President Takes Oath of Office

President and Mrs. Verkuil and their children Tara and Gibson are pictured with (l-r) former Governor Albert S. Harrison, Rector of the College Miss Anne Dobie Peebles and the Rev. Thom Blair, interim rector at Bruton Parish Church, following the swearing in of the new president in the Wren Chapel following a meeting of the Board of Visitors on July 1. Formal inaugural ceremonies will be held Oct. 20. (Photo by Thomas L. Williams)

Bond to Talk on Open School

Graham Bond of Eastbourne, England, a guest lecturer in the School of Education this summer, will give a noon lecture Wednesday, July 24 in Jones 307, on the unlikely topic, "The Loss of the *Royal St. George*, or . . . Who Sank the Open School Movement?"

The *Royal St. George* was a British battleship which sank while at anchor at Portsmouth in 1782, not because of enemy action, but because of a fluke accident. The ship was being visited by throngs of people as part of a navy day celebration. Something caught the eye of one of the visitors, the rest rushed to that side of the ship to investigate, which caused the ship to capsize with the loss of over 700 lives.

The situation, says Bond, is analogous to the fate of the open school program. Despite many successes, an inquiry of an open school in London made the headlines

and an avalanche of negativism was started. People became alarmed and started to clamor for "back to basics," explains Bond. Bond says he hopes that the values of the open school program will one day be presented in a comprehensive, objective report.

Bond has been the headmaster of five different schools during the past 30 years, including four in the United Kingdom and one in Switzerland. He has served as a senior lecturer in education at Goldsmiths' College of the University of London and has been a guest lecturer at the College on two prior occasions. He is the author of three books and numerous articles and is currently preparing a book on the community and the school.

Those attending the lecture are invited to bring a brown bag lunch.

DIRECTOR OF UNIVERSITY RELATIONS

Director of University Relations required by October 1, 1985 to manage a challenging program of public information, special events, publications, internal communications and government relations, and supervise a staff of six professionals, support staff, and a five-member print shop for a nationally recognized, moderate-sized state university in an attractive location. Seeking highly creative and skilled person with demonstrated success in public relations and administration, and with media experience. Knowledge of Virginia, the community, and the College desirable. Salary competitive. Submit resume, references, and salary expectations to S. Dean Olson, Secretary, Search Committee, College of William and Mary, Williamsburg, Virginia 23185. Deadline for applications to be received is August 15, 1985.

William and Mary is an EO/AA employer.

Donaldson to Head Committee for Director of University Relations

A committee to search for a new director of university relations for the College of William and Mary has been appointed by President Paul R. Verkuil.

Scott Donaldson, professor of English, will serve as chairman of the committee, which also will include: Duane A. Dittman, vice president for university advancement; H. Westcott Cunningham, executive vice president of the Society of the Alumni; J. Edward Grimsley, editor of the editorial page for the *Richmond Times-Dispatch* and a member of the board of directors of the College's Society of the Alumni; Stewart

H. Gamage, director of the Virginia Liaison Office in Washington, D.C., and a member of the College's Board of Visitors; and S. Dean Olson, director of publications for the College, who will serve as secretary for the committee.

The position has been vacant since Charles M. Holloway resigned in March to go into private consulting work. The new director of university relations will report administratively to the President.

Deadline for applications, which should be sent to Olson in James Blair Hall, is Aug. 15. Inquiries about the job should be directed to Professor Donaldson.

85 Students Enrolled in STEP

The Summer Transition and Enrichment Program (STEP) currently underway at the College has an enrollment of 85 Virginia high school students who have completed their junior year and are busily preparing for their futures at college.

Established at William and Mary in 1979 and funded by the College and a \$20,000 grant from the State Council of Higher Education, STEP is designed to help minority high school students make a positive transition from secondary education to college.

Although all students in the program do not eventually choose to attend William and Mary, STEP graduates are being admitted to highly ranked institutions, says Dean Hardy. She cites several STEP students who have been admitted to West Point and the Naval Academy at Annapolis.

