

NEH Awards IEAHC Fellowship Grants Totalling \$47,300

The National Endowment for the Humanities has awarded over \$47,000 to the Institute of Early American History and Culture for fellowship programs during 1983-85.

An award of \$21,200 has been made by the NEH for post-doctoral fellowships during the two-year period. In addition, \$26,100 has been given for support of special senior fellowships for the 1984-85 academic year.

Both grants are being made to the Institute under the aegis of the NEH's program of fellowships at Centers for Advanced Study. The Institute is one of only 16 such independent centers in the country recognized by the NEH as qualified for fellowship grants. This is the first time that the Institute has received NEH support for its longstanding fellowship program.

Founded in 1943, the Institute is spon-

sored jointly by the College and the Colonial Williamsburg Foundation. It is dedicated to the furtherance of historical knowledge concerning America from the 16th century to approximately 1820.

Besides its distinguished program of post-doctoral fellowships, which have been awarded for over 30 years, the Institute is also publisher of the leading scholarly journal for early American studies, the "William and Mary Quarterly"

and the publisher of over 100 books on all aspects of early American culture. In April an Institute book was awarded the Pulitzer Prize for history.

With this new financial support for the Institute from the NEH, the Institute's fellowship program will be more varied than it has been in the past. Regular Institute fellows will be appointed for two years as before, shortly after earning the Ph.D., with the main criterion for appointment being the potential of the candidate's dissertation to be turned into a distinguished first book. The first year of the regular two-year fellowship will be the NEH-year, with approximately half of the stipend coming from the federal Endowment. The stipend for the second year of this fellowship will be entirely from Institute funds.

The new Senior Fellowship of the Institute, which will begin in 1984-85, will be awarded either as separate grants to two scholars, each of whom will be resident in sequence at the Institute for six months, or as a single twelve-month fellowship. The deadline for applications for Senior Fellowships is October 15. Senior Fellows will be expected to have compiled a distinguished record of publication prior to receiving the Institute appointment. Further details about the application procedure and the criteria for the Institute's Senior Fellowship will be made available shortly.

Scholars interested in applying either for the regular Institute fellowship or for the new Senior Fellowship should write immediately to the Director for further information.

Faculty Club Seafood Feast Set at VIMS

The Faculty Club will once again begin its social year with a party on the grounds of the Virginia Institute of Marine Science at Gloucester Point on Friday, Sept. 23.

Festivities will start at 6 p.m. Various seafoods will be featured. The club expects to offer an abundance of fried fish, oysters, crabs and New England Clam Chowder. Also included will be such complements as hush puppies, cole slaw and chips. All the usual beverages will be available.

Endowed Professorship Established By Haserot

A former professor at the College has made a cash gift of \$200,000 to establish a permanently endowed professorship in the Department of Philosophy, where he taught from 1937-1947. Dr. Francis S. Haserot of Winter Park, Fla., made the gift in honor of former William and Mary Presidents John Stewart Bryan and Alvin Duke Chandler.

Annual income from the endowment fund (approximately \$11,000 annually) will qualify for matching funds from the Commonwealth of Virginia's Eminent Scholars Program and will supplement an existing faculty member's state salary base. The Board of Visitors will appoint the first Francis S. Haserot Professor of Philosophy at its October meeting.

Dr. Haserot, 88, is a native of Cleveland, Ohio. He attended the Wharton School of Business at the University of Pennsylvania from 1913-1916 before entering the Army Air Corps in the closing years of World War I. In 1919, he completed his undergraduate degree at Columbia University and received his A.M. there in 1922.

In 1935, Dr. Haserot received his Ph.D. from Harvard University. Shortly thereafter, Haserot was told of a teaching position available at the College of William and Mary and was advised to give it special consideration. "this proved to be the fortunate origin of my greatly valued subsequent associations with the College," he said.

Dr. Haserot began his career at the College as an instructor in 1937 and was soon promoted to assistant professor. In 1942, he was named associate professor and in

1947, Haserot resigned to pursue scholarly projects. He is the author of "Essays on the Logic of Being" (Macmillan, 1932), and his fields of academic speciality are metaphysics, logic and aesthetics.

Prior to joining the College's faculty Haserot was an assistant in metaphysics at Radcliffe College and lecturer in philosophy and psychology at Northeastern University.

New Sculpture for Museum

Nationally acclaimed sculptor Lila Katzen, described by critics as "a powerful woman with a powerful art," will install an important work of hers outside the Muscarelle Museum of Art on Sept. 14.

Entitled "Curled Up C," the two-ton stainless steel monumental sculpture, measuring 93 x 91 x 84 inches, consists of two curving bands of metal in contrasting colors and should provide an intriguing counterpoint to the architecture of the College's newest building.

Its twin is installed in the courtyard of the National Museum of American Art at the Smithsonian Institution in Washington, D.C.

Katzen, a New York native, has been recognized as a leading creator of environmental, or "site-oriented" sculpture. Her work has been exhibited at some of the nation's leading galleries, including the National Collection of Fine Arts and the National Gallery of Arts of the Smithso-

nian Institution; Everson Museum of Art, Syracuse, N.Y.; Milwaukee Art Center, Wisconsin; and Fordham University.

Katzen has been an instructor in two-dimensional design-media, sculpture, art and perception at the Maryland Institute, College of Art since 1962. Among her many awards are a National Endowment Grant in 1973, a Goodyear Fellowship in 1974, and the Creative Arts Award in 1974 from the American Association of University Women.

Katzen's larger-than-life sculptures are a part of the environment at a variety of locations. Her "Antecedent" is installed in front of the east building of the National Gallery of Art in Washington, and "Antecedent II" is on the grounds of the Norton Gallery of Art in Palm Beach, Fla.

The sculpture is expected to arrive mid-day on the 14th. Katzen will supervise its placement outside the Museum on Jamestown Road.

Fears To Speak Monday At 8

William E. Fears, State Senator for the Third Senatorial District, will speak to the College Community Monday, Sept. 12, at 8 p.m. in the Little Theater. He will discuss the committee system in the Virginia Legislature and how seniority affects legislation.

Newsmakers

Wayne L. Eaton, lecturer in physical education for men, has been awarded the Fourth Black Belt and the title of Shihan (master instructor) in Okinawan Shorin Ryu Karate by Shugora Nakazato, fifth generation grandmaster, Okinawan Shorin Ryu Karate Do. A member of the William and Mary faculty since 1982, Eaton teaches courses in martial arts, karate and self defense for women. As part of his advanced karate class he also teaches Ko-Bu-Do weaponry.

Eaton is an advanced placement English instructor at Tabb High School and is currently completing work on a master's degree in educational administration at Hampton Institute.

George W. Grayson, professor of government, lectured in Brazil (Rio de Janeiro, Belo Horizonte, Recife), Bolivia (La Paz, Santa Cruz), and Chile (Santiago, Valpariso) between August 10 and August 26 under the auspices of the United States Information Service. The topics of his talks, presented to government officials, professors, graduate students, and journalists, included "Democracy and Constitutional Government," "Systems of Local Governance," and "Domestic Forces Shaping U.S. Foreign Policy Formation." "Cleaning Up Mexico's Stickit Business," an essay by Grayson on corruption in Mexico's oil industry appeared in the "Outlook" Section of the *Washington Post* on July 24. Grayson's article on "The Mexican-Venezuelan Joint Oil Facility," was published in the spring number of the *Caribbean Review*.

Carl H. Hobbs, III, assistant professor of marine science in geological oceanography at VIMS, has had two papers published in the *Journal of Sedimentary Petrology*, Vol. 53, entitled "Organic Carbon and Sulfur in the Sediments of the Virginia Chesapeake Bay" and "A Method for Determining the Dry Bulk Density of Subaqueous Sediments."

Robert J. Orth, associate professor of marine science and **Kenneth Moore**, marine scientist in VIMS' Wetlands Ecology, recently published a paper in *Marine Technology Society Journal* Vol. 17, entitled "Submersed Vascular Plants: Techniques for Analyzing Their Distribution and Abundance."

VIMS' scientists recently had papers published in the *Journal of Applied and Environmental Microbiology* entitled, "Seasonal Variation in Survival of *Escherichia coli* Exposed in Situ in Membrane Diffusion Chambers Containing Filtered and Nonfiltered Estuarine Water" and "In Situ Development of Sublethal Stress in *Escherichia coli*: Effects on Enumeration" co-authored by **Howard Kator**, assistant professor of marine science and **Martha Rhodes**, associate marine scientist in the department of estuarine and coastal ecology at VIMS.

Elizabeth A. Cornell, instructor in marine science has recently attended a conference, a workshop, and had a manuscript accepted for publication.

At the National Marine Education Association Annual Conference in South Portland, Maine the scientist presented a paper entitled "The Role of the Family in the Promotion of Science Literacy" and chaired the conference's Museums and Aquaria Committee.

Ms. Cornell will be guest editing the Association publication, *Current, The Jour-*

nal of Marine Education, (winter 1984 issue) which is devoted to contemporary issues and practices in aquarium and museum education.

She served as a faculty member and presented the results of a recent NSF research paper for the Smithsonian Institution's Office of Museum Programs' Workshop Series in Washington, D.C.

The workshop "Families in the Museum" attracted a national student body of museum professionals for the 3-day course in July.

A manuscript entitled "Pupillary Responses of *Rana pipiens*-complex frogs" co-authored by **Elizabeth A. Cornell** and Dr. Jack P. Hailman, University of Wisconsin, Madison, was accepted for publication by the journal, *Herpetologica*.

