VOL. I WILLIAMSBURG, VIRGINIA, MONDAY, APRIL 30, 1934 NUMBER 8

## FIFTEEN YEARS OF PROGRESS SHOW PHENOMENAL DEVELOPMENT AT W.&M

Physical Plant Now Valued at \$4,500,000 Not Including the Wren Building, Brafferton and President's House.

1200 ACRES IN CAMPUS

Curriculum Broadened and Academic Standards Have Steadily Advanced.

Dr. J. A. C. Chandler came to William and Mary as president on July 1, 1919. This article will outline the development of the College during his administration of 15 years which will be appropriately celebrated here on Alumni Day, June 9th.

Three new buildings had been erected on the campus since he had graduated here in 1892. They were a gymnasium, a library and a science hall. These buildings plus the Wren Building, the President's house and the Brafferton and a few others erected during the past seventy-five years comprised the physical plant at William and Mary.

Dr. Chandler started on his new work with characteristic energy and a vision of what could be done here. He had three specific things in mind—first, to build up the College physically—second, to bring a learned and hightype faculty to the new College and third, to select students for the College who would fit into the atmosphere here and who could assimilate the traditions at William and Mary.

### The Physical Development

The physical property at William and Mary is today valued at \$4,500,000. The Wren Building, the President's House and the Brafferton are, of course, priceless, and only the cost of restoring them, \$740,000 is included in the above valuation. In twelve months \$650,000, granted by the Federal Government, will be spent in erecting the new Taliaferro dormitory for men, the Marshall-Wythe Hall for classes and for administration offices, a student's activity building, and an athletic stadium. For this entire building program during Dr. Chandler's administration the State of Virginia has appropriated around \$2,000,000. The remainder, \$3,150,000 has been secured by Dr. Chandler from other sources.

The buildings erected or shortly to be erected during his administration are: Phi Beta Kappa Hall, \$130,000; Library, \$150,000; Rogers Science Hall, \$325,000; Blow Gymnasium. (Continued on page 4)

## PROGRESS IN SCIENCES AT THE COLLEGE REACHES HIGH POINT SINCE 1919

William Barton Rogers Hall Named for Famous Alumnus of William and Mary and Founder of M. I. T.

The teaching of the Sciences at William and Mary has received a great deal of attention by Dr. Chandler during his administration and it is not too much to say that these departments, Physics, Biology and Chemistry, have shown greater improvement during the past fifteen years than any other departments in the College.

Dr. R. C. Young in physics, Dr. Donald W. Davis in biology, Dr. R. G. Robb and Dr. W. G. Guy in chemistry, are outstanding in their fields and we present herewith an account of the departments represented by them.

The William Barton Rogers Science Hall which houses the departments of physics and chemistry was completed in 1927. It is a memorial to the alumnus of the College who founded the Massachusetts Institute of Technology. The building is a three-story fireproof structure which combines usefulness and architectural beauty in an unusual way. The inside is of hard brick finish with red tile floors. Each of the three stories has approximately 13,500 square feet of floor space. The walls of the building are so constructed that they are poor conductors of heat. This makes the building easy to heat in winter and tends to keep it cool in summer.

It was considered better to have one large building for the teaching of physics and chemistry, rather than two small buildings, as is the case in many colleges. The chief objection to having one building for physics and chemistry is that the chemical fumes are likely to damage the delicate physics apparatus. This difficulty was obviated by making the first floor, which is occupied by the physics department, entirely separate from the rest of the building, with separate entrance.

Rogers Hall, as it is usually called, cost \$300,000 completely equipped with furniture and apparatus. Of this sum the General Education Board gave \$150,000 and admirers of (Continued on Page 4)

DR. J. A. C. CHANDLER

Whose 15th Anniversary as president of William and Mary will be celebrated June 9.

## TO INAUGURATE CUSTOM OF ENCIRCLING WREN BUILDING ALUMNI DAY

Traditions and History of William and Mary Are Centered In This Ancient Building.

Many colleges much younger than William and Mary have some custom based on tradition that is carried out on Alumni or Homecoming Day and cherished by both alumni and students. In spite of the great age of William and Mary and the many traditions of her history no such custom is practiced here except the one of presenting Latin verses each year to the Governor of Virginia in payment of quit-rents as provided for in the ancient Charter of the College.

