Non-Profit Organization
U.S. Postage PAID at Williamsburg, Va.

At a few minutes past 8 a.m. Thursday morning, the upperclassmen's registration line was stretched out of the door of W&M Hall, down the sidewalk, and around the perimeter on Campus Drive. The usual campus dogs were also present, scratching fleas and accepting occasional pats. Everyone was duly registered by the weekend, including add-drops, and W&M Hall readied itself for the next big event, Billy Idol's concert on Sept. 7.

Dr. Berendzen To Discuss Homes, Schools, Society

Dr. Richard Berendzen, president of American University, astronomer and education specialist, will speak at a free public forum on Tuesday, Oct. 9, at 8 p.m. at the Hampton Coliseum. Dr. Berendzen's lecture, "Home, Schools, Society: Partners in America's Future," is part of the "Our Future in the Cosmos" series cosponsored by the College of William and Mary and the NASA Langley Research Center.

One of the youngest men ever selected to head a major university, Dr. Berendzen has chaired numerous national committees studying the strengths and weaknesses of American education. He has also

The Commons' Conditioner Blows Its Cool

It's a feat to beat the heat this week at The Commons, where the 100-ton air-conditioner decided to break down the day before freshmen arrived on Aug. 25.

The big system has performed beautifully for 18 years in the dining hall and had undergone some repairs during the summer. However, because of its misbehavior, it has been dismantled and sent away to Charlotte, N.C., for overhaul. The huge machinery will be back by September 14, and hopefully, cooling breezes will emanate from its coils to blow away the last vestiges of summer heat.

The Commons is being cooled by fans, dehumidifiers, and open windows, all of which provide good circulation of air through the building.

appeared as an education and science commentator on the CBS Evening News, the NBC Nightly News, Donahue, and the Today Show.

Dr. Berendzen's lecture in Hampton will focus on the serious problems facing American education — inadequate funding, poor teacher preparation, lack of discipline in schools, and declining achievement of students — and will outline innovative solutions being implemented in school systems around the country.

William and Mary and NASA have presented the "Our Future in the Cosmos" free lecture series since 1974. Free tickets for Dr. Berendzen's lecture are available by calling William and Mary's Office of Special Programs at 253-4084 or 253-4047.

Dr. Richard Berendzen

Plans Begin Here For College Tricentennial

It's a few years away, but already the College, second oldest in the nation, is gearing up to celebrate its Tricentennial in 1993. The College was chartered in 1693 as the second oldest institution of higher learning in the country.

President Thomas A. Graves, Jr., has appointed a planning committee to explore ways to make the celebration both memorable in its impact and enduring in its influence. The groups, composed of faculty and administrative staff, students, alumni, townspeople and friends of the College, will consider and plan activities, projects and publications.

H. Westcott Cunningham, executive vice-president of the Society of the Alumni, has been appointed chairman of the committee.

"It's not too soon to begin making plans to commemorate this important anniversary," he says. "Right now we're just brainstorming, but there are several things we plan to do. We hope to invite the President of the United States to the campus during 1993, and it's not unrealistic to anticipate that the reigning monarch of Great Britain may come.

"There will be seminars, cultural events, symphonies, and important art events during the celebration. We hope that a commemorative U.S. stamp will be issued here, with appropriate ceremonies. Possibly some successful theatre project will take place on campus. It's not inconceivable that the William and Mary football team might play both the oldest (Harvard University) and the third oldest (Yale University) colleges on the gridiron in 1993.

"All these developments would of course be under the leadership of the President of the College at that time."

Cunningham emphasized that publications would be an important part of the Tricentennial, and that plans for publishing can go forward well in advance of the event. He expects that a popular history will be written by someone associated with William and Mary, to cover events from the College's founding up to 1993.

The ten colonial colleges established before the American Revolution will probably be involved in the observation, he believes. "It's really something special for an American college to commemorate 300 years of higher education," he adds.

The committee chairman predicts that there will probably be a plethora of Tricentennial items, such as medallions, pictures, posters and published materials, produced not only by the College but by outside interests.

Meanwhile, he says, the committee is proceeding slowly, soliciting ideas until the College's new President is in place. The Board of Visitors is expected to join with the next president in taking an active planning role.