Sue Gammisch, Marine Education Specialist for the Virginia Sea Grant Program at VIMS, presented a session at the 1983 National Marine Education Association annual conference in Portland, Maine during the week of August 1-6. The theme of the conference was "Sights and Sounds of the Sea" and featured speakers from all over the United States. In 1985, the NMEA annual conference will be held here at The College. For more details, contact Sue Gammisch at VIMS.

Reinando Morales-Alamo, marine scientist and **Dexter S. Haven**, professor of marine science, have recently published a paper in *Marine Biology*, an International Journal on Life in Oceans and Coastal Waters, entitled, "Uptake of Kepone From Sediment Suspensions and Subsequent Loss by the Oyster *Crassostrea virginica*."

A document entitled, "Adult Play," by **John Charles** of the department of physical education for women, has been selected for inclusion in the September 1983 issue of "Resources in Education" published by the ERIC Clearing House on Teacher Education.

Berna L. Heyman, head of the bibliographic services division of Swem Library, was recently appointed to the Southeastern Library Network (SOLINET) Nomination Committee. The Committee is responsible for nominating the Board of Directors of Solinet as well as the SOLINET representatives to the OCLC Users Council. Ms. Heyman is currently completing a term on the Executive Committee of the OCLC Users Council.

William T. Geary, professor of accounting, participated in the 15th Symposium for Educators, in Itasca, Ill., presented by the international accounting firm of Ernst & Whinney.

The July 20-22 conference brought together some 85 leading accounting educators from colleges and universities throughout the United States and Canada to exchange updates and ideas with nearly 50 of the top executives of the firm.

Armand J. Galfo, professor of education, has written a book entitled "Educational Research Design and Data Analysis: An Integrated Approach," that will be published in paperback in November and in hardback in December.

Published by the University Press of America, the new book is described as a "primer to help graduate students to conceptualize the relationship between research design and data analysis." It is the first book to integrate the two areas.

Self-Study Notes

This is the first of a series of reports that will appear in this space. The Self-Study of the College will involve a large number of people on campus. The Steering Committee, chaired by Professor of Physics Hans C. von Baeyer, will keep the community informed of the progress of the Self-Study by this and other means.

The Self-Study will be conducted by eleven committees. President Graves, on recommendation of the Steering Committee, has appointed the following faculty members to chair them. The committees themselves will be chosen by the middle of September.

Purpose of the Institution:	W. F. Davis Professor of English
Organization and Administration:	E. L. Bradley Professor of Biology
Educational Programs:	Richard Prosl Assoc. Professor of Math and Computer Science
Financial Resources:	M. D. Schiavelli Professor of Chemistry
Faculty:	T. F. Sheppard Professor of History
Library:	J. E. Selby Professor of History
Student Development Services:	D. W. Thompson Professor of Chemistry
Physical Resources:	M. M. Stanley Professor of Business Administration
Special Activities:	B. W. Coursen Professor of Biology
Graduate Programs:	J. A. Musick Professor of Marine Science
Research:	K. G. Shaver Professor of Psychology

Earlier it was announced that the Editor of the Self Study would be Professor Jack Edwards. When he became Acting Dean of the Faculty of Arts and Sciences, President Graves appointed Associate Professor of Anthropology Theodor Reinhart to the post of Editor.

Next: The Calendar of the Self-Study

Friends' Drive Raises \$119,844 During 82-83

The Friends of the College have completed their 1982-83 fund drive by raising a total of \$119,844 to support the College's educational programs, exceeding their \$115,000 goal by \$4,844.

According to J.B. Hickman, chairman of the Friends Advisory Council, the final figures included \$34,111 in unrestricted gifts, which were stressed during the drive in light of state cutbacks affecting the College's operations budget. Unrestricted gifts received in 1982-83 exceeded last year's total by \$10,201.

A local organization of William and Mary supporters, the Friends raise money to strengthen aspects of the College's educational program for which the state does not appropriate money, or for which supplementary private support is crucial.

Led by a 22-member advisory council, the local Friends provide financial assistance for faculty compensation, student scholarships, faculty research, student honors and independent study projects, instructional equipment and library materials.

Funds raised by the Friends are also used to bring to the campus a variety of specialists, including businessmen, artists, political leaders and other professionals, who supplement classroom instruction with lectures in their particular fields of expertise.

Hickman characterizes the work of the organization as part of a reciprocal relationship between the College and the community. "We ask donors to invest in the College," says Hickman, adding that 6,500 students and 1,500 faculty and staff support the local economy with millions of dollars each year. Many more parents and visitors to the College also spend signifi-

cant amounts during Homecoming, Commencement and athletic and other special events, he says. "Investing in William and Mary is just good business."

The Friends organization was established in 1972 and raised \$22,000 its first year.

Evans at Bland Selected Judge For NCTEA Awards

Timothy J. Evans, director of Richard Bland College's Writing Center, is the institution's first regional judge named by the National Council of Teachers of English for its Achievement Awards in Writing Program.

As one of two judges in a region including northern Virginia, Washington, D.C. and part of Maryland, he recommended one of 24 entries by high school seniors for advanced evaluation.

Physics Colloquium

H.J. Gerbert, Federal Institute of Technology, Zurich, will speak on "Polarization of the Positron in Muon Decay," at the physics colloquium Friday, Sept. 9 in William Small, room 109, at 4 p.m.

Coffee will be served in the conference room at 3:30 p.m.

Speaker at the Sept. 16 colloquium will be A. Zehnder, Swiss Institute for Nuclear Research. His topic will be "The Hunting of the Axion."

Notebook

President Continues 'Open House' Hours

President Graves will hold "Open House" hours for students throughout the year continuing a tradition of providing opportunities for students to chat informally with him about any topic of their choosing.

The President has set aside the following hours to meet with students, over and above his daily calendar, and students are invited to stop by his office in Ewell Hall during these hours. No appointment is necessary. Callers will generally be given about 10 minutes.

Listed below are dates of Open House hours for the fall semester. Hereafter the News will carry only dates for the following week.

Tuesday, Sept. 27	5-6 p.m.
Monday, Oct. 3	4-5 p.m.
Thursday, Oct. 13	4-5 p.m.
Wednesday, Oct. 19	3-4 p.m.
Thursday, Oct. 27	2-3 p.m.
Wednesday, Nov. 2	4-5 p.m.
Thursday, Nov. 10	4-5 p.m.
Monday, Nov. 14	4-5 p.m.
Wednesday, Nov. 30	4-5 p.m.
Thursday, Dec. 8	4-5 p.m.

Homecoming Parade

The 1983 Homecoming Parade will be held Saturday, Oct. 22, at 10 a.m.

All organizations interested in entering a float in this year's competition should send a representative to the Alumni House at 3:30 p.m. on Tuesday, Sept. 13.

For further information, please contact John Phillips at ext. 4302 or 229-1693.

Intramural Softball

The Men's Intramural Softball competition will be held in the Fall this year. Entries are being taken in the Men's Intramural Sports Office in Room 4, Blow Gymnasium. Each entry must include a team name, manager's name and phone number, and a complete roster.

A manager's meeting will be held at 4 p.m. on Friday, Sept. 9 in Blow Gym.

Deadline for entering a team will be at the manager's meeting.

Workshop Set For Study Skills

Improve study skills as you learn effective, researched methods of study through STUDY SKILLS WORKSHOPS

Open to all: Sessions offered throughout the semester on Wednesdays from 7:30 p.m. to 8:30 p.m. in Jones 301.

September 14: MEMORY/READING STRATEGIES AND NOTE TAKING SKILLS

Skillful, purposeful marking in your text-book is more useful than taking copious chapter notes. In fact, it is the most efficient aid for retention and review that you can devise. Learn and use the SQ3R method of reading and textbook usage and see yourself become a more efficient, effective student.

Poetry, Art, Fiction . . .

William and Mary's literary magazine, *The Review*, will hold an organizational meeting tonight, Tuesday, Sept. 6th, at 8 p.m. in the *Review* office (207 Campus Center). Anyone interested in working on the poetry or fiction staffs should attend.

Submissions are accepted from all over; the staffs review and discuss the submitted materials.

Office hours are 7-9 p.m., Sunday through Thursday.

For further information, stop by the office or call ext. 4862.

Shared Experience

Shared Experience is a program of local internships. The program is designed to allow students to gain practical experience in areas of academic and career interests. Interns work 8-12 hours per week and receive neither salary or academic credit. Among this year's sponsors are James City County Government, The War Memorial Museum, The National Park Service, VIMS, The Williamsburg Clerk of Circuit Court, and The Williamsburg Area Women's Center. There will be an informational meeting Sept. 13, at 4 p.m. in Morton Hall, room 238.

For more information, contact the Office of Career Planning, Morton Hall, Room 140, ext. 4427.

HELP NEEDED!

Immediate assistance is needed for handicapped students here at the college. Please volunteer to help in one or more of the following capacities:

- drivers to get students to and from class or to run errands
- escorts to walk with handicapped students around campus
- readers to read assignments, texts, and handouts onto tapes.

Please volunteer to help your fellow students. Call Dean Jarman's office (ext. 4581, 4546) for more information.

NDSL and SEOG Recipients

If you are a National Director Student Loan and/or Supplemental Opportunity recipient for the 1983-84 academic year, you must come by the Student Loan Office, Room 102, James Blair Hall, no later than September 15. Failure to do so by this date will result in cancellation of your loan or grant.

