Dean Jamison Announces Business School Changes

A reorganization of the School of Business Administration has been announced by Dean John C. Jamison.

Effective July 1, the reorganization is intended to more effectively administer the changing character and the expanded programs of the School, Jamison said.

This fall, the School will initiate at Christopher Newport College a part-time MBA program, while in January it will initiate an Executive MBA program on the campus of William and Mary. These programs were initially supported by area legislators and the State Council of Higher Education, and were funded by the last General Assembly.

In addition, Jamison disclosed that the faculties of the Marshall-Wythe School of Law and the School of Business Administration have agreed to offer a joint juris doctor MBA degree program at William and Mary beginning in the fall of 1986. Also during the past year, the School established its Center for Executive Development to better serve the continuing educational needs of professionals in industry and government in Virginia and in the mid-Atlantic region.

Under the reorganizations, Associate Dean Franklin Robeson will direct academic affairs, and Associate Dean Henry Mallue, Jr. will direct administration and external affairs in a modification of their present roles of directing graduate and undergraduate studies. Dean Jamison also announced that Roy Pearson, professor of

business administration, will become the director of the Bureau of Business Research. Pearson has been acting director of the bureau since the death in 1984 of Leland E. Traywick, who had been the director since 1967.

"Our students, faculty, alumni and associates of the School of Business should benefit from the greater focus and thrust intended by this reorganization," says Jamison. "It better supports our aim to educate students in our programs as well as any business student in any similar program in the country. It also enables us to better serve our communities."

COLLEGE ENDOWMENT RANKED

In a recent issue of *The Chronicle of Higher Education*, William and Mary's endowment was listed alongside the top 206 college endowments in the country. In this "Fact File" of endowment values, the College was 21st among public institutions and 117th among all institutions ranked. The reported combined market value of the College's endowment as managed by the Board of Visitors and the Endowment Association totaled \$30,826,000 as of June 30, 1984. The data for the listing came from the reports of institutions participating in a comparative performance study conducted by the National Association of College and University Business Officers.

'84 Graduate Wins Award For Thesis on Education

Lloyd Mark Tyree of Richmond, a 1984 graduate of the doctoral program in education at the College, has been awarded the Donald A. Gatzke achievement award for excellence in doctoral dissertations in higher education administration.

Tyree took as the topic of his dissertation, "An Assessment of the Impact of Changes in the Student-Faculty Ratio Used in the Budget Formula for Virginia's Colleges." His dissertation director was Mary Ann Sagaria, who is currently on the faculty of Ohio State University.

Tyree received his undergraduate degree and MBA from Virginia Commonwealth University. He is an associate professor in the business division of J. Sargeant Reynolds Community College in Richmond.

Tyree's dissertation will be published by the American Association of University Administrators Foundation and distributed nationwide to its membership as an indication of dissertation excellence during the past year.

John Thelin, associate professor of education, who teaches courses in higher education, said that Tyree's honor was particularly significant in view of the national scope of the competition and the size of the School of Education. "It is quite unusual for someone from one of the smaller schools to do so well," said Thelin.

Tyree is active in the Association for the Study of Higher Education and the American Educational Research Association.

Ash Lawn Summer

The Opera Festival, a resident company of professional singers and directors from Boxton, N.Y., and Virginia, will perform Mozart's "Cosi Fan Tutte," and "The Impresario," Salieri's "Prima La Musica Poi Le Parole," and Cimarosa's "The Secret Marriage," in a repertory scheduled

Continued on P. 4

Many Offices On the Move

A number of moves are being completed on campus this summer. The schedule seems to be working well, says Larry Broomall, vice president for business affairs, but he adds a plea for patience during the transition period.

President Verkuil and his staff have moved to the second and third floors of the Brafferton. Admissions will expand into the vacated offices.

Provost George Healy and his staff have moved from the second to the first floor of the Brafferton.

Linda Collins Reilly, Associate Provost, will move from the first to the third floor

of the Brafferton. Members of her staff, Nell Jones and Jim Vaseleck, have moved to the Brafferton Kitchen, the small building beside the Brafferton.

Elsewhere, the Employee Relations Department on the second floor of James Blair and the EEO/AA office in Rogers Hall, have moved to Thiemes on Richmond Road, across the street from the Bryan residence halls.