Much thought has been given by interested alumni on the matter of establishing some custom here to be observed each Alumni Day or Homecoming Day in the fall so that it (Continued on Page 3)

## TO ALUMNI OF DR. CHANDLER'S PERIOD

You represent one of the most important eras in William and Mary's history. In your day the College that was loved and cherished by those who were here before you, has taken on new life and has become one of the leading colleges in America. It must be a source of pride to you that you were here during this great development.

On June 9th, Alumni Day, the alumni as far back as 1873 will gather here to honor the alumnus of the College, Dr. J. A. C. Chandler, whose super-human efforts and a devotion unsurpassed have made our College a source of pride to every living alumnus.

You are over 4000 strong and June 9th will be your day at William and Mary. Of course you will be here for that day to meet your classmates and to join with representatives of the 2000 living alumni who were here ahead of you, in expressing to Dr. Chandler the gratitude of both alumni groups for his wonderful work for our Alma Mater.

Write to the Alumni Office that you will be here. If you can't come write anyway and let us know that you will be with us in spirit.

(Continued on page 2)

## ALUMNI DAY CELEBRATION JUNE 9th TO HONOR DR. J. A. C. CHANDLER

### ATHLETICS AT W&M KEEP PACE WITH DEVELOPMENT DURING PAST 15 YEARS

Teams in Major Sports Have Won 61 Per Cent of All Contests Played.

The first football team at William and Mary was organized in 1893 with H. G. Humphreys, '94, now a retired Army Surgeon living in Philadelphia, as its captain. Both football and baseball struggled along at the College through the 90's but it was not until 1900 that both became firmly established. For the next 19 years our teams met the enemy whenever they could, did the best they could, and while they won quite a few victories, they took more lickings than anything else. Oscar L. Shewmake, '04, scored the first William and Mary touchdown ever made on Richmond College. This was in 1901 and next year Shewmake broke his leg and the 1902 game with Richmond College was cancelled. Three baseball games in 1902 went hay-wire as follows: William and Mary 0 - Washington and Lee 40; William and Mary 3-Randolph Macon 18; William and Mary 1-University of Virginia 27. By 1904 William and Mary was hitting her stride in baseball and has had good teams ever since.

All honor is due to the athletes at William and Mary from 1893 to 1919. They were nearly always up against overwhelming odds but fought valiantly for their Alma Mater.

With Dr. Chandler's coming to William and Mary in 1919 athletics took on new life along with everything else at the College. He was sympathetic with the aspirations of the alumni and students to put athletics on a more successful and permanent basis. His interest and sympathy together with large enrollments at the College produced entirely different results. William and Mary became a power in intercollegiate athletics both in the State of Virginia and outside. Dr. Chandler rarely ever misses an athletic contest at the College, attends many away, knows every man on every team at the College and urges them always to higher scholastic endeavors.

Ten years ago an Athletic Committee composed of three faculty members, three students and three al (Continued on page 3)

His Fifteenth Anniversary As President of William and Mary To Be Appropriately Observed.

ASHTON DOVELL ORATOR

Classes From '20 to '33, Class of '92 and Class of '09, To Hold Reunions.

June 9th will mark another milestone in the long and honorable history of William and Mary. On this Alumni Day will be celebrated the 15th anniversary of Dr. Chandler's presidency at the College. The alumni of the College will express their appreciation and gratitude to Dr. Chandler for his monumental labors during the past 15 years.

The program for the day, printed elsewhere in the Gazette, provides for the annual meeting of the Alumni Association when officers for the ensuing year will be elected and general business transacted.

At 11:30 A. M., will be held the meeting to honor Dr. Chandler, Ashton Dovell, '08, will deliver the alumni address and his ability as an orator and his intimate knowledge of Dr. Chandler's administration insure an interesting and enjoyable address. Immediately after Mr. Dovell's address the faculty of the College will take part on the program to be followed by representatives of the student body.

After this meeting memorial exercises will be held at Col. Ewell's grave, to Col. Ewell and to the alumni who have died since last year.

At 1 P. M. a dinner will be served on the campus to the alumni and their friends, the faculty and students.

At 2:30 P. M. class reunion meetings will be held in rooms in the Wren Building and in the Brafferton.

After the class reunions opportunity will be given to visit places of interest in Williamsburg, chief of which will be the Governor's Palace, the Capitol and the Raleigh Tavern.

At 5 P. M. the alumni will gather in front of the Wren Building for a program of songs and music to be given by the Music Department under Professor Small. At the conclusion of this program alumni will form a circle around the Wren Building and sing the Alma Mater song. A reception and informal dance in the Blow Gymnasium from 8 to 11:30 (Continued on page 4)

## 85,000 Books In Library Here Paintings Valued at \$75,000

For 213 years the library at William and Mary was located in the Wren Building and it served the small enrollment at the College very well. Three fires in this building took their toll and many precious books and documents were lost forever.

