Volume XVIII, Number 24 25

Wednesday, March 22, 1989

Timely Reminders

This is a timely reminder of events occurring in the coming week, which have been detailed in previous editions.

Magic of Chemistry

The Chemistry Club's annual mystifying fund-raiser is tonight at 6:30 and 8:30 p.m. in Rogers 100. Admission is \$1.

Assembly meets Tuesday

The Faculty Assembly will meet at 3:30 p.m., Tuesday, March 28 in the Ewell Recital Hall.

Lerman talk

The final lecture in the Judaica series will feature author Rhoda Lerman, who will read from her work tonight at 8 p.m. in Tyler 102.

Orchesis

"An Evening of Dance" will be presented Thursday through Saturday at 8:15 p.m. in Phi Beta Kappa Memorial Hall. There is no admission charge.

Finkelstein lecture

New York artist Henry Finkelstein will present an illustrated lecture on his work at 4 p.m. Thursday in Andrews 201 in conjunction with an exhibition of his work in Andrews Gallery.

Art and Power

Ronald Engard, department of anthropology, will speak on dance and architecture as systems of constitutional politics among the Bafut as part of the "Art and Power: The Anthropology of Culture" series. Speaker on March 29 will be Susan Diduk, an alumna, currently assistant professor of sociology and anthropology, Denison University. She will speak on the paradoxes of secrecy among the Babanki of the Cameroon Highlands.

Aquino Lecture

Randolph Reynolds will deliver the annual Benigno Aquino Memorial Lecture at 6 p.m., Thursday, March 23 in Millington Aud.

DST coming

Daylight Savings Time begins April 2. Clocks should be set ahead one hour the night of April 1 — no fooling!

World-class scientists to participate

College to offer applied science Ph.D.

The State Council of Higher Education in Virginia has approved the College's request for a Ph.D. program in applied science, a program that will link the campus with state-of-the-art equipment and world-class scientists.

This program will bring together activities in applied science at William and Mary, NASA's Langley Research Center (LaRC) in Hampton and the Continuous Electron Beam Accelerator Facility (CEBAF) in Newport News.

A search is currently underway to find a distinguished scientist to direct the program. The director will be appointed the CSX Professor of Applied Science, a chair endowed with a portion of a \$2 million gift to the College last year by the CSX Corp.

The search committee plans to interview candidates in early June and hopes that the new director will be ready to begin work by the summer of 1990. Robert Orwoll, professor and chairman of the chemistry department, is serving as chair of the search committee. Orwoll was appointed interim director last year.

According to the plans approved by the State Council, about 25 individuals will teach courses and direct research in the new program. Eight or nine of these will be drawn from the current William and Mary physics, chemistry, mathematics and computer science faculty. An additional five applied science faculty — including the new director — will be hired into these Area III departments over the next five years. The remaining participants will be scientists and engineers at the Langley Research Center and CEBAF.

Thesis research will be carried out in the laboratories of the three participating institutions. Some of the space in Small and Rogers halls that will be available with the expected completion of Tercentenary Hall in 1992 will be used for applied science laboratories and the new faculty.

The program is aimed at two groups, the full-time student and the professional employed in the area who wants additional study. The first Ph.D. candidates will enter the program in 1990 or 1991. Most will have undergraduate degrees in a physics, chemistry or materials science. Others, who have majored in mathematics, computer science or an engineering discipline, will be expected to have had some training in physics or chemistry.

During their first year, applied science students will take core courses, which treat the scientific principles and mathematical and computing skills

that have special utility in applied science. These courses will include chemistry and physics graduate courses that are available now, as well as new applied science courses being developed for the program.

Students will begin their thesis research during their first year. Work may be carried out on the William and Mary campus or at LaRC or CEBAF depending on the nature of the project and on the particular laboratory facilities required.

The program has been planned with special strengths in four areas: polymer science, quantita-

tive materials characterization, accelerator science and surface science, in order to take advantage of major research endeavors at William and Mary, LaRC and CEBAF.

Most studies on polymers will be performed in the department of chemistry or in the materials division at LaRC, where a new three-story laboratory building houses part of Langley's extensive polymer activity.

Research will cover a broad spectrum of activi-

Continued on page 5.

Two students who tied for first place in "Genesis 1989" the annual college student art show sponsored by the Peninsula Fine Arts Center and the Daily Press/The Times-Herald newspapers, pose in the sculpture studio with their instructor, Lewis Cohen, assistant professor of fine arts.

Charles J. Berzansky Jr., (r) a senior chemistry major from Toms River, N.J., won \$250 for a limestone sculpture titled "Germinal Seed." He tied for first place with John E. Fisher Jr., a fine arts major from Williamsburg who also received \$250 for an untitled limestone sculpture.

Residential program for gifted planned

The School of Education will initiate two residential programs and a commuter program for gifted students this summer.

The Phoenix Program, June 18 through July 1, is open to gifted students presently in grades 7 through 11. Students will have the opportunity to take a core academic course such as computer science, geology, literary analysis, probability and statistics or a writer's workshop; and an interdisciplinary course such as critical thinking, humanities, international studies, Latin or philosophy.

There will be a special law course offering,

which will span both the core and interdisciplinary strands. Generally, courses will be taught by faculty of the College. Students at the College will serve as classroom mentors.

Students will live in a residence hall on campus and will be engaged in an exciting variety of evening and weekend activities. There will be specially designed enrichment seminars staffed by College and program faculty as well as a full recreational program. Commuter students are also welcome to apply.

The Phoenix Program's all-inclusive fee for tui-

tion, room and board is \$675. The course tuition fee for commuter students is \$300. The application deadline is May 1 and there is a \$25 non-refundable application fee.

A second residential program, the Pre-Collegiate Program, will run from July 10 through Aug. 11. This program is for gifted students in grades 11 or 12 who wish to take regular college courses for credit and experience five weeks of residential living on campus.

To the College community

We have received word that early Sunday morning, March 12, John Lee Vahradian, a May 1988 graduate of the College, died in Washington, D.C. John was co-captain of the swim team and a member of Sigma Chi fraternity

A memorial service was held at 3:30 p.m. on Saturday, March 18 in the Wren Chapel. We are saddened by John's death and extend our deepest sympathy to his family and friends.

Sancetta family establishes fellowship for M.B.A. students

The family of the late Anthony L. Sancetta, Zollinger Professor of Business Administration Emeritus, has established the Sancetta Memorial Fellowship. An award from the scholarship fund will be made to a second-year M.B.A. student in the graduate business program.

The fellowship will be presented to a student who has expressed an interest in and demonstrated an aptitude for the teaching profession.

Professor Sancetta graduated from Western Reserve University in 1937 with an A.B. degree and received M.S. and Ph.D. degrees from Columbia University in 1939 and 1952 respectively. He served as a first lieutenant in the Army Corps of Engineers from 1942 to 1946.

Sancetta came to the College in 1948 as an assistant professor of economics and was appointed professor in 1961. He served as coordinator of the Evening College from 1955 to 1957.

In 1965, Sancetta became a professor of business administration and, with the establishment of the School of Business Administration at William and Mary in 1968, was instrumental in its development. He served as the school's associate dean for graduate studies from 1970 to 1972 and associate dean for undergraduate studies from 1976

until his retirement in 1979. He was Zollinger Professor of Business Administration during 1978-79.

Sancetta's significant contributions to the business school helped result in the professional accreditation of its B.B.A. and M.B.A. degree programs.

William and Mary President Paul Verkuil, a College alumnus, recalled of Sancetta: "During my student years at the College, he was known affectionately and with respect as 'tough Tony.'"

A recognized scholar and consultant in business, economics, finance and banking, Sancetta was a member of Beta Gamma Sigma and a founder and director of Southern Bank of Williamsburg.

The Sancetta Memorial Fellowship is being established by his wife, Mrs. Joyce Kellogg Sancetta of Williamsburg; a daughter, Constance Sancetta of West Nyack, N.Y.; and a son, Biagio Sancetta of San Francisco.