VIMS Completes Feasibility Study on James River Fish Passages

by **Becky Ashe**
Editorial Assistant

A Virginia Institute of Marine Science (VIMS) report entitled "Feasibility Study of Fish Passage Facilities in the James River, Richmond, Virginia" has just been completed. The study was conducted by Dr. Joseph G. Loesch, Steven M. Atran and William H. Kriete, Jr., fishery specialists at VIMS and Ben Rizzo, a hydraulic engineer with the U.S. Fish and Wildlife Service.

The present interest in fish passage facilities has been motivated by the dramatic decline in Virginia landings of striped bass, American shad, alewife, blueback herring, and hickory shad since the early 1970's, Loesch said. These species are anadromous, i.e., they live in the ocean but must return, via estuaries, to fresh water to spawn.

The report was a direct consequence of Delegate Ralph L. Axselle's House Joint Resolution No. 233 agreed to by the Virginia House of Delegates and the Senate in 1981. The resolution directed appropriate State agencies to conduct a feasibility study of the construction and maintenance of fish passage facilities in the Richmond area of the James River and also, directed that assistance be sought of appropriate Federal agencies. In response to the resolution, the James River Fish Passage Facilities Committee was formed. It consists of representation from the Virginia Commission of Game and Inland Fisheries, the Virginia Institute of Marine Science of the College of William and Mary, the Virginia Marine Resources Commission, the U.S. Fish and Wildlife Service, and the U.S. National Marine Fisheries Service.

Based on the documented aesthetic, social and economic success realized in other restoration programs, Loesch said that the construction of fish passage facilities on the five low head dams (Manchester, Browns Island, Belle Island, Williams Island and Boshier) in the Richmond area would restore about 100 miles of historical spawning grounds.

Benefits expected from the fish passage facilities would be 1) increased spawning and nursery habitat; 2) increased density

of forage species for resident species; and 3) enhancement of sport fisheries, commercial fisheries and their support businesses, city park fishing activities, and associate interpretive programs in the Richmond area.

It is estimated that about 600,000 shad and 3,000,000 river herring (alewife and blue back herring) would eventually be passed upriver, but their number and size would be a function of the types of facilities constructed.

Preliminary total cost estimated by Rizzo for fish passage facilities on all five dams would range from \$2.5 million to \$7.5 million. The actual cost will depend on the nature of the facilities built and whether or not hydropower is redeveloped at the Manchester and Twelfth Street plants. The cost of a single facility elsewhere, where dams are much higher (19' being the highest of the five in the Richmond area) has often exceeded the total estimated costs for all five dams on the James River.

In contrast to the low levels of anadromous stocks in Virginia, stocks have been greatly enhanced or reintroduced after long absences in the New England region. These successes are due to the construction of fish passage facilities and stocking of fish upstream of the dams.

Northeast Utilities (NU), a group of utility companies, spent \$12.5 million for three fish ladders in the Connecticut River that were completed in 1980 at the Turners Falls Dam, Massachusetts. Also, in the Connecticut River in Vermont, a ladder at the Vernon Dam was completed in 1981 at a cost of \$9.5 million. Another ladder in Vermont at Bellows Falls Dam, scheduled to open later this year, will cost about \$7 million. The member companies of NU proclaim the results of their restoration efforts, and their cooperation with the Committee for Fisheries Management of the Connecticut River Basin.

The Holyoke Water Power Company lays claim to the first successful shad fishway on the Atlantic coast, the Holyoke Dam fish lift, which passes about 400,000 shad and 500,000 river herring upriver. At the Turner Falls facility, NU has provided viewing areas for the public. Each spring, a

"shad derby" sponsored by the Holyoke Water Power Company brings thousands of anglers to the river below the dam.

An NU brochure states that sport fishermen catch over 10,000 American shad in the Connecticut River, and spend \$270,000 annually. Additionally, the value of the commercial catch from the river mouth to just below Hartford (approximately 45 miles) averages about \$500,000 annually.

Loesch said that there is a rapidly growing awareness of the aesthetic and social importance of urban fishing programs by urban planners, developers, and city officials, as well as by fishery professionals. The present high activity in water reclamation projects for public recreation, the involvement of industry and the public in fish restoration projects, and the growing popularity of urban fishery programs indicated that the aesthetic and social rewards

of such endeavors are no less important than the monetary considerations.

The Commonwealth of Massachusetts, the State of New York and the District of Columbia are examples of state and municipal governments that have instituted urban fishery programs because of high social value of water-related recreation.

The James River Fish Passage Facilities Committee recommended the installation of facilities that would ensure upstream passage for anadromous species, and, subsequently, the successful downstream return of adults and juveniles. Access to historical spawning grounds above Richmond will enlarge the anadromous populations. All Virginians would benefit from this enhancement, Loesch said, and in particular, the cities and other municipalities from Richmond to Lynchburg would have a unique opportunity to enrich their aesthetic, social and economic posture.

National Conference Planned at VIMS

The Virginia Institute of Marine Science (VIMS), School of Marine Science (SMS), will be host to the National Marine Education Association Conference (NMEA) in 1985, according to Sue Gammisch, Virginia Sea Grant Marine Education Specialist, Department of Advisory Services at VIMS, who will serve as conference chairperson.

The conference will bring together members from all 50 states, Canada, New Zealand, Great Britain and Egypt. Its membership is composed of teachers, aquarium, museum and zoo educators, college and university personnel, representatives from marine research facilities, private industry and government agencies, as well as all other persons interested in the world of water.

The Association provides opportunities for continuing professional development as it assists educators in meeting the needs of their students. Through regional newsletters and other publications, it stimulates communications among all persons interested in the aquatic environment.

The goals of the Association are to make educators more aware of the marine environment and their involvement in it. It provides a forum for the exchange of educational materials, ideas and resources; effective representation of marine education interests throughout the nation; and an opportunity to take an active role with their colleagues.

The Association consists of 14 Chapters throughout the United States. Gammisch was elected as president of the Mid-Atlantic Marine Education Association (MAMEA) Chapter for the 1984 term. She has been actively involved in this Chapter for many years and was recently elected for a second term to the NMEA Board of Directors for 1983-85.

Costs of these conferences are held to a minimum by meeting on college campuses, thus enabling as many as possible interested professionals and members to attend.

The 1983 Conference was hosted by the Gulf of Maine Marine Education Association in Portland, Maine with 440 in

Family Educational Rights And Privacy Act Detailed by V.P. Healy

Under the terms of the Family Educational Rights and Privacy Act of 1974, the College is to inform enrolled students annually of their rights under the law. The act does not apply to students admitted to the College who have not officially enrolled.

The College hereby affirms that its policies and procedures are in full compliance with the Family Educational Rights and Privacy Act of 1974, whereby each student's right to the privacy of his or her official College records and access to the same is assured.

Enrolled students shall have the following rights under the law:

1. The right of access to his or her official College records. Under the terms of the Act the College is not required to make available to students the following materials:
 - a. Confidential letters of recommendation placed in student's files before January 1, 1975, and those letters for which the student has signed a waiver of his or her right of access.
 - b. Parents confidential financial statements.
 - c. Medical, psychiatric, or similar records "which are created, maintained, or used only in connection with the provision of treatment to the student and are not available to anyone other than persons providing such treatment; provided, however, that such records can be personally reviewed by a physician or other appropriate professional of the student's choice."
 - d. Personal files and records of members of faculty or administrative personnel, which are in the sole possession of the maker thereof and which are not accessible or revealed to any person except a substitute."
 - e. Records of the Admissions Office concerning students admitted but not yet enrolled at the College. Letters of recommendation are removed from the Admissions files before the files are forwarded to the Registrar's Office.
2. The right to inspect and review his or her official College records.

3. The right to a response from the College to reasonable requests for explanations and interpretations of his or her official records.
4. The right to an opportunity for a hearing to challenge the accuracy or appropriateness of his or her official records.
5. The right to have disclosure of his or her official records limited to College officials or other persons authorized under the Act, for legitimate purposes, unless permission for release of such information to other parties is given in writing.

The College has designated the following information as "Directory Information" which may be released to the public:

1. Student's name, address (permanent and local), telephone number (permanent and local).
2. Student's birthdate.
3. Dates of attendance at the College, field of concentration, current classification, current enrollment status (full or part time), degrees awarded.
4. Previous schools attended and degrees awarded.
5. Honors or special recognition.
6. Height and weight of members of athletic teams.

A student who does not want the above information made public must file notice in writing of this request in the Registrar's Office, James Blair, by September 15, 1982.

A student wishing to review his or her College records must consult the directory of official student records in the Registrar's Office. The directory lists the offices where official student records are maintained and the name of the official responsible for the maintenance and release of each type of record, and to whom requests for access should be made.

George R. Healy
Vice President for Academic Affairs

THE PRESIDENT'S REPORT 1982-83

Twelfth Annual Review

President Graves

I

At its meeting on July 20, 1983, the Board of Visitors directed me to proceed with the formation of a Long-Range Planning Commission in 1983-84.

There are several reasons why such a planning effort is especially appropriate at this time. In ten years we shall be celebrating the tricentennial of the granting of the Royal Charter by King William and Queen Mary to establish the College in 1693. We have an obligation to make every effort over the next ten years to ensure that William and Mary will enter its fourth century strong and vital as an educational institution.

That strength and vitality will depend in large part on the financial resources which are available to support that commitment; and undoubtedly during this ten-year period we shall be initiating and completing a major effort to secure new and larger capital funds. Intensive and critical planning is an essential prerequisite to such an undertaking. At the start, we must have a clear and realistic consensus within the College community as to our needs and priorities.

