## Metropolitan Opera Star to Open Concert Series

The 1980-81 Concert Series will open Friday, November 7, with a performance by the distinguished Metropolitan Opera mezzo-soprano, Florence Quivar.

Miss Quivar's concert will begin at 8:15 p.m., in Phi Beta Kappa Memorial Hall. Individual tickets are \$3 for members of the College community, \$4 for the general public and are available from the director of the Concert Series, Ken Smith, at the Campus Center. A limited number of tickets will be available at the Phi Beta Kappa box office the night of the performance. Season tickets are still available from Ken Smith at \$12 for students, faculty and staff of the College; \$17 for the general public.

An artist whose exceptional vocal beauty is employed with rare musical perception and skill, Miss Quivar made her New York debut in 1973 as guest soloist in the Verdi Requiem with the National Symphony at Carnegie Hall. In the brief time since her debut, she has been repeatedly engaged by the world's leading conductors, including Bernstein, Boulez, Rostropovich, Mehta, Levine, Ozawa and many others.

With the Metropolitan Opera, she has well over 25 roles to her credit including Adalgisa in "Norma," and Serma in "Porgy and Bess."

In her Williamsburg concert, Miss Quivar will sing arias from "The Marriage of Figaro," and "Samson and Delilah," as well as a selection of

popular Spanish songs by Manuel de Falla, German gypsy songs, Zigeunerlieder, songs by Brahms as well as works by Schubert. She will close her program with four American spirituals.

The Pennsylvania Ballet will be the second attraction on the Concert Series schedule. The ballet will perform, Tuesday, Nov. 25. Nathaniel Rosen, cellist, will be here February 3; The

Romeros, a quartet of classical guitarists, March 2; Russian-born violinist Boris Belkin, March 19; and the Czech Philharmonic orchestra, March 24.

## Pianist Marian Hahn To Give Encore Concert

Marian Hahn, a talented young American pianist who was warmly received when she performed here in 1978, returns Nov. 9 for the opening concert of the new Sunday Series season at the College.

Miss Hahn's concert will begin at 3 p.m. in the Campus Center ballroom. There is no admission charge. Donations will be accepted at performances.

She will play the Prelude and Fugue in F flat minor and the Prelude and Fugue in A Major by Bach; Fantasie in C Major opus 17 by Schumann; Bartok's Suite, opus 14; and three short pieces by Liszt.

Since 1976 when she reached the rank of finalist in the international

Leventritt Competition, Miss Hahn has been making an impact on audiences throughout the United States. She has been heard in such places as Carnegie Recital Hall and the Metropolitan Museum in New York, the Phillips Collection, Washington, D.C., the Flagler Museum, Palm Beach, the Gardner Museum in Boston and universities from Virginia to California.

She is a Phi Beta Kappa graduate of Oberlin College and received her master's degree from the Julliard School. She has received many prizes for her artistry and made her New York recital debut as the Madeleine Malraux award winner of the Concert Artists Guild.

## Green Bequest Benefits Sunday Performances

A bequest from the estate of Warren J. Green, former director of the Campus Center, will be used to further the College's cultural activities, and in particular, The Sunday Series Concerts.

Acting on a recommendation from President Graves, the Board of Visitors at its meeting of October 17-18, approved the purchase of a new spinet piano with funds from the Green estate. Funds which remain after the purchase of the piano will be used to establish the Warren Green Fund, which will function as an endowment. Income from this fund will be used to support an annual concert, to be designated "The Warren Green Memorial Concert," and, as the income permits, to

support the Sunday Series Concert activities.

Green, who retired in 1976 after 13 years as director of the Campus Center, was manager of the Concert Series for six years and the Sunday Series for two seasons.

As concert manager, Green sought a dignified, balanced program with box office appeal. He continually built the attendance at the Concert Series to the point where sold-out seasons and standing room only audiences were the rule, not the exception.

Ken Smith, who currently directs the Concert Series and the Sunday concerts, said that the Warren Green Memorial Concert performance would be designated next season.