Contributions to The Sancetta Memorial Fellowship can be sent in care of Virginia D. Weathers, Director of Development and Alumni Relations, School of Business Administration, College of William and Mary, Williamsburg, VA 23185.

Lynwood H. Wilson honored

Hillsman V. Wilson and his wife, Steuart, of Timonium, Md., have established an endowment honoring his brother, the late Lynwood H. Wilson '31. They have also pledged support for scholarships at the Marshall-Wythe School of Law.

The \$50,000 endowment is part of a \$125,000 commitment to the College by Mr. and Mrs. Wilson. The Hillsman V. and Lynwood H. Wilson Athletic Scholarship will provide financial assistance to a student athlete who plans to attend law school after graduating from William and Mary.

Another \$50,000 will support scholarships at the Marshall-Wythe School of Law. The remaining funds will be divided between support for existing scholarships and the annual funds of William and Mary and its law school.

Hillsman Wilson, who graduated from William and Mary in 1951, attended college on a partial athletic scholarship. He received a B.C.L. degree from the Marshall-Wythe School of Law in 1953.

Wilson retired as president and chief operating officer of McCormick and Company in 1987 after 32 years with the Baltimore-based company, an international producer of seasonings, flavorings and specialty foods. He is a founding trustee of the Law Foundation at Marshall-Wythe, and is trustee emeritus of the Endowment Association Board at the College. He has also served on the board of directors of William and Mary's Society of the Alumni.

Currently, he is a director of Signet Bank of Maryland, the Union Trust Bank Corp., Baltimore Life Insurance Co. and the Bank of Virginia Co.

Math establishes Conner Fund

The department of mathematics has established a fund in memory of Luther Thomas Conner, associate professor of mathematics, who died Nov. 4, 1988.

The proceeds from the fund will be used for an annual prize to a senior mathematics major who demonstrates the enthusiasm for mathematics and

concern for others that were characteristics of Professor Conner.

Contributions to this fund should be made payable to the College of William and Mary and sent to the department of mathematics. Please write "Conner Fund" on the memo line of the check.

James D. Squires editorializes on pressing current issues

James D. Squires, editor of the *Chicago Tribune* and 1989 Journalist-in-Residence described his public talk March 16 as two "editorials."

He chose this journalistic device to convey to his audience his concern about two current issues — relations with the Soviet Union and the state of education.

In his first "editorial," Squires talked about the need to change out-dated ideas about the Soviet Union. He admitted that this was not an easy recommendation for the *Chicago Tribune* to make because the paper "has never liked the Russians and the *Chicago Tribune* has always been a rather conservative newspaper."

But, said Squires, the time has come to address the new leadership and changes in the Soviet Union which he said represents a new challenge and the greatest opportunity that the United States as faced in the last 40 years. Dealing with the new Russia is a risk," said Squires, but added it was a risk worth taking "simply because the Soviet Union and the United States have been busy going bankrupt trying to outspend each other in the pursuit of military power. Our entire federal budget

system, our whole way of operating militarily around the world, is based on the premise that the Russians are coming. Assuming that they are not, at least for a few years, will free this nation's brains and its hands toward defeating other enemies more real and more dangerous than the Russians ever were.

"Continued preoccupation with some military threat, the idea that the Soviets were on the verge of rolling across Europe, on the verge of pushing the button, has served as nothing more than a sand pile in which the United States has been burying its head and doing it to avoid seeing a horrible truth. That is that the greatest threat to the freedom of the United States, to our way of life and our future, is not something that a strong NATO alliance is needed to stop in Europe, or that we need a Stars Wars nuclear umbrella to protect ourselves from, or something that can be negotiated away in the next round of trade talks with the Japanese. It is an enemy that is already here, that is gnawing away at America from the inside. And that is the pure and simple destruction of our children.

Continued Squires, "All the great public policy

Tucker named assistant director for Marshall-Wythe alumni

Suzanne Tucker of Williamsburg has been named assistant director of alumni affairs for the Marshall-Wythe School of Law.

Tucker will be responsible for coordinating special events and the production of publications for the law school's 3,000 alumni. She will report jointly to the law school and the Society of the Alumni which serves the College's total alumni body.

In her most recent position, Tucker established and managed the American Red Cross office at the Naval Submarine Base in Kings Bay, Ga. Prior to that she served as assistant director of admission for the University of the Pacific in Stockton, Calif., where her duties involved arranging programs for visitors, including representatives from foreign governments interested in placing students in the United States. Additionally, she was a member of the admission staff at the University of Maryland at College Park where she coordinated the production of all undergraduate admission materials.

Tucker holds a bachelor's degree from the University of Wisconsin and a master's degree from the University of Maryland.

Suzanne Tucker

Scottish Institute offered in Edinburgh

The Institute of Scottish Studies at Old Dominion University is offering an Edinburgh Institute this summer at Edinburgh University July 25-Aug. 15.

The academic portions of the Institute are complemented by an extensive touring program to beauty spots of Scotland. The Isle of Skye, Linlithgow Palace, Dumfries, St. Andrews, Falkland Palace, Inverness, Cawdor Castle, the Royal Tattoo and an excursion to Sir Walker Scott country are all travel choices included in the 14-day program. All lectures will be given at Edinburgh University and participants will stay in the Pollock Halls of Residence at the university. Academic credit will be offered for coursework.

Fee for the Institute is \$2,300 and includes trans-Atlantic airfare, food and lodging. Optional trips are extra.

For additional information, please contact Charles H. Haws, Institute of Scottish Studies, Old Dominion University, Norfolk, VA 23508, phone (804) 683-3179/3180.

Honors 202 Forum series

Professor Henry West of Macalaster College will give a lecture on "The Utilitarian Foundation of *On Liberty*," Wednesday, March 29.

Mark Fowler of the philosophy department will speak on "Nietzsche and the Value of Morality," Wednesday, April 5.

Grover Smith, professor at Duke University and president of the T. S. Eliot Society, will speak on "The Waste Land and the Recycling of Junk," on April 12.

Lectures are held Wednesday evenings at 7:30 p.m. in Tucker 120.

A reception following each lecture will be held

in the Charles Center, Tucker B-2.

Students, faculty and members of the community are invited to attend the lectures and receptions.

Easter sunrise service on Jamestown Island

Buses will leave from outside Jefferson at 6 a.m. for the 6:30 a.m. Easter sunrise service on Jamestown Island on Sunday and return at 8 a.m.

Those planning to take the bus should call the Wesley Foundation at 229-6832 so adequate transportation may be provided.

This service is being sponsored by CAMU and the Williamsburg Clergy Association.

Commonwealth Center hosts architect

Alex VonHoffman, graduate school of design, Harvard University, will speak at a seminar on "Horticulture, Agriculture and Other Urban Pursuits in Early 19th-Century America," at 4 p.m., Thursday, March 23 in the Friends' Room, Swem Library.

This seminar is sponsored by the Commonwealth Center for the Study of American Culture.

Grayson to field questions on C-SPAN

George W. Grayson, professor of government, will answer student questions on Mexico on the "Close Up Forum" to be telecast on C-SPAN, from 10:30 to 11 a.m., Saturday, March 25 and 7:30 a.m., Sunday, March 26.

Grayson's latest publication is a monograph, *The Mexican Labor Machine: Power, Politics, and Patronage*, published by the Center for Strategic and International Studies in Washington, D.C., as part of its Significant Issues Series. Senator Charles S. Robb wrote the foreword.

mother use on her son. She went into his room and he told her he was not going to school, explaining that everyone there, including pupils, teachers and the custodial crew, hated him. "You have to go the insisted the mother. "You're the principal."

The William and Mary NEWS

The *William and Mary News* is issued weekly during the school year for faculty, staff and students of the College and distributed on campus Wednesday afternoons.

News items and advertisements should be delivered to the News Office, James Blair 310A, no later than 5 p.m. the Friday before publication. Notices for the calendar should be delivered to the News Office no later than 5 p.m. the Wednesday before publication.