By keeping track of STEP alumni through newsletters, the director of the program, Carroll Hardy, associate dean of students, says she can see the positive influence of STEP in retaining minority students at colleges and helping them assume leadership roles in student government and other campus organizations.

Enrollment in this year's STEP program includes black, Spanish and Asian students. The diversity, says Dean Hardy, adds to the vitality of the program.

The students now on campus until Friday, Aug. 2, are participating in a schedule which includes two university-level courses. "The Art of Writing," taught by Beverly Peterson of Old Dominion University, is designed to give students a personalized analysis of their own writing and

Area Teachers in Writing Program

For five weeks this summer, 20 teachers from eastern Virginia are spending seven hours a day, four days a week at the College putting themselves through what some might consider pure torture: They write.

Not only do they write, but they read their writing to each other, talk about writing, listen to others talk about writing, read about writing, and generally immerse themselves in the often frustrating task of putting words on paper.

They are participants in the seventh annual Eastern Virginia Writing Project (EVWP), designed to improve the teaching of writing in all subject areas from kindergarten through high school. The EVWP, directed by associate professor of English education Mark Gulesian, is one of over 100 National Writing Project sites in the United States, Canada, Europe and Australia.

The programs are cooperative ventures among colleges and public and private schools; EVWP is funded by a grant from the Virginia Foundation for the Humanities and Public Policy and from contributions by the College and the participating Tidewater school divisions.

"EVWP is one of the best things happening to education, K through 12, in the state," says Mary Barnes, recently retired supervisor of secondary English for Virginia Beach Public Schools and an instructor for the program.

Virginia Beach teachers have been coming to William and Mary's writing project for seven years. "The EVWP has had such an impact that writing across the curriculum has become the major objective of the school system," she says.

Gulesian agrees with Barnes that the writing program is beginning to pay off in curriculum improvements for many area school systems.

Concern with writing improvement, Gulesian points out, is catching on with teachers of grades K through 12 and across all disciplines. Elementary schools are having writing weeks and writing competitions, and teachers from EVWP have conducted workshops for their peers in virtually every subject area and grade level.

To meet the needs of the elementary group, James Beers, associate director of EVWP and an associate professor of reading and language arts, focuses on integration among the language arts and across the disciplines.

What teachers learn at EVWP is not necessarily how to become great writers, but how to inspire and help their students develop and improve writing skills. "We don't pretend to make people into writers," says Gulesian of the program. "We just want teachers to know what writing is like from the point of view of the victim."

Gulesian asks teachers in EVWP to do two things: develop a writing workshop to present to their fellow teachers in their home schools; and do some personal

Stitchery Expert Here July 28

Needlework enthusiasts will have a rare opportunity to see an informal demonstration of Elizabethan embroidery by Mrs. Dallas H. Smith of New Kent, from noon to 2 p.m., Sunday, July 28, immediately before the matinee performance of the Virginia Shakespeare Festival in Phi Beta Kappa Memorial Hall on Jamestown Road.

Mrs. Smith, who has taught classes in colonial needlework for the past eight years at the Virginia Museum of Fine Arts, will be demonstrating a type of embroidery known today as "black work."

Correction

A grant of \$21,694 to Morton Eckhause, John R. Kane, Robert Siegel and Robert Welch, physics, was incorrectly identified in the last issue of *The News*. This award for experiments on the interactions of muons, kaons, antiprotons and sigma hyperons was made by the National Science Foundation, which has awarded over \$1 million to date for this project.

The National Endowment for the Humanities has awarded \$45,000 to the Institute of Early American History and Culture for a project entitled "The World of an Anglo-Jamaican in the Eighteenth Century." Project director will be Philip D. Morgan, editor of publications at IEAHC and adjunct associate professor of history.