## Reynolds Service Today

November 3, 1980

### TO: Members of the College Community

With deep regret I must inform you of the death of Thomas L. Reynolds, Professor of Mathematics and Computer Science, on Sunday, November 2, at Williamsburg Community Hospital.

Tom came to the faculty of William and Mary in 1960 from Millsaps College and served as chairman of the department. He received his B.S. from Guilford College in 1938 and his M.A. and Ph.D. from the University of North Carolina. He was a veteran of the Army Air Corps, World War II, and held memberships in the Mathematical Association of America, the American Mathematical Society, and the National College Teachers of Math. He was a member of the Williamsburg United Methodist Church.

He is survived by his wife, Raye, their daughters, Pam Smith and Pat Kiser, and their son, Reverend Richard L. Reynolds.

There will be a memorial service on Tuesday, November 4, at the Williamsburg United Methodist Church at 4 p.m. Interment will be on Wednesday at 2:30 p.m. at the Centre Friends Meeting Cemetery near Greensboro, North Carolina.

The family suggests that expressions of sympathy take the form of a contribution to the Williamsburg Emergency Medical Services Unit.

## Hahn Recital Set Sunday

Continued from P. 1

In addition, Miss Hahn has presented successful debut recitals in Paris and London and has been heard on RAI, Italian radio. She has appeared as a soloist with the Cleveland Orchestra, the North Carolina Symphony and the Philharmonic Symphony of Westchester.

## Remler Speaker for Project Plus

### 'Entropy and Solar Energy: An Engineering Overview'

Edward A. Remler, professor of physics at the College since 1977, will be guest speaker at the next Project Plus open forum at 7:30 p.m., Wednesday, November 5, in Millington Hall auditorium.

Remler will take as his topic, "Entropy and Solar Energy: An Engineering Overview," tying in the general theme of Project Plus for this year, "Food and Energy: Problems of Scarcity in a Hungry World."

Remler earned his B.S. degree at M.I.T., his M.S. at Columbia University, and his Ph.D. at the University of North Carolina. He is a specialist in theoretical physics, scattering and particle physics.

The forum program for Wednesday, Nov. 12, will be entitled "Water Disposal: Is it the Achilles Heel of Nuclear Power?" Speakers will include Herbert Oakley, vice president for Nuclear Waste Disposal, Chem-Nuclear Systems, Inc., Barnwell, S.C.; Fred Millar, spokesman since 1977 for the Potomac, Alliance, a safe-energy group in Virginia, D.C. and Maryland; George Grayson, a member of the government department at the College, chairman of the Nuclear Waste Committee of the Solid Waste Commission of Virginia and a member of the House of Delegates.

Alan Geyer, executive director, Churches' Center for Theology and Public Policy, Washington, D.C., will be speaker at the Nov. 19 forum and will discuss "Hunger and Cheap Grace."

## Roberts Named New Department Head at VIMS

Morris H. Roberts has been named head of the Department of Marine Culture at the Virginia Institute of Marine Science (VIMS), according to Frank O. Perkins, VIMS assistant director and head of the Division of Biological Oceanography.

Roberts completed his graduate studies at VIMS-William and Mary in 1969 and taught biology at Providence College for two years. He later was Director of Invertebrate Studies with Aquatic Sciences, Inc., in Boca Raton, Florida. There, he studied larval development and culture of the blue crab, *Callinectes sapidus* and carried out toxicity studies with various invertebrates and fishes. He was also responsible for algal and invertebrate culture.

Roberts returned to VIMS in 1973 to assist with a study for the Council of Environmental Quality. His research since then has centered on the effects of chlorine and bromine chloride, and most recently Kepone, on various estuarine species.

The research in Roberts' department will encompass aquatic toxicology experiments and the culture of bivalves and other invertebrates.

"The two research areas dove-tail nicely. The bivalve culture research in progress deals with development of disease-resistant strains, while the aquatic toxicology research involves culture of animals to study effects of environmental stress on these organisms: natural stress (i.e., changes in water temperature or salinity levels) and man-induced stresses (i.e., pesticides or herbicides introduced into water systems)," explained Roberts.

The emphasis of the culture research will be to develop and distribute disease-resistant bivalves to private industry or major producers, along with information on larvae culture procedures, and to expand the number of invertebrate species cultured for various purposes.