Barbara Ball, editor
Mary Ann Williamson, desktop publishing
Publications Office, production
News deadline: Fridays, 5 p.m.

Religion lecture series features Martin, Curran, Williams

In recognition of its 20th anniversary, the religion department will sponsor a series of three Thursday night lectures on contemporary issues in religion, to begin March 23 with a talk by William Martin, Rice University sociologist, on "How the Mighty Have Fallen: Perennial Problems of Prime Time Preachers." Martin will speak at 8 p.m. in Tyler 102.

Charles Curran, the controversial theology professor who has been barred from teaching theology at Catholic University because of his dissent from church teachings, will speak at 8 p.m., Thursday, March 30 in Millington auditorium.

John Alden Williams, Visiting William R. Kenan Distinguished Professor of Humanities and specialist in Islamic art and culture, will speak at 8 p.m., April 6 in Tyler 102 on "Mad Mullahs or Modernization: The Muslim World in Our Time" to conclude the series.

Martin, whose main areas of specialization include sociology of religion, criminology and popular culture, has published widely in a variety of national magazines and is currently under contract to William Morrow & Co., for a book on Billy Graham. In addition to his active role in publishing, Martin is also sought after for TV appearances on national networks and NPR to discuss religious broadcasting and other topics pertaining to the sociology of religion. Martin also finds time to write essays, humor pieces and travel articles.

Curran, currently Visiting Brooks Professor in the School of Religion, University of Southern California, will speak on "Tensions in Contemporary Roman Catholicism." He was visiting professor of Catholic studies at Cornell University last year.

Curran joined Catholic University in 1965. A theologian of international repute, he has long differed with aspects of traditional Catholic teach-

ing on such questions of sexual ethics as birth control, homosexuality, divorce and masturbation. After exchanges with the Vatican's Congregation for the Doctrine of the Faith, which lasted over seven years, he was notified in 1986 of the Vatican's judgment against him.

Catholic University removed him from the teaching roster, an action he maintains is a violation of academic freedom. In early March, a District of Columbia Superior Court Judge ruled that Catholic University had the right to bar Curran from teaching after the Vatican declared him "ineligible" to teach Catholic theology because of his dissent from church teachings.

In response to a *Washington Post* reporter, Curran said that although he felt sad about the court's ruling, "it's a sadder day for the university because it confirms that full academic freedom ... does not now exist at Catholic University."

Williams, on leave from the University of

Texas, has spent more than 30 years trying to bridge the gulf of misunderstanding, fear and mistrust that has formed between the Western and Islamic worlds.

He has traveled extensively to study Islamic art and architecture and has been director of the Center for Arabic and Islamic Studies at the American University in Cairo.

Much of the misunderstanding of the West, says Williams, comes from exported popular culture, including TV soap operas like "Dallas" and "Dynasty." Viewers, says Williams, see America as a society with too much money and far too little self-control. For Americans, he adds, the popular notion of Islamic nations is also influenced by television, particularly the battles between Muslim and other religious groups in the Middle East.

Continued on page 5

Graham to give Shapley Lecture

John Graham of the department of terrestrial magnetism, Carnegie Institution of Washington, will give the Harlow Shapley lecture, Thursday, March 23.

This is a public lecture designed for a general audience. Graham will speak on "Comprehending the Universe: Experiment and Observation in the 1980s" at 7:30 p.m., in Small Hall 109. He will describe the way that astronomers are using new instruments and space observatories to study radiation from the universe that was hitherto undetectable from the surface of the earth.

An Australian, Graham has been associated with the Mount Stromlo Observatory; the University of Leiden; and the Kitt Peak National Observatory, Tucson. He is a tenured astronomer at the Cerro Tololo Inter-American Observatory and has been a staff member at Carnegie Institution since 1985. He serves as chairman of the editorial board of the publications of the Astronomical Society of the Pacific.

During his campus visit, Graham will speak on "The Formation of Stars Like the Sun" at the Friday afternoon physics colloquium, which will be held at 4 p.m. in Small Hall 109.

The Shapley lectureship is named for Harlow Shapley (1885-1972), president of the American Astronomical Society from 1943 to 1946 and throughout his life an active member of the Society. Director of the Harvard Observatory for more than 30 years, his research covered a wide spectrum, including especially his studies of variable stars in the Magellanic Clouds and Milky Way fields and work on faint southern galaxies. In the 1930s he discovered the first dwarf galaxies in Sculptor and Fornax, both of them now recognized members of the Local Group.

Not only was Shapley a great astronomer, he played a major role in public life, was instrumental in the founding of UNESCO and was active in the affairs of the International Astronomical Union.

Orchestra soloists

W&M Orchestra to premiere Ursula Mamlok composition

The College of William and Mary Orchestra and the Chamber Orchestra will premiere a work by Ursula Mamlok, a young composer and teacher at the Manhattan School of Music, at their concert at 8:15 p.m., Wednesday, March 29 in Phi Beta Kappa Memorial Hall.

Tickets are \$2.50 and will be available at the box office the evening of performance.

Under the direction of conductor Joel Suben of the music faculty, the musicians will open the program with "Divertimento for Orchestra" by Mamlok.

A native of Berlin, Mamlok came to the United States as a scholarship student, first at Mannes College of Music and later at the Manhattan School of Music. She has won numerous awards including a Koussevitzky Commission from the Library of Congress, a Readers Digest Commission, the Walter Hinrichsen Publication prize from C. F. Peters as well as citations from the American Academy and Institute of Arts and Letters, and Broadcast Music, Inc.

Soloists at the concert will include winners of the Concerto Competitions: Heidi Swanson, violin, a freshman from Norfolk, Va.; and two seniors, Jill Beth Kippax, flute, from New Gloucester, Me.; and Jennifer Lynn Bidlake, oboe, of Springfield, Va.

Swanson, will play "Konzertstück" by Schubert. Kippax and Bidlake will perform a Concerto for Flute and Oboe by Cimarosa with the Chamber Orchestra.

The Chamber Orchestra will also play "La Creation du Monde" by Milhaud and Suite No. 2 by Stravinsky.

The Christopher Wren Singers, a student vocal ensemble, will be featured in two works by Phillip James: "I Know a Maiden Fair To See," a madrigal for unaccompanied chorus on a poem by Longfel-

Ursula Mamlok

low, and "General William Booth Enters into Heaven." James made his setting of this work in 1932, some 20 years after a solo voice setting of the same text by Charles Ives. James' setting is a dramatic montage with a satirical text by Vachel Lindsay.

Angie Wooten (l) Anne Elizabeth Armstrong and Julie Davis in a scene from "Ring Round the Moon."

Armstrong to direct Anouilh play

"Ring Round the Moon," a two-hour one-act comedy by Jean Anouilh will be presented as a Second Season production March 31 - April 2 in the Studio Theatre in Phi Beta Kappa Memorial Hall.

Performances will be given nightly March 31 and April 1 at 8:15 p.m. and at 2 p.m. April 2. There is no admission charge.

The play is a senior directoral project by Anne Elizabeth Armstrong, a senior from Gainesville,

Ga., who has been active in theatre throughout her college career. As a freshman she appeared in the main stage production of "The Robber Bridegroom." During her sophomore year she appeared in "Identity Crisis" for Directors Workshop. Her junior year she directed "This is the Play," for Premiere Theatre and appeared in "Graceland" for Directors Workshop. This year she has appeared in "The Threepenny Opera," and "The Country Wife," and has been publicity director for the William and Mary Theatre.

Olde Guard Day scheduled for April 12

Members of the classes of 1929 and 1934 will hold reunion receptions as part of the program for the Eighth Annual Olde Guard Day, Wednesday, April 12.

Events will be held in William and Mary Hall and will include the Olde Guard Luncheon in the

main arena beginning at 11:45 a.m. The William and Mary Concert Band, the William and Mary Choir and the Tribe Cheerleaders will provide entertainment for the diners.

