

Shakespeare Festival includes four plays

The 1985 Virginia Shakespeare Festival will stage four productions during its eighth season from July 5 through Aug. 17 in Williamsburg. Among them is an encore of one of its most popular past offerings, "The Taming of the Shrew," along with "Richard II," "Cymbeline" and Moliere's "The Miser."

The Moliere play marks the first non-Shakespearean production the Festival has ever presented on its main stage in Phi Beta Kappa Memorial Hall at the College of William and Mary. In the past, the Festival has offered non-Shakespearean, or contemporary works in its smaller studio theatre. This year "Cymbeline," one of the Bard's lesser known romances, will be presented in the studio theatre's more intimate setting.

Festival artistic director G. Leslie Muchmore says he has recruited cast and crew members from all over the nation to work at this year's Festival. Earlier this year he made trips to theatre schools at several major universities and interviewed professional actors in Wisconsin, North Carolina, Florida, New York and Williamsburg.

Muchmore himself will direct the popular "Taming of the Shrew," and Jerry Bledsoe, associate professor in William and Mary's Theatre Department, will direct "The Miser."

Guest director for "Richard II" is David Knight, professor and head of the acting program at the University of Illinois at Urbana-Champaign. Knight spent last summer at the Utah Shakespeare Festival where he directed and starred as Prospero in "The Tempest." His Shakespearean directing credits also include "Romeo and Juliet," "A

Midsummer Night's Dream," "The Comedy of Errors," and a previous production of "Richard II."

Knight has also amassed considerable credits as an actor, having first been recognized for his role as Lincoln in the BBC television production of "Abe Lincoln in Illinois" followed by the London production of "The Caine Mutiny Court Martial." For 20 years thereafter he was a leading actor in British theatre, films and television.

He has starred as the male lead in "Equus," "A Man for All Seasons," "Finishing Touches," "Private Lives," "Arms and the Man," "Hedda Gabler," "Richard II," "The Iceman Cometh" and "The Tenth Man." Three years ago he appeared in the Colorado Shakespeare Festival's 25th season as guest artist in the title role of "Macbeth."

Muchmore has high hopes for the 1985 season. Among his many goals is to take his production of "Taming of the Shrew" on tour at the end of the regular season. "We made some preliminary inquiries and are reasonably sure we could market the production," Muchmore says. "Everyone we've contacted has been very enthusiastic."

The Virginia Shakespeare Festival will present the four plays in repertory nightly except Sundays, which feature afternoon matinees, and Mondays, which are dark. Season tickets are available by writing the Virginia Shakespeare Festival, College of William and Mary, Williamsburg, Va. 23185. For information about individual tickets, group rates or special programs, either write or call the Festival at (804) 253-4377.

From left, honorary degree recipients May 12 include Walter E. Hoffman, U. S. District judge; author Eudora Welty; Rt. Rev. John B. Bentley, retired bishop of Alaska; and Commodore Grace Hopper, shown with College Rector Anne Dobie Peebles and acting President George R. Healy.

Commencement ceremony winds up 1984-85 year

The class of 1985, 1,600 strong, was graduated from the College of William and Mary Sunday, May 12, after a weekend of meaningful ceremonies.

There was a senior class dance on May 10, Baccalaureate, a dedication, receptions, commissioning, and a Candlelight ceremony on May 11, leading up to the big event, the 2 p.m. Commencement exercises at William and Mary Hall, appropriately held on Mothers' Day, May 12. Many proud mothers, lots of them wearing corsages, proud fathers and families were on hand to pack the building for the event.

The seniors gathered at the Wren Building at 1 p.m. Sunday for the traditional last walk through the historic Wren Building, ringing the bell as they passed, then marching through the Sunken Garden, past Chancellors and James Blair Halls, and through Crim Dell to the Hall where faculty, staff, Board of Visitors, and guests awaited their arrival. There was some tomfoolery among the seniors, to cover up the emotions they were feeling. One barefoot senior brought out a frisbee to throw to cohorts while they waited. There was some hugging, some champagne-guzzling, lots of laughter and wise-cracking. "Mr. T," class president Tony McNeal, resplendent in an ornamental neckpiece signifying the chain of office, led his classmates into the cavernous hall for the last time together as students. When they departed two hours later, they were alumni.

As usual, many students had messages on top of their caps, ranging from fraternity symbols to their initials to Confederate flags to green tennis

balls. Three wore colonial hats, two wore baseball caps. One student had on his mortarboard, "I got a job;" another, "Hi Mom;" still another, "Me 2 Dad."

Present were a large number of babies, some eating, sleeping, wiggling and hollering. At least one dog was present, an Eskimo spitz puppy who slept through most of the event.

The Commencement speaker, Commodore Grace M. Hopper, USNR, got a standing ovation for her speech. The audience particularly liked her words of wisdom directed to graduates when she advised, "If it's something good, go ahead and do it. It's much easier to apologize later than it is to get permission."

Honorary degrees were presented to Commodore Hopper; author Eudora Welty; the Hon. Walter E. Hoffman, senior U.S. District Judge; and to the Right Rev. John B. Bentley '19, former Episcopal bishop of Alaska.

The William and Mary Choir and Brass Ensemble furnished music for the occasion.

Among the guests of honor were members of the class of 1935, who were celebrating their 50th anniversary. Clad in caps and gowns, they were led into the arena by H. Westcott Cunningham, executive vice president of the Society of the Alumni.

In the 292nd year of the College, the Commencement officially ended with the passing of the "chain of office," a heavy metal neckpiece, from Tony McNeal, president of the class of 1985, to Liz Flamm, president of the class of 1986, and the final procession by graduates and dignitaries.

Off with the old and on with the new! Lt. Col. R. Robert Goodhart, right, outgoing professor of military science, welcomes Lt. Col. D.E. Coates to the campus as new professor of military science beginning June 3.

Col. Coates reports here June 3

Lt. Col. Dennis Edward Coates, United States Army, will report to the College of William and Mary on June 3, to assume the position of professor of military science and head of the Reserve Office Training Corps unit at William and Mary and at Christopher Newport College.

He currently is on duty as adjutant general, chief administrative officer, at the United States Armed Forces Staff College in Norfolk.

Colonel Coates, 39, has lived in York County for six years. He graduated from the U.S. Military Academy in 1967, and has both master's and doctoral degrees in English from Duke University. He taught at the U.S. Military Academy, 1973-75, at Thomas Nelson Community College, 1978-79, and at the Armed Forces Staff College, 1981-85.