Financial aid has moved down the hall in James Blair to the offices vacated by the Employee Relations department.

The budget office is moving from the Brafferton to the second floor of James Blair in offices vacated by financial aid.

Pat LaLand, administrator of the President's House project, will move from the University Advancement office on the first floor of James Blair to James Blair 210.

Peter Broccoletti, (l), meets with John M. Levy, professor of law, and Timothy J. Sullivan, (r) new dean of the Marshall-Wythe School of Law.

Clinical Law Program Introduces 'Elderlaw'

The Legal Services Corporation has announced its intention to provide \$80,000 for the Marshall-Wythe School of Law to expand its clinical law program to include a course called "Elderlaw," in which students will furnish legal services to poor, elderly persons.

The Legal Services Corporation is a public non-profit organization established by Congress in 1974 to provide financial support for legal assistance in non-criminal matters to the poor.

The LSC grant, which will be paid to the law school over the next two years, will be used to hire an additional clinical law professor to supervise the new course planned to begin either this fall, or in the spring of 1986, according to John M. Levy, professor of law and director of clinical education at Marshall-Wythe.

The clinical lawyer/professor and eight students per semester will represent elderly clients referred to them by the Peninsula Legal Aid Center Inc., and those with whom they come in contact through various outreach activities.

"There is a growing need for people to help the elderly in the myriad of financial and bureaucratic chores which age either brings about or exacerbates," says Levy. Elderly persons may need legal advice on Medicare, Medicaid, insurance, wills, guardianships, tax relief or even in dealing with so-called consumer services that are not what they claim to be.

In the past, says Levy, "one of the traditional barriers to the delivery of legal services to older people has been their isola-

tion and relative inability to travel to the various services available to them. The use of law students in this program will help overcome this barrier."

Law students in the Elderlaw program will have few cases and clients, he adds. "They will be able to work closely with their clients, going to their houses or to the institutions where they are living. Each student will also be assigned to work with a group, institution, agency or church to educate and provide legal services to their members."

Levy, who will supervise the clinical teacher hired with funds from the grant, says the new program will complement the variety of clinical courses already available to Marshall-Wythe Students. These include working with local legal aid agencies, clerking for various law firms or judges, internships in the Attorney General's office in Richmond or the U.S. Attorney's office in Norfolk, and a post-conviction assistance project with the Petersburg Federal Youth Correctional Institute.

Marshall-Wythe is one of 19 law schools throughout the nation benefitting from the LSC program. Peter Broccoletti, a Marshall-Wythe alumnus and acting director of the Legal Services Corporation, presented the first phase of the funding to Timothy J. Sullivan, dean of the law school.

In making the presentation, Broccoletti said he was grateful that Marshall-Wythe had helped him establish the Tidewater

POST OFFICE HOLIDAY HOURS

The Campus Post Office will be open until noon on Thursday, July 4.

Newsmakers

Over \$300,000 has been awarded in recent grants to College faculty members for projects that cover a wide variety of topics.

Christopher Welch, physics, has received \$103,109 from the National Aeronautics and Space Administration for a project entitled "Quantitative Non-Destructive Evaluation (NDE) Imaging."

The work involves the development of methods using thermal probes and material properties to perform non-destructive evaluation of materials using non-contacting radiometric measurements and quantitative analysis of image data.

Total award to date for this project is \$351,197.

John Austin, physics, has been awarded \$3,200 by NASA for stratosphere sounding unit (SSU) data and Nimbus 7 LIMS measurements to perform photochemical investigations of the stratosphere. Austin will use the grant to complete work on nitric acid in the polar night and write up the results. This brings to \$36,400 the funding for this project.

Roy Champion, physics, has been awarded \$2,192 from NASA to program the McIntosh Computer in PASCAL or a PASCAL-life language for experimental control. This will result in a software program which permits a microcomputer to control data acquisition for ultrasonic measurements.

Vernon Collins, research scientist, chemistry, has been awarded \$4,600 by NASA as a supplement to a Task Assignment to support the development of a new experimental system to furnish calibrated vapor base mixtures of low-concentration caustics in air. A total of \$153,747 has been awarded to date for this project.