Class reunions will begin at 2:30 p.m.

In an invitation to Olde Guard members, Lota

Spence Reid '33, chairperson of the Olde Guard Council, notes that this is a special event for graduates.

"Olde Guard Day is special in many ways, but most of all, it's fun!" she writes. "Sharing laughter and memories with friends and classmates, enjoy-

ing the lively entertainment and sumptuous luncheon, experiencing the campus in the freshness and beauty of springtime. ... It all adds up to a day of celebration and good times that you won't want to miss. This is our day when the College honors us for who we are and what we mean to William and Mary."

Newsmakers

Administration

President **Paul Verkuil** is the author of "Separation of Powers: The Role of Law and the Idea of Independence," in the Winter 1989 issue of the *William and Mary Law Review*.

Emily Harbold, associate director of academic support, will present a session titled "Pursuing the Doctorate at Mid Life," at the National Conference on Personal and Professional Renewal for Faculty. The conference, sponsored by the University of Georgia, will be held in Atlanta, April 13-15.

Anthropology

Professor **Mario D. Zamora**, Bjorn B. Erring, University of Trondheim, Norway, and Anthony L. Laruffa, Herbert H. Lehman College, City University of New York, have edited "The Anthropology of War and Peace," for the *Journal of Northern Luzon*, published by St. Mary's College of Bayombong of the Philippines. This edition is the outcome of a symposium in honor of Dr. Elliot P. Skinner, Franz Boaz Professor of Anthropology at Columbia University, and former United States Ambassador to Upper Volta, which was held in Denver, Colo., in 1984. "The Anthropology of War and Peace" will be reprinted in the United States at a future date.

English

Two articles by **Susan V. Donaldson**, assistant professor, have been published in recent issues of *The Southern Quarterly* and *Journal of the Short Story in English*.

Appearing in the summer issue of *The Southern Quarterly* is "Subverting History: Women, Narrative, and Patriarchy in *Absalom, Absalom!*"

The second article, published in the autumn is-

session of *Journal of the Short Story in English*, is titled "Meditations on Nonpresence: Re-Visioning the Short Story in Eudora Welty's *The Wide Net*."

In addition, Donaldson recently delivered papers at three national conferences. At the 1988 Faulkner and Yoknapatawpha Conference in Oxford, Miss., she read a paper titled "Dismantling *The Saturday Evening Post* Reader: The Unvanquished and Changing 'Horizons of Expectations.'"

Her paper for the American Studies Association Conference in Miami Beach was titled "Implicating the Audience: Jean Toomer, William H. Johnson, and Strategies of Subversion."

For the Southern Historical Association Conference in Norfolk, she organized and chaired a concurrent session of the Southern American Studies Association on "Art and the Modern South" and read a paper titled "Katherine Anne Porter, Anne Goldthwaite, and the Craft of Memory."

Esther Stineman, assistant professor, has published a review essay, "Mary Austin Rediscovered" in the *Journal of the Southwest* (Winter 1988).

Fine Arts

Miles Chappell, Chancellor Professor of Fine Arts, was one of the six specialists on Italian drawings giving papers at the symposium "Tuscan Drawings from the Uffizi," sponsored by the Detroit Institute of Arts in connection with the loan exhibition, "16th-Century Florentine Drawings from the Uffizi Gallery."

An article, "Jacob Eicholtz's Portrait of an Italian Nobleman," by Chappell was published recently in the *Southeastern College Art Conference Review*. Chappell formulated and moderated the

session "From Drawings for Finished Works" at the fall conference of SECAC held at Hollins College. He gave a talk, titled "The Legacies of Later Medici Florence," for the Arts Club of Washington, D.C.

Chappell was recently named to the Art Advisory Board of the Interlochen Center for the Arts.

Government

Roger W. Smith, professor, has been named to a three-year term on the board of directors for the Zoryan Institute for Contemporary Armenian Research and Documentation. He attended a two-day board meeting in Cambridge, Mass., in December and was elected chair of the publications committee. The Zoryan Institute is a major scholarly organization with a budget of over \$650,000. Its major projects include: documentation of the 1915 genocide in Turkey; comparative Diaspora studies; an Open University, which presents seminars around the country and in Canada on various aspects of Armenian culture; and Soviet Armenian studies. The Zoryan Institute also publishes a number of special reports and memoirs and assists with production of television and film documentaries.

Smith presented a paper at the 19th annual Scholars Conference on the Holocaust, which was sponsored by the Anne Frank Institute and the U.S. Holocaust Memorial Council. The meeting, chaired by **Alan Berger**, Gumenick Visiting Associate Professor of Judaic Studies, took place in Philadelphia, March 5-7. Smith's paper was titled "Fantasy, Purity, Destruction: Norman Cohn's Complex Witness to the Holocaust."

History

Judith Ewell, Newton Professor of History, has just published "Debt and Politics in Venezuela" in the March 1989 issue of *Current History*.

She recently was reappointed to a second term on the editorial board of the *Latin American Research Review*. Ewell served as a commentator on two panels on civil-military relations in Latin America at the February meeting of the Rocky Mountain Council on Latin American Studies hosted by New Mexico State University.

George V. Strong, associate professor, is among 18 educators and historians who will be presenting papers at the 1989 Symposium of the Virginia Humanities conference to be held April 7-8 at Mary Baldwin College in Staunton, Va.

Strong's paper, "Woodrow Wilson and the Regeneration of Europe: The American President's Interaction with Thomas G. Masaryk in 1917," will be presented during Session I of the symposium at 9:15 a.m., Friday, April 7.

This program is co-sponsored by the Woodrow Wilson Birthplace Foundation and is supported by a grant from the Virginia Foundation for the Humanities and Public Policy. The meeting theme will be "The Treaty of Versailles: The Shaping of the Modern World."

International Studies

James A. Bill, professor of government and director of the Wendy and Emery Reves Center for International Studies, delivered the Lustman Memorial Lecture at Davenport College, Yale University, Feb. 23. His topic was "Iran and America: Ten Years after Khomeini's Revolution."

Physics

On March 15, Professor Hans C. von Baeyer gave the annual Phi Beta Kappa address in Lee Chapel at Washington and Lee University. His subject was "The Goddess and the Cow: On the Human Value of Science." On the occasion, von Baeyer was inducted as an honorary member of PBK.

VIMS scientists give papers at aquaculture conference; awards presented for service, teaching and volunteerism

Professor **Maynard Nichols** presented a keynote paper titled "Sedimentologic Fate and Cycling of Kepone in an Estuarine System," at an international American-European symposium on the fate and effects of toxic chemicals in large rivers and estuaries convened in Quebec, Canada. As a member of the technical organizing committee, Nichols convened a session on transport, deposition and fate of toxic chemicals.

Mary Gibbons, assistant professor; Professor **Michael Castagna**; **Fu-Lin Chu**, assistant professor; and **Jerome F. LaPeyre**, a graduate student, attended Aquaculture '89 in Los Angeles, Calif., and presented the following papers:

M. Gibbons and **B. J. Kemp**, "Comparison of Enumeration Techniques for Eyed Larvae of the American Oyster."

M. Gibbons and F. L. Chu, "Does Tidal Zonation Affect the Intensity and Incidence of *Perkinsus marinus* in Juvenile American Oysters?"

F. L. Chu and M. Gibbons, "Evaluation of the Efficacy of Commercial Microencapsulated Diet for Growth of Juvenile American Oysters."

M. Castagna, M. Gibbons and **K. Kurkowski**, "Remote Setting and Post-Set Strategies for Growing *Crassostrea virginica* in Virginia."

J. F. LaPeyre and F. L. Chu, "Hemocyte and Humoral Activities of Two Populations of Oyster (*Crassostrea virginica*)."

M. Castagna, "History of Clam Aquaculture in U.S."

Chu also chaired the session "Disease and Disease Control" and Castagna chaired a seminar on "Clam Aquaculture, State-of-the-Art" at the meetings.