He wrote the Army's manual, *How to*

Manage Training, and is an expert on the 20th-century American novel. His doctoral dissertation was on John Cheever, a contemporary novelist, whose biography is currently being written by J. Scott Donaldson, Cooley Professor of English at the College. Donaldson and Col. Coates have conferred on the subject of Cheever.

The new military science professor is also a fitness enthusiast, has entered a number of marathons, and coordinated Virginia's largest road race, the Elizabeth River Run in Tidewater.

He has written numerous articles on military subjects, literary criticism, book reviews and is the author of a book, *To the Colors*, published in 1975.

He was an infantry adviser in Vietnam and has been awarded the Silver Star and five other awards for valor.

The colonel is married and has two children.

Seniors from Lodge 14 made sure they were identified with letters placed on their mortarboards, highly visible from the upper tiers of spectator seats at William and Mary Hall during Graduation ceremonies.

Professor hopes Africa solves its food problems eventually

If the continent of Africa is ever to find a permanent solution to its famine problem, what it needs more than food is long-range monetary support, according to an assistant professor of history at the College of William and Mary.

Ismail H. Abdalla, a native of Sudan who teaches courses in African history and culture at the College, believes that if Africans have the money to start up new farm technologies, they can solve their own hunger problems and have food left over for export. Abdalla says the steady influx of food for the hungry has undercut what is being grown and sold by African farmers.

Africa has the land, water and solar power to farm successfully if those resources can be harnessed properly, according to Abdalla. "The land is fertile, just covered by sand," he says. "Farmers would have enough water if more deep wells could be dug, and the sun is an obvious source of power, so let's use it."

Abdalla acknowledges that the current shipments of food and medical supplies are still needed, but adds that these short-term solutions ignore long-term problems, such as lack of an adequate water supply. He estimates that each deep well in the African deserts costs about \$3,000 to drill. Many of the wells have been provided by the Agency for International Development. "Each well can support 6-10 families, all their livestock and their household items," he says. "Water is their biggest need, and the wells are a perfectly logical solution."

Abdalla points out that Israel has learned how to successfully use desert land in that country, and he wonders why African agricultural experts couldn't be sent there to learn to do the same thing in Africa. Discovering how to control the land, irrigate it and use the sun for growing power is the key to solving the hunger problem in Africa, Abdalla believes.

"Food aid can be detrimental to the farmer," he says. "We need the food, but in the long run the farmers may become too dependent upon outside food. That's why we need to send the technology."

The famine problem is compounded by the loss of time in agricultural work. Most African workers, because they can't grow enough food, spend long hours standing in lines to get it. Abdalla says an enormous amount of time is lost that could be spent in farm production.

With the proper tools and irrigation,

"African farmers also could cut down the amount of time it takes to grow crops," he adds.

Another aspect of the famine that is misunderstood by the rest of the world is the ongoing African attitude toward population growth. While having fewer mouths to feed seems a logical partial solution to hunger, Abdalla notes that Africans consider children to be their hope for the future; they keep having more children because so many die. "Even though in the short run, African children may suffer disease and die, those who survive can grow to support and help the aging parent," he says.

"Checking the population growth is not money well spent," he says. "As long as children are perceived as an asset, Africans will keep having them."

People can't move around the continent as freely as they once did to find food, Abdalla adds. Political boundaries have been drawn that create divisions among tribes and ethnic groups. This political instability, says Abdalla, has contributed to the food shortage. Consequently, "both natural and man-made problems face the people."

The forests and rainfall that once were plentiful have diminished. Forests have been cut down and the wood used to make charcoal, a cash crop. Resources of the environment are being used up faster than they are being replenished. Rainfall starts about two to three weeks later in the season than before, and ends about two weeks sooner, he adds.

With all the problems surrounding the famine in his homeland, Abdalla says he is optimistic that Africa will be able to help itself more instead of relying so heavily on foreign aid.

"The Africans are realizing their alternatives," he says. "The people do try to reverse the perpetual hunger and death. We are planting trees that will produce gum as an export crop. Wells are being dug, and new breeds of cattle are being imported. The national government is reorganizing agricultural farms and banks and rethinking African politics."

But, to accomplish its goals the continent needs monetary support from its donor nations. "For the short run, we have to help the starving and dying people with food aid, even if it means dumping on the local farmers," says Abdalla. But money and expertise to make long-range plans for stability, he notes, "would be a beautiful humanitarian experiment."

Recent Grants Awards at William and Mary

Department of Anthropology

Barka, Norman F., "Phase I Archaeological Survey of Grove Neighborhood," County of James City, Virginia, \$1,747.50 (April 1985).

Department of Biology

Bartlett, Karen, "Biogenic Modulation of Methane in the Global Troposphere," National Aeronautics and Space Administration, \$42,618 (2/1/85-1/31/86).

Mangum, Charlotte P., "Adaptability of Blood Oxygen Carriers: Mechanisms and Evolutionary Origins," National Science Foundation, \$30,284 (3/1/85-8/31/86).

Scott, Joseph L., Norman J. Fashing and Charlotte P. Mangum, "Acquisition of a Transmission Electron Microscope," National Science Foundation, \$59,375 (11/1/84-4/30/86).

Department of Chemistry

Brewer, Dana, "Development and Evaluation of Analytical Models for Space Station Systems Analysis," National Aeronautics and Space Administration, \$56,580 (1/1/85-12/31/85).

Hill, Trevor B., "Mobil Chemical Contract: Spring 1985," Mobil Chemical Company, \$3,533 (1/1/85-5/1/85).

Kranbuehl, David E., "Characterization of the Relationship of Dynamic Dielectric Properties to Cure Cycle Processing of High Temperature Composite Resins," Center for Innovative Technology, \$28,000 (1/1/85-12/31/85).

Kranbuehl, David E., "Characterization of the Relationship of Cure Cycle Chemistry to Cure Cycle Processing Properties," National Aeronautics and Space Administration, \$84,828 (12/1/84-11/30/85).

Department of Computer Science

Collins, W. Robert and Noonan, Robert E., "The Specification, Design, and Implementation of a Toolset Command Language Via Rapid Prototyping," National Aeronautics and Space Administration, \$8,307 (11/1/84-5/31/85).