It is especially urgent that we examine

these requirements and priorities at a time when there are significant changes taking place in the resources available to support higher education and in the expectations for higher education. During a period when we may well be asked to make some difficult decisions on possible changes in our programs and personnel and in the use of scarce resources in their support, it is essential that we be confident as to what among our educational priorities is really important to us as we carry out the College's mission.

II

I intend to establish the Long-Range Planning Commission in the fall of 1983. I shall ask the members of the Commission realistically to identify, evaluate and prioritize the needs of the College over the next ten to twenty years, in order for William and Mary to begin its fourth century of service from a position of strength and confidence. The work of this Commission, which I hope will be completed in the fall of 1984, will set the stage for a major capital effort by the College in the 1980's.

In order for the Long-Range Planning Commission to accomplish its goal in a timely and effective manner, it should have, as a basis for its work, a statement of the College's mission and certain assumptions and guidelines. In this section of my annual report, I shall set forth my view of the mission of the College.

Within a broad goal of excellence, William and Mary does not seek to be all things to all people. It has carved out a particular academic task which it strives to accomplish exceptionally well. It defines its objectives in a limited and realistic way, with a goal of excellence in everything it does. It is a state university of national character and unique quality.

The central purpose of William and Mary is to provide a liberal education for its students. It is a selective, residential, full-time university of moderate size that seeks to attract as students young men and women with superior qualifications and potential from every background. The College places its emphasis on motivating each student to develop to his or her full potential, and encouraging the quality of learning of the student as an individual. As a place of liberal learning, William and Mary's emphasis is on the overall intellectual and personal development, in breadth and in depth, of an individual within a liberating educational environment that emphasizes quality in both curriculum and extracurricular activities. The College's primary focus, in teaching and in learning, is on education, not training.

With this as the College's central purpose, the faculty's central concern is to protect and enhance the value of the William and Mary degree. As I stated in my 1981-82 annual report, a university is many things, as well as it should be, but at its core is the quality, the integrity, indeed in the long run the reputation, of its academic degree. The quality of the faculty, which is a reflection of the vitality, well-being, dedication, morale and skill of individual teachers and the faculty as a whole, determines the quality of the academic degree.

The heart of the mission of William and Mary is in the undergraduate college, with its emphasis on full-time and residential studies leading to the bachelor's degree in arts, sciences, business and education. Within that focus, the educational foundation of the College, its intellectual core, is in the arts and sciences. There the focus of teaching and learning, especially in the first two years for all undergraduate students, is on preparation for living, not on preparation for careers.

President Reagan speaks from William and Mary Hall during Summit of Industrialized Nations

President Looks ahead — 'competitive excellence' to be standard for planning process

William and Mary is clearly more than an undergraduate college, however. It is a university with selective objectives at the professional and graduate levels. The graduate programs in arts and sciences, business, education, law and marine science are critical to the College's mission. These graduate and professional schools are of increasing strength and quality.

Placing primary emphasis in our mission on the undergraduate program and on the arts and sciences does not by comparison set up dichotomies. The undergraduate arts and sciences program, the graduate programs, and the professional programs can be and are compatible. Graduate and professional programs and undergraduate courses are enhanced, to each other's mutual benefit, within the same university, when the objectives and goals are carefully chosen. A university whose students are primarily undergraduate, full-time and residential, benefits from the resources, environment and breadth of opportunities associated with the graduate and professional programs. This is particularly true in a university with the exceptional capabilities of William and Mary's undergraduate students. In a similar manner, the university is better able to attract and retain an outstanding faculty. Graduate and professional programs lead to financial resources at a university level, on a College-wide basis, for faculty salaries, faculty research, and libraries that would otherwise not be available. At the same time, as a state university, William and Mary has an obligation to provide the public service and educational opportunities to the citizens of Virginia which are found in William and Mary's graduate and professional programs. I support strongly the presence at William and Mary of the professional schools of business administration, education and law, the graduate program and research institute in marine science

Bob Guillen

Fire from Jefferson Hall lights up the night sky.

limited increase in enrollment, if any; few, if any, new degree programs being approved; very limited increases, if any, in employment of faculty and staff.

Second, unless there is a significant increase in general fund revenues through a general tax increase (i.e., income or sales), which seems unlikely, increases in general fund revenues which higher education can anticipate over the next several years as the economy improves will not be a significant factor. The Commonwealth has other urgent priorities to which the General Assembly will probably be forced to give its major attention. General fund appropriations, for higher education, realistically, will probably continue to decline relative to nongeneral fund appropriations.

Third, individual institutions are being asked to do more with less. Collaboration among institutions, in personnel and programs, will be emphasized, as a means of using scarce resources more effectively, with financial incentives provided for such collaboration.

Fourth, it is reasonable to assume that William and Mary will be in an increasingly competitive environment both within Virginia and across the nation in its efforts to attract the very best young men and women to its undergraduate, graduate and professional programs. Likewise, the College will be in increasingly severe competition with other universities of national quality to attract and retain exceptional faculty members and administrators. This assumption, and what we do with it, is absolutely critical to an assessment of our needs in achieving our mission, for without absolutely first-rate faculty members and administrators and without highly motivated and extremely able students, our programmatic standards of excellence will have little meaning.

Fifth, I believe that we may be confident in anticipating continuing steady increases over the years ahead in private funding. The College has been successful in the early years of its development program, now some ten years old, and with adequate support of that program, we can realistically count on significant growth. But sound planning does not lead to an expectation of unrealistic bonanzas in new private funds. The College's next major development effort, for which we are now starting to plan, will be successful. But we must be pragmatic both in our expectations of new resources and in our willingness to commit our resources and energies to ensure that success.

Finally, I sense that in both the executive and legislative branches of government there is an increasing willingness to recognize and reward excellence, creativity and innovation. Institutions which make special emphasis on quality rather than quantity, which are willing to make hard decisions in the effective use of scarce resources, which are prepared to experiment in interinstitutional collaboration, will benefit materially.

These assumptions may of course not turn out to be infallible. The Long-Range Planning Commission should consider how best to work with them as its study progresses. But I hope that they will serve as a useful point of departure.

IV

If the mission described in Section II indeed represents consensus within the College community, and if the assumptions outlined in Section III are realistic, there is one likely conclusion. Over the next ten to twenty years there will probably not be sufficient financial resources, even assuming a successful major capital effort, to continue business as usual, to continue to fund all of the present programs at a high level of quality. That quality is in danger now of being eroded, and we can expect the situation to become worse unless we have the foresight and courage to make some choices. Given the College's mission and given these assumptions, I believe that these choices must be in favor of quality over quantity whenever and wherever the choice is forced. The Long-Range Planning Commission will thus be encouraged not only to identify and evaluate the requirements of the College, but to place those needs in order of priority, using a standard of quality over quantity wherever necessary.

"... Choices must be in favor of quality over quantity"

V

More specifically, throughout the planning process I suggest that the standard that is used be that of "competitive excellence." It is one often used in the business world, but in today's environment it is applicable to an educational institution with a commitment to high quality in a period of scarce resources.

A guideline that is a general commitment to excellence is not enough for it is not sufficiently specific to allow for rigorous analysis. I hope that the Long-Range Planning Commission's examination of each of the College's programs will raise the question of what does that program contribute to William and Mary's mission; how essential is it to the achievement of that mission; is it realistic to believe that that program can maintain or achieve a position of competitive excellence; what priority should that program have among the financial requirements and resources of the College. Given the prospect of limited financial resources to be spread across the university, it is essential that programs be placed in an order of priority that reflect accurately and realistically the mission of the College and the standard by which it is judged.

I think we can all agree that, in order for William and Mary to achieve its mission, it must, first of all, be able to attract and retain the very best faculty members, and it must be able to attract students of high quality. There are obviously major financial challenges attached to these objectives. But it will be important then for the Long-Range Planning Commission to relate faculty members and students to programs, in an order of priority that will allow for a realistic assessment of needs.

This analysis may lead to a judgment that in order for William and Mary to be competitively excellent in all that it does, it cannot continue to offer all of the programs and activities that it now provides. It could lead to an assessment

that some current programs and activities should be modified or even, over time, phased out, in order that the College as a whole remain competitively excellent in what it does offer, and in order for limited resources to be used with maximum effectiveness. I shall not ask that the Long-Range Planning Commission reach hard conclusions or recommendations of this order, but I do hope that it will arrive at an assessment of requirements in an order of priority that reflects a realistic and pragmatic evaluation of the College's mission and the competitive environment in which it will be operating.

I firmly believe that we can do anything we want. We cannot, however, do everything we want. The establishment of priorities among programs is essential.

The statement of needs and priorities would serve as a basis for an external feasibility study of potential private financial resources, which in turn would lead to the establishment of realistic goals for fund raising.

The outcome of the Commission's work should be enormously useful as the first major step in planning for the College's next major capital drive. It will set the stage for William and Mary's increasing substantially the private financial resources needed to assure that this institution remains competitively excellent within its limited mission. The Board of Visitors will of course play a major role in this effort.

VI

During the 1982-83 academic year other important activities related to long-range planning got underway.

A Self-Study, required every ten years by the Southern Association of Colleges and Schools, was organized under the leadership of Professor of Physics Hans C. von Baeyer. As of this writing the Steering Committee is hard at work and the chairmen of the major Self-Study committees have been appointed. Dr. Robert J. Faulconer is an active member of the Steering Committee. I anticipate that the work of the Self-Study will be coordinated closely with that of the Long-Range Planning Commission.