Professor **Robert J. Huggett** presented a seminar on organic pollutants to the Center for Environmental Health Sciences of the Massachusetts Institute of Technology in Cambridge, Mass.

Awards

Comptroller **Edmund A. Brummer III** was presented a plaque from the graduate students of 1989 in appreciation for his assistance in student affairs. In an interview regarding his award, he requested that **Carol Tomlinson**, VIMS payroll supervisor, also be recognized for her tireless efforts in this endeavor.

Nancy J. Charrier, marine scientist in the Advisory Services, was also presented a plaque from the Student Association for her dedicated service while serving as president of the as-

Ray Morales-Alamo

Dr. Robert George

sociation.

The annual awards ceremonies at VIMS were highlighted this year by the presentation of the Institute's Outstanding Teaching Award to Associate Professor Gene Bureson and the John M. Zeigler Student Achievement Award to graduate student Hilary Neckles.

Reinaldo (Ray) Morales was recognized for 25 years of continuous service to the Institute and the Commonwealth of Virginia. Gloucester veterinarian **Robert George** was presented with a certificate and art print in recognition of his 10 years of volunteer service in the study of sea turtles and marine mammals.

Service awards were presented to **Vinaya Rangappa**, **Vernice Lawson**, **Larry D. Ward**, **Dorothy Maxine Butler**, **Susan W. Carter** and **Gayle K. Layman**, five years; **Maxine N. Lewis**, **Ruth A. Hershner**, **Mary L. Diggs**, **Paul D. Gerdes**, **Roland P. Billups**, **Dennis G. Bunting**, **Betty A. Salley**, **Carl H. Hershner** and **Lavonne A. Allen**, 10 years; and **Teresa W. Haynes**, **Morris H. Roberts Jr.**,

Kenneth A. Moore, and **Claudia B. Walthall**, 15 years; and **Robert G. Huggett** and **Judy G. Hudgins**, 20 years.

Dean Perkins (l) with Eugene Bureson

Moshari wins award for French scholarship

Anouche Moshari, a junior, who has a double major in chemistry and French, has been awarded fifth prize of \$250 in the Joseph W. Yedlicka Scholarship contest sponsored by Pi Delta Phi, National French Honor Society. Ms. Moshari is

the daughter of Mr. and Mrs. H. Moshari of Vienna. She is a member of the International Circle Club, is SA films director, a French drill instructor and is president of the William and Mary chapter of Pi Delta Phi.

Alumnae shine on prime time television

While one network over the weekend was carrying "The Women of Brewster Place," featuring **Oprah Winfrey** and written by alumna **Karen Hall**, the Movie Channel was featuring another alumna, **Glenn Close** in the movie "Fatal Attraction."

Close, who has been nominated for an Oscar for her role in "Dangerous Liaisons," hosted the "Saturday Night Live" show recently with some assistance from **William Hurt**. She has also been a regular on the talk shows, including **David Letterman's** late night show.

Book review

Selby gives definitive view of Virginia during Revolution

The Revolution in Virginia, 1775-1783

John E. Selby

The Colonial Williamsburg Foundation, 442 pp.; \$24.95

By George Tucker

In this handsomely produced book, John E. Selby, William E. Pullen Professor of History and chair of the department of history at the College of William and Mary, has written the most comprehensive account to date of the Virginia aspect of the Revolutionary War. It supersedes H. J. Eckenrode's *The Revolution in Virginia*, published 73 years ago and until now regarded as the best account of the subject. It amplifies Eckenrode's chronicle greatly and, for reasons of research and readability, easily takes the place of the earlier book.

This is not meant to disparage Eckenrode's effort, in which he tried to cover his subject as comprehensively as possible. During the years between the time Eckenrode published his account and the time when Selby began his research, however, thousands of pertinent documents unknown to Eckenrode surfaced. These have enabled Selby to write and annotate what undoubtedly will be long regarded as a well-nigh definitive account of what went on in Virginia on all levels during the Revolution.

Selby's book has had a long period of gestation. His research for his *Chronology of Virginia and the War of Independence* (1973) and his *Dunmore* (1977), an account of Virginia's last royal governor, both written for the Virginia Bicentennial Commission, persuaded him that a more detailed chronicle of Virginia's participation in the long

revolutionary struggle with the Mother Country was needed.

Giving full credit to Eckenrode and even earlier scholars for their efforts to present as complete an account of Virginia's revolutionary history as was possible when they wrote, Selby went further and made use of every scrap of information relating to his subject that had surfaced since Eckenrode's book was published in 1916.

This involved countless hours of patient research in British and French archives, where considerable material on his subject has been preserved, as well as in libraries, public records and private collections of Revolutionary War materials in this country.

The result is not a book that will please some American patriotic societies that are inclined to regard the American Revolution as a Jehovah-directed contest between the good guys (i.e., the eventually victorious colonists) and the bad guys

(i.e., the British).

Rather, Selby presents a sharply focused picture of many of the self-styled Virginia patriots (now regarded as ancestral paragons) as opportunists or rabble-rousers who had everything to gain from a separation from British rule. This indictment does not include those Virginians of the Age of Enlightenment such as Washington, Peyton Randolph, Jefferson, Madison and others of their class and mentality who envisioned things more clearly.

Unlike the rabble, these superior men, as well as many other Virginians who thought along the same lines, clung to the possibility of remaining in the British Empire almost until the final acts of oppression by a hostile home government led them to approve of — and in some instances sign — the Declaration of Independence.

Fortunately, the superior Virginians referred to managed to keep a firm hand on the political tiller from the time the breach was made and throughout the trying times of the American Revolution. The result was that the political changes that Virginia's leaders achieved — creating an independent state, disestablishing monarchical rule and eventually abolishing the established church — had enormous consequences for the future of America.

Beginning with a detailed description of how Virginia defeated Lord Dunmore and the royal rule with a minimum of outside help, and continuing through the Treaty of Paris in 1783, which guaranteed Virginia and the other colonies their independence, Selby's book is a major summation of the role played by the Old Dominion in the struggle that ended in making us a nation.

Amplified with 83 pages of scholarly, but eminently readable, notes; an 11-page bibliographical essay on his sources; and a 21-page, double-

John Selby

column index, Selby's book is a triumphant combination of solid research expressed in felicitous prose.

George Tucker is a Norfolk historian and newspaper columnist. He has donated some of his Jane Austen research material to Swem Library.

Program to foster links among W&M, NASA-Langley, CEBAF

Continued from page 1.

ties. Examples include improving aramid fibers used for tire cord and bullet-proof clothing, developing processing techniques for manufacturing lightweight polymeric composite materials to be used in structural components of airplanes and understanding degradation mechanisms in plastics.

Quantitative materials characterization involves the application of scientific principles to the testing and monitoring of materials. Students will develop methods that work without perturbing the object being studied. This is known as nondestructive evaluation or NDE. Many of the techniques employed, such as laser interferometry, x-ray tomography and photoacoustics are at the forefront of technology.

Some aspects of the quantitative materials characterization will focus on "smart materials," that is, materials with sensors imbedded within them to monitor aging and fatigue to signal potential failure. Research in this part of the applied science program will be carried out in collaboration with NASA's materials characterization instruction section, headed by Joseph S. Heyman, who is adjunct professor of physics at William and Mary. Heyman's research group works in the non-destructive evaluation laboratory at NASA-Langley, a state-of-the-art facility completed in Nov. 1988.

The accelerator science component of applied science will make extensive use of the facilities and personnel of CEBAF. Graduate students in

this program will learn about the design and operation of accelerators. Some graduates from this area will probably be among the projected 2,200 scientists and engineers to be employed at the superconducting supercollider (SSC) to be built in Texas. Other graduates will work at other large accelerator facilities in this country and elsewhere as well as in institutions such as hospitals where accelerators are playing an increasingly more important role in the diagnosis and treatment of diseases.