Hagemann promoted

Diane K. Hagemann has been named director of chapter programs for the Society of the Alumni. She is a graduate of the class of 1975 and holds a B.A. degree in history from the College. Mrs. Hagemann was formerly assistant director of class programs for the Society, assuming her new duties May 13. She replaces Tish Paschall '64 who has become associate director for annual giving in the Office of University Advancement. Mrs. Hagemann originally joined the Society staff in 1981.

Mrs. Hagemann will also continue in her capacity as director of Educational Travel Programs and director of Student Programs for the Society (Life After DOG Street, Alumni-Student Liaison Committee programs), as well as the Alumni Society contact for Career Exploration Day.

Department of Economics

Finifter, David H., "Support Services to Assist the JTLS Technical Advisory Panel," Westat, Inc. (for U.S. Dept. of Labor), \$7,184 (12/15/84-3/15/85).

Department of Mathematics

Andersen, Carl M., "Tire Nonlinear Model," National Aeronautics and Space Administration, \$75,389 (10/16/84-6/15/85).

Department of Physics

Benner, Chris, "Halogen Occultation Experiment (HALOE) Investigation," National Aeronautics and Space Administration, \$59,325 (1/1/85-12/31/85).

Benner, Chris, "High resolution Spectroscopy of Support Atmospheric Measurements," National Aeronautics and Space Administration, \$57,502 (4/1/85-3/31/86).

Champion, Roy L. and Doverspike, Lynn D., "Negative Ion Detachment Cross Sections," Department of Energy, \$84,000 (3/1/85-2/28/86).

Eckhause, Morton, John Kane, Robert Siegel and Robert Welsh, "Experiments on the Interactions of Muons, Kaons, Antiprotons, and Sigma Hyperons," National Science Foundation, \$410,000 (1/1/85-6/30/86).

Gordley, Larry L., "Data Inversion Algorithm Development for the Halogen Occultation Experiment," National Aeronautics and Space Administration, \$113,101 (12/1/84-10/31/85).

Hubbard, Harvey H., "Large Wind Turbulence Acoustics - Phase V," National Aeronautics and Space Administration, \$50,057 (12/1/84-11/30/85).

Krakauer, Henry, "Electronic Structure, Geometry, Equation-of-State, and Structural Transitions of d-band Surfaces and solids and f-band Metals and Compounds," National Science Foundation, \$73,600 (12/15/84-5/31/86).

Kruszewski, Edwin T., "Development of a Unified Dynamic Structural Mechanics Theory for Beams," National Aeronautics and Space Administration, \$43,100 (1/1/85-12/31/85).

Namkung, Min, "Study of Static and Dynamic Stress Effects in Nonlinear Solids," National Aeronautics and Space Administration, \$50,980 (12/1/84-11/30/85).

Schone, Harlan E., "U.S. - Hungary Cooperative Research on NMR in Amorphous Metals," National Science Foundation, \$20,300 (2/15/85-7/31/88).

Vahala, George M., "Nonlinear Magnetohydrodynamics and Alpha Particles," Department of Energy, \$18,000 (1/1/85-12/31/85).

Department of Psychology

Drown, Debra, "Battered Women: Attributions of Causality, Responsibility, and Blame," Society for the Psychological Study of Social Issues, \$500 (2/15/85-12/15/85).

Department of Theatre and Speech

Palmer, Richard, "Virginia Shakespeare Festival," Virginia Commission for the Arts, \$3,500 (6/1/85-8/31/85).

Office of the Graduate Dean of Arts and Sciences

Carli, Bruno, "Task Assignment Number 6," National Aeronautics and Space Administration, \$5,000 (3/29/85-4/30/85).

School of Education

Adair, Fred, "Family Counselling Project," Peninsula Area Cooperative Educational Services, \$13,000 (9/1/84-6/30/85).

Affirmative Action

Robinson, Dale, "Graduate and Professional Study Fellowship Program," Department of Education, \$77,700 (9/1/85-8/31/86).

Muscarella Museum

Kale, Louise, "Conservation of Prints and Paintings," Institute of Museum Services, \$7,240 (10/1/84-9/30/85).

EMBA program will begin for business managers

With the approval May 12 of a new Executive Master of Business Administration program by the College of William and Mary Board of Visitors, experienced area professionals will have the opportunity to complete a graduate degree in management without having to spend three or four years taking courses.

The College's new Executive MBA program, or EMBA, expected to begin in January of 1986, is designed to serve those who have considerable management experience and wish to pursue part-time graduate management studies. By attending intensive class sessions on alternate weekend days, with some extended residency periods, EMBA enrollees can complete their studies within two years instead of the usual three or four required by most graduate business programs.

It is expected that most EMBA students will be sponsored by their employers, who will provide both financial support and release time for their employees in the program.

"We are really trying to meet a need in the Tidewater area for graduate education of middle managers who have an interest in pursuing an M.B.A. degree with a like peer group," says Franklin E. (Bud) Robeson, associate dean and professor of business administration.

The total cost of \$17,500 for the program will include purchase of a personal computer for each student. "The

students won't be here on campus as much, so they need computer support with an arrangement to communicate with our main terminal on campus," says Robeson.

He adds that the EMBA curriculum, because it is only five semesters long, is less flexible than other MBA programs.

Instead of traditional course structure, students will have modules to complete, each one tightly integrated with the next, because, in Robeson's words, "you can't afford to lose one day in a program like this." Students will cover everything from economics and finance to marketing and production, to information systems and quantitative methods.

Post-impressionist art is on exhibit

The summer exhibition at the Muscarelle Museum of Art is in place, and has already been attracting art lovers to the Sheridan Gallery. Post-impressionist painters are represented in the display, which will be shown through August 11.

The show includes works by Pablo Picasso, Cezanne, Klee, Matisse, Toulouse-Lautrec and Renoir.

It is from the Alex Hillman Family Foundation collection, and is arranged through the American Federation of Arts, founded in 1909.

Professor Braxton appears at seminars around nation

The month of April proved a busy one for Joanne M. Braxton, assistant professor of English. A poet as well as a scholar and literary critic, Professor Braxton was one of seven writers spotlighted at the Seventh Annual Women Writers' Conference at the University of Kentucky in Lexington on April 9. She was also the featured reader at the annual meeting of the Poetry Society of Virginia in Williamsburg on April 20, reading both from her collection of verse *Sometimes I Think of Maryland* (Sunbury Press, 1977) and from a new

and recently published work.