In addition, the Planning and Priorities Committee of the College, under the chairmanship of Professor of Chemistry David E. Kranbuehl, has had an active and productive year. It has worked closely with the administration and other faculty groups on a variety of initiatives that promise to improve organizational effectiveness, development activities, and the resources available to the faculty and the educational programs of the College. The role of this Committee will also need to be related closely to that of the Long-Range Planning Commission.

VII

The 1982-83 academic year was an eventful one at William and Mary. Because I have devoted the bulk of this report to the mission of the College and the prospects for the Long-Range Planning Commission, I shall not attempt, in either breadth or depth, to do justice to these events. Instead, in capsule form let me simply mention a few of the events which made headlines.

The fire and gutting of Jefferson Hall in January was a tragedy for the students who lost their homes and most of their belongings. It turned out to have a happy ending, thanks to thoroughly professional and supremely dedicated individuals both within the College and in Williamsburg and surrounding areas, and thanks to exceptional generosity and caring on the part of many individuals and organizations. The word "community" took on a very special meaning. At this writing Jefferson Hall is being reconstructed within its original brick walls.

Another building under construction is the new Marine Science Service Center at the Virginia Institute of Marine Science. The groundbreaking for this \$3.2 million facility at the Virginia Institute of Marine Science, also in January, was a dream come true, after literally years of intensive effort on the part of many individuals both at the College and in the government of the Commonwealth. Its completion in 1983-84 will help to keep VIMS in its preeminent position in Virginia in research and service in marine science.

In May the college successfully completed the National Endowment for the Humanities Challenge Grant Campaign of the past three years. The result is that over \$2,325,000 have been added to the endowment for the humanities program. In a time of very scarce financial resources for faculty support and development, this was an especially welcome milestone.

Another event in May that created headlines not only in Williamsburg but around the world was the 1983 Summit of

"The Summit was a grand success"

Industrialized Nations. The College's role required a great deal of planning and hard work on the part of many of my colleagues, as well as some inconvenience and disruption of normal work and activities. But thanks to superb cooperation among the Colonial Williamsburg Foundation, the College, the City of Williamsburg and the federal government, the Summit was a grand success. The College benefited substantially, both materially and intangibly.

The College's involvement in the Southeastern Universities Research Association and the efforts to bring a proposed nuclear electron accelerator laboratory to the VARC campus of the College of William and Mary called for the very best efforts of many of my colleagues, including members of the Board of Visitors. Professor Hans C. von Baeyer has played a crucial leadership role. As of this writing, thanks to the determined efforts of our Senators and Representatives, Governor Robb and his colleagues, and exceptional cooperation among several localities and institutions in Tidewater, we can be cautiously optimistic that indeed the accelerator laboratory will eventually be constructed in Newport News. The benefits to William and Mary and to Virginia will be enormous.

Finally, when the 1983-84 academic year gets underway, we shall have three new academic deans providing leadership to the faculties of Arts and Sciences, Business Administration and Education. I have elsewhere expressed my deep appreciation to Charles L. Quittmeyer and James M. Yankovich for jobs extremely well done, as they return to the teaching ranks. And just very recently Zeddie P. Bowen resigned after two very good years, to become Provost and Vice President of the University of Richmond.

I am delighted that we have John C. Jamison as the new Dean of the School of Business Administration, and John M. Nagle as the new Dean of the School of Education. And I am indeed grateful that Professor of Government Jack D. Edwards has accepted a temporary appointment as Acting Dean of the Faculty of Arts and Sciences, a responsibility he filled most ably for seven years as Dean until 1981.

Those are a few of the happenings that made headlines in 1982-83.

VIII

They did not make headlines, but the faculty, administration and staff of the College of William and Mary carried out their responsibilities of teaching, research and service throughout 1982-83 with great skill and dedication and in good spirit. They did this despite reductions in financial resources and support that required them to work under substantially less than ideal conditions, and despite decisions at the state level that led the great majority of them to receive no regular salary increases for 1983-84. My colleagues have my deep gratitude and respect.

IX

Two of your colleagues on the Board of Visitors completed their service in March of this academic year. Robert S. Hornsby and Aubrey L. Mason personally the great dedication, leadership and skill that perhaps we tend to take almost for granted among those who are appointed to the Board. Fortunately, both Mr. Hornsby and Mr. Mason are remaining close to the affairs of the College in active and participatory roles, but I shall miss them on the Board of Visitors.

At the close of my twelfth year at the College, I am privileged to express to you my sincere gratitude for your leadership and support.

Thomas A. Graves, Jr.
President

ADDENDUM

**A PARTIAL RECORD
JULY 1982 - JUNE 1983**

Faculty Necrology

The College community noted with sadness and respect the following deaths among members of the faculty during the 1982-83 academic year:

Frederick P. Crownfield, Professor Physics
T. Carter Gleysteen, Lecturer of Business Administration, Emeritus
Stanley G. Hummel, Lecturer in Physics, Emeritus
Stanley R. Williams, Professor of Psychology, Emeritus

Faculty Retirements

The following members of the faculty and administration, who served the College with distinction and dedication, retired at the conclusion of the 1982-83 session:

Jay D. Andrews, Professor Marine Science
Royce W. Chesser, Professor of Education
John W. Sykes, Associate Professor of Education

Faculty Promotions

The following faculty members were promoted by the Board of Visitors during the academic year just passed:

Professor to John Marshall Professor
George W. Grayson, Department of Government
Professor to William E. Pullen Professor
Thaddeus W. Tate, Jr., Department of History
Associate Professor to Professor
John B. Delos, Department of Physics
Dale E. Hoak, Department of History
David E. Kranbuehl, Department of Chemistry
Joseph G. Loesch, School of Marine Science
Henry E. Mallue, Jr., School of Business Administration
Jesse S. Tarleton, School of Business Administration

Assistant Professor to Associate Professor
Christopher J. Boll, Department of Theatre and Speech
Lynda L. Butler, School of Law
John M. Charles, Department of Physical Education
John B. Corr, School of Law
Joseph Galano, Department of Psychology
Thomas L. Heacox, Department of English
Ingrid M. Hillinger, School of Law
Morris McCain, Department of Government
Robert J. Orth, School of Marine Science
John R. Orphan, School of Law
Instructor to Assistant Professor
David E. Zwerner, School of Marine Science

Faculty Research

Listed below are those faculty members who were awarded Faculty Research Assignments in 1982-83, enabling them to devote one full semester on the listed project: following that group is the list of faculty members receiving 1983 Summer Research Grants, totaling \$104,445. Both research assistance programs are funded and administered by the College through the Committee for Faculty Research.

Faculty Research Assignments

Fred L. Adair Department of Education	A Study of Marital Functioning, Professional Degrees and Divorce
William D. Barnes Department of Fine Arts	Landscape, Color Equivalency: A Series of Paintings Exploring a New Direction
George M. Bass, Jr. Department of Education	Effect of Computer-Assisted-Instruction Design and Individual Cognitive Style on Learning
Ruth Ann Beck Department of Biology	Baseline Studies on the Distribution, Abundance and Breeding Success of the Great Blue Heron in Virginia
William Lee Bynum Department of Mathematics and Computer Science	A Generator for Syntax-directed Errors

"... we must have a clear and realistic consensus within the College community as to our needs and priorities"

and the graduate curricula in arts and sciences, and the contribution and service they allow us to make to Virginia and beyond.

In discussing the College's mission, I have not made reference to the libraries of the College, to faculty research, to computer resources, to a wide variety of cultural, extracurricular and special advisory programs and services. They represent and are the vehicles by which a university such as William and Mary uses its resources and makes its contribution. They are an essential part of the matrix of people and programs that add up the College's mission.

III

My view of the mission of the College reflects, I believe, a consensus among the faculty, administration and the alumni of the College. It reflects the "Statement of Purpose and Aims" contained in the 1974 *Report of Self Study*, as well as the narrative statement for William and Mary included in successive editions of the *Virginia Plan for Higher Education*. I believe that it reflects the consensus of the Board of Visitors over recent years. I shall be asking the Long-Range Planning Commission to use this statement of the College's mission as the basis for its work in identifying, evaluating and prioritizing the requirements of the College over the next ten years.

In order for the Commission to carry out its task in a manner that reflects the current and prospective realities of the environment for higher education in Virginia, there are certain assumptions that I shall also suggest that the members of the Commission consider as, in all likelihood, given. These assumptions are drawn from what we now believe are to be the major trends in higher education in Virginia and in the nation over the next ten years that relate directly to William and Mary.

First, the era of higher education benefiting financially from inflation and enrollment increases is over. Growth and improved financing for higher education at the margins are coming to an end. Planning, to be realistic and pragmatic, should be based on the assumption of, by and large, a very

"The establishment of priorities among programs is essential"

Computer Courses Scheduled

The Computer Center has scheduled a number of free, non-credit short courses for the fall semester. Although there is no charge for the classes, space is limited for most of them, especially those providing "hands-on" access to the computer system. Anyone who wants to attend one or more of the courses should register in advance with Mrs. Lagassa at ext. 4547.

Several of the courses suggest certain prerequisite experience for participants. The instructor will assume that at least the stated background is present. When the prerequisite is some experience on the PRIME or any computer, mastery of the topics outlined in the first day of "Introduction to the PRIME and Text Processing" is appropriate.

Intro. to the PRIME and Text Processing:

A 2-session course designed to get people started in the use of the PRIME. Tasks like typing and listing documents are emphasized.