Mark Conradi, physics, has received \$17,250 from the Jeffress Memorial Trust for "Condition - Jump NMR in Solids," a project involving condition-jump experiments to reveal information which is fundamentally different from that available with conventional NMR relaxation techniques.

Robert A. Orwoll, chemistry, has received \$8,026 from NASA to study radiation effects on high performance polymers. Novel polyarylene ethers, synthesized in the materials division at NASA-Langley as models for matrix components that could be used in space, will be subjected to high doses of electron irradiation that are comparable to those received by an object in geosynchronous orbit for periods up to 30 years. The resulting changes in molecular weight, the formation of crosslinkages, and the effects of crystallinity will be studied.

Robert J. Scholnick, English Director of American Studies, has received a grant of \$4,000 for a series of four lectures on science and American literature by distinguished scholars. The "Science and the American Imagination," series is planned for 1986 and will be held on campus.

John B. Delos, physics, has received \$51,800 in additional funding from NASA for continued research on two distinct topics. The first topic of study is the orderly and chaotic motion in classical and quantum mechanics, and the second is the theory of electron detachment in negative-ion collisions. This grant will provide support for three graduate physics students and brings to \$102,800 the total amount awarded for this work.

Morton Eckhause, John R. Kane, Robert Siegel and Robert Welsh, physics, have received an additional \$21,694 from NASA for experiments on the interactions of muons, kaons, antiprotons and sigma hyperons. This award brings the total awarded to date for this project to over \$1.1 million and represents additional support for the high energy physics group at the College, which has been engaged in experiments at Brookhaven National Laboratory, the Swiss Institute for Nuclear Research, LAMPF, and the LEAR facility at CERN.

Associate Librarian **John D. Haskell, Jr.**, has received \$25,000 from the State Council of Higher Education of Virginia for the continuation of a conversion project for Swem Library. In particular, this funding will aid in converting 11,000 serial titles into machine-readable form. Total funding to date is \$72,134.

Three grants have been awarded for projects at Ash Lawn under the direction of curator **Carolyn Holmes**.

The Virginia Foundation for the Humanities and Public Policy has awarded \$5,500 for a series of five lectures and a one-day symposium which will trace Monroe's early life and education, his life aboard in diplomatic service, his career both as public servant and as a farmer, and his presidency.

The Virginia Commission for the Arts has awarded \$3,000 to Ash Lawn for the summer festival currently underway there.

A grant of \$1,000 from the Institute of Museum Services to Ash Lawn will fund an on-site evaluation of Ash Lawn's museum conservation and registration methods.

The Virginia Commission for the Arts has awarded \$1,500 for a symposium on modernism in American architecture, to be directed by **James Kornwolf**, fine arts. The symposium on the traditional, modernist and post-modernist directions in American architecture in the last fifty years will include two panel discussions in which six or seven nationally known architects and critics will participate. The project is directly related to the opening of the College's exhibition, "Modernism in America 1937-1941—Four Architectural Competitions."

David Kranbuehl, chemistry, will continue work on the characterization of high performance materials under a grant from the General Electric Company. A recent award of \$20,000 brings to \$58,699 the total funding for this project. Under current funding Kranbuehl will research the dynamic dielectric characterization of the cure properties of PMR-15 composite cloth, and the characterization of the cure properties of PMR-15 resin using a Perkin Elmer DSC-7 system.

Mark Gulesian, school of education, has been awarded \$25,000 by the Virginia Foundation for the Humanities and Public Policy for the Eastern Virginia Writing Project for teachers, designed to ultimately increase the competency of student writers.

Robert J. Orth, associate professor of marine science, "Submerged Aquatic Vegetation in the Chesapeake Bay: Value, Trends and Management."

N. Bartlett Theberge, professor of marine science, "Economic Development and Wetlands and Preservation — an Assessment of Wetlands Management Under Virginia's Wetlands Act."

Stanley E. Brown, director of placement, left June 21 for four weeks at the University of Southampton, England, on an exchange with Barbara Kilburn, Careers Advisor for Southampton. **Robert P. Hunt**, associate director of placement, will assist Kilburn while she is here and arrange for her to sit in on student-alumni conferences. The Career Library and its resources will be one area which will be of special interest to her.