Members of the committee include: from the College faculty, Dr. Eric L. Bradley, associate professor of biology; Dr. John R. Thelin, associate professor of education; Dr. David W. Thompson, professor of chemistry; and Jean C. Wyer, associate professor of business administration. From the College administration are: Barrett H. Carson '74, director of development; David H. Charlton, assistant vice-president for business affairs; Carroll F. Hardy, associate dean of students for minority affairs; Charles Holloway, director of university communications; Virginia Laycock, acting associate dean of education; and Kenneth E. Smith, Jr., '68, associate dean of students, student activities.

Alumni include Austin L. Roberts III '69, president of the Society of the Alumni; Dr. Marvin F. West '52, former Alumni Society president; Stewart Gamage '72, member of the Alumni Society board; Lisa Haverty '83, Fraser Hudgins '83, Evelyn C. King '43, Will

Molineux '56, W.W. Kale '66, and O.T. Trumbo '84.

Others include Sarah Gunn, Williamsburg merchant; Hugh DeSamper '54, Colonial Williamsburg Foundation; Jeanne S. Kinnamon '39, Board of Visitors; Caroline G. Egelhoff '46, Board of Visitors; Lee Anne Bush '85, student body president at the College; Anthony McNeal, Jr., '85, senior class president; and Ellen Lewis, student.

Duane A. Dittman, vice-president for university advancement, and James S. Kelly '51, assistant to the president, will be observers. Recorder is Diane K. Hageman '75, assistant to the executive vice-president of the Alumni Society.

TV's Alice To Marshal W&M Parade

Linda Lavin

Linda Lavin, star of television's "Alice," will be the Grand Marshal at the Homecoming Parade on Saturday, Nov. 3, when William and Mary plays Lehigh University in football.

Miss Lavin, a popular visitor on the campus last year, is a graduate of the class of 1959.

John Phillips, director of Alumni Affairs for the Society of the Alumni, expects over 50 high school bands to participate in this year's parade, and he estimates that 50,000 persons will watch the annual event, a highlight of fall activity at the College.

The Parade theme will be "Injuneering A T-R-I-B-E Production," since the Lehigh football team is known as the "Engineers." Float entries are being asked to reflect the theme as it pertains to television, films and theatre. Prizes of \$500, \$250 and \$100 will be awarded to the first, second and third places, respectively, and the first place winner will take possession of the Lambert Cup.

Campus organizations wishing to place a float in this year's parade will meet next Wednesday, Sept. 12, at 3:30 p.m. at the Alumni House.

List Homecoming Events

Should any individuals be planning a Homecoming activity or event, they may have that information listed on the Homecoming printed material, says John Phillips, director of Alumni Affairs. Deadline for submitting this material is next Friday, Sept. 15.

PUBLIC ADVICES

A slide-illustrated presentation on the geologic history of the Chesapeake Bay, will be presented by Gerald H. Johnson, professor of geology, on Wednesday, Sept. 5, at 7:30 p.m. in the Watermen's Hall auditorium at VIMS.

The present Chesapeake Bay is only one of several "Chesapeake Bays" that have existed through time. Professor Johnson will trace the history of the Chesapeake through the late part of the Ice Age to the present.

The program is one in the "Oceanography for Landlubbers" series, presented free to the public the first Wednesday in each month. For further information on these series, contact Mary Sparrow, 642-7172.

Here's an intriguing lecture scheduled for Thursday, Sept. 6 at 8 p.m.! The subject is "Language and Sex," and it will be discussed by Roy Harris, linguistics professor at Oxford University. Join the crowds in room 120 (the old Moot Court Room) at Tucker Hall.

VIMS at Gloucester Point has a new telephone number -- 642-7000. On the SCATS line it's 842-7000.

The grazing sheep on the green spaces at Colonial Williamsburg have long been a part of the summer scene. With a youthful shepherd in tow, the woolly beasts move around from lawn to lawn, delighting visitors. Tourists often seem uncertain about the animals, however, and are wont to ask, "Are these real sheep?" One young collegian, working in costume as a ticket-taker for the summer, finally got a bit tired of replying, "Yes, they are real sheep." The next time a couple asked if the sheep were genuine, he answered with a straight face, "No, those are student volunteers from the College of William and Mary."