Additionally, Professor Braxton delivered a paper to the Five College Faculty Seminar in Black Studies at Smith College in Northampton, Mass. on April 25. Professor Braxton spoke on "Redefining the Slave Narrative: The Autobiography of Linda Brent." The lecture was attended by faculty members and administrators from Smith, Mt. Holyoke and Amherst Colleges, the University of Massachusetts at Amherst, and other local colleges and universities.

Joanne Braxton was busy autographing copies of her book of poetry, *Sometimes I Think of Maryland*, in Northampton, Mass. recently, and held the baby of the autographe while writing. Braxton is assistant professor of English at William and Mary.

Leonard L. Graves '35 and Ann T. Graves '38 with the last of seven Graves offspring to attend the College. Lilly '85 was graduated May 12.

Graves family supports College for 50 years

The last of the seven children of Leonard L. Graves '35 and Ann Thompson Graves '38 was graduated from the College of William and Mary May 12. She was Lillian (Lilly) Graves, an accounting major, who will begin a job in Richmond with an accounting firm July 1.

The seven alumni children of the Williamsburg couple include: Leonard L. Graves, Jr., '68 and '71 Marshall-Wythe School of Law; Joan '70; Patty '71; Ann (Umpie) '73; Elizabeth (Libby) '75; May '78 and '80 M.B.A.; and now, Lilly.

All seven have chosen careers in business or public life. Joan, Patty and Libby are computer experts; May is an assistant vice president at a Richmond brokerage firm; Leonard, Jr., is partner in a Hampton law firm; and Umpie, who formerly taught math, is now a housewife. Four of the six girls married William and Mary classmates.

Mrs. Graves' two sisters also went to the College, as did her brother, who opted to get a degree elsewhere. Mr. Graves' brother, Henry K. Graves, was in the class of 1931 at the College. All of the Graves children except Lilly were day students at William and Mary. It was easy, since their family home is on Jamestown Road, just across the street from Phi Beta Kappa Memorial Hall. Lilly lived a year in a sorority house and two years in a dorm. She and her roommate of three years plan to share a Richmond apartment when they begin working.

While Lilly was attending Commencement activities this past weekend, her parents were busy with the 50th reunion festivities, which included luncheons, a reception, a banquet, and a memorial service in the

Retirees are listed

Retirees from service at the College this past year included the following: Thomas E. Lee, Buildings and Grounds, Aug. 1, 1984; Ervin D. Farmer, Buildings and Grounds, Aug. 1, 1984; Elizabeth R. Turner, Buildings and Grounds, Aug. 1, 1984; George J. Colyer, CEBAF, Sept. 1, 1984; Lucy Scott, Buildings and Grounds, Dec. 1, 1984;

Also, Marcia Bush, Swem Library, Jan. 1, 1985; Grover Batton, Buildings and Grounds, April 1, 1985.

Irving H. Robitshek, employee relations director, will retire June 1, as will Emma Harris of Buildings and Grounds.

They will be honored at a luncheon to be held in June.

Sunken Garden. Since Sunday was also Mothers' Day, the Graveses hosted several of their children who attended Lilly's graduation ceremonies.

Leonard Graves, Sr., praised the College of William and Mary. "It's one of the better colleges in the nation. It has a fine reputation, and most of its students have done mighty well. I'm so glad Lilly decided to go there — she looked at other colleges, but then followed the family tradition."

Mr. and Mrs. Graves have no more children to send to the College, although Lenny Graves facetiously suggested that Rocky, the family dog, might consider it. They will depend on grandchildren, they said, to keep up the William and Mary tradition.

Academy of Sciences meets at College

"As educators we labor to present material so that our students can understand it. Yet, there are times when we feel we've lost them, or they complain that we are talking over their heads," says a flyer distributed to members of the Virginia Academy of Science, set to meet at the College of William and Mary May 15-17.

The flyer advertises a lecture by Dr. Robert L. Hartshorn, associate professor of chemistry at Tidewater Community College's Virginia Beach campus, who will share some of his surprising findings about how students learn in a talk called "Still Concrete After All These Years--Piagetian Research on Thinking Patterns of Adult Students." Hartshorn's talk, which will include a discussion session afterward, will be held from 1:45-2:45 p.m., Thursday, May 16, in William and Mary's Millington Hall, room 119. Area educators are invited to attend.

Like others who study the physical and behavioral sciences, Dr. Hartshorn sought answers to such problems in Piaget's theory of development of the human cognitive processes. He will discuss research on graduate and undergraduate university students, community college students and high school students and the implications for teaching strategies.

About 500 persons are expected to attend the meeting. Around 1,000 high school students will be here May 14-16 for the Virginia Junior Academy of Science meeting and will present 535 papers or research projects.

Graduation Scenes - 1985

Peter Wilcox of Newport News is the fourth in his family to wear this graduation gown, which went to W&M Commencements in 1981, 1983 and 1984. There are several other Wilcoxes coming along, including sister Terese, who will wear it some day. His parents are Dr. and Mrs. James Wilcox.

THEN . . .

Keith Exton of Williamsburg at age three indicated an early decision for W&M on Crim Dell bridge in 1967. His brother, Brian, in a baby carriage in the background, gurgled that he liked the College too.

Keith Exton was graduated May 12 with a degree in business administration. His brother, Brian, finished the freshman year at W&M and Margy, the last of the Extons, will enter as a freshman in the fall.

AND NOW

Lt. Michael Powell, left, was commissioned by his father, Maj. Gen. Colin Powell, at R.O.T.C. ceremonies May 11. Maj. Gen. Powell was principal speaker.

The last walk through the campus by the class of 1985 was led by Tony McNeal, class president, and Lee Ann Bush, student association president.

Commodore Grace Hopper delivered the graduation address.

The Rt. Rev. John B. Bentley, retired Episcopal Bishop of Alaska, was among four distinguished guests who were awarded honorary degrees at Commencement. Rector Anne Dobie Peebles and acting President George R. Healy presided.

Tom and Zoe Graves were welcome guests at Commencement. The former President of the College and Mrs. Graves attended the Candlelight ceremony and graduation.