Wayne Kernodle, professor of sociology, has been elected as a member of the board of directors of Williamsburg Landing, a retirement community which is nearing completion on a setting bounded by historic College Creek in Williamsburg.

Brown University's graduate school honored three of its alumni for their distinguished contributions to society through scholarship or related professional activity, as part of the general commencement program, May 27.

Cited were **Thaddeus W. Tate Jr.**, Edward Fulton Denison and **Chain T. Liu**.

Tate, professor of history and Director of the Institute of Early American History and Culture, was honored for his work as a scholar and director of the Institute, one of the most important scholarly centers in the world for the study of early American history and culture.

Denison a senior fellow emeritus at the Brookings Institution in Washington, D.C., is one of the world's outstanding scholars in the field of national income and growth. **Liu** is a group leader at Oak Ridge National Laboratory and is internationally recognized for his technical and scientific achievements in the field of structural materials.

Carl A. Roseberg, professor emeritus of fine arts, was chosen one of three jurors for the international James Wilbur Johnston Sculpture competition June 3-7, at the Corcoran School of Art in Washington, D.C., sponsored by the Art for Humanity Foundation.

Roseberg joined two other outstanding sculptors as jurors, **Bruno Lucchesi** of New York, and **Edward Fraughton** of South Jordan, Utah. Judges were selected by the Art for Humanity Foundation.

The threesome judged competitors as they actually worked in completing a clay sculpture, 30 to 36 inches tall, from the live model stage to the final version.

Participants in the competition were students and non-professional sculptors.

Joseph Galano, associate professor of psychology, and **Fred Adair**, professor in the School of Education, recently represented the College at the Virginia Symposium on Research Related to the Prevention of Mental Illness, Mental Retardation, and Substance Abuse. All of the major state universities and numerous human service agencies participated.

George C. Grant, professor of marine science, and **Michael F. Canino** recently had a paper published in the Journal of Plankton Research entitled: "The Feeding and Diet of *Sagitta Tenuis* (Chaetognatha) in the Lower Chesapeake Bay."

Alan J. Ward, professor of government, has been appointed Research Fellow in the Institute of Irish Studies, Queen's University, Belfast, for the 1985-6 academic year. During the term of the fellowship he will work on a book about the evolution of constitutions and governments in the British Commonwealth and Ireland. His research will also take him to London and Dublin during the year.

Kelly G. Shaver, professor of psychology, recently published a book entitled, *The Attribution of Blame: Casualty, Responsibility, and Blameworthiness*.

The book appeared in the Springer-Verlag Series in Social Psychology, a collection of monographs and edited volumes designed to advance knowledge in the discipline. Shaver's volume integrates philosophical conceptions of causality and responsibility into social-psychological research and theory. The book concludes with a comprehensive theory describing the process by which blame should be assigned.

Shaver began working on this project, and collected some of the data reported in the book, with the support of one of the Anheuser-Busch Faculty Research Fellowships.

John A. Musick, professor of marine science, has been elected a member of the Council of the American Association for the Advancement of Science. Musick was recently addressed a gathering of scientists, researchers, ichthyologists and curators on sharks at the National Aquarium in Baltimore.

Robert J. Huggert, professor of marine science, was invited to present a seminar to the Virginia Beach Medical Society. The presentation was entitled "Pollution of the Elizabeth River - Causes, Biological Effects and Prognosis."

The following marine scientists presented papers at a conference entitled "Wetlands of the Chesapeake" in Easton, Maryland in April:

Gene Silberhorn, associate professor of marine science, "Chesapeake Bay Freshwater Wetlands: Status and Research Needs." Silberhorn also was a member of the steering committee for the conference.

Thomas A. Barnard, Jr., instructor in marine science and **Walter I. Priest III**: "Virginia's Wetland Mitigation/Compensation Policy: Its Evolution and Current Status."

Clinical Law

Continued from P. 1

Legal Aid service in 1967, and added that the quality of the law school and the need for legal aid services to the poor and elderly in the area made Marshall-Wythe an excellent candidate for LSC funds.

The Marshall-Wythe Elderlaw program's service area will include Newport News, Williamsburg, and the counties of Gloucester, James City, Mathews, Middlesex and York.

Virginia Shakespeare Festival

Ticket prices range from \$17.50 to \$26 for the season and from \$6 to \$10.50 for single admission tickets.