Speakers and films scheduled by Honors 201 for the Wednesday Forums this semester have been set, and a schedule is available in the office of Thomas M. Finn, dean of undergraduate studies, Arts and Sciences. All events will be held in Millington Auditorium at 7:30 p.m., with the exception of "Oedipus Rex," scheduled for the Campus Center Ballroom, and "Don Giovanni," to be held at the Williamsburg Regional Library.

Among the speakers are Leon Golding, Florida State; Peter Smith, University of North Carolina; Thomas Brickhouse, Lynchburg College; Terence Irwin, Cornell; and Carrie Cowherd, Howard University.

"Sexual Harassment" will be the theme of the Forum of Williamsburg next Tues-

day, Sept. 11 at the Campus Center Ballroom. The speaker is Elaine Themo, associate professor of sociology at the College. The luncheon meeting will begin at noon and end by 1:15 p.m., and the cost is \$7 for a menu which includes poached chicken in caper sauce. Reservations are being taken by Margaret Ward or Julie Leverenz at 253-4286, for this town-and-gown get-together.

A conference on "Northern Ireland: The Mind of a Community in Crisis" is scheduled for Sept. 20-22 at the College. Scholars from this country and Ireland will be on hand for the meeting, which will be held at the Campus Center. A poetry reading by Paul Muldoon and John Montague will take place Sept. 21 at 8:15 p.m. at the Williamsburg Regional Library. Alan J. Ward, professor of government, is conference director.

Art Lecture Scheduled At Muscarelle

In connection with the current exhibit of Chinese bronzes on display at the Muscarelle Art Museum, Alfreda J. Murck of New York will lecture on the stunning Chinese art Thursday, Sept. 13 at 4:30 p.m. in room 101, Andrews Hall.

She is assistant curator-administrator in the department of Far Eastern art at the Metropolitan Museum of Art. Following the lecture, a reception will be held at the Muscarelle from 5:30-7 p.m. The public is invited to both events.

The exhibit, housed in the Sheridan Gallery, includes 23 Chinese bronze ritual vessels, some dating back to the 11th century B.C. They were collected by Earl and Irene Morse over a 35-year period, and were first shown to the public in a Metropolitan Museum exhibit in 1982.

Mr. and Mrs. Morse will also be here for the lecture and reception.

Mrs. Murck has degrees from the University of California at Santa Barbara and Princeton University, specializing in Chinese art and archaeology. She has studied abroad at New Asia College in Hong Kong, at Kyoto University in Japan, and in Taiwan. Before coming to the Metropolitan Museum in 1979, she was curator of the Far Eastern Seminar and lecturer on Chinese art at Princeton University.

The Chinese bronzes, a major exhibit at the Muscarelle this year, will be on display through Monday, Sept. 24. Museum hours are 10 a.m. to 4:45 p.m., Mondays through Fridays; and noon to 4 p.m., Saturdays and Sundays.

W&M ROTC Excels

The College ROTC fared well at the 1984 ROTC Advanced Camp at Fort Bragg, N.C., during the summer. Of 111 military science departments represented during the training, William and Mary ranked tenth for overall performance, the highest such ranking in the history of the College's ROTC program.

William and Mary cadets placed fourth in physical training, with senior Maureen Hinnebusch setting the women's camp record in the two-mile run. Margaret Ashburn was the top William and Mary cadet at Advanced Camp, ranking 27th out of the 3,982 students who attended. Ashburn completed cadet flight training as well, and is now qualified to pursue active duty flight training and a career in Army aviation if she wishes. Also completing the flight orientation program at Fort Rucker, Ala., was Terry Watson.

Ten William and Mary students successfully completed Army Airborne train-

ing during the summer to become qualified as full-fledged Army paratroopers. Janet Payne of the College won honors as the distinguished graduate in her Airborne Training Platoon at Fort Bragg.

ROTC officials at William and Mary are pleased with the good showing College students are making and the records they are setting. Two rising juniors, Kim Moses and Alexander Cochran, have been awarded full ROTC scholarships for their superior performance in training conducted at Fort Knox, Ky., during the summer.