Commencement Prizes and Awards

LORD BOTETOURT MEDAL FOR SCHOLARSHIP

Lisa Ellen Porter

Sixteen members of the graduating class at the Marshall-Wythe School of Law were inducted into the Order of the Coif society on Saturday, May 11. Pictured from left are: John O'Grady, George Clemo, Adam Gallo, William Shewmake, Gene Brooks, Laura Waterland, John Wesley, Ann Burke, Michael Sterling, Judge Roy W. Arthur, honorary member, William B. Spong, Jr., retiring dean of the law school, Dana McDaniel, Kim Humes, Bradley Maxa, Arthur Kelsey, Patricia Vaughan, Hilary Kline, and Jonathan Smith-George.

This spot near Millington Hall was dedicated May 11 as a memorial to Joseph G. Pastore '85, a senior who died last fall of a rare blood disease. His parents, Mr. and Mrs. Raymond Pastore of Reston, left, his brothers, sister, and roommate, Bill Bennett, right were present for the ceremony. Students contributed to buy two park benches and three cherry trees in Pastore's memory.

Carol W. Sherman, left and Shirley Roby, both professors of dance, were cited for sustained excellence in teaching and were presented with the first annual Thomas A. Graves, Jr. Award at Commencement exercises May 12.

First Graves Award is presented

The first annual Thomas A. Graves, Jr. Award for sustained excellence in teaching at the College of William and Mary went jointly to two faculty members whose professional careers have meshed at the College for the past 20 years — Shirley Roby and Carol W. Sherman, both professors of dance.

The Award was established last fall by friends of Dr. and Mrs. Graves, just before the 24th president left for a new position as director of Winterthur Museum and Gardens in Delaware. Its purpose, to honor Dr. Graves, was to recognize long-term excellence in teaching at the College.

Shirley Roby, a native of Staunton, came to William and Mary in 1964 with degrees from Longwood College and the University of North Carolina. Carol Wallace Sherman arrived at the College a year earlier, in 1963, after obtaining degrees from Hollins and Sarah Law-

rence colleges. Mrs. Sherman was born in Watertown, N.Y.. Both have collaborated for years on dance projects, and both have also served on a number of faculty committees and have worked to focus attention on the arts at the College.

One of their best-known ventures is the DancEvent, a stunning modern dance show staged every other year. They annually produce well-attended performances of Orchesis, modern dances choreographed by members of the student dance group.

Because of their genteel manners and the respect and affection their students hold for the pair, they are often referred to as "The Ladies."

Dr. and Mrs. Graves were on hand at Commencement exercises Sunday to see the presentation of the awards to Mrs. Sherman and Miss Roby.

Newsmakers

Kay J. Domine, College archivist, recently attended the joint meeting of the Mid-Atlantic Regional Archives Conference and the South Atlantic Archives and Records Conference. She presented a paper on "How Evaluations Are Really Done" at a session on "Measurement and Evaluation of Public Service Programs." **Laura Parrish**, assistant archivist, also attended the conference.

Robert Scholnick, director of the American Studies Program and professor of English, presented a paper, "An Urban Pulpit for America in the 1870s: J.G. Holland's *Scribners' Monthly*," at the meeting of the American Society for Church History, April 25-27. The meeting was held at Miami University, Oxford, Ohio.

Edward K. McCormick, director of Student Financial Aid, has been asked by the State Council of Higher Education in Virginia to serve on a committee designing a program review process. The program review will be an annual activity both off-site and on-site to determine where any problems might exist in the administration of the College Scholarship Assistance and Tuition Assistance Grant Programs.

John M. Nagle, professor of education and dean of the School of Education, served on a panel discussion entitled, "Personnel Assessment: Implications for Personnel Training," at the annual spring conference of the Virginia Educational Research Association, May 2, in Fredericksburg.

Bruce Grant, professor of biology, was recently elected to the Editorial

Board of the *Journal of Heredity* by the Council of the American Genetic Association.

Wayne Kernodle, professor of sociology, presented a lecture on "Adjusting to Retirement" to the Planning for Retirement session held by the Training and Employee Communications division of Colonial Williamsburg at the Cascades on Tuesday, April 30.

Stewart Ware, professor of biology and **Donna M.E. Ware**, curator of the herbarium, recently attended the annual meeting of the Association of Southeastern Biologists (ASB) in Tennessee. He presided over a paper session on plant ecology and also presented a paper, "Re-analysis of Quarterman and Keever's Southern Mixed Hardwood Forest." She presided over a paper session on plant systematics, and is also the author of the recent article "Mountain Memoirs: Botanizing in a Blue Ridge Gorge," which appeared in the *ASB Bulletin*.

Kelly G. Shaver presented a colloquium entitled "Attributions of blame: Causality, responsibility, and blameworthiness" at Princeton University in early May.

Robert E. Noonan, professor of computer science, was invited by NASA to attend an Open Forum on Space Station Software Issue, held April 24-25 at the Marshall Space Flight Center in Huntsville, Ala. The purpose of the forum was to "provide an opportunity for industry and academia to comment upon the plans and concepts being formulated by NASA" for a space station.

He's dean of publications

One of the College's unsung hard workers came to William and Mary by way of Washington state, Alaska and Denmark. It was a circuitous but fortunate route that sent S. Dean Olson to William and Mary in 1967 as the school's news director.

A native of the state of Washington, he had graduated in journalism from Gonzaga University and with a master's degree in communications from the University of Washington. A stint with the Coast Guard and the Associated Press provided him with enough savings to buy a Eurail pass and tour Europe. A brother was studying at the University of Copenhagen, and when Dean dropped by to visit him in Denmark, he met the lovely Annelise. During Dean's next job, a three-year task as journalism teacher at the University of Alaska, they courted by mail. She came to visit him in Alaska in 1966, and they were married. He was assistant professor of journalism by then, but they decided to head back to Copenhagen, where she was a legal secretary, and he would look for a job.

Nothing really turned up in his area of interest, so he placed an ad in *Editor and Publisher* magazine in America, and it was answered by Ross Weeks, Jr., who was then head of William and Mary's communications office. He hired Dean, sight unseen, for the job of news director.

A year later, Dean was plucked from that office to serve as assistant to President Davis Y. Paschall, and later filled the same position for two years for the 24th President of the College, Thomas A. Graves, Jr. In 1974, he was named publications director, a new job at the College, and one which he still holds. Awards for College publications since that time have been many; the latest is a gold medal for the *William and Mary Magazine* as one of the five best collegiate magazines in the nation.