Some of the research on surface science, the fourth area proposed for applied science, will be closely related to activities at CEBAF. The surface characteristics in the accelerator, which will be subjected to intense electric fields and temperatures near absolute zero, must be maintained within very narrow limits for the facility to operate.

Related topics for students in the physics department and at CEBAF will be the field emission of electrons; compact, tunable ultraviolet and x-ray sources; and the development of intense electron sources that can be modulated at very high frequencies from photoemissive surfaces.

Endorsements for the new applied science program are impressive.

Hermann Grunder, director of CEBAF, has given his wholehearted endorsement to the program. In a letter to President Paul Verkuil, Grunder said, "We consider such a program timely and in the interest of the research community, and the nation's technological manpower base. Needless to say, that its aims are quite ambitious and that its

realization would constitute a significant success. There are a number of CEBAF scientists who could greatly contribute to all of the program's area except that of polymer science, and who in turn could profit from the interdisciplinary professional interaction and exchanges that could take place within the framework of this program."

Richard H. Petersen, director, NASA-Langley Research Center also strongly supports the plan. In a letter to President Verkuil, Petersen says, "It is to the benefit of both institutions to see further advancement in nondestructive measurement sciences for quantitative materials characterization, polymer science, and surface science. ... I am confident that members of our staff will want to obtain advanced degrees in this program and that other students in the program will find our Center an exciting place to work. The proximity of our two institutions will provide the opportunity for synergistic activities in applied science, which will benefit both our organizations."

In his three-year report, published last fall, President Verkuil emphasized the university's commitment to science. "In an increasingly complex world, most of the pressing problems have solutions that are inherently scientific and technological. This leads us to recognize that a liberal education must include excellence in the sciences."

The new applied science program is the result of almost two years of preliminary studies and planning by an ad hoc committee known as GRASP — the Group to Revitalize the Applied

Science Program. Its membership included Roy Champion, Harlan Schone and Robert Siegel from physics; Joseph Heyman from NASA; David Stanford from mathematics; Richard Prosl from computer science; David Thompson, Richard Kiefer and Robert Orwoll from chemistry; David Kranbuehl, associate provost for research; and Robert Scholnick, dean of graduate studies.

GRASP sought advice from three outside consultants: Arden Sher of SRI International and former director of the master's program in applied science; Robert Green, director of the Center for Nondestructive Evaluation, Johns Hopkins University; and Byron Pipes, dean, College of Engineering at the University of Delaware. GRASP's proposal for the Ph.D. program was approved by the Faculty of Arts and Sciences in Feb. 1988 and by the Board of Visitors at its spring meeting.

Orwoll and Dean Scholnick completed the College's formal proposal for submission to SCHEV in June. In December, SCHEV granted the College authorization to implement the program.

The search committee for the new director, chaired by Orwoll, includes Grunder; Petersen; Scholnick; Stephen Park, professor of computer science; Robert Welsh, chairman and professor of physics; and David Thompson, chairman and professor of chemistry.

While the Ph.D. program is being established, the applied science master's program is being revitalized. In recent years this program has been inactive. However, the program will enroll candidates again in the fall.

Grayson reports educational actions during General Assembly session

In a letter to colleagues on campus, George W. Grayson, professor of government and a member of the Virginia House of Delegates outlines issues of concern to the College in particular and higher education in general that were addressed in the 1989 session of the General Assembly.

As usual, budgetary issues greatly affected institutions of higher learning. Thanks to the incredibly effective efforts of Rector Watkins, President Verkuil, Provost Schiavelli and Jim Kelly, William and Mary faculty members have been grant-

ed a 9.3 percent average salary increase — the second highest among state institutions of higher education. Part-time professors, graduate teaching assistants and administrators will be eligible for a raise that averages 5.9 percent.

Meanwhile, classified employees will receive a 3.25 percent raise on July 1, as well as a 4.5 percent increase on their evaluation date. The proficiency component benefits the two thirds of classified workers who have yet to reach the top of their scale. Members of the General Assembly, led by Hampton's Senator Hunter B. Andrews, have

worked assiduously to close the gap between compensation in the public and private sectors.

The budget bill contained additional appropriations for the College — namely, \$400,000 to buy classroom and office equipment for the newly renovated Blow Gymnasium, \$378,000 to plan construction of Tercentenary Hall to house the geology and computer science departments, \$325,000 to build a 3,000-square-foot child care facility for 50 children of employees, \$500,000 for the geographic education program, \$147,000 to commemorate events in connection with the College's

300th anniversary, \$106,980 for an electronic library and \$54,251 to purchase equipment maintenance contracts.

Funds appropriate for housing needs included \$7.7 million to build residences for 230 graduate and upper-class students, \$2.2 million for renovations to several older dormitories and \$8.9 million to construct dormitories for 400 undergraduates. Lottery proceeds designated for capital projects, totaled \$78.4 million for construction of Tercentenary Hall, \$3.8 million for renovation of Washington Hall and \$885,000 for Matoaka Lodge.

Danforth Foundation gift helped establish department of religion

Continued from page 3.

The department of religion was established in the fall of 1968 and is the second youngest department at the College. Beginning with two full-time faculty members, it currently numbers eight and teaches all the major religious traditions, ancient and modern, eastern and western.

From its outset, the department's task has been to contribute this new field of study to the Col-

lege's long-standing mission of general education in the humanities, encompassing many fields of study including history, literary-textual studies, philosophy, ethics and social-scientific analysis.

Since its inauguration, the department has included on its teaching staff, in addition to its tenured members, 29 visiting scholars, many of whom have international reputations. The department regularly enrolls 650 students a semester in its courses, which have grown from six annually to 42.

Since 1973, when the concentration in religion

was initiated, the department has graduated close to 150 concentrators, 20 of whom are seeking graduate degrees in programs recognized as the best in the country. But religion concentrators also regularly pursue careers that include business, law, medicine, journalism, police work, the health sciences and social work. The department graduates on average 10 students a year; they tend to be in the top 20 percent of the graduating class.

The Danforth Foundation of St. Louis, Mo., helped underwrite a portion of the cost of estab-

lishing the new department in 1968. Many gifts since have assisted the department in a number of ways. Gifts have enabled the establishment of the Walter G. Mason Professorship in Religion, currently held by James C. Livingston, the department's first chairman. The Sophia and Nathan S. Gumenick Visiting Associate Professorship of Judaic Studies is currently held by Alan L. Berger, an authority on the literature, pedagogy and theology of modern Judaism, especially in America. He is on leave from his post as chairman of the Jewish Studies Program at Syracuse University.

Summer programs for gifted offer variety of curricula

Continued from page 1.

Students will register for two regularly scheduled William and Mary courses offered during the second summer session. A counselor will be assigned to these students to assist with residence hall life and to organize recreational opportunities. Total cost for the Pre-Collegiate Program is \$1,700.

The commuter program for gifted learners ages 4 through 12 will be held from June 26-July 7. Classes will be held daily (except on July 4) in the morning. Course offerings include early academic enrichment, animal classification, art, computers, French, geography, problem-solving, reading and writing, science and Spanish. The course fee for this program is \$140 plus a \$10 non-refundable application fee. Application deadline for this program is May 15.

Further information and application details may be obtained by contacting Joyce VanTassel-Baska, William and Mary Gifted Learner Program, College of William and Mary, Williamsburg, VA 23185, ext. 5258.

Medieval, Renaissance lecture series inaugural Marie de France is subject of lecture by Maréchal lecture

Professor Chantal Maréchal of West Virginia University will give a public lecture titled "Marie de France's *Milun*: A Society between Myth and Reality," at 4 p.m., Monday, March 27 in the Friends' Room on the ground floor of Swem Library.

The lecture will be followed by a reception from 5 to 6 p.m., in the Botetourt Gallery adjoining the Friends' Room.

Both the lecture and reception are free and open to the public.

Maréchal's campus visit is sponsored jointly by the departments of history and modern languages and by the Charles Center for Interdisciplinary Studies. It is also supported by the Committee on Medieval and Renaissance Studies and inaugurates what the committee hopes will become an ongoing series of lectures on various aspects of medieval and Renaissance culture.