Day I: introduction to the computer, text editor (SANE), basic commands

Day II: the text formatter Runoff, file commands

The two days will always be scheduled 1 week apart. All participants are expected to practice using the computer several times during the week to be prepared for the second session. Consultants and staff will be available to help with problems of short-course students.

The above series will be offered several times from 3-4 p.m. during the semester, as follows:

1. Sept. 12 and 19 (Mondays)
2. Sept. 15 and 22 (Thursdays)
3. Oct. 13 and 20 (Thursdays)

***Each class is limited by the size of the classroom.

The PRIME Editor EMACS: one session workshop introducing a powerful full-screen editor on the PRIME. Participants should have use the PRIME before.

Oct. 3 (Monday), 3-4 p.m. or 4-5 p.m., Chancellors 104.

***Each section is limited to 10 participants.

Introduction to IBM: Time Sharing with TSO, and JCL: 2 one-hour sessions, similar to the PRIME introduction without Runoff. Participants should have used some computer before.

Sept. 27 and Oct. 4 (Tuesdays), 3-4 p.m., room t.b.a.

PRIME Topics — Tailoring your Environment: 1-session explanation of some useful features (abbreviations, login command files, terminal characteristics, cpl routines, etc.) Participants should have some PRIME experience.

Oct. 17 (Monday), 3-4 p.m., room t.b.a.

Introduction to Basic: 1 session workshop on use of Basic on the PRIME. Participants should have some computer experience.

Sept. 29 (Thursday), 3-4 p.m., Chancellors 104.

***Limited to 10 participants

AAUW To Hear Carolyn Weekley

Ms. Carolyn Weekley, Associate Director of the Abby Aldrich Rockefeller Folk Art Center, will present a program on "Painting in the South" at the Sept. 14 meeting of the Williamsburg Branch of the American Association of University Women.

Ms. Weekley has many publications to her credit in the field of Early Southern Decorative Arts and has held curator and administrator positions at the Museum of Early Southern Decorative Arts in Winston-Salem, North Carolina, and The Virginia Museum of Fine Arts prior to her affiliation with the Abby Aldrich Center.

Hostesses for the occasion are Elizabeth Cochran and Meredith Bell.

For information regarding the program or membership in AAUW, please contact Sara Cloud, 220-3050 or Sally Wagner, 229-0410.

Membership is open to any woman with a 4-year degree from an accredited college or university. Graduate students at the College are particularly invited to join.

Officer Poynter

Poynter Given New Duties With Campus Police

The Campus Police Department has designated Officer Kathryn Poynter as a full-time crime prevention officer who will initiate informational programs for faculty, staff and students, aimed at lowering crime statistics on campus.

Poynter will conduct workshops on building and office security, sexual assault, theft control and self protection. These programs will be augmented by a variety of printed materials on bicycle security, safe driving and burglar-proofing residences, which will be available from the police office.

The appointment of Poynter comes in the wake of the latest statistical report on crime in Virginia, prepared by the Virginia State Police, which shows that the William and Mary police unit made substantial gains last year in handling cases.

Richard Cumbee, director of the Campus Police Office, credits the improved record to the people who live and work at the College. "Without their reporting of crimes and cooperation in investigating them, we would clear very little," he adds.

Poynter joined the campus police in September 1982, after serving two years with the City of Williamsburg force. A graduate of Denbigh High School, she attended Thomas Nelson Community College and has continued her education in police work through a number of specialized programs. In November she will attend a Crime Prevention Institute school at the University of Louisville. Poynter holds certification as a police instructor from the state.

Forum on Stress

The topic will be "Stress" and the speaker Barbara Wielicki, director of employment, Colonial Williamsburg Foundation, at the next meeting of the Forum of Williamsburg, Tuesday, Sept. 13, at noon in the Sit 'n Bull room at the Campus Center.

This a luncheon meeting and the fee is \$6.

Veronica Nowak, of Associates in Communication Training, will talk about "Managing Change," at the Oct. 4 meeting of the Forum. Cost of the luncheon is \$6.

Reservations for the Forum luncheon should be made with Julie Leverenz or Margaret Ward at ext. 4286.

The October meeting is part of the 1983 Work of Women event which opens Oct. 1 at the Chamberlin Hotel.

Rita Welsh Adult Skills Program Seeking Tutors

The Rita Welsh Adults Skills Program will open for the fall semester on Sept. 12 in Bryan Hall basement.

New students may register at their convenience through Sept. 9. The office will be open daily from 9 a.m. to 5 p.m. Monday through Friday. Students may call the Center at 253-4644 to make other arrangements if they are unable to visit the office before the registration deadline.

Returning students may register by telephone if they have already indicated their intention of continuing instruction for the fall semester.

ASP, supported by the United Way, the College, area employers, area service clubs and many interested individuals in the community, is a community service open to adults of all ages in the Williamsburg-James City County-York County areas who want and need help in improving their

reading and math skills. Instruction is offered in beginning, functional and advanced reading and math, GED (High School Equivalency Test) preparation; and English as a foreign language. Adult student attend without charge.

Students in the program are tutored on

a one-to-one basis by volunteers and the program director, Corliss Tacosa (ext. 4644) would like to hear from members of the College community, students, faculty, staff or friends who would like to donate one or two hours a week to tutor students in ASP.

Chapters Plan Social Events

The Society of the Alumni will maintain an active schedule of chapter events throughout the year. This fall the following meetings are scheduled.

The third annual San Diego "Old Dominion Day" reunion will be held Friday, Sept. 16 at the Admiral Kidd Club. Alumni from 14 Virginia institutions have been invited to attend.

The Baltimore-Annapolis chapter has planned a Harvest Moon cruise for Sunday, Sept. 25, and is inviting alumni from Bucknell, Randolph-Macon Women's College, the University of Richmond and Virginia Tech to participate.

The Philadelphia Alumni chapter is also

Cinema Society Offers Well Known Films At Bargain Prices

Sept. 4, **WHITE HEAT** (1949) James Cagney, Virginia Mayo, Edmund O'Brien and Steve Cochran. A taut suspenseful melodrama with an unforgettable climax. Sept. 11 **BOMBSHELL** (1933) Jean Harlow, Lee Tracy, Frank Morgan and Pat O'Brien. A pre-censorship satire of Hollywood.

Sept. 18 **BRINGING UP BABY** (1938) Gary Grant, Katherine Hepburn, Charles Ruggles and Barry Fitzgerald. A comedy that includes a zoology professor, dinosaur bones, a pet leopard and Katie in love.

Sept. 25 **THE POSTMAN ALWAYS RINGS TWICE** (1946) Lana Turner and John Garfield. A drama of lovers who murder for money.

Oct. 2 **FLESH AND FANTASY** (1943) Charles Boyer and Barbara Stanwyck. A trilogy that includes elements of fantasy and supernatural. A classic of the macabre. Oct. 16 **THE MIRACLE OF MORGAN'S CREEK** (1944) Eddie Bracken and Betty Hutton. A fantastic irreverent mix of slapstick, romance, farce and melodrama.

Oct. 23 **ALL THE KING'S MEN** (1949) starring Boderick Crawford. An idealistic young lawyer turns politician. Oct. 30 **THE LADY VANISHES** (1938) A British production, directed by Alfred Hitchcock, starring Margaret Lockwood.

Nov. 6 **GILDA** (1946) with Rita Hayworth and Glenn Ford. Best known for

Hayworth's rendition of "Put the Blame on Mame."

Nov. 13 **THE INSPECTOR GENERAL** (1949) with Danny Kaye and Walter Slezak. Nikolai Gogol's satirical story of crooked politicians.

Nov. 20 **THE CAINE MUTINY** (1954) co-starring Humphrey Bogart and Jose Ferrer. Is there a plot to discredit Captain Queeg or is he a coward? One of Bogie's finest roles.

Nov. 28 **RANCHO NOTORIOUS** (1952) with Marlene Dietrich, directed by Fritz Lang. A tale of hate, murder and revenge told by Lang in his unique, bizarre style.

Dec. 4 **THE PRIVATE LIVES OF**

ELIZABETH AND ESSEX (1939) Bette Davis and Errol Flynn. The sets, costumes and Wolfgang Korngold's score are outstanding.

Dec. 11 **IT'S A WONDERFUL LIFE** (1946) James Stewart and Donna Reed, directed by Frank Capra. Stewart is cast as the man who discovers that each individual is important in the scheme of things.

Season tickets for the fall series are \$15 for non-students, \$12 for students.

All films are shown on the date scheduled at 8 p.m. in Millington auditorium. Single admission is \$2.

For additional information, call Wayne Taylor at ext. 4275.

Swem Exhibit All About Va. Women

The current exhibit in Swem Library's Zollinger Museum is comprised of materials from the College's Manuscripts and Rare Books Department, designed to introduce to the College community, the wealth of primary resources on women and children available to them at Swem.

"A Sampler of Virginia Women and Children, 300 Years," gives an insight into the lives of women and children residing in Virginia from the Colonial Period to the present. Each section of the exhibit is built around a particular theme common to the lives of most women or children such as "Household Chores," "Children's Amusements," or "Courtship and Marriage." Displays include such artifacts as antique valentines, 18th century clothing, 19th century report cards and ca. Civil War wallpaper.

But not all items reflect the past. The exhibit includes original scripts of the TV program "M*A*S*H" by alumna Karen Hall, now story editor for the TV series "Hill Street Blues."