Dean's department, which includes four other workers and the print shop, produces the William and Mary catalogs, viewbooks, directories, brochures, flyers, posters, announcements, tickets, programs, campus newspapers and magazines and a myriad of other printed needs of the College.

Since Charles H. Holloway resigned as director of communications last February, Dean has also served as interim director of communications.

He is known around Williamsburg as a serious runner and participates in at least two races each year: the United Way run from Carters Grove to Williamsburg and the Half Marathon from William and Mary Hall down the Colonial Parkway and back. He usually finishes in the top half of the contestants. His best time so far is an hour and 41 minutes for 13.1 miles. He runs six miles every night because "it relaxes me after a stressful day."

Dean is an enthusiastic participant in Kiwanis Club activities, a civic club to which he has belonged for 12 years. He zealously peddles the organization's candles and peanuts around the campus at Christmastime, to aid the Kiwanis fundraising efforts, which assist local charities and projects. "It's a real great club," he says, "heavily involved in community life. And there's a good deal of camaraderie among its members."

Dean and Annelise and their son, Poul, now 14, live in the Lakewood section of Williamsburg. Dean drives a red VW, usually parked in front of James Blair Hall by 7:30 each morning. Annelise is secretary to C. Rodgers Huff, president of United Virginia Bank in Williamsburg, and Poul is a freshman at Lafayette High School. Rusty, a cocker spaniel ("one of the nicest dogs I know," says Dean), rounds out the family.

Dean Olson

Campus Spotlight

Dean has a wry sense of humor which can surface at unexpected times, like during a long, serious meeting that needs a touch of lightness. He can say outrageous things with a perfectly straight face, leaving listeners to wonder if they've suddenly gone bonkers. A dedicated and conscientious state employee, he is particularly diligent about spending College funds and watches the pennies carefully. He obtains high productivity from his small staff, regularly turning out an astounding amount of high quality printed matter for the College.

"The thing that makes William and Mary a quality institution is the quality of the people who work here," he sums up. "It's been a great satisfaction to me to be around all the nice individuals. I've never been sorry I ended up at the College."

- Tina Jeffrey

Kids programs planned for summer interests with classes, camps

Before long school will be out for the summer, and the kids will be looking for something interesting to do. Why not help them learn while they're having fun — with courses from William and Mary's Office of Special Programs?

This summer Special Programs will present several courses developed especially for youngsters. Dr. Martin Mathes of the biology department will teach "Gardening for Young People,"

featuring illustrated discussion of how plants grow, demonstrations of methods of propagation and factors controlling growth, followed by actual planting experience at city garden plots.

Other classes for kids include a fine arts workshop, a crafts workshop, elementary photography for youngsters, and day camps for competitive swimmers.

For both adults and young people, Special Programs will offer summer courses in "Singing for Beginners," tennis, and conversational Russian.

To register or to receive more information, call the Office of Special Programs at 253-4084, 4047.

Grants and Contracts at VIMS

The Virginia Institute of Marine Science
Awards of Grants and Contracts
July 1, 1983-June 30, 1984

FEDERAL FUNDS

Bender, Michael, Chemical Oceanography, "Kepone Analysis of Fishes," Council on the Environment, \$89,000 (7/01/83-6/30/85).

Boon, John and Berquist, Carl, Geological Oceanography, "Research in Earth Science," National Science Foundation, \$2,600 (2/01/84-6/30/86).

Byrne, Robert and Huggett, Robert, Physical & Engineering Science, "Crony Island," Corps of Engineers, \$24,992 (8/01/83-2/29/84).

Diaz, Robert, Estuarine and Coastal Ecology, "Habitat Suitability Index Model for Hoskins Creek Dredging Project," Corps of Engineers, \$1,149 (5/01/84-5/30/84).

Diaz, Robert and Byrne, Robert, Estuarine and Coastal Ecology, "Baltimore Harbor and Channels," Corps of Engineers, \$416,186 (9/20/83-6/16/85).

Grant, George, Physical & Engineering Science, "Ultra Low Level Element Analysis of Fish and Mussel Tissue," Department of Energy, \$40,236 (11/28/83-2/28/85).

Haas, Leonard, Estuarine and Coastal Ecology, "Planktonic Rate Processes in Oligotrophic Ocean Systems," National Science Foundation, \$60,523 (2/01/84-7/31/86).

Haven, Dexter, Fisheries Science, "Evaluation of Norfolk Deepening Project," Corps of Engineers, \$2,166 (5/01/84-6/30/84).

Hobbs, Carl, Geological Oceanography, "Aerial Photography, Tangier Island," Corps of Engineers, \$400 (2/10/84-3/09/84).

Hobbs, Carl, Geological Oceanography, "Aerial Photography, Crane, Broad & Oyster Creeks," Corps of Engineers, \$950 (5/24/84-7/30/84).

Hobbs, Carl, Geological Oceanography, "Aerial Photography for U.S. Army Waterways Experiment Station," U.S. Army, \$356 (11/01/83-TBA).

Huggett, Robert; Kator, Howard; and Diaz, Robert, Chemical Oceanography, "Coastal Environment Impact Program," Council on the Environment, \$89,000 (8/01/83-1/31/85).

Huggett, Robert, Chemical Oceanography, "Norfolk Dump Site," Environmental Protection Agency, \$4,898 (7/12/83-12/31/83).

Huggett, Robert, Chemical Oceanography, "PNA Analyses of Sediment Samples from the Elizabeth River," Corps of Engineers, \$6,930 (5/01/84-5/30/84).

Kator, Howard and Mason, Patrice, Estuarine and Coastal Ecology, "TEM Studies of NASA Materials," NASA, \$9,018 (7/01/83-6/15/84).

Loesch, Joseph and Kriete, William, Fisheries Science, "Study of Alosa Stock Composition and Year Class Strength in Virginia," National Marine Fisheries Service, \$77,000 (1/01/84-12/31/84).

Loesch, Joseph; Kriete, William; and Diaz, Robert, Fisheries Science, "Striped Bass Research," National Marine Fisheries Service, \$35,000 (10/01/83-9/30/84).

Lynch, Maurice, Marine Resources Management, "1984 Sea Grant," National Oceanic and Atmospheric Administration, \$741,026 (1/01/84-12/31/84).