There are also children's rates and special prices for groups.

July 5 - August 17

Detailed information concerning tickets may be obtained from the box office in Phi Beta Kappa Memorial Hall, ext. 4469.

Higgs Memorial Award Goes to Andrew W. Jewell

Andrew W. Jewell of Silver Spring, Md., a rising senior and computer science major, has been selected as the first recipient of the Roger A. Higgs Memorial Scholarship.

Jewell was selected for the award because of his outstanding academic performance, not only in computer science courses but also throughout his college career. His professors praise him as an excellent programmer with an interest in computer science far beyond that of most of his peers.

During his senior year at William and Mary, Jewell will be participating in the departmental honors program and will pursue independent study and research in the area of program correctness. This work will involve developing automated programming aids to provide consistency between formal program specifications and actual program codes.

Formal presentation of the award will be made to Jewell at the fall meeting of the Virginia Association for Educational Data Systems (VAEDS), which sponsors the award.

Roger A. Higgs, for whom the scholarship is named, was manager of administrative data systems at William and Mary's computer center. A charter member of VAEDS, Higgs at various times held virtually every office in that organization, including president. He was also active in the Hampton Roads chapter of the Data Processing Management Association, where he served as president, and more recently, as international director. His work in the DPMA earned him the prestigious Individual Outstanding Performance Award.

Higgs came to the College in 1966 as one of the first employees of the computer center, following a career as a flyer in the U.S. Naval Reserve. At the time of his retirement in 1984, he was manager of administrative data systems at the computer center. With a staff of 22, he was in charge

of providing computer support for the financial offices and the student records office at the College. He is warmly remembered by his staff as a caring person who was concerned with their personal well-being.

PACES Gets Grant

The Peninsula Area Cooperative Educational Services, PACES, which provides free family therapy and a practicum for students through facilities at the School of Education, recently received a state grant for \$13,000.

The PACES conference area is a home-like setting in which students can do their professional practicums by counseling families after spending a semester observing the procedure. To encourage family cooperation in counseling, the conference area has been equipped with toys, games and books for small children who may be brought along.

"Fixing the problem doesn't really work unless you can talk with everyone who lives in the household," says Pamela G. Boll, a graduate student in education who is coordinator for the counseling project.

Fred L. Adair, professor of education and faculty liaison for PACES, concurs with Mrs. Boll's assessment of the need for total family participation. "Family therapy centers on the premise that anything that is wrong affects the whole family system."

The family counseling program at William and Mary, initiated in January 1984, is one of five areas of educational assistance provided by PACES, which has offices in Hampton. PACES also operates a day-school program for children with severe emotional problems; a regional program for autistic and communication-handicapped students; workshops for teachers; and a center for vocational evaluation of handicapped students.

Six school systems contribute funds and recommend clients to PACES. They include York, Poquoson, Gloucester, Hampton, Newport News and Williamsburg-James City counties.

Newsmakers

Dr. Robert J. Huggett, associate professor of marine science, Virginia Institute of Marine Science, will be a consultant on an exciting month-long project this summer when — for the first time — Lake Superior will be explored by scientists in submersibles of the type used for ocean floor studies. The venture begins July 22 when a multidisciplinary team of scientists embarks from Sault St. Marie, Mich., for a month-long series of dives. At one point they will be the first humans to see the deepest point in the Great Lakes, a total of 1,333 feet below the surface. Weather permitting, they will make two dives a day, each lasting two to four hours. Studies will range from chemistry and geology to biology and shipwrecks. Dr. Huggett, who will not board the ship, will consult on patterns of polycyclic aromatic hydrocarbons and chlorinated dioxins in Lake Superior sediments. The project is organized by Michigan State University, and under the responsibility of the University of Connecticut. A \$500,000 grant toward the project is provided by the National Oceanographic and Atmospheric Administration.

Law Week Award

Wayne M. Zell, '85, of the Marshall-Wythe School of Law, is the recipient of the United States Law Week Award.

Zell was selected for the award as the graduating student who, in the judgment

of a faculty nominating committee, showed the most satisfactory scholastic progress in his final year.

Zell, a native of Alexandria, currently resides in Columbia, Md., where he practices law.