Overall, the Army has recognized the high quality of William and Mary students by awarding 60 scholarships in a department that records an enrollment of 140 ROTC cadets. This is at least 20 percent above the national average for ROTC scholarships held in any one college.

Employment

LABORATORY MECHANIC B (Grade 6)--Salary range \$12,644 to \$17,273 per year. Starting salary dependent upon experience or exceptional qualifications and previous salary level of appointee. No. 424.

THIS IS A RESTRICTED APPOINTMENT.

Incumbent maintains, repairs, calibrates, designs, and fabricates field and laboratory instruments used in oceanographic and environmental engineering research. Responsible for maintaining a permanent monitoring station at Gloucester Point, and also will assist in field data collection programs.

Qualifications--Knowledge of electrical and electronic circuitry, analog to digital conversions, microprocessors, and programming languages required. Familiarity with field sampling procedures preferred.

VIMS (Physical Oceanography & Environmental Engineering), deadline Sept. 6

LABORATORY SPECIALIST A (Grade 7)--Salary range \$13,826 to \$18,886 per year. Starting salary dependent upon experience or exceptional qualifications and previous salary level of appointee. No. 156

Incumbent will assist in both field oriented and laboratory studies of environmental controls on the growth, reproduction and survival of submerged aquatic macrophytes (seagrasses) in estuarine environments.

Qualifications--Bachelor's degree in biology or chemistry preferred. Knowledge of or demonstrated ability using basic scientific instrumentation (e.g. analytical balances, spectrophotometers, gas chromatographs, analog-digital readouts) required. Knowledge of or demonstrated ability in small boat handling and ability to swim preferably with SCUBA certification required. Knowledge of basic statistical data reduction techniques and computer data entry highly desirable. Must be willing to work odd hours and travel overnight.

VIMS (Wetlands), deadline Sept. 6

CLERK TYPIST C--Unclassified, part-time, 20 hours per week, salary range \$5.09 to \$6.08 per hour. Annual and sick leave benefits only. Incumbent is responsible for responding to mail and telephone inquiries about seminar offerings and for taking registrations over the telephone. Also responsible for typing general correspondence on NBI word processor and for assembling materials and general office duties.

Qualifications--High school graduate or equivalent with excellent verbal communications skills. Ability to deal effectively with the public over the telephone required. Must be able to pay close attention to detail. Familiarity with word processing equipment preferred. Typing test required.

Center for Executive Development, deadline Sept. 7

MARINE SCIENTIST A (Grade 9)--Salary range \$16,521 to \$22,579 per year. Starting salary dependent upon experience or exceptional qualifications and previous salary level of appointee. No. 153

THIS IS A RESTRICTED APPOINTMENT.

Incumbent will assist in the location, collation, analysis and reporting of water resource information center function, organization, clientele, and needs as part of a contract with the Chesapeake Research Consortium.

Qualifications--Background in natural resources and an understanding

of problems related to water resources. Must be able to perform with a minimum of supervision.

VIMS (Marine Science Management), deadline Sept. 7

LABORATORY TECHNICIAN B--Unclassified, part-time, up to 40 hours per week, \$5.56 per hour. Temporary appointment for less than 90 days. (3 openings)

Incumbent will be responsible for transplanting submerged aquatic vegetation (eelgrass).

Qualifications--Must be willing to work in the water in a wet suit under a variety of environmental conditions. Diving experience (skin diving as a minimum) preferred.

VIMS (Wetlands), deadline Sept. 7.

REGISTERED NURSE--Unclassified, part-time, 20 hours per week minimum, \$7.27 per hour, nine-month position.

Incumbent will work in the College Student Health Center and is responsible for administering care to the 18-25-year-old age group.

Qualifications--Ability to act independently in assessing patients and making preliminary diagnosis required. Recent clinical experience required with emergency and psychiatric nursing helpful. Valid Virginia nursing license must be presented upon employment. Must be able to work both day and night shift as needed for relief of permanent staff.

Student Health Center, deadline Sept. 10.