The exhibit was mounted by Cindi Brown, assistant to the Curator and Marylee G. McGregor, manuscripts cataloguer, with the assistance of Deborah Smith-George, assistant in manuscripts and rare books. Acknowledgements also include Colonial Williamsburg, Connie Granger, Louise Kale, Trisha Mitchell and Cynthia M. Hargrove. Original watercolor posters for the exhibit have been designed by Jan Johnson of Psychological Services, based on illustrations of historical needlework.

The exhibit is open daily, Monday through Friday, from 8 a.m. to 4:45 p.m. and Saturdays from 9 a.m. to 12:45 p.m., through Oct. 14.

Several hundred different items including letters, diaries, advertisements, musical instruments, games and items of clothing have been assembled for the exhibit. A 19th century advertisement proclaims the value of a family knitting machine which sold for \$25 with a three-year guarantee and could complete 20,000 stitches in one minute. This hand-power machine was offered by the American Knitting Machine Company of Boston.

There are many recipes included in the exhibit, handwritten directions for a variety of items including cosmetics, soap, candles and plum pudding. There is also a complaint, written in 1687 by Grace Procer in Warwick County Court against Matthew Jones who promised her 1,000 lbs. of tobacco while she was "with child" and failed to keep his bargain.

All items exhibited are available for research upon request.

Bloodmobile

The Williamsburg-James City County Chapter, American Red Cross, will conduct a bloodmobile on Monday, September 12, from noon until 6 p.m., at St. Bede's Catholic Church Parish Center. The visit is sponsored by Alpha Phi Omega.

Individuals who have not donated blood within the past eight weeks are urged to support this visit. To schedule an appointment, call 253-0228.

Cindi Brown and Marylee McGregor examine items included in the current Swem exhibit

Red Cross Wants To Save Lives With CPR

I died in a local business establishment, with people standing around not knowing what to do. I collapsed, my heart stopped, as did my breathing; it was seven minutes before help arrived. They tried, in fact they worked hard using the best in emergency equipment and skills, but it was too late. You see, time is important when the heart stops or breathing ceases. The brain will begin to suffer irreversible damage if it goes without oxygen for 4 to 6 minutes. Each passing moment brings greater damage. If nothing is done, death will occur. That's what happened to me. By the way, I met a nice young lady after I died; she also is dead. She died because her family did not know how to recognize choking and what to do. She choked on a piece of steak. Oh, I almost forgot. There is a cute 1-year-old baby boy with us; he pulled a plastic bag over his head and suffocated. His mother found him minutes after it happened, but she didn't know what to do. I believe all three of us would be living today if those close by had known what to do.

I am writing to tell this story so others will have a chance to live out their lives. Yes, that's right - live out their lives. We could be with you today - we could be living out our lives, if people had taken a CPR course. It only takes a few hours. What is a few hours of your time if it means the difference between life and death? You ask why all the fuss. Why is a dead man making all this noise? I'll tell you why. On Oct. 22, local Red Cross chapters are going to teach CPR. It is an opportunity for you to learn what to do. It will only take a couple of hours. Last year, 1,600 folks took advantage of the offer. Some have already had to use their skills on loved ones. And not all who registered to take the training showed up; I bet they wish now they had. Some of them have been caught not knowing what to do when a loved one needed help.

A little time invested will be very worthwhile. It will be a great day in your life. You will know what to do when someone is the victim of heart or breathing problems, or may be choking, in your presence.

Faculty Party

Continued from P. 1.

Music will be provided by FOAM. Casual dress is advised.

The specific site of the party this year will be the area behind the main building (Brooke Hall) beside the beach. There is ample parking space in the vicinity. In the event of inclement weather, the alternate site will be the Demonstration Building located close to the end of the York River Bridge on the Gloucester side.

The fee for membership in the Faculty Club this year will be \$14. Payment of this fee will admit a member to the party on Sept. 23 at no extra charge. A fee of \$4 will be assessed for each spouse or guest (one guest only at reduced rate). *Only members and their guests will be admitted to this first party!* The Faculty Club is open to all members of the faculty and administration of the college. Membership fees may be paid at the party or beforehand to Roy Pearson, treasurer, Faculty Club, School of Business Administration. Emeritus professors are accorded free membership.

If all of you living people would take advantage of the CPR day there would be far fewer people like us - those who died because people stood by not knowing what to do. Time flies when the heart stops and breathing ceases. You can mean the difference between life and death.

Please take the time to take the CPR class on Oct. 22. Call Carolyn Latoski (253-0228) at the Williamsburg-James City County Chapter for details or drop by the office at 109 Cary Street.

Bland Tops All On Grant Awards

Richard Bland College is topping all other two-year state supported institutions in assigning renewable grants of \$1000 to encourage students to transfer to a four-year school where they would be in the minority race.

The program represents Virginia's effort to encourage black enrollment in predominantly white schools and white transfers to historically black universities.

Only four of the state's 24 two-year colleges have given away at least half their grants, state figures reveal. Richard Bland College, the Southside Virginia branch of the College of William and Mary, assigned its original allocation of five grants and then was given two additional ones. All seven grants were issued to black students.

Transfer Grant Recipients include Tammi Rollins of Hopewell and Erica Y. Bailey of Petersburg, who will attend Old Dominion University. Horace L. Daniel of Richmond will register at William and Mary. Attending Virginia Commonwealth University will be Kevin L. Goodwyn of DeWitt, Gloria A. Jefferson of Chesterfield, Ronda A. Harris and Theodore H. Taylor, both of Petersburg.

Dressing Up The Campus

Bill Thompson is setting out some of the 2,800 chrysanthemum plants, all of them grown from cuttings in the College's nursery, which will enliven the campus setting this fall. Planted in 11 different areas, the multi-colored blooms include all the fall colors. Depending on the weather, says Thompson, the flowers should bloom through most of October. After that ornamental cabbage and pansies will be planted in the beds for winter. Donations from Mrs. Alfred Armstrong of Williamsburg and Lyle Wiggins, college electrician, both enthusiastic gardeners, were among the cuttings nurtured in the nursery for this fall's plantings. Keeping the campus beautiful and planning for year-round plantings is supervised by landscape architect Roy Williams.

New Vans Added

Two 12 passenger vans have been added to the State Pool Car fleet at the College. The charge rate for use of the vans is 28¢ per mile.

These vans are available for official college business by college employees. They can be reserved through the Transportation Office by submitting Form WM8-1-4, Application for Use of State or Personal Motor Vehicle for Official College Business.

SA Sponsors Talk By Fears

Continued from P. 1

Senator Fears graduated from Yale in 1943 with a degree in Engineering and received his Juris Doctorate Degree from The University of Cincinnati in 1948. He was elected Commonwealth's Attorney of Accomack County in 1955 and served until 1959 when he returned to private practice. He has represented this district in the Virginia General Assembly since 1968.

Senator Fears has served as Chairman of the State Senate Commerce and Labor Committee. He is second in seniority on the Agriculture and Natural Resources Committee and the Transportation Committee of the State Senate. He has also served as a member of the State Senate's Rules Committee and the Finance Committee.

Senator Fears was invited to campus by Lee Anne W. Bush, the Student Association's Liaison to the Virginia General Assembly.

All students, faculty members, and administrators are invited to attend Senator Fears' presentation. A reception will follow in the Campus Center rooms A and B. For more details contact Lee Anne Bush at 353-1687, or call the SA office weekday afternoons from 1-5 p.m. at ext. 4350.

Senator Fears

Wightman Cup

The Wightman Cup tournament has an office established in William and Mary Hall, Room 314, located on the upper concourse around the corner from Les Hooker's office. Laura Haas is there to answer all inquiries. Her number is 229-3516, 3517, 3518.

Gifts of Costumes

Marge Solenberger, director of public relations for Richard Bland College and Anna Lou Musgrove, an alumna, both residents of Petersburg, Va., recently donated over 30 outfits and 20 hats from the early 1900's, 1920's and 1930's to the William and Mary Theatre costume collection. Both donors are members of the Lord Chamberlain Society of the Virginia Shakespeare Festival.

Mrs. Solenberger began collecting vintage costumes in 1976 as part of a Bicentennial project. Butterick Patterns produced a film strip of fashions from 1776 until the modern era which Mrs. Solenberger used as part of a presentation Richard Bland College made to Petersburg area high schools and clubs. She used the actual costumes to augment the film by Butterick. One of the costumes donated to the theatre is an evening cape, trimmed in monkey fur, which is featured in the Butterick film.

Above, Richard Palmer (l) chairman of the theatre department and general manager of the Virginia Shakespeare Festival and Patricia Wesp (r), costumer for the William and Mary Theatre, help Mrs. Solenberger and Mrs. Musgrove unload their donations of costumes. Mrs. Wesp '76 joins the theatre department this year.

Alumni

Continued from P. 5

planning a riverboat cruise in association with the Philadelphia chapters of Hampden-Sydney, Mary Baldwin, the University of Richmond, UVA, VMI, Washington & Lee and Virginia Tech.

A Show-me state alumni party is planned in St. Louis Sept. 24 at the home of MAC '74 and MJ '74 Conway of Webster Grove.

John Jamison, new Dean of the Business School, will be special guest speaker at the a Lower Peninsula "All-You-can-Eat Seafood Buffet," at Herman's Harbor House, Sept. 26.

SWEM LIBRARY SCHEDULE	
Thurs., Sept. 1 through Thurs., Oct. 6:	
Monday through	
Friday	8 a.m. -Midnight
Saturday	9 a.m. -6 p.m.
Sunday	1 p.m. -Midnight

Memo From Treasurer's Office

In order to more efficiently accommodate students, faculty, and staff, the Treasurer's Office will be observing the office hours of 8:30 a.m. to 3 p.m. until further notice.