This project will provide a detailed analytical index to, and statistical analysis of, an extraordinary rich historical collection kept by Thomas Thistlewood, an Anglo-Jamaican. The computer will be used to provide an exhaustive index to all names, places, subjects and activities mentioned by Thistlewood, and in addition, all quantities and specialized data will be presented in the form of statistical appendices.

An award of \$36,187 brings to \$100,000 the funding from the National Science Foundation for a study of comparative nuclear cytology in the red algae, directed by Joseph L. Scott, professor of biology.

The U.S. Department of Energy has awarded a grant of \$34,600 for continued study of nonlinear magnetohydrodynamics and alpha particles by George Valhala, associate professor, and Linda Valhala, research assistant professor in the Department of Physics. This award brings to \$129,905 the amount of funding to date for this project.

Eight Scientists and students from VIMS recently attended the 65th annual meeting of the American Society of Ichthyologists and Herpetologists at the University of Tennessee in Knoxville and presented the following papers:

Szedlmayer, S.T., M.P. Weinstein, and J.A. Musick. VIMS. "Daily Aging of Juvenile Chesapeake Bay Weakfish, *Cynoscion regalis*."

Munroe, Tom. VIMS. "A Preliminary Hypothesis of Species Group Relationships within the Tonguefish genus *Symphurus* (Pleuronectiformes: Cynoglossidae)."

Sminkey, Tom. VIMS. "Functional Morphology of the Pharyngeal Organ of Two Species of Stromateid Fishes, *Peprilus triacanthus* and *P. paru*."

Markle, Douglas F., and John E. Olney. Huntsman Marine Laboratory and VIMS. "Are Pearlfish Invaders from the Deep Sea?"

Musick, J.A., J.A. Colvocoresses, E.F. Lawler, and W.G. Raschi. VIMS; Corolla, North Carolina; and Bucknell University, Lewisburg, Pa. "Distribution and Abundance of Sharks in the Chesapeake Bight."

Bowen, Brian W., and R.W. Chapman. VIMS and Chesapeake Bay Institute. "Phylogenetic Relationships in the genus *Morone* as Inferred by Mitochondrial DNA Analysis."

Armstrong, M.P. VIMS. "Life History Aspects of the Goosefish, *Lophius americanus*."

Crabtree, R.E., and K.J. Sulak. VIMS and U.S. National Museum. "Aspects of the Life History and Distribution of the Alepocephalid genus *Conocara* in the Western North Atlantic."

Dentzau, M.W., and M.E. Chittenden, Jr. Texas A&M University and VIMS. "Reproduction, Movements, and Population Dynamics of the Atlantic Threadfin, *Polydactylus octonemus*, in the Northwestern Gulf of Mexico."

Governor Charles S. Robb will give the keynote address at the National Marine Education Conference, which will be hosted by the Virginia Institute of Marine Science/School of Marine Science, July 30-August 3.

The week-long meeting, which will be held on campus, will offer over 100 concurrent sessions, which will include marine and aquatic education, workshops, field trips on research vessels, and visits to museums.

The program will also include a Chesapeake Bay symposium featuring research information presented by prominent scientists from estuarine research facilities including VIMS.

Janet L. Coryell, a doctoral candidate in history, presented a paper, "A Woman's Grasp Exceeded: Women and the Transformation of Power," at "Facing the Future: Graduate Student Conference on Scholarship on Women," an interdisciplinary conference in women's studies held at Yale University on April 13, 1985.

A. Camille Wells, a doctoral candidate in history, received a full-year fellowship for dissertation work (1985-86) from the American Association of University Women. Over 1,300 women applied for the fellowship program of the AAUW.

Henry Coleman, associate professor of art, recently served as a judge for the Junior Women's Club annual art show held in Merchants Square.

Gary Rice, assistant professor of chemistry, has been awarded \$15,000 by the Petroleum Research Fund (American Chemical Society) for continued exploration into the scope of application of gaseous afterglow systems produced at atmospheric pressure as excitation sources for emission spectroscopy and their utilization as reliable, element specific, multielement detectors for gas chromatography.