SALE OF GUY PROPERTY

The Endowment Association has authorized the sale of two parcels of real property close to the College. These parcels are known as the Guy Property formerly owned by Gladys B. Guy and the late Professor William G. Guy of the College of William and Mary. This property consists of a house, garage, and lot located at 600 Pollard Park and a contiguous lot at 517 Newport Avenue.

Parcel I

600 Pollard Park: This is a 1½ story frame house of approximately 2130 square feet plus a partial basement, and a 1½ story frame 2 car garage of approximately 790 square feet. House consists of a living room with fireplace, dining room, sun porch (enclosed), kitchen, utility porch, ½ bath, and den on the first floor and 3 bedrooms and 2 baths on the second floor. The garage is a 2 car with a separate storage area and a playroom with fireplace on the second floor. Sale price \$165,000.

Parcel II

517 Newport Ave.: .218 acres facing Newport Avenue; 50 feet on Newport Avenue. Sale price \$45,000.

Sale price of both parcels \$200,000 (if purchased together)

This property will be available on or about September 1, 1985. It will be first offered for sale exclusively to the College community until July 1, 1985 after which it will be placed on the open market. For more information, please contact Larry Broomall, Vice President of Business Affairs at 4211.

Robert Dutro
Legal Counsel
The Endowment Assn.

Associates Plan Galleries Trip

A bus trip to the National Gallery of Art in Washington, D.C., is planned Wednesday, July 10, sponsored by the Muscarelle Museum Associates. The group will take a guided tour of two special exhibitions at the Gallery, the Leonardo to Van Gogh Master Drawings, and the Sculpture of India: 3,000 B.C. to 1,300 A.D.

The trip, limited to 39 members of the Associates, will begin at 7:30 a.m. A chartered bus will depart from the College, arriving at the National Gallery at 10:45 a.m. for the 11 a.m. tour given by Gallery guides. There will be free time for lunch and for visiting other galleries until 3:30 p.m., when the bus departs for Williamsburg, arriving back at 6:30 p.m.

Cost of the day at the galleries is \$15 per person. Reservations must be made at

the Muscarelle Museum of Art by Saturday, July 6.

The Muscarelle Museum of Art Associates was formed this year to offer support to the Museum, which has been funded almost entirely through private means since its inception in 1980. Membership is open to any interested person, and includes benefits such as invitations to exhibition preview-receptions, admission to seminars and lectures on art, a subscription to the semi-annual newsletter, discounts on publications sold at the Museum, and trips to important exhibitions at major museums. Members are also contemplating an art trip abroad at some future date.

Categories of annual membership range from \$5,000 for patrons to \$25 for families, \$15 for senior citizens, and \$10 for students.

For more information, call ext. 4003.

Recruiting Gives ROTC Grads Early Introduction to Duty

Maureen Hinnebusch and Kerke Johnson, two 1985 ROTC graduates, are getting a head start on their military careers this summer.

The two new second lieutenants are working on campus as a recruiting team to help increase enrollment in William and Mary's ROTC program, which currently has 150 students.

Hinnebusch, who majored in anthropology, is the daughter of Col. and Mrs. Michael L. Hinnebusch, who are currently stationed at Langley Air Force Base in Hampton.

Johnson, son of Dr. and Mrs. David A. Johnson of Lynchburg, was an English major at William and Mary.

This fall, Hinnebusch will be sent to Huachuaca, Ariz., for training. She is in the military intelligence branch of the Army. Johnson, who is in the cavalry, expects to spend the next three years at Fort Knox, Ky.

On active duty as recruiters, Hinnebusch and Johnson are getting valuable seniority over the rest of this year's ROTC graduates, who will not go on active duty until they report to their stations this fall. Hinnebusch and Johnson are well suited for their summer jobs. Both are enthusiastic about ROTC and the opportunities and benefits of a military career.

Hinnebusch had a four-year ROTC scholarship for which she applied while still in high school. "I had three brothers and sisters going to college," she explains, "so my dad thought it would be a good idea if I applied for ROTC."

Johnson says he decided on ROTC the summer before he came to college. He did not apply for a scholarship, but after considering the prospect of a steady job and being able to by-pass job searches and interviews, he decided to serve in the military.

