications should be made at the Personnel Office, 201 James Blair Hall, and not at the department where the opening exists. Call 229-JOBS (229-5627) for an updated listing and 24-hour service. An EEO/AA employer.

TRADE BOOK CLERK B--non-State employment; \$2.48 per hour; College Bookstore; deadline April 13.

CAMPUS POLICE OFFICER--\$8,784 per year; Campus Police Office, deadline April 14.

COLLEGE HOSTESS C--(Resident Administrator for Asia House), \$463.25 per month plus apartment and utilities, 9 month appointment, beginning late August, deadline April 20.

WELDER MACHINIST--\$5.50 per hour, no State benefits; William Small Physical Laboratory Machine and Instrument Shop; deadline April 18. Qualifications: Five years machine shop experience in research laboratory work; must be capable of heliarc, welding and hard soldering.

Faculty Club Party, April 22

The Faculty Club will hold its fifth and final cocktail party of the year on Friday, April 22, from 5:30 to 7:30 p.m. in the Alumni House. All members of the faculty and administration are invited to attend and may pay at the door or pay in advance to Lewis Foster at the usual rates: members - \$2.50 per person (\$1.50 non-drinkers); non-members - \$4 per person (2.50 non-drinkers).

Faculty members in the School of Business Administration presented several papers recently at the Mid-Atlantic Regional Meeting of the American Accounting Association in Washington, D.C. They include, **Robert Bloom**, "Economic Substance versus Legal Form in Financial Accounting," **Pieter Elgers**, co-author of "SEC's Latest Forecast Guidelines: Problems of Format, Content and Independent Review," and also co-author of "The Frequency and Timeliness of Corporate Financial Disclosures: An International Comparison;" and **James E. Smith**, "The Auditor's Perception of the Relationship with Management: Financial Auditing versus Operational Auditing."

Robin Roark, lecturer in voice in the music department, will be performing in two area operas.

On April 22 and 23 he will sing the part of Alfredo in Verdi's "La Traviata" for the Richmond Civic Opera Association. The performance will be at the Empire Theatre in Richmond.

On June 4 and 5 he will be Gherardo in Puccini's "Gianni Schicchi" at Christopher Newport College. The opera is sponsored by the Virginia Opera Association.

Jerry Bledsoe and **Chris Boll** represented the College at the 1977 Conference of the U.S. Institute for Theatre Technology, which met in March in Washington, D.C. In addition to major theatre architects, consultants, and engineers, the USITT is composed of scene designers and technicians from educational and regional commercial theatres across the country. Bledsoe works with the costume and education commissions and serves on the steering committee of the Scenography Commission.

William Bullock of the School of Education and a former school superintendent, recently served on the education panel of the Washington and Lee University Public Education Seminar for education journalists throughout the state of Virginia. The seminar dealt with elementary, secondary, and higher education and was designed to increase journalistic awareness and understanding of educational aspects of finance and control. Bullock, who discussed the dangers of authoritarianism among directors of educational systems, also suggested that little is done at the state level to provide leadership for the alternative education programs that all Virginia school divisions must launch by 1980 under State Board of Education standards of quality. The same, he indicated, is true in highly controversial areas of curriculum such as sex education. Other members of the panel included the legislative committee chairman of the Virginia School Boards Association, the chairman of the State Board of Education, and the executive director of the Virginia Education Association.

Dean **James Yankovich** of the School of Education will serve as consultant in a forum dealing with Parents' Rights in Education of Children at the Eastern

Region Conference of Kappa Delta Pi in Richmond, April 15-16. As consultant, Dean Yankovich will lend his expertise to the Forum presentation and will field questions at its conclusions. **Frances Nelson**, counselor of William and Mary's Alpha Xi Chapter of Kappa Delta Pi, is a member of the conferenced planning committee.

Professor **Armand Galfo** of the School of Education is a referee of papers submitted to the eighth annual Conference on Computers in Undergraduate Curriculum, to be held June 19-22 at Michigan State University. The papers describe innovative uses of the computer in teaching and counseling undergraduate students.