Roy Chernock, head track coach, recently served as assistant track coach of the USA National Team that competed against national teams from Japan, Australia, New Zealand and Canada at the Pacific Conference Games held at the University of California at Berkeley.

Molly Brunk Tribble, psychologist at the Center for Psychological Services, is co-author of an article, "Mother-Son Relations of Juvenile Felons," which has been accepted for publication in the *Journal of Consulting and Clinical Psychology*. She also co-authored a paper that will be presented at the American Psychological Association convention in Los Angeles this August titled "Mother-Adolescent Relations of Violent Juvenile Offenders."

John A. Musick, professor of marine science, was recently elected by the American Association for the Advancement of Science (AAAS) Council, as a Fellow of the Association. A Fellow of the AAAS is defined as "a member whose efforts on behalf of the advancement of science or its applications are scientifically or socially distinguished."

At the first annual meeting of the American Elasmobranch Society (study of skates, sharks and rays), Musick was elected to the board of directors.

Campus Center Hours

The Campus Center summertime hours of operation are as follows: Until Aug. 9: Monday-Sunday, 7 a.m.-12 midnight.

Closed Aug. 10-11.

Aug. 12-16: 8 a.m.-5 p.m.

Closed Aug. 17-18.

Aug. 19-23: 8 a.m.-5 p.m.

Regular hours, 7 a.m.-1 a.m., will resume Aug. 24.

John R. Thelin, third from left, and Hiroyuki Hamada, second from left, are pictured with the senior faculty and administration of Mukogawa Joshe University in Kobe. This is one of two universities in Japan which has been visited by the Imperial Family.

Thelin Returns From Japan

John Thelin, associate professor, School of Education, is back from a three-week educational-cultural exchange trip to Japan during which he gave seven lectures on higher education issues in the United States.

Thelin visited Tokyo, Kobe, Kyoto, Osaka and Kitakyushu, sister city of Norfolk, Va.

He presented lectures at Nittaidai, Nippon College of Physical Education in Tokyo; Mukogawa Joshe University in Kobe; Kobe Joshe and Kobe Gakuin universities and Kitakyushu University. Thelin also spoke to a national conference of college, university and school athletic directors and coaches and a national conference of school superintendents and principals.

At each of the universities listed, this was the first time a scholar from the United

States had been invited to address the assembled faculty and administration.

As part of his visit, Thelin was given an audience with Master Yamaguchi, highest ranking master of martial arts philosophy and technique in the world, who is in his 80's and rarely has visitors. He was invited to visit Sho-Rei-In Temple in Kyoto and participate in a formal tea ceremony conducted by the Buddhist priest of the royal family. Thelin also had an opportunity to see operations at Shasta Mountain, a special farm-restaurant devoted to the education of handicapped youth. The students grow all the food and make all the ceramic dishware for one of the most popular restaurants in all of Jaan, Japan. It signifies, explains Thelin, the fundamen-

Honorees, left to right, Mary Lewis, Harvey Perkins, Barbara Thompson

Graduates Honored for Dissertations

Three graduates of the doctoral program in the School of Education were honored this spring by Virginia Polytechnic for their outstanding dissertations.

In a state-wide competition, the three were included among the 12 invited to participate in a research symposium sponsored by VPI.

Representing William and Mary were Dr. Barbara Townsend, assistant professor of education at Buffalo, N.Y., University;

Dr. Harvey Perkins, director of program development and technology, Newport News School system; and Dr. Mary Lewis, career specialist and consultant for the National Aeronautics and Space Administration, NASA, at Langley Field.

Students selected were invited to the two-day conference as guests of VPI. Their dissertations were presented to students and faculty from VPI and other state colleges and universities.

Lee G. Walsh

Walsh to Head Capital Support

Lee G. Walsh, director of development and planned giving at Brenau College in Gainesville, Ga., has been named director of capital support at the College of William and Mary.