Maréchal, a native of France, was educated in France and the United States. She holds a Ph.D. from the University of Michigan and is a specialist in medieval French literature, particularly Marie de France. Her lecture will explore the interplay between literary and social aspects in one of Marie's "Breton lays."

Marie de France lived and wrote in the English court of Henry II in the late 12th century. She left several works in Anglo-Norman, the Old French dialect of medieval England. She is the earliest woman poet in the French language and the probable inventor of the short verse romances known as "Breton lays." Her works are being studied in two classes at the College this semester: History 491C-05, "Women in the Middle Ages," taught by Maryann Brink, assistant professor of history; and Comparative Literature 311, "Courtly Love in Medieval Literature and Society," taught by Don Monson, professor of modern languages.

Faulkner scholar to discuss 'The Artist as Cuckold'

Noel Polk, professor of English at the University of Southern Mississippi, will speak on "Faulkner: The Artist as Cuckold," at 4 p.m., Tuesday, March 28 in Tucker 120.

Open to the public, the lecture is sponsored by the College Lecture Committee, the department of English, the Charles Center for Honors and Interdisciplinary Studies and the Commonwealth Center for Study of American Culture.

A leading scholar in Faulkner studies, Polk is the author and editor of numerous books, including *William Faulkner's Requiem for a Nun: A*

Critical Study, Intertextuality in Faulkner, An Editorial Handbook to Faulkner's The Sound and the Fury, Sanctuary: The Original Text, An Anthology of Mississippi Writers, and Black Religion in the South.

In addition to editing concordances for several Faulkner novels, Polk has also prepared texts for the Library of America's publication of *William Faulkner: Novels 1930-1935* and its upcoming second volume on Faulkner, including *Absalom, Absalom! The Wild Palms, The Unvanquished* and *The Hamlet*. He is currently serving as one of four editors of a 44-volume facsimile edition of the Faulkner manuscripts and typescripts at the University of Virginia and the New York Public Library.

Thomas plans senior recital

Lisa Thomas, mezzo soprano, will present her senior recital at 8 p.m., Tuesday, March 28 in the Ewell recital hall.

Her program will include works by Mozart, Berlioz, Strauss and Bernstein. Lisa has studied with Mary Fletcher for the past four years.

As a music and psychology double concentrator, Lisa has endeavored to combine her two areas of interest in an Honors thesis. She has been active in a number of campus activities. She has directed a handbell choir, coordinated the Baptist Student Union's creative ministry team, been a member of the William and Mary Women's Chorus and the BSU choir and accompanist at a local church. Lisa presented a junior recital last spring.

Christine Cochrane, a senior music concentrator, will be accompanist. Christine recently presented a senior recital and gave a performance for the Town and Gown luncheon group earlier this month. Christine is a member of the William and Mary Choir.

Lisa Thomas

Hospital careers topic for Bernd

The Office of Career Services will sponsor an informational session on careers in hospital administration at 4 p.m., Thursday, March 23 in Morton 141.

David L. Bernd '71, executive vice president and chief operating officer, Sentara Health System, will be the principal speaker.

David Bernd

Bernd is responsible for the operating divisions of a \$415 million dollar health care corporation, including bottom-line performance, board governance, medical staff activities and new business and joint ventures for these divisions. He is the 1984 recipient of the American College of Hospital Administrators' Robert S. Hudgens National Young Hospital Administrator of the Year Award.

For further details, please call the Office of Career Services, ext. 4604.

Linguistics scholar to speak March 30

Dell Hymes, Kenan Professor of Anthropology at the University of Virginia, will present a lecture on "Ethnopoetics" at 4 p.m., Thursday, March 30 in Tucker 120.

Professor Hymes is the foremost linguistic anthropologist in the country and is regarded

worldwide as a leader in his field. He is the author of many books, including *Pidginization and Creolization of Languages, Languages in Culture and Society, Directions in Sociolinguistics, American Structuralism and Studies in the History of Linguistics.*

The Percussion Group/Cincinnati

Percussionists to include work by William DeFotis

With a concert Friday, March 31, The Percussion Group of Cincinnati will close out the 1988-89 concert series at the College.

The percussion group will perform at 8:15 p.m. in Phi Beta Kappa Memorial Hall. The concert series is fully subscribed; however, the seats of season ticket holders not claimed by 8 p.m. will be sold on a first-come, first-served basis at the box office. Tickets are \$5.

The program for March 31 will include "Continuous Showing" by William DeFotis, assistant professor of music. This work is propelled by the disunion of sounds from their sources — a sort of musical ventriloquism — and by each event being at odds with its placement in time, appearing as if it were a segment from another piece.

The group will also play "Les Moutons de Panurge" and two works by John Cage, "Imaginary Landscape II" and "Living Room Music."

"Drumming, Part I" by Steve Reich, four Chilean songs arranged by the group and "Marimba Spiritual" by Minoru Miki will also be included in the performance.

Over the past decade the Percussion Group of Cincinnati has become one of the premier musical ensembles of its generation. The trio of virtuoso musicians has sparked the imagination of audiences and composers alike with concerts described as "aural and visual delights." As a recent

Washington Post review declared, "theirs is an intense, vigorous music making."

Founded in 1979 by Allen Otte, an original member of the Blackearth Percussion Group, trio members Otte, James Culley and Benjamin Toth are faculty and ensemble-in-residence at the University of Cincinnati's College Conservatory of Music.

The group uses such unusual sound-generating devices as tuned sewer pipes, amplified cactus needles, trash cans, tin cans and computers to supplement the sounds of traditional drums, cymbals and bells.

The group's busy international schedule includes formal concerts, recordings of classical and avant-garde percussion pieces, community concerts of family-oriented programming and outdoor summer events. The group also offers instrumental lecture-recitals or advanced master classes. Their uniquely educational and entertaining program for school children is titled "Music from Scratch."

This unusual trio of musicians follows a highly popular schedule of concerts this season, which has included the Stuttgart Radio Symphony, the Elisa Monte Dance Company, "La Traviata" by the New York City Opera and the Empire Brass. The concert schedule for 1989-90 has not yet been announced.

Notes

Classics film

The department of classical studies and the Classics Club will host a performance of Aeschylus' "Agamemnon" by a group of classical drama students from University College, London, at 7:30 p.m., Saturday, March 25 in the Ewell Recital Hall.

Saturday flick

The William and Mary Film Society will present "Knife in the Water," the first feature film by director Roman Polanski of "Chinatown" and "Frantic" fame, at 7 p.m., Saturday, March 25 in Millington auditorium.

Admission is \$2 or free with a Film Society season pass.

Lee's Retreat

Richard Bland College and the Petersburg

National Battlefield are co-sponsoring the spring tour for Civil War history buffs Saturday, April 8. The tour follows the line of Lee's retreat from Petersburg to Appomattox

The bus tour begins at 8 a.m. and returns to RBC by 5 p.m.

Persons interested in reserving a place on the tour should send a check for \$22 (includes transportation, admission fees and lunch) made out to Richard Bland College, and addressed to Civil War Tour, Richard Bland College, Petersburg, VA 23805.

RBC internat'l forum

Yugoslavia's ambassador, the Honorable Zivovrad Kovacevic, will give a public address this evening at 7:45 p.m. in the Student Center at Richard Bland College, Petersburg, to open the annual International Forum sponsored by RBC's government department.

Ambassador Kovacevic will discuss his

country's relations with both the Soviet Union and the United States.

In April the Forum will feature two speakers, Ryszard Krystosik, minister plenipotentiary of the Polish People's Republic, who will speak on April 12, and Dr. Richard A. Wilford of Queen's University, Belfast, Northern Ireland, who will speak April 19.

All lectures are at 7:45 in the Student Center and are open to the public without charge.

Associate program for women students

The Virginia Association of Female Executives, a non-profit organization promoting women and careers, has initiated an associate program for female students in their last year of undergraduate study through Ph.D. candidacy.