Professor Galfo has been notified by the Concepts Division, Headquarters, U.S.A.F., The Pentagon, that his review and analysis of the monograph **The Critical Properties of Sudden Attack: A Study Proposal** will be incorporated into the final proposal for research on the subject by the Air Force. Mr. Galfo's major recommendation is to convert the non-numerical data system of an interactive model, described in the monograph, to a numerical method which would allow computer modeling and data analysis.

The Secondary Commission of the Southern Association of Colleges and Schools has appointed a commission to study and recommend revision to the standards, policies, and procedures of

the Commission on Secondary Schools. **Robert Maidment**, associate professor of education, will serve as state committee consultant for the study.

At the annual meeting of the Virginia Council of Teachers of Mathematics, March 19-20 in Harrisonburg, professor **S. Stuart Flanagan** of the School of Education spoke on the relationship between developments in the State Testing Program and minimum mathematic requirements for graduation. Flanagan is president of the Council.

James E. Smith of the School of Business Administration presented a paper on "Using Communications Theory to Evaluate the Current State of Financial Reporting" at the Southwest Regional Meeting of the American Accounting Association in New Orleans.

Smith's article on "The Influence of the Tax Reform Act of 1976 on the Partnership: A Recognition and Planning Perspective" has been accepted for publication in the *Virginia Accountant*.

Psychology Professor **Herbert Friedman** spoke on extrasensory experiences and demonstrations, both in the laboratory and everyday life, in a workshop on ESP phenomena. The workshop was part of a Danforth Conference on "The New Consciousness," March 25-27, in Roanoke.

At a conference workshop on transcendental meditation, sophomore **Stephen Barnard** of Alexandria, Va., introduced participants to the ways in which such meditation affects sensory awareness and conscious experience.

Psychology professor **Virgil V. McKenna** and his wife, **Willafay**, a law student at Marshall-Wythe, were program planner for the conference.

Personnel Bulletin

Passport Club--William and Mary permanent employees are eligible for membership in the Busch Gardens Passport Club. Upon presentation of a valid membership card at Busch Gardens' main gate, the card bearer and family are entitled to a special reduced admission. The Passport Club card replaces The Friendly Eagle Club card issued in 1976.

Membership cards for 1977 are

Management Training Courses Set

Several short courses and workshops on improving management skills are being offered for State employees this spring by the Commonwealth's Management Development Training Service (MDTS). Interested employees may apply for the courses by submitting a request in writing to their department heads, who will then forward the request to the College Personnel Office. Tuition fees, normally \$30, and other costs must be borne by the employee's department.

Course titles, dates offered, eligibility requirements and application deadlines are as follows. Each will be taught in Richmond.

Styles of Managing with People I, May 2-4, deadline April 18; May 31-June 2, deadline May 17; for supervisors at all levels.

Styles of Managing with People II, May 23-24, deadline May 9; Sept. 29-30, deadline Sept. 15; requires completion of Styles 1.

Styles of Managing with People III, May 5-6, deadline April 21; Sept. 15-16, deadline Sept. 1; requires completion of Styles II.

Employee selection, May 25-26, deadline May 11, for supervisors involved in selecting employees.

Women in Management (for women), Apr. 20-21, deadline Apr. 13;

available for permanent College employees. Cards will be issued in the College Personnel Office to eligible employees on an individual basis, after presentation of acceptable personal identification. Cards will be issued Monday through Friday between 8 a.m. and 12 noon, and between 1 and 5 p.m. in the Personnel Office, 201 James Blair Hall.

Apr. 28-29, deadline Apr. 21; for women in or expecting to be in management positions.

Women in Management II, May 18-19, deadline May 4; June 6-7, deadline May 23, requires completion of Women in Management.

Performance Appraisal, May 11-12, deadline Apr. 27; June 1-2, deadline May 18; for supervisors who complete service ratings.

Time Management, May 19-20, deadline May 5; for supervisors.

Grievance Handling, (fee is \$20), May 6, deadline April 29; May 13, deadline May 6; for supervisors.

Newsmakers

Sophomore ROTC student **Thomas Bell** of Williamsburg placed second in the Individual Trick Drill category at Hampton Institute's annual Invitational Drill Competition, March 26. "The competition was some of the toughest I've seen" said **Sgt. Maj. Cato**, who directs William and Mary's ROTC drill team. Bell is a member of the Queen's Guard.