MacIntyre, William and Su, Chih-Wu, Chemical Oceanography, "Investigation of Deviations in the Two Liquid Phases of Medium Molecular ...," USAF, \$52,418 (1/01/84-12/31/84).

MacIntyre, William and Hinton, Rebecca, Chemical Oceanography, "Carbon Monoxide Sampling Program," NASA, \$5,000 (5/30/84-10/01/84).

Orth, Robert, Wetlands Ecology, "Distribution and Abundance of Virginia's SAV," EPA, \$12,671 (5/15/84-12/31/84).

Rooney-Char, Ann, Marine Resources Management, "Response to Hazardous Material Spill in Chesapeake Region," National Oceanic and Atmospheric Administration, \$8,000 (8/01/83-9/30/83).

Theberge, N. Bart and Kaiser, Jennifer, Ocean and Coastal Law, "Fishery Regulations," National Fishery Institute, \$5,000 (7/15/83-12/30/83).

Wright, Don, Geological Oceanography, "Nearshore and Surf Zone Morphodynamics," Office of Naval Research, \$198,009 (4/01/84-3/30/85).

STATE FUNDS

DuPaul, William, Advisory Services, "Marine Service Education," Virginia Department of Education, \$5,000 (6/01/84-12/31/84).

Musick, John and Byles, Richard, Fisheries Science, "Migratory Behavior of Sea Turtles from the Chesapeake Bay," Virginia Game and Inland Fisheries, \$31,000 (7/01/83-6/30/84).

Neilson, Bruce and Anderson, Gary, Physical Oceanography and Environmental Engineering, "Evaluation of Eastern Shore Tidal Creek Impoundments," State Water Control Board, \$38,572 (9/01/83-10/30/84).

PRIVATE FUNDS

Austin, Herb, Fisheries Science, "Juvenile Fish Travel Survey," Chesapeake Research Consortium, \$17,560 (4/01/84-12/31/84).

Castagna, Mike, Wachapreague, "Israeli Oceanographic and Limnological Research," Binational Agricultural R&D Fund, \$3,000 (12/06/83-12/31/86).

Cornell, Elizabeth, Advisory Services, "Waterman: Exposing Myth and Reality," Virginia Foundation for Humanities, \$4,147 (7/01/83-2/29/84).

Hardaway, Scott, Geological Oceanography, "Soil and Water Conservation Advisor," Department of Conservation and Economic Development, \$37,788 (7/01/83-6/30/84).

Huggett, Robert, Chemical Oceanography, and **Neilson, Bruce**, Physical Oceanography and Environmental Engineering, "Cooperate State Agency Research Program," State Water Control Board, \$150,000 (7/01/83-6/30/84).

Byrne, Robert, Physical and Engineering Science and **Grant, George**, Fisheries and Biological Oceanography, "Chesapeake Bay Research Initiative," Council on the Environment, \$1,000,000 (7/01/85-6/30/86).

Publick Advices

Former College President Thomas A. Graves and his wife, Zoe, were featured recently in a long article in the *Sunday News Journal* of Wilmington, Del. They were quoted on their special feelings about the Henry Francis duPont Winterthur Museum and Gardens, where Dr. Graves is now the director. He said that "Winterthur is a national treasure" and "the quality of the staff is absolutely first rate." Zoe noted that their new home, Chandler Farm, has been redecorated in some of her favorite colors, and that "you could never buy a picture as beautiful as the surrounding landscapes."

The Graveses expect to do a lot of entertaining there, and their schedule already includes a number of receptions to be held at the 14-room brick house.

Barbara S. Ball, who has been on sabbatical for the past ten months, will resume her job June 3 as editor of the *William and Mary News* and manager of communications at the College. She has spent the past two semesters at the United States Military Academy where her husband, Donald L. Ball, professor of English, was a visiting professor.

The College of William and Mary has recently received an allocation of \$7,000 from the Virginia Council of Higher Education to participate in a comprehensive statewide graduate recruitment program during 1985.

The program is one of the Commonwealth's commitments under the 1983 amendments to the *Virginia Plan*. It is designed to promote graduate education among Virginia residents, with emphasis on black Virginians. The objectives of this effort include publishing and distributing a statewide guide to graduate programs, sponsoring local informational programs for undergraduates and others interested in pursuing graduate work at Virginia's public senior colleges and universities, and promoting close relations between graduate programs and departments offering related undergraduate majors.

Summer morning Tour Guides are still needed by the Admissions Office. The position may entail escorting prospective student groups around campus once or twice a week. The duration of the tour is approximately two hours beginning at 10 a.m., Monday through Friday. If you are available to do these morning tours, please contact Mrs. Lenore Perry at ext. 4223 in the Admissions Office. Only morning tour guides are needed according to Frank Robert, assistant to the Dean of Admissions.

The Virginia Shakespeare Festival needs volunteer actors, musicians and technicians to help stage "The Taming of the Shrew," "Richard II," "Cymbeline" and Moliere's "The Miser," during the 1985 season, July 5 through Aug. 17.

Speaking and non-speaking roles for men of all ages are available, as well as walk-on and non-speaking roles for women. Musicians who play Elizabethan instruments are needed for the productions, and technicians, especially in the area of set construction and costume construction, are being sought.

Auditions for actors and musicians and interviews for technicians will be held from 4 to 8 p.m., Thursday and Friday, May 30 and 31, in Phi Beta Kappa Memorial Hall. No appointments are necessary.

For more information, or to arrange for other interview times, call Leslie Muchmore at the Virginia Shakespeare Festival, 253-4377.

ADMISSIONS OFFICE VACANCY

This position encompasses a broad range of recruitment and selection activities to include: interviews with prospective students and their families; travel throughout the Commonwealth of Virginia for the purpose of visiting high schools and representing William and Mary at college day/night events; and evaluation and selection of new students. Familiarity with computer applications and the management of clerical personnel desirable. The successful candidate will possess exceptional communication and interpersonal skills. A master's degree in a related area is preferred. Past admissions experience helpful but not necessary. Salary and title commensurate with experience and qualifications. Please submit resume by May 21, 1985 to G. Gary Ripple, Dean of Admissions, The College of William and Mary, Williamsburg, Va. 23185. An Equal Opportunity Affirmative Action Employer.

Official Memoranda

STANDARDS OF CONDUCT

Pursuant to the authority provided in Chapter 10 of the Code of Virginia regarding policy directives, effective May 1, 1985, the maximum period of suspension for a Group III offense or suspension in lieu of termination will be increased from 10 work days to 30 work days. All other suspension periods outlined in the "Standards of Conduct" remain the same.