Puppets Play "Oedipus Rex"

A Greek drama performed by puppets? It sounds a little improbable but it's true. Peter Arnott, drama professor at Tufts University, will be here to present "Oedipus Rex" next Wednesday, Sept. 12, at the Campus Center Ballroom. It's part of Honors 201 and the Wednesday Forum this semester, and the public is invited. Admission is free.

Arnott, who grew up in Ipswich, England, began puppetry early in his life. By the time he had reached the sixth form, he had been reading Greek for three years and somehow thought he could put on Aristophanes' comedy, "The Frogs," using marionettes.

It was a hit, and he began booking other performances. The profit-making venture helped when he was working toward his bachelor's, master's, and doctoral degrees in Greek at Oxford University and the University of Wales.

Since that first 1948 performance of "The Frogs," he has translated and mounted about 20 more shows, building over 100 marionettes for the one-man performances. He has appeared in 47 states -- all but Alaska, Arkansas, and Nevada -- and at virtually every major university in this country, as well as at engagements in England and Canada. He has also presented his Greek comedies and tragedies at the Ashland Shakespeare Festival in Oregon, at the Stratford Shakespeare Festival in Ontario and at the Folger Shakespeare Library in Washington, D.C.

His puppets are made for portability and weigh only a pound or two. His entire show, with lighting, characters and puppet theater can be stuffed into two suitcases.

Show time is 7:30 p.m. No one under 12 years of age will be admitted, and no flash pictures will be allowed.

Cinderella Transformation Is Complete At Trinkle Hall

The College community returning to William and Mary this fall has found a new student activities building waiting. But Trinkle Hall isn't exactly new to the thousands of alumni who ate meals, worked and played in the old building over a long period of time.

In fact, Trinkle Hall, which underwent a \$1.46 million renovation over the past year, dates back to 1914, when a small dining hall was built behind what is now the Campus Center. That building was expanded in 1926 when the College built a new dining hall for \$150,000 and later named it for Gov. E. Lee Trinkle.

Although the renovation, which will give the College an additional 28,300 square feet for student activities and an auxiliary dining hall, cost 10 times the amount of the original construction, the College still got a bargain, says James J. Connolly, director of facilities, planning and construction. Connolly, who oversaw the renovation, estimates that a new building of comparable size would cost at least \$2.6 million.

The renovated structure doubles the space available for student activities. It provides eight student offices, an atrium lounge, a craft shop with a darkroom, a games room, studios for the campus radio station, an auxiliary dining room capable of seating 180, and the centerpiece of the building, a huge, multipurpose hall for dances, conferences, lectures, the Student Association film series, concerts and alumni gatherings.

The entire complex, including the current Campus Center, will be known as the Campus Center, but the large hall, which can accommodate up to 1,000 people, will probably retain the name of Trinkle Hall, while the dining area will be called the Colony Room, after its original name.

Ever since it was taken out of active service to be used as a storage area in 1971, Trinkle Hall has been eyed by some campus administrators as ideally suited for additional student activities space. By the time Trinkle was closed, the Campus Center was overcrowded and overused. "It had gotten to the point where we simply could not meet the need," said Ken Smith, associate dean for Student Activities, who has worked in student affairs since 1969. When the Campus Center was completed in 1958, William and Mary had 2,500 undergraduates; today undergraduate enrollment is almost twice that number.

As early as 1973, Smith, in a memorandum to W. Samuel Sadler, dean of student affairs, had proposed the renovation of Trinkle Hall for student activity space.

The building had much to offer: proximity to the Campus Center, unique architectural features and many memories for alumni who had eaten in old Trinkle Hall, some of whom worked their way through college by waiting on tables.

For several years after Smith's proposal the idea lay dormant because the College needed Trinkle for storage space. In the late '70s, however, the College received money to expand its plant department facilities, freeing Trinkle Hall for what Sadler describes as the "adaptive reuse," i.e., its conversion into a student activities center.

The College chose Roanoke architect Rick Ekstrom of Wiley and Wilson to develop the renovation plan. Ekstrom had experience in renovation of old buildings, having worked on the Baltimore Harbor redevelopment project. He also had an affection for William and Mary, which his cousin had attended many years ago.