As a team, Hinnebusch and Johnson have contacted over 200 members of the incoming freshman class, and so far the response has been encouraging. "Half the people we talked to have requested more information," says Johnson.

The recruiters are reminding students of their eligibility for three-year ROTC scholarships, which begin during the sophomore year and provide tuition, funds for books and lab fees, and \$100 a month, tax-free, during the school year.

Both Hinnebusch and Johnson agree that their ROTC experience was a good one. "I met some of my best friends through ROTC," says Hinnebusch. "They are a special breed of people, conscientious and hard-working."

"Being chosen one of the top 15 ROTC units in the country by the Army Chief of Staff was a feather in our cap this year," adds Johnson.

Incoming students who have expressed interest in ROTC will have an opportunity to talk individually with cadets on campus this fall.

Hinnebusch and Johnson are working under the supervision of Maj. Amy C. Nutt, assistant professor of military science.

Employment

DEADLINE FOR APPLYING FOR THE FOLLOWING POSITIONS IS JULY 5

GROUNDS FOREMAN--Salary range \$13,403 to \$18,309 per year (as of July 1). Starting salary dependent upon experience of exceptional qualifications and previous salary level of appointee. No., 46.

Incumbent serves as working zone foreman and is responsible for supervising crews and planning all phases of grounds maintenance and landscaping.

Buildings and Grounds.

Qualifications--Demonstrated supervisory ability as well as extensive ability in general maintenance activities required.

LABORATORY SPECIALIST A--unclassified, \$7.05 per hour (as of July 1), temporary appointment for approximately 90 days. Incumbent prepares environmental samples for gas chromatographic analyst, including liquid extraction of water, soxhlet extraction of sediment, gel chromatography and derivatization with Grignard reagent and the accompanying gas line laboratory cleanup. Analyzes samples by gas chromatography and collects and records data using an automated lab data system. Field work will be required to collect sediment and water samples using a small boat.

Qualifications--Bachelor's degree in chemistry or biochemistry, extensive experience in environmental trace analysis, working knowledge of gas chromatology solvent extraction techniques required. Experience with air sensitive and toxic compound handling techniques desired.

VIMS (Chemical Oceanography).

CUSTODIAL WORKER--unclassified, \$4.13 per hour (as of July 1), part-time, approximately 35 hours per week. Incumbent performs housekeeping duties necessary to maintain buildings. Will set up buildings in preparation for activities. Will work some nights and most weekends.

Qualifications--Demonstrated housekeeping ability required. Knowledge of cleaning methods and use of cleaning supplies and equipment required.

Buildings and Grounds.

CUSTODIAL WORKER--unclassified, \$4.13 per hour (as of July 1), part-time, approximately 35 hours per week. Incumbent performs housekeeping duties necessary to maintain buildings.

Qualifications--Demonstrated housekeeping ability required. Knowledge of cleaning methods and use of cleaning supplies and equipment required.

Buildings and Grounds.

LABORATORY TECHNICIAN B--unclassified, \$5.90 per hour (as of July 1). **THIS IS A RESTRICTED APPOINTMENT.** Incumbent assists with preparations for and excursion of monitoring surveys of Chesapeake Bay and slackwater surveys of three major tributary estuaries. Assembles necessary gear for field work and uses various types of equipment, including CTD's, DO sensors, LORAN C,

and small vessels. May also process water quality samples, calibrate instruments and assist with special laboratory studies.

Qualifications--Ability to follow instructions and to use oceanographic instruments in small vessels and ability to drive a standard-shift truck and trailer are required. Must be able to work odd hours (depending on weather conditions and project requirements) and must be able to participate in field work which may require overnight trips.

VIMS (Physical Oceanography and Environmental Engineering)

CLERK TYPIST C--Salary range \$11,222 to \$15,321 per year (as of July 1), Starting salary dependent upon experience or exceptional qualifications and previous salary level of appointee. No. 324.

Incumbent provides clerical support to faculty, including typing various documents in French, German, Spanish and Italian.

Qualifications--Strong typing and clerical skills and excellent interpersonal skills required. Knowledge of foreign languages desirable. Typing test (in English, French, German and Spanish) required by the deadline date.

Modern Languages.