I.H. Robitshek,

News deadline: Fridays, 5 p.m.

FOR RENT

Gloucester Point house (6 yrs. old), 4 BR, 3 bath, LR, DR, FR with fireplace, outside kennel, 2-car garage, workshop, master gardener's yard with mini-orchard and gardens, ½ mi. from York River and VIMS, avail. 1 Aug., \$625/mo., Bob Goodhart, 253-4475 (office), 642-5121 (home). 5/15

Peppertree - 2 bedroom condo, 1 bath, all appliances, including microwave, washer and dryer. Lease required. Available June 1st. \$500/month. Call Stan or Ginny at 565-2855.

5 bedroom house on 2 wooded acres in quiet neighborhood just 6 min. from College. 6-8 weeks, mid-June to mid-August. Call 220-1065 or 253-1506.

Share air-conditioned 2 BR condo at Jamestown Commons, 1 mi. from campus, non-smoker, \$250 plus ½ of utilities. Faculty preferred. Call ext. 4145 or 565-1499. 5/16

Chesapeake Bay cottage, sleeps 7; 100 yards to private beach in Mathews County, near boat ramp. Available June 1 at \$250/week. Deposit and application required. Call 229-4461 for info.

3/4 BR, furnished house; available Aug. 1 for academic year; family preferred; close to campus; 229-8901.

Summer sublet, June 11 til Sept. 10, furnished 2 BR townhouse, one bath, 2 miles from College, AC, all appliances, \$450 mo. and utilities. Call 229-8708. References required.

Townhouse in new section of Seasons Trace. Excellent condition. 3 BR, 2½ BA. Brick fireplace. 2 ceiling fans, 2 cable hookups. All appliances, single garage. No pets, no smokers. Prefer faculty couple or married grad students. \$650/mo + utilities. Call 565-2711 after 6 p.m.

Employment

LABORATORY SPECIALIST A (Grade 7) — Salary range \$13,826 to \$18,886 per year. Location: VIMS (Estaurine and Coastal Ecology). Deadline May 17.

LABORATORY TECHNICIAN B (Grade 5) — Salary range \$11,572 to \$15,808 per year. Location: VIMS (Physical Oceanography and Environmental Engineering). Deadline May 17.

LABORATORY AIDE B — Unclassified, \$4.26 per hour, part-time, up to 35 hours per week. Temporary appointment up to September, 1985. Location: VIMS (Physical Oceanography and Environmental Engineering).

POWER PLANT SHIFT SUPERVISOR B (Grade 7) — Salary range \$13,826 to \$18,886 per year. Location: Buildings and Grounds. Deadline May 17.

CARPENTER (Grade 6) — Salary range \$12,644 to \$17,273 per year. Location: Buildings and Grounds. Deadline May 17.

CLERK TYPIST C — Unclassified, part-time, \$5.09 per hour, approximately 35 hours per week. Location: Office of Director of Academic Support Services. Deadline May 17.

MARINE SCIENTIST A (Grade 9) — Salary range \$16,521 to \$22,579 per year. Location: VIMS (Advisory-Services). Deadline June 7.

PRESIDENT'S HOUSEKEEPER — Salary range \$9,677 to \$13,222. Deadline May 17.

From left are Richard S. Cumbee, director of Campus Police; Kathryn A. Poynter, crime prevention officer; and acting president George R. Healy.

Kathy Poynter is honored for her outstanding work

Kathryn A. Poynter, crime prevention officer for the William and Mary police department, was commended on May 8 for outstanding work. Acting President George R. Healy presented Mrs. Poynter with a \$50 savings bond and a certificate.

Mrs. Poynter is a 1983 graduate of the

National Crime Prevention Institute in Kentucky and has taken courses at the University of Richmond dealing with sexual assault. She also has attended the Peninsula Criminal Justice Academy for training in basic investigating.

At William and Mary, Mrs. Poynter has implemented innovative measures designed to encourage students to lock their bicycles. She also presented programs in dormitories on dealing with sexual assault, and prepared informational brochures on curbing robberies and theft on campus.

Her biggest aim as a crime prevention specialist, she says, "is to make people more aware of the problem. People in general are very trusting. They never imagine anyone will steal their bicycle, but it happens."

Also in attendance at the award presentation were Dick Cumbee, director of campus police; Irving H. Robitshek, retiring director of employee relations; Lawrence W. Broomall, Jr., vice president for business affairs; and Billie Brandon, director of administrative services.

Alumni College is scheduled for June 2-6 here

The years spent after leaving college do not necessarily diminish the love of learning or studying; quite a few William and Mary alumni can attest to that fact. From the classes that finished half a century ago to those that spent part of the 1970s on campus, 40 former students will be coming back June 2-6 for "Return to the Wren," an alumni college sponsored by the Society of the Alumni.

This is the first such program held since 1976, when the Bicentennial of our nation was the focus. This year's college, with a theme of "A Celebration of the Liberal Arts," was determined as the result of a questionnaire that appeared in the College's *Alumni Gazette* a year ago.

As in the past, alumni registrants will stay in a campus dormitory, will dine at Trinkle Hall, attend classes in the Wren Building and visit various places on campus and in Colonial Williamsburg.

Selected faculty members will meet with participants in a format combining lectures with group discussions. Among those teaching will be Thomas L. Heacox, associate professor of English; Ludwell H. Johnson III, professor of history; Burton Kester, lecturer in music; James C. Livingston, professor of religion; Timothy P. Olbrych, lecturer in music; Howard M. Scammon, professor of theatre and speech, emeritus; Vinson H. Sutlive, Jr., professor of anthropology; John R. Thelin, associate professor of education; and Hans C. von Baeyer, professor of physics.

Alumni have reading assignments before they show up in Williamsburg for the program. They have been furnished a list of six books to study, including Edward T. Hall's *Beyond Culture*; John Hick's *God Has Many Names*; and *The Uses of the University* by Clark Kerr.

In addition to the class sessions, plans include visits to the President's House, a tour of the Muscarelle Museum of Art's new exhibit of post-Impressionist artists, and a special tour of Carters Grove.

For more information on fees, contact Tish Paschall, Society of the Alumni, Box GO, Williamsburg, VA 23187, or telephone (804) 229-1693.