"We were interested in finding an architect who was genuinely excited about the adaptive reuse of old Trinkle," said Sadler. "Ekstrom was able to see ways of highlighting some of the interesting architectural features of the old building while maintaining the integrity of the original design."

Trinkle Hall was originally designed by one of Virginia's best-known architects, Charles M. Robinson, who also designed the Mosque in Richmond. Among Trinkle's many attractive features are large, fan-shaped windows, which now adorn student offices, two huge skylights in the old kitchen area, the large marble fireplace in the dining hall, and the quarry tile floor throughout the building. In the renovation design, Ekstrom was careful to preserve all of the structure's unique features. In addition, he had the exterior sandblasted to remove an ugly yellow paint, revealing the original brick walls.

"It was really nice to see Trinkle return to its old grandeur," says Ekstrom. "It was very rewarding to know that what you have done is make a building useful for a whole new generation of students."

Alumni as well as students will have an opportunity to see and use Trinkle Hall this fall. Student organizations will begin moving in when classes start, and both alumni and students will hold dances in the large hall during Homecoming weekend.

Perhaps the best part about the renovation of Trinkle Hall, besides the retaining of some of its original features, is the old-fashioned way the College paid for the renovation: the money was saved in advance from surplus funds generated by student activities fees.

Official Memoranda

COLLEGE COMPUTING NEEDS

To: Members of the Faculty and Administration

In its report of November 1979 the ad hoc Computer Planning Committee headed by Professor Franz Gross outlined a plan for computing which it felt was both reasonably economical and which would keep the College competitive in this important area. One of the primary achievements of this plan was to encourage the widespread use of computing in instruction. In the last academic year approximately half of the students used the College's Prime computer system via remote terminals.

Since we have now largely achieved the goals of that plan, and since computer technology continues its rapid advancement, it appears timely to examine again the College's computing needs in a comprehensive way. There appears to be general agreement on the issues now before us.

1. Instructional computing has benefited significantly from the progress of the last five years. With the increasing availability of reasonably priced personal computers, their role in instructional computing is deserving of careful study.
2. Most research needs of the College are accommodated by the facilities available for instructional computing. However, that segment of research computing usually identified as "number crunchers" can adversely affect the central computer system when viewed by the computing community at large. A plan for computing must recognize this reality.
3. Administrative users appear to have benefited least from the progress of the last five years. In contrast to academic users, administrative users are dependent on a small group of professional programmers. Thus, meeting the diverse needs of our administrative offices is a challenge which must be met if they are to continue to provide the strongest possible support for the primary functions of the university, namely teaching and research.
4. Word processing is becoming a reality at the College. Our needs in this area must be met. Some guidance concerning the purchase of hardware and software in this area of manifold options is desirable.

Therefore, I am appointing the following members of the university community to an ad hoc Computer Planning Committee to examine in detail the College's computing resources and needs and to make such recommendations to the President on the above and other related issues as they deem desirable and realistic by early September 1985.

William L. Bynum, Professor of Computer Science
 Alan E. Fuchs, Associate Professor of Philosophy
 E. Kenneth Greene, Treasurer
 William H. Hawthorne, Associate Professor of Business Administration
 Henry Johnson, Director of College Computing
 Stephen K. Knudson, Associate Professor of Chemistry, *Chairman*
 David E. Kranbuehl, Professor of Chemistry
 Gary A. Kreps, Associate Professor of Sociology
 Jacob M. Nelson, III, Director of Internal Audit

We anticipate a student as a member of the Committee as well.

Thomas A. Graves, Jr.
 President

EMPLOYEES' DAYS

As a token of the esteem and appreciation of the College community for our employees, the following dates have been designated as "Employees' Days" for football games at William and Mary during the 1984 season.

September 8	VMI
October 6	Temple University
October 13	Boston University
November 3	Lehigh University

A total of 100 complimentary tickets for each football game will be available for permanent college employees who have an annual salary that does not exceed \$11,069.00 as of 1 July 1984. College employees with long service and retirees who fall within the stated salary limitation will be given preference. Eligible individuals may obtain the complimentary tickets by applying in person at the Employee Relations Office, room 201, James Blair Hall.