SECRETARY/OFFICE MANAGER--\$7.06 per hour, part-time, initially 10-20 hours per week, but may increase to 25 hours per week. No benefits, pro-rated leave. Work hours flexible within normal business hours.

THIS IS A VIRGINIA COURT OF APPEALS POSITION.

Incumbent serves as secretary/office manager for the Office of Reporter of Decisions located in the William and Mary Law School.

Qualifications--Superior secretarial, administrative and communication skills required. Familiarity with word processing equipment (IBM 3270 Network) desirable. Marshall Wythe School of Law.

FISCAL TECHNICIAN SENIOR--(Grade 8)--Salary range \$16,025 to \$21,885 per year (as of July 1). Starting salary dependent upon experience or exceptional qualifications and previous salary level of appointee. No. 537

Incumbent is responsible for auditing documents for completeness, accuracy, and detecting discrepancies of all input/output entered into the accounting system and making necessary corrections.

Qualifications--Degree in accounting or equivalent experience in related field preferred. Ability to verify codes and batch input documents into the Institute's accounting system in accordance with established regulations, ability to detect and correct discrepancies, ability to maintain and reconcile detailed records and support of financial transactions required. Excellent communications skills required. Knowledge of computerized fund accounting system preferred.

VIMS (Accounting)

ASSOCIATE DEAN FOR DEVELOPMENT AND ALUMNI AFFAIRS

Marshall-Wythe School of Law The College of William and Mary

The Marshall-Wythe School of Law invites applications for the position of Associate Dean for Development and Alumni Affairs. The Associate Dean is responsible for all programs directed toward the understanding and support of the School from its several constituencies. The Associate Dean reports to the Dean of the Marshall-Wythe School of Law and works in close cooperation with the Office of Development of The College of William and Mary.

Letter of application, resume, and names of three references must be received by July 8, 1985. Address to Timothy J. Sullivan, Dean, Marshall-Wythe School of Law, The College of William and Mary, Williamsburg, VA 23185.

The College of William and Mary is an Affirmative Action, Equal Opportunity Employer. Women and minorities are encouraged to apply.

OBSERVANCE OF INDEPENDENCE DAY

Independence Day, July 4, is a legal holiday for permanent classified employees and William and Mary Support personnel. The administrative offices, the Plant Department and the Campus Mail Room will be closed with the exception of essential employees who are required to work. The Campus Police Department will maintain its regular schedule.

Classes are scheduled for July 4. Academic support staff who are required to work will be credited with compensatory time on an hour for hour basis. Consistent with an exception in the Fair Labor Standards Act non-exempt employees are eligible for compensatory leave if they are required to work on this holiday.

The names of permanent classified employees and William and Mary Support personnel who are required to work must be reported in writing to the Office of Employee Relations and Affirmative Action by July 9 in order that these employees may be credited with compensatory leave on an hour for hour basis.

Compensatory leave earned should be taken as soon as possible after July 4 with the approval of management. Compensatory time not taken within 12 months will lapse. Hourly employees who are required to work on July 4 will be paid at their regular hourly rates.

The Virginia Institute of Marine Science will observe this same holiday schedule and procedure.

This action is a change from the previous policy regarding Independence Day and does not affect the approved Christmas holiday schedule.

Ash Lawn

Continued from P. 1

throughout the summer at Ash Lawn in Charlottesville until August 18.

Also scheduled at Ash Lawn this summer as part of the Summer Festival are the Colonial Crafts Weekends which transform the gardens of Ash Lawn into an active working farm of the early 19th century with craftspeople in period dress demonstrating their skills.

The First Virginia Regiment of the Continental Line encamps in the area and demonstrates military drills and other aspects of Revolutionary War camp life.

Sunday afternoon Children's Shows, from July 14 - August 18, include puppetry, theater, dance and music. They stress active audience participation and free balloons and lemonade are offered to members of the audience.

In addition to the season tickets, special rates are available for groups, senior citizens and students. For the Opera Festival and Summer Festival schedule brochures and further information, please write: Ash Lawn Summer Festival, Route 6, Box 37, Charlottesville, VA 22901, or call 804-293-8000.

The 1985 Summer Festival is funded in part by the Virginia Commission for the Arts and by the Virginia Foundation for the Humanities and Public Policy.