The program pairs a student with a woman professional who serves as the mentor in career, professional or other interests. The VAFE organization is seeking interested William and Mary students who would like to participate. A \$3,000 scholarship will be offered to selected students.

Applications are due by March 31. Information may be obtained at either the Office of Career Services, Morton 140 or the Student Financial Aid Office on the second floor of James Blair Hall.

Summer jobs

Counselors

Residential counselors are needed for the Summer Enrichment Program for Gifted and Talented Adolescents, June 19-July 1.

Contact Brad Elison at the School of Education, ext. 4562 for more information.

CTA internship

CTA Incorporated of Newport News anti-

pates an opening for a half- to full-time summer intern in its NASA Langley Research Center Space Station Freedom system engineering support program.

This is an opportunity to work in the aerospace industry on the nation's foremost civilian space initiative, in areas related to on-orbit operations and/or NASA's technology development research program.

Candidates with the following qualifications are encouraged to apply:

Education: B.A. or B.S. in computer science preferred; mathematics, physical science or engineering discipline also considered.

Experience: software development in MS-DOS environment required; DBMS applications development (e.g., dBase, R-base) under MS-DOS required; ORACLE experience desirable; C and/or FORTRAN programming experience desirable; UNIX experience desirable.

Work period and salary negotiable. Please send resume to: Ms Jackie Rose, CTA Incorporated, 11847 Canon Blvd., Suite 12, Newport News, VA 23606.

Jobs on Golden Pond

Summer jobs are available at Rackywoold-Deephaven Camps, Inc., on the Squam Lake, in Holderness, N.H., where "On Golden Pond" was filmed.

The resort holds 360 guests and has been in operation since 1986.

Positions available include: office positions as receptionists, drivers, and harbor masters, and personnel in maintenance, food services and recreation assistance.

Room, board and laundry are provided for the 65 employees as well as wages. Workers are expected to live at the resort from June to September.

For more information and application form, look in the Summer Camps notebook in the Career Services library or ask Deb Young, librarian, for assistance.

Committee on Degrees Petitioners

The Committee on Degrees will have only two more regular meeting dates this semester and will not meet again until fall.

All undergraduates who plan to petition for waivers of or changes in degree requirements must do so no later than April 4 (for the April 11 meeting) or April 18 (for the April 25 meeting).

Petition forms are available in the Office of the Dean of Undergraduate Studies (James Blair 112) from Mrs. Pearson. All petitions must be typed and must be accompanied by a letter from the appropriate department chairperson.

Special handling for special summer courses

Students who wish to take summer courses elsewhere which meet for fewer than four weeks or 37.5 contact hours also need a summer session elsewhere form, course description, course evaluation by the appropriate W&M department chairperson and a statement in the petition dealing with the educational value of that particular course in the student's four-year educational plan.

Sharon Reed, associate registrar
Wendy Pearson, recorder, Committee on Degrees

Classified Advertisements

Classified ads are included as a service to members of the College community and will be accepted from faculty, staff, students and alumni only. The fee for ads is \$3 for three consecutive issues. Ads should be no longer than 40 words and must be submitted, in writing and with payment, to the William and Mary News office no later than 5 p.m. on the Friday preceding the first insertion. Corrections must be made before the second insertion. Any change is considered a new ad.

FOR SALE

Please help a graduating senior. Buy a 1981 Honda Passport for only \$300. Good condition. Call Elizabeth, ext. 5513 or 220-5650. (4/5)

1977 Toyota Corolla. Automatic transmission, cream color. \$600. Call 565-0859. (4/5)

2-story brick colonial in Kingswood. Wooded 9/10-acre lot, 2,400 square feet, 2-1/2 baths, 4 large BRs plus office or nursery upstairs. Colonial white picket fenced back yard, kitchen vegetable garden. \$179,000. Available July 1989. Call 229-9371 after 6 p.m. (4/5)

Tandy CM-5 RGBI color computer monitor, brand new, never used; \$225 (reg. \$300). Cherry wood arm chair, rush seat, 44" high back; brand new; \$250 (reg. \$465). Call N. Watson, ext. 4242, or 229-0529. (3/29)

Immaculate custom-built ranch on nearly one acre, off Jamestown Road, only three miles from College and shopping. Quiet, wooded. Three large BRs, 2-1/2 baths, living room with fireplace, formal dining room, study, family room, huge kitchen. \$142,900. Call Sancetta, 229-3333. (3/29)

One-week Hawaiian vacation package, including hotel and airfare for two. Retail value \$2,450. Must sell for \$2,250 or best offer. Call Darlene, 220-5612. (3/29)

FOR RENT

Summer sublet. Furnished bedroom in 2-BR apartment. 2-1/2 miles from campus, on bus line. AC, dishwasher, pets allowed. Available May 1 through July 31. \$217.50 per month. Rent and dates negotiable. Call 220-5676. (4/5)

Apartment for sublet. Four rooms including kitchen and storeroom. A/C, pets allowed. \$260 per month plus electricity. Available May through August. Call 220-3794 after 7 p.m. (4/5)

Jamestown Commons, 2-BR condominium in quiet building; less than two miles from campus. AC, washer/dryer, dishwasher. \$475 plus utilities. Available June 1. Call Al Albert, ext. 4360, days; or 229-6430, evenings. (3/29)

4-BR furnished house, 2-1/2 baths, living room, kitchen, dining room, sunroom, washer/dryer. Two blocks from CW. \$700 per month plus utilities; deposit

of one month's rent required. Call John Lewis, collect: 703-348-5881, 9 a.m.-noon; 703-348-5157, 9 p.m.-midnight. (3/29)

Two furnished BRs available through Aug. One bath, washer/dryer, full house privileges. Two blocks from CW. \$185 per room plus utilities; deposit of one month's rent required. Call John Lewis, collect: 703-348-5881, midnight-9 a.m.; 703-348-5157, 9 p.m.-midnight. (3/29)

Typing, resumé, housecleaning, house-sitting, errands, shopping service, manicures and special-event hosting. Call 874-3320. (3/29)

Employment

Informational interviews will be held in the Office of Personnel Services each Thursday from 9 a.m. to noon on a first-come, first-served basis. This is an excellent chance to learn more about employment opportunities at the College and VIMS.

The following positions at the College are open to all qualified individuals. Call 229-JOBS for a 24-hour-a-day listing of vacancies, or visit the Office of Personnel Services, Thiemes House, 303 Richmond Road, for information and application forms, Monday-Friday, 8 a.m.-4 p.m. All applicants must submit a completed Commonwealth of Virginia Application form to the Office of Personnel Services.

The College of William and Mary is committed to the principles of equal opportunity and affirmative action in the employment of faculty, administrators and non-academic personnel. This policy was reaffirmed by the Board of Visitors on Nov. 4,

1988. It is the policy of the College not to discriminate against any employee or applicant for employment on the basis of race, sex, color, national origin, religion, age, handicap, disability, veteran's status or political affiliation. It is also the policy of the College to implement appropriate affirmative action initiatives.

Notice: In accordance with the Immigration Reform and Control Act of 1986, effective immediately, all individuals hired for positions at the College of William and Mary or the Virginia Institute of Marine Science will be required to produce the following: either (1) one document establishing both U.S. employment authorization and identity (such as Alien Registration card with photograph, U.S. passport, certificate of U.S. citizenship, certificate of naturalization or unexpired foreign passport with attached employment authorization); or (2) one document establishing U.S. employment eligibility (such as original Social Security card, birth certificate or unexpired

INS employment authorization) and one document establishing identity (such as driver's license or U.S. military card). If the employee cannot produce the required documents within three business days of hire, he/she will be subject to removal.

Deadline for applying for the following positions is 5 p.m., March 24, unless otherwise indicated. Postmarks will not be honored.

GROUND FOREMAN (Grade 6) — Entry salary \$15,168. #502. Location: Facilities Management.