I.H. Robitshek
 Director, Employee Relations

Calendar

Tuesday, September 4

College-wide Faculty Meeting, Millington Auditorium, 3:30-4:30 p.m.
 Faculty reception, Muscarelle Museum, 4:30 p.m.
 Bookfair Drop-off, Campus Center Trinkle Hall, 5-8 p.m.
 Campus Crusade for Christ, Campus Center, Sit 'n Bull Room, 6-9 p.m.

Wednesday, September 5

Plant Sale, CC Lobby, 11 a.m.-6 p.m.
 Bookfair Sale, CC Trinkle Hall, 3-6 p.m., pickup, 8-10 p.m.
 Inter-sorority Council, CC Sit 'n Bull, 6 p.m.
 Honors 201, Millington Auditorium, 7 p.m.

Thursday, September 6

Plant Sale, CC Lobby, 11 a.m.-6 p.m.
 CSA Mass, Wren Chapel, 12:45 p.m.
 Bookfair pickup, CC Trinkle Hall, 3-6 p.m.; 50¢ sale, 7-9 p.m.
 Canterbury, Wren Chapel, 5:30 p.m.
 English department lecture, Tucker 120, 7:30 p.m., "Language and Sex" by Prof. Roy Harris

Friday, September 7

BSO, reception and dinner, CC Ballroom, 5 p.m.
 SA movies, CC Trinkle Hall, 7 p.m.
 Concert: Billy Idol, W&M Hall, 8 p.m.

Saturday, September 8

Annual meeting, WMAEF, Person Room, W&M Hall, 10:30 a.m.
 Organ Recital, Wren Chapel, 11 a.m.
 Pre-game Brunch for WMAEF, W&M Hall lawn, 11:30 a.m.
 Football game, W&M vs. VMI, Cary Field, 1:30 p.m.
 Inter-Sorority Council slide show, CC Trinkle Hall, 7 p.m.

Sunday, September 9

Faculty Brunch by President and Mrs. Graves, 12:30 p.m., Wren Yard
 Historical Simulation Society, CC Room D, noon

Monday, September 10

Bloodmobile at Trinkle Hall, noon to 6 p.m.

STUDY SKILLS WORKSHOP

Why in the world should anyone take the time to make a study schedule? It could mean no more mad dashes to prepare your school work, no more "butterflies in the stomach" at exam time, freedom from worry about spending too much time on one subject at the expense of another, and protection from laziness, loafing, and "goofing off." Come join us and learn Time Management - it's worth its weight in gold!

This workshop and others on various aspects of study skills will be offered

throughout the semester on Tuesdays starting Sept. 11 from 3 p.m. to 4 p.m. in Jones 302. Additional sessions will be offered on Wednesdays from 7 p.m. to 8 p.m. in Morton 39. These workshops are open to all. No registration is necessary.

Graduating college students who wish to qualify for a career with the National Security Agency should register by Oct. 5 for the 1984 Professional Qualification Test. Bulletins and registration forms may be obtained at the College Placement Office, 140 Morton Hall.

Newsmakers

Dr. Mario Zamora, professor of anthropology, has returned from Durham University, England, where he attended a meeting this summer of the executive committee of IUAES, the International Union of Anthropological and Ethnological Sciences. He is the only member from the U.S.A. to serve on the 16-person governing body. The IUAES officers will meet again in Zagreb, Yugoslavia, next year to discuss the planned 1988 World Congress of Anthropology to be held in Yugoslavia.

George W. Grayson, professor of government, has recently authored a new book, "The United States and Mexico: Patterns of Influence." The book was published by Praeger.

The Pelican Publishing Company has released a new book by **Robert Maidment**, professor of education, titled, "Tuning In -- A Guide To Effective Listening." The book deals with listening, our most frequently used yet most neglected communication skill. Professor Maidment's article, "Ten Reasons Why Managers Need to Know More About Delegation" appeared in the August issue of *Supervisory Management*, a publication of the American Management Association.

Armand Galfo, professor of education, presented a paper, "Student Litigation in State and Federal Courts" to the 38th annual National Conference of Professors of Educational Administration, held Aug. 12-17 at the University of Maine. In his presentation, Galfo described a study previously conducted at the National Center for State Courts, and also the follow-up study which he has proposed to the Law and Social Science section of the National Science Foundation.