"Since we will be producing bivalves under controlled conditions, we will also know their life history, which will enable us to study various aspects of the biology of each organism with greater reliability," Roberts added.

"Information gathered during toxicity studies will be used to determine if pesticides/herbicides used in the Chesapeake Bay are toxic to important species like oysters, shrimp or clams; otherwise we must react after damage has been done to the species. Our research will involve more than pesticides. We will also look at how water temperature, salinity levels and

sediment composition affect the life cycles of organisms," said Roberts.

He also pointed out that toxicants introduced into the environment may affect important species indirectly. "A pesticide may damage the food source of an organism, causing starvation. Therefore, we must also study effects of toxicants on important organisms in the food chain," concluded Roberts.

## Ceramics Lecture/Workshop Set by Pilcher

Spaces are still available for those who wish to sign up for the ceramics workshop to be held by Don Pilcher, nationally recognized ceramics artist and professor of art and design at the University of Illinois at Urbana-Champaign.

The workshop will be held from 9 a.m. to 5 p.m., in the old power plant ceramics studio, behind the bookstore on Jamestown Road, Saturday and Sunday, Nov. 8 and 9.

Fee for the workshop is \$30 and participants are asked to bring

examples of their own work to the Sunday workshop session. There is no charge for students, but those wishing to attend are asked to contact Marlene Jack in the Fine Arts department for details. Non-students planning to attend the workshop should send fees to the Office of Special Programs, 12070 Jefferson Avenue, Newport News, 23606.

Pilcher will lecture at 7 p.m. Saturday, Nov. 8, in Andrews Hall, room 201.

Pilcher's lecture will be a slide

presentation and discussion of his work and its relationships with both historical and contemporary ceramic art. His work has been included in over 100 invitational and competitive exhibitions over the past ten years. Some of the most notable of these are "A Century of Ceramics in the United States, 1878-1978," and "American Porcelain," which will open at the Renwick Gallery of the Smithsonian Institution, Nov. 7. Pilcher has also lectured and juried extensively. His articles have appeared in both Studio Potter and Ceramics Monthly magazines.

## Programming Team Places Third in Region Contest

A team from William and Mary participated in the 3rd Annual ACM Capitol Region Scholastic Programming Contest, which was held at the University of Maryland Oct. 25. The top two teams from each region advance to the national contest, to be held this year in St. Louis in February. The William and Mary team (in their first participation in the contest) finished fourth. Other teams participating and their final positions were: University of Maryland (1); University of Virginia (2); Virginia Tech (3); Morgan State (5); American University (6); James Madison (7); Longwood College (7); and VCU (7).

Each team consisted of four members and was given four hours total to solve four problems. The William and Mary team consisted of Tim Hall, Bev Hawk, Katy Hilscher, and Beth Katz. The faculty sponsor was Robert Noonan.

Teams were ranked by the total

number of problems solved. In the event of a tie, total time plus the number of computer runs was used to solve it. Maryland and UVA each solved three problems; Va. Tech. and

William and Mary each solved two problems; and Morgan State and AU one problem. The William and Mary team was singled out by the judges for outstanding programming style.

## Music Dept. to Present Recital by Rowland and Nicholson

The music department will present Alice Louise Rowland, soprano, in recital at 8 p.m., Saturday, Nov. 8 at the Williamsburg Presbyterian Church on Richmond Road.

The program will include sacred arias by Buxtehude, Handel and Bach, as well as Antonin Dvorak's *Biblical Songs*.

Miss Rowland, a senior music concentrator, is a member of the William and Mary Choir, Botetourt Chamber Singers and is president of Delta

Omicron Music fraternity. She is also a 1980 recipient of the Aurelia B. Walford Scholarship. She studies with Mary Lou Fletcher.

Laurinda Leigh Nicholson, a senior music and history concentrator, will accompany Miss Rowland on the piano and harpsichord. She is a member of the William and Mary Choir, Botetourt Chamber Singers, Delta Omicron music fraternity and the Sinfonicon Opera Company. She is a student of Vera Lendvay.