A 1975 graduate of William and Mary with a bachelor's degree in government, Walsh has been employed at Brenau since 1979. In his new position, he will figure prominently in the College's fundraising efforts for major gifts to endowment and other capital purposes.

Walsh, a native of Yorktown, is married to the former Vicki Lifsey of Emporia, and they have a two-year-old son, Martin. Walsh will assume his duties in the College's Office of Development Aug. 16.

Law Professor Invited to Berlin

Walter L. Williams Jr., professor of law, Marshall-Wythe School of Law, has been invited to draft a declaration on world peace through justice at the 12th biennial conference on the law of the world to be held in Berlin, July 21-26 by the World Peace Through Law Center.

As a representative from the United States, Williams will also present a paper on transnational legal aspects of biotechnology for a panel on biotechnology chaired by Dr. Ernst Benda of the Federal Republic of Germany. More than 100 nations are expected to be represented at the conference.

This is the third time Williams has been invited to participate in international conferences by the Center. In 1975 he wrote a declaration of world interdependence entitled "The Washington Declaration" for the conference that was held in that city. In 1979, for the Madrid conference, he wrote a declaration on international cooperation.

Williams is currently working with the Center as a member of the central committee for planning and goals which establishes the agenda for the conference.

The World Peace Through Law Center was founded in 1957, originally as a special committee of the American Bar Association. In 1963 the special committee within the ABA was given a status independent of, but closely associated with the ABA, and it became a worldwide organization. At a meeting in 1963 in Athens, Greece, the World Peace Through Law Center was established. Its membership is worldwide and is comprised of jurists, attorney generals, ministers of justice, supreme court justices and justices of lower courts, professors of law, attorneys, law students and a number of others who are interested in international legal issues. The Center and its national branches and affiliated associations operate in more than 155 countries, with a total membership of about 100,000.

SUMMARY: "Transnational Legal Aspects of Biotechnology"

Technology has become a major resource in today's world. This is especially true of biotechnology, which has evolved from the science of producing hardier corn or disease-resistant tomatoes to the development of petroleum-eating bacteria produced by genetic engineering. The rapidity of these developments, along with the increased demands of emerging nations struggling to develop strong economies, has created a need to evaluate the legal implications of the transfer of this knowledge.

Patent laws provide an incentive to researchers—protecting their creativity and discoveries and allowing them an oppor-

tunity to profit financially—but there is no international agreement on the patentability of living organisms, especially as the social and ethical questions of patenting higher life forms loom nearer. In addition, procedures for international patenting remain cumbersome. Furthermore, treating such developments as trade secrets may have an adverse effect on science—by restraining the free exchange of ideas, affecting the consulting value of scientists, or subordinating pure research to the enticements of profit.

Questions of liability—the potential for epidemics, harm to the environment, or health risks for those involved in research—affect perceptions of tort law. The free flow of knowledge is presently hindered by the lack of uniform standards of liability, which would allow those who handle the transfer of such information to determine what legal risks they are taking.

Regulatory law recognizes the need to establish guidelines that outline containment procedures during the necessary testing of potentially harmful organisms. Rapid advancements in genetic engineering have exacerbated the problem of establishing effective, international guidelines, especially since preliminary restrictions are generally perceived as having been too stringent.

Williams suggests that problems in all three legal areas may be resolved within the forum of the United Nations Centre for Genetic Engineering and Biotechnology. The recently established Centre could serve as an international arena for discussion.

MAW.

Breeden Named Baseball Coach

Joe Breeden, a Hampton native, has been named head baseball coach at William and Mary, it was announced by Athletic Director Jim Copeland. He replaces Ed Jones who resigned following the 1985 season.

Breeden, a former baseball player at Old Dominion, spent a year as an assistant at Virginia Commonwealth. He played for two seasons in the Montreal Expos Organization as a catcher and has also coached at VCU, Virginia Wesleyan, Denbigh High School and Warwick High School.