W&M Calendar Wins

The College's Cultural Calendar of 1983-84 has won a first-place award for printing excellence. The calendar, typeset at the College, was printed in Harrisonburg by Good Printers. The competition is sponsored annually by the Printing Industries of the Virginias in its Graphic Communications Awards. There were over 1,000 entries in the contest.

Prof. Mario Zamora

Berna L. Heyman, head of the Bibliographic Services Division of Swem Library, was recently elected for a second term to the OCLC Users Council. The Users Council consists of sixty representatives from throughout the country whose primary function is to counsel OCLC on policies and future directions for the OCLC system.

Heyman was also recently appointed to two committees within the American Library Association. She will be serving a one-year term on the Publications Committee of the Association of College and Research Libraries. Heyman will also serve as chair of the Library and Information Technology Association — Gaylord Award Committee which recognizes outstanding achievement in the area of library and information technology.

Brent Bledsoe is the new director of athletic promotions at the College. He comes to Williamsburg from Liberty Baptist College, where he was associate athletic director. Bledsoe is a 1976 graduate of VPI, where he played football. After graduation, he coached high school sports in Tennessee, Georgia and Virginia.

Bledsoe is from Kingsport, Tenn. He and his wife, Linda, are the parents of two sons, Mathew, 2, and Seth, 8 months.

Honor Council Trials

Charge	Decision	Spring-Summer	
		Decision	Action

CAMPUS SPOTLIGHT

Brad Dunkin

What does a director of merchandising do?

At the Society of Alumni, Brad Dunkin stays busy with inventory, promotion, advertising and seeing that orders are filled. Items relating to the College are much in demand by alums, and the Society does a brisk business in furnishing these. Profits go to support programs of the Society not otherwise funded.

The next few months will mean heightened activity for him, since fall is the heaviest buying time. Alumni come back to football weekends and pick up souvenirs while here. Still others are busy mail-ordering Christmas gifts with College insignia or the cypher. Business is fairly steady three seasons of the year, says Brad. Only during the summer does it dip, following the busy week of graduation.

The best-sellers are neckties in school colors, the College chairs, mugs, brass trivets, cross-stitch kits, and jewelry, particularly silver jewelry. The Harris print of the Wren Building is a good seller, and Hub's peanuts, plus hams and turkeys from the James G. Driver Fine Foods are always popular.

A new item Brad expects will draw a lot of orders is a Cross pen with the College

logo attached, available in chrome, 10-karat gold and black.

The Society sells mainly to alumni. Underclassmen usually buy such goods as T-shirts, sweatshirts, shorts, etc., from the College Bookstore. Both the Society and the Bookstore are aware of each other's territories, and try not to infringe.

Brad notes that the Alumni Society put out a small catalog last year in one of the Alumni Gazettes to present the entire range of goods for sale. It was expected, he says, that alumni would keep this for reference when ordering gifts. He does regularly put advertisements in the Alumni Gazette for certain items, too.

Inventory is kept all over the Alumni House, he grins. Mail orders are prepared in a small shipping room and readied for daily UPS pickups.

He's always on the lookout for new products. Some companies will develop items for him, and he likes that.

Brad, a 1983 graduate of the College, majored in urban studies. He worked on student committees at the Alumni House and knew of the merchandising job opening, so he applied for it and was hired after graduation. He also serves as Alumni House manager, keeping a schedule of events and arranging meetings, receptions, alumni happenings, student and Board of Visitors gatherings, plus regular events such as Sertoma Club meetings and duplicate bridge competitions. The house, because of its size, location and beautiful furnishings, is a favorite spot for social events and is regularly rented out for parties, wedding receptions and the like.

Brad is a bachelor, 24, and lives in a Williamsburg apartment. He likes to bicycle and has purchased a racing bike; he works out at Nautilus, enjoys gardening and is a valued member of the Big Brother/Little Brother organization, spending time each week with a youngster who is without a male influence at home. Brad says he was attracted to William and Mary because of its excellence, its size, and its history. Brad was sent by his senior biology teacher to look over the campus and has always been glad he spent his college years here.