Jeffrey J. Sanderson, visiting professor of physics, attended the 1977 Washington Conference for Senior Fulbright-Hays Scholars, March 20-23. The theme of the conference was "U.S. Policy Directions: Domestic and Foreign" and it was conducted by the Washington International Center in cooperation with the Department of State and the Council for International

Exchange of Scholars. Sanderson was awarded a Fulbright-Hays travel grant by the U.S.-U.K. Educational Commission in support of his visit to William and Mary. An article entitled "Effects of the Small Components of the Nucleon on Pionic Disintegration of Deuterium near Threshold," by physicists **Etienne Delacroix** and **Franz Gross**, has been published in Physics Letters.

Charles Davidson and **John Conlee**, English and **Jerry Smith**, modern languages, attended the annual meeting of the Southeastern Medieval Association, March 24-26, held at Virginia Commonwealth University. Professor Conlee presented a paper on "The Dream-Debate in Middle English: An Approach to a Genre."

Development Office Grant Opportunities

NATIONAL SCIENCE FOUNDATION

Public Service Science Residencies and Internships - To improve the public understanding of science, engineering, and technology and their impact on public policies, through the participation of scientists and engineers and of students of science and engineering in public service science activities. Activities should be directed toward enabling citizens to reach informed decisions on issues affecting their daily lives, as consumers, workers, family members, and community residents, as well as on matters of public policy in broader social and political contexts.

Appropriate projects may include (but are not limited to) research, writing, expert advice and other activities addressed to the needs of citizens, and informal educational activities for adults such as seminars, workshops, and public lectures. Residents and interns must associate themselves with any of a wide range of host organizations, including (for example) educational institutions, state and local government agencies and offices, professional associations and societies, trade unions and trade associations, citizen organizations and other groups that serve important public purposes. For more information and guidelines contact Julia Leverenz, ext. 4391. Deadline: May 15.

Scientists & Engineers in Economic Development Program - 1) Research/Teaching Grants - An individual may apply through his institution for support to enable him to conduct research or teach (or both) in one of 43 developing countries. The research and training grants will be used to support specific development projects designed by eligible U.S. scientists in collaboration with foreign counterparts. Proposals for joint projects should be developed directly by the cooperating scientists and submitted to NSF by the U.S. scientist through his home institution. 2) International Travel Awards - Individual U.S. scientists and engineers may apply directly for international travel support for participating in projects which require only a limited amount of time or which can proceed with only one or two consultative visits. Travel awards may be used to support visits by persons who are involved in the planning of Research/Teaching projects when such visits are likely to improve the quality of a project and logistical arrangements. Applications for travel support may be submitted any time. The closing dates for submission of Research/Teaching proposals are June 1st and December 1st. Approximately five months are required to process applications. For guidelines for the preparations of proposals, write or call: Division of International Programs, National Science Foundation, Washington, D.C. 20550 Telephone: (202) 634-7930.

Minority Centers for Graduate Education Program - To promote increased participation by minorities in science and engineering, NSF will provide support for 1) planning grants to provide assistance in planning for the establishment of Minority Centers for Graduate Education; 2) study grants concerned with questions of minority participation in science and engineering, the appropriate geographical location of Minority Centers for Graduate Education, the identification of the disciplines which should be emphasized at such centers, or the development of other mechanisms for

increasing minority participation in science and engineering. Deadline: May 6. Contact J. Leverenz, ext. 4391, for more information.

Public Service Science Residencies and Internships - To encourage participation of experienced scientists and engineers, as well as students, in public service science activities. Residents and interns will work with organizations such as educational institutions, professional associations and societies, State and local government agencies, trade unions and associations, and citizen organizations. Application Deadline May 15. For further information contact Julia B. Leverenz, Grants Office, Extension 4391.