Students, please be reminded that when picking up any type of check--i.e., VELA, GSL, National Merit or refund, you must bring your validated ID card. Federal regulations prohibit disbursement of any proceeds of a Guaranteed Student Loan without proof of registration. Your validated ID is your proof of registration.

The last day to make any changes in your board plan or turn it in for a refund is Wednesday, September 21. There will be absolutely no changes or refunds after this date except in the cases of some withdrawals.

Due to administrative procedures, no refunds can be processed before October 1. Requests for refunds may be completed in Student Accounts beginning September 16.

Financial Aid

Student Emergency Loans-The Student Emergency Loan Fund was established to make small loans to students in emergency situations for periods of up to thirty days. The maximum loan allowed is \$50.00, and is available through the Office of Student Financial Aid. Students seeking this aid should be advised that the fund is a small one, therefore it will not be used for loans of convenience, but for true emergencies only. It will be administered differently than in the past: students seeking funds

should see Ms. Acosta-Lewis or Mr. Looney by Wednesday of any given week in order for a check to be drawn by Friday of that same week. See the Financial Aid Office for further details.

Selective Service Registration Compliance/Financial Assistance-Correction to Flat Hat article of 9-2-83 concerning the Selective Service Registration Compliance Act: Those persons (male and female) receiving any Title IV financial aid including Pell Grant, student loans (NDSL, GSL, and PLUS), SEOG, CSAP, CW-SP and grants from other states must complete a legible registration compliance form and have it on file in the Student Financial Aid Office in order to retain their aid. A COPY OF THE REGISTRATION ACKNOWLEDGEMENT FORM IS NOT REQUIRED. If you are unsure whether you have a completed form on file, see the Office of Student Financial Aid.

"Employees' Days"

As a token of the esteem and appreciation of the College community for our employees, the following dates have been designated as "Employees' Days" for football games at William and Mary:

Sept. 17	Delaware
Oct. 15	James Madison
Oct. 22	Rutgers
Nov. 19	Richmond

A total of 100 complimentary tickets for each football game will be issued to Permanent College employees who have an annual salary that does not exceed \$10,192.00 as of July 1, 1983.

Special Programs Offering Fossils, Folklore & Fitness

The Office of Special Programs is offering a wide range of courses this fall from basic accounting to basketry, and including instruction on automobile and home repairs, wine-tasting, arts and crafts, sports, financial management, use of computers, helping the handicapped, and car-

ing for house plants. A variety of topics are specifically designed for women.

Also included are courses on writing skills, both verbal and non-verbal communication, and career development.

Classroom courses will be held on the life of Thomas Jefferson and the White House. Field trips in archaeology and tours of the James River Plantations, historic churches in the District of Columbia, and 18th-century Richmond homes are offered as well.

A category entitled "Personal Growth" includes courses in nutrition, weight control, physical fitness, loving, reducing stress, and problem-solving.

In the arts and crafts, instruction includes painting, sculpture, drawing and composition, woodcarving, pastel and watercolor portraiture, photography for beginners, and basketmaking.

To obtain a catalog of Special Programs courses, call 877-9231, ext. 60. Registration may be handled either by phone or mail.

Jamestown Island Sets Fall Hours

On weekends, now through September, Colonial National Historical Park will be offering guided bike tours of Jamestown Island.

Through the "Bike With a Ranger" program started last year in the park, visitors have an opportunity to enjoy the natural and cultural history of the Island, while getting plenty of exercise.

The bike tours consist of a 6-mile ride through Jamestown Island on the Loop Drive, a paved, level road which winds through scenic marshes and woodland. Accompanied by a Park Ranger, visitors have a chance to hear about the history of Jamestown from the early 17th through 20th centuries.

The tours meet every Saturday and Sunday at 8:30 a.m. at the last turnout on the Colonial Parkway before the Jamestown Entrance Gate. There is an entrance fee of 50 cents per biker to Jamestown Island.

Reservations can be made for the tours by calling the Jamestown Visitor Center, 229-1733, which is open daily from 8:30 a.m. to 6:00 p.m. until after Labor Day when the hours will change to 9 a.m. to 5:30 p.m.

VIMS Meeting

Continued from P. 4

attendance. The goal is to increase this number in 1985 to 600.

The Northwest Association for Marine Education (NAME) will host the 1984 conference.

Further information on the conference and the NMEA may be obtained by writing to Sue Gammisch, 1985 Conference Chairperson, Virginia Institute of Marine Science, Gloucester Point, Va., 23062 or by calling 642-2111, ext. 111.

Employment

The following positions are open to all qualified individuals; however, current faculty and classified employees will receive first consideration. Except where noted, inquiries and applications should be made at the Personnel Office, 201 James Blair Hall, and not at the department where the opening exists. Call 229-JOBS (229-5627) for an updated listing and 24-hour service. An EEO/AA employer.

SYSTEMS ANALYST (Grade 14) -- Salary range \$23,761 to \$32,455 per year.

Starting salary dependent upon experience or exceptional qualifications and previous salary level of appointee. No. 384. Responsible for systems analysis, design, and implementation of financial data processing applications at the College.

Qualifications -- Extensive demonstrated ability in analysis and programming with supervisory experience required. Bachelor's degree in related field with practical experience in COBOL programming language and familiarity with structured programming techniques and working knowledge of data base management required. Excellent in written and oral communication skills and the ability to respond to user requests from senior management and operating level personnel required. Computer Center, deadline -- Sept. 8.

CAMPUS PARKING ENFORCEMENT ATTENDANT -- Unclassified, salary range \$4.69 to \$6.40 per hour, approximately 39 hours per week.

Incumbent is responsible for enforcement of parking laws and regulations on the grounds of the College.

Qualifications -- High school graduate or equivalent preferred. Ability to use good judgment and to deal effectively with the public required. Familiarity with state and institutional parking laws and regulations preferred. Ability to follow written and oral instructions required. Campus Police Office, deadline Sept. 8.

Sea Grant Internships

The Office of SEA Grant, NOAA, U.S. Department of Commerce, is again sponsoring a SEA GRANT INTERN PROGRAM, which enables graduate students to obtain a one-year work experience on Capitol Hill in congressional offices or senior staff offices of the Department of Commerce dealing with marine matters.

Interested students are invited to submit a letter of appreciation to Dr. William L. Rickards, Director, Virginia Graduate Marine Science Consortium, 102 Monroe Hill Range, University of Virginia, Charlottesville, Va. 22903, with a copy to the William and Mary Sea Grant Coordinator. The application should indicate how the internship experience would be supportive of long-term career/educational goals. The application should also include a summary of educational and employment experience. A statement of sponsorship from the graduate thesis supervisor/major professor is also required.

Interns for the January 1984 class will be selected by 31 October 1983. Applications are due at the SEA GRANT Director's office by Sept. 21. About ten interns will be selected on a nationwide basis for 1984. Early application is encouraged.

Questions regarding this program should be directed to Dr. M.P. Lynch, Sea Grant Coordinator, VIMS Gloucester Point, VA 23062, 642-2111 (SCATS 634-3650), ext. 171 or 124.

CLERK TYPIST C -- Unclassified, salary range \$4.69 to \$6.40 per hour, approximately 20 hours per week.

Incumbent performs clerical duties including answering phone, preparing correspondence and light bookkeeping.

Qualifications -- High school graduate or equivalent with clerical and basic bookkeeping skills preferred. Ability to deal effectively with the public required. Excellent organizational skills required. Typist test required. Office of International Programs, deadline, Sept. 9.

CAMPUS POLICE OFFICER (Grade 7) -- Salary range \$12,731 to \$17,390 per year. Starting salary dependent upon experience or exceptional qualifications and previous salary level of appointee. No. 584, 360.

Qualifications -- High school graduate or equivalent preferred, with work experience involving considerable public contact. Must possess excellent written and oral communication skills. Ability to work under stressful conditions, conduct investigations, work shifts and extra duty hours and to graduate from an accredited police academy within one year of employment. Must be able to pass an extensive personal background investigation.

Campus Police Office, deadline -- Sept. 16.

CAMPUS POLICE LIEUTENANT (Grade 9) -- Salary range \$15,213 to \$20,791 per year. Starting salary dependent upon experience or exceptional qualifications and previous salary level of appointee. No. 283, 228.

Incumbent is involved in planning, administration, and supervision of a university law enforcement agency. Reports to Director of Campus Police.

Qualifications -- Excellent written and oral communications, personnel relations, and supervisory skills required. Extensive knowledge of progressive police patrol and investigations techniques required. Ability to act effectively as liaison; plan and coordinate major police operations and deal effectively with the general public, staff and students is essential. Must be able to assume responsibility in the absence of the Director. Shift work required. Background investigation, testing, and physical examination required.

Campus Police, deadline -- Sept. 12.

CAMPUS POLICE SERGEANT (Grade 8) -- Salary range \$13,921 to \$19,011 per year. Starting salary dependent upon experience or exceptional qualifications and previous salary level of appointee. No. 297.

Duties require the proven ability to act as liaison between management and line personnel; insure policies and procedures are implemented by the staff; conduct training sessions; insure high level of staff performance; prepare reports; conduct preliminary investigations; assume responsibility in the absence of higher authority; and perform active police duties as required.

Qualifications -- Incumbent must possess superior capability in personnel relations and supervision and pass an extensive background investigation. Must be able to meet requirements and standards for police officers in Virginia as set forth by the Criminal Justice Services Commissions. Shift work required.

Campus Police Office, deadline -- Sept. 14.