Senior Athlete

Senior Mitch Cooper, a native of Alexandria, Va., is scheduled to compete in the long jump and the 4 x 100 meter relay in the Maccabiah Games in Israel at the end of the month, representing the U.S.A.

Honorees at the annual staff luncheon are pictured on the steps of Phi Beta Kappa Memorial Hall. They are, front row, l-r, Lucy E. Scott, Lena Jefferson and Ervin D. Farmer. Back row, l-r, Mrs. Roger Higgs, Irving H. Robitshek, Alta Vrooman and Lathaniel Parker.

Staff Feted at Annual Luncheon

The annual luncheon to honor members of the College staff was held June 28 in the refurbished Dodge Room in Phi Beta Kappa Memorial Hall.

George R. Healy, Provost, noted that as presenter of the awards to retirees, 20-year veterans and housekeeping award winners, he was performing his final act as acting president of the College. In the audience at the luncheon was President Verkuil who took office on July 1 and will be inaugurated Oct. 20.

Ten retiring members of the staff were presented plates to commemorate their service to the College. They included Grover F. Batton, power plant superintendent, 17 years; Marcia Bush, library assistant, 17 years; George J. Colyer, watchman, 12 years; Ervin D. Farmer, director of buildings and grounds, 32 years; Emma Harris, custodial worker, 17 years; Thomas E. Lee, Sr., storekeeper assistant, 37 years; Irving H. Robitshek, director of employee relations, 17 years; Lucy E. Scott, custodial worker, 36 years; and Elizabeth E. Turner, custodial worker, 14 years. Mrs. Roger A. Higgs accepted for her husband, the late Roger A. Higgs, programmer and systems development supervisor at the Computer Center who had been with the college 18 years.

Twenty-year service awards were made to Alta Vrooman, registrar's office and two members of the buildings and grounds staff, Allan Brown and Lathaniel Parker.

Eleanor Johnson was named Custodian of the Second Semester for her work in the Wren Buildings and The Brafferton. Custodian of the Month awards were made to Lena Jefferson,

who works in Washington Hall and the Bridges House, for April; Harold Wallace at the Campus Center for May; and Novella Mason in Hugh Jones Hall for June.

Museum Hours

The Joseph and Margaret Muscarelle Museum of Art will have additional evening hours this summer.

The museum will be open Thursday evenings until 8 p.m., July 11 through Aug. 8. The Muscarelle Museum is currently open Monday through Friday from 10 a.m. to 4:45 p.m., and Saturday and Sunday from noon to 4 p.m.

The extended hours on Thursdays, said a museum spokeswoman, will give working people an opportunity to visit the museum's current exhibit, "Selections from the Collection of the Alex Hillman Family Foundation." The museum will also be available to patrons to the Virginia Shakespeare Festival, which is housed in the adjacent Phi Beta Kappa Memorial Hall.

Sports Note

William and Mary cross-country All American Ken Halla will represent the East at the sixth annual National Sports Festival to be held in Baton Rouge, La., July 24-Aug. 4.

Halla, a senior from Vienna, Va., will run in the 10,000 meters. The 1985 track captain finished third in the 10,000 at the IC4A Outdoor Track and Field Championships in May.

Writing Program

Continued from P. 1

writing to get familiar with the process. "We suggest, as most teachers do with their students, that they start writing about personal experiences. They write poetry, prose, fiction — anything they want."

The work doesn't end there. The teachers also have a hefty list of assigned reading that they are required to present to the group. They must also present their writing workshop and read selected pieces of their writing in class.

"Some of us, in trying to get writing projects started at our own schools, are hesitant," says Jane Van Dyke, a teacher at Norge Primary School in James City County. "Teachers often know intuitively what should be done, but a supervisor may ask them to justify what they're doing, and they can't justify it on intuition. I feel, after having done the reading, hearing the discussion and going through this experience, that I have the background to justify what I feel I should be doing in the classroom. I discovered I wasn't very far off the mark."