NATIONAL ENDOWMENT FOR THE HUMANITIES

GENERAL RESEARCH PROGRAM - The program supports a wide range of humanistic scholarship. Of current particular interest is the research and writing of serious narrative history on the State and local levels. Other areas of consideration include humanistic research in archeology, history, literature, philosophy, and social sciences. Prospective applicants are urged to make preliminary inquiries of the Endowment staff prior to the development of a formal proposal. Such inquiries should be made at least eight weeks prior to the official deadline. For further information, guidelines, and application materials contact: The Division of Research Grants, Mail Stop 350, National Endowment for the Humanities, Washington, D.C. 20506 (202) 382-3414. Deadline, June 1.

Fellowships for Independent Study and Research - For humanists who have made or demonstrated promise of making significant contributions to humanistic thought and knowledge. Fellows must devote full time to their fellowship study. Fellowships are available in all fields of the humanities including interdisciplinary studies. The deadline for applications is **June 1, 1977**, for study in 1978-79. For more information and application materials contact David Coder, Division of Fellowships, National Endowment for the Humanities, 806 15th Street, N.W., Washington, D.C. 20506. (202) 382-5827.

NATIONAL CENTER FOR HEALTH SERVICES RESEARCH

Research on Issues Related to Health Manpower - Of particular interest are applications proposing to study aspects of the non-physician components of the health care labor force. Suggested areas of research include: (1) Collective Bargaining in the Health Care Industry; (2) Health Manpower Career Patterns and Mobility; and (3) The Supply of Health Manpower. Research proposals need not be confined to the areas mentioned, however, and applicants may propose studies which address a particular subset of the issues raised in any given area. Consideration will be given to proposals for empirical studies which bear directly on the formulation of policy, as well as those oriented to more theoretical or methodological concerns. For additional information, a copy of the program solicitation (**DHEW Publication No. HRA-77-3156**), and application materials, write/Review and Advisory Services Office, National Center for Health Services Research, Room 15-35, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857. Deadlines: July 1 and November 1.

ENVIRONMENTAL PROTECTION AGENCY

Intergovernmental Exchange Program - A temporary exchange of personnel between federal agencies, state and local governments, and institutions of higher education. - Assignments are usually for one-year periods but may be extended depending upon the nature of the work. Applicants should have at least four years of post-graduate experience and show an interest in independent investigation. The Environmental Sciences Research Laboratory is looking for applicants with expertise in the fields of chemistry, physics and meteorology. For more information on the program, write to Gloria J. Koch, Coordinator, ESRL (MD-59), EPA, Research Triangle Park, North Carolina 27711. The Office of Air Quality Planning and Standards has openings in the following areas: energy strategies, engineering/economics, pollutant analysis, source receptor analysis, atmospheric chemistry/engineering, emission standards and engineering, standards implementation, and data systems. Further information is available from Gail Whitfield, Coordinator, OAQPS (MD-11), EPA, Research Triangle Park, North Carolina.

ADMINISTRATION ON AGING

Planning Grants - To assist postsecondary institutions in planning programs in gerontology. Deadline, April 29. For information, see address below.

Career Training Grants - To develop multi-disciplinary projects to prepare students at the undergraduate and graduate levels for careers directed towards serving the elderly. Deadline, May 6. For information, see address below.

Quality Development and Improvement Projects - To stimulate new and different kinds of projects designed to more effectively serve the needs of older Americans. Examples of acceptable types of proposed projects include: (a) design and development of model instructional approaches to introduce gerontology into various curriculum - this could be for career training; and (b) the use of audio-visual materials for presentations in non-traditional approaches to instruction. Deadline, April 29. For information and applications write Administration on Aging, Training Branch, Office of Human Development, HEW, 400 6th St., S.W., Washington, D.C. 20201 or call 202/472-3050.

FORD FOUNDATION

Ford Foundation Program in Policy Analysis for State

Environmental Management - To encourage environmental policy analysis, its use by government agencies, and continuing government/university cooperation. Projects should focus on important environmental or natural resource policy issues facing state government, such as: 1) The extraction, transport, processing and conservation of energy resources; 2) The maintenance and improvement of air and water quality; 3) The management of solid wastes, hazardous materials or toxic substances; 4) Land use regulation and growth policy, and 5) Intergovernmental relations in environmental and natural resource programs. This list is only suggestive; other policy areas would be equally appropriate. For more information and guidelines contact Julia Leverenz, ext. 4391. Deadline for preliminary proposal is July 15.

Classifieds