Virginia Shakespeare Festival

Adrienne Dunn, as the Queen, gives a deadly potion to Cornelius, played by Edward Morgan, with instructions to poison Imogen in a scene from "Cymbeline," at the Virginia Shakespeare Festival. The season is underway with "Richard II," "The Taming of the Shrew," and "The Miser" by Moliere being performed in a repertory schedule which will continue until August 17. Ticket information may be obtained at the Phi Beta Kappa Memorial Hall box office, ext. 4469. (Photo by Maggi Schlotter)

Japan Visit

Continued from P. 2

tal Japanese ethos: "The love and pleasure of good work."

Thelin began preparation for his visit last January with language classes and orientation sessions on how to respond to the formal greetings and traditional social customs which are such a part of Japanese life. Visitors are judged, he explained, by how they maintain their composure through elaborately orchestrated dining and hospitality.

Prime mover in organizing the educational exchange was Hiroyuki Hamada, who received his doctorate in education from the College in 1984 and also taught karate. Hamada is one of four master teachers in Japan. His position affords him

Employment

The following positions at the College are open to all qualified individuals. Call 229-JOBS for further information or visit the Employee Relations Office, Thiemes House, 303 Richmond Road, for information and application forms between 8 a.m. and 4 p.m., Monday-Friday. An EEO/AA employer.

For the present, job bulletins are not being distributed through campus mailboxes. Persons interested in obtaining copies may pick them up at the Employee Relations Office.

LABORATORY TECHNICIAN B — unclassified, \$5.90 per hour, part time, approximately 20 hours per week. **THIS IS A RESTRICTED APPOINTMENT.**

Location: VIMS (Physical Oceanography and Environmental Engineering). DEADLINE 7/26.

tips on how to be effective in the written word. A mini-calculus course, taught by L. Thomas Conner, Jr., helps students get a head start on college calculus.

Students will also take a course in study skills and time management which is taught by Susan Mirik, director of Study Skills at William and Mary.

Because special emphasis is being given this year to the humanities both as a field of study and as a career option, Dr. Carolyn Reid-Wallace, assistant director of educational programs for the National Endowment for the Humanities, presented a program for STEP students Wednesday, July 17.

Dr. Jo A. Lanier of the Dana School of Music at Youngstown State University, gave a seminar on Afro-American music, Wednesday through Friday, July 17, 18 and 19. Nettie Faulcon, an engineer with the National Aeronautics and Space Administration (NASA), will talk about careers in engineering Friday, July 26. Jacqueline Parham, producer of "The Bottom Line" program on WAVY-TV, the Tidewater NBC affiliate, will talk about careers in broadcast journalism Tuesday, July 30.

This year a seminar on how to choose a college, designed by Dean Hardy, has been added. The seminar cautions students against making snap decisions on which school to attend, advising them to assess a college's offerings in light of their own career goals.

Participants are also asked to consider the type of environment they feel most comfortable in before deciding on a large or small college. They will even compute college costs as part of the seminar.

The STEP participants study college application forms in detail during the seminar. "We talk about the importance of the essay that colleges request of incoming students," says Dean Hardy. "When a college says, 'Tell us about yourself,' a two- or five-line answer is not enough."

The Virginia Shakespeare Festival at the College gives students an opportunity to study drama. They will attend a performance of "Cymbeline" and go backstage to talk with cast and crew afterwards.

Not all the time at STEP is spent on academic subjects. Students have trips planned to Virginia Beach and other scenic spots in the area, and are scheduled to attend a concert at Hampton Coliseum.

Assisting Dean Hardy this summer is a former STEP graduate, Zandra Thompson of Chesapeake, a senior at the College.

Stanko Drafted

Former William and Mary first baseman and outfielder Ed Stanko was drafted by the New York Yankees in the 13th round. The 6-0, 205 lb. product of Brooklyn, N.Y., has signed a contract with the Yankees and will play for their single A ballclub in Oneonta, N.Y., in the New York-Pennsylvania League this summer.