In 1908 under Dr. Tyler's administration, a separate library building was erected with funds donated by Mr. Andrew Carnegie and from other friends of the College. It was considered a beautiful building in its day and entirely adequate for the number of students then.

When Dr. Chandler came to William and Mary in 1919, realizing that a library is the very heart of an educational institution, he set to work to increase the library's facilities and to build it up to the point

where it would be worthy of the institution that he had in mind to build here.

Accordingly, in less than two years after his inauguration he secured a gift from the Carnegie Foundation that enabled him to increase the facilities considerably. Even this increase failed to take care of the demand for library facilities due to the tremendous increase in enrollment in the College and so by 1929 Dr. Chandler had secured an appropriation of \$120,000 from the State of Virginia and the library was enlarged to its present size. The architects succeeded, in spite of the several additions to the building in 21 years, in making the final structure conform to the major architectural design of the entire group of (Continued on page 2)

## New Infirmary Opened In 1930 Contains 20 Rooms and 2 Wards

The William and Mary catalogue of 1859 calls attention to the salubrity of the Williamsburg climate and states that only six students had died at the College in 59 years, and that two of these died by drowning. The climate is a healthful one but students have their ailments just the same and in a student body as large as the one at William and Mary the number requiring treatment from time to time, even daily, presents quite a problem to the College administration.

For many years the Infirmary accommodations at William and Mary were entirely inadequate but Dr. Chandler took care of this situation just as soon as he could get to it. The result of his endeavors along this line is a splendid building lo-

cated on Boundary Street next to Tyler Hall.

This building contains 18 rooms on the first and second floors with 36 beds and two big wards on the third floor with 20 beds for patients with contagious diseases. There are also two rooms for nurses on this floor. The building is equipped with an elevator and also has twenty bathrooms. This infirmary cost \$75,000, and was opened in 1930.

Miss Hallie King, an alumna of William and Mary, is head nurse and has an assistant. Dr. D. J. King, College Physician for a number of years, is head of the Health Department of the College and has office hours, 9 to 11 A. M., at the infirmary every day.

### HONOR TO WHOM HONOR IS DUE

There have been three distinct periods in the fortunes of William and Mary since the College opened its doors in the fall of 1865 after the disastrous War between the States and a few of her sons, who had laid down their books in '61 for the musket, came back from Appomattox to complete their education.

The devotion of Col. Ewell to the College has become a cherished tradition and he will live forever in the hearts of the alumni.

The second period of this sixty-nine years of struggle started with the administration of Dr. Lyon G. Tyler in 1888. He served for thirty-one years and during that time about 2,000 young men entered the College. This group has contributed greatly to the prestige of our Alma Mater. Some have risen to fame and hundreds of them can be found in the forefront of all important activities of this age. They are truly a bulwark in the ranks of the present alumni strength of the College.

At the close of the next great war in which this country was engaged William and Mary was again at a cross-roads of her destiny. Without endowment, without adequate physical equipment, she faced a new and entirely different era with only her great and glorious past to offer the young men and women of this state and country.

Her sons and friends knew that she could not survive the new era ahead and were reconciling themselves to the fact as best they could.

And then the kind Providence that had watched over her fortunes for more than two centuries decreed that she should not die. A great thrill electrified the hearts of her two thousand sons when they learned that one of her own sons, brilliant in scholarship and with a proven record in modern educational administration, would direct her destinies.

The coming of Dr. J. A. C. Chandler to William and Mary in 1919 was truly providential. He assumed his task with a clear cut vision of what was needed and he had the ability to carry out his plans. Verily, he has made bricks without straw.

With the completion of the buildings to be erected here this year, William and Mary will have one of the most dignified and complete educational plants in America. And yet with all this building the Colonial atmosphere of the campus has not only not been destroyed but it has been enhanced. The restoration of the three original buildings on the campus has stamped the College for all time with the imprint of the period in which it was founded.

And in this phenomenal development of the College with all its modern aspects, Dr. Chandler has not for one minute forgotten the glorious traditions of the College. In fact, he has made a most effective use of the history of the College and this history has become a living, vital thing during his administration. Witness the establishment of the Marshall-Wythe School of Citizenship and Government, the School of Jurisprudence and the ancient chair of Italian. Go through the new buildings and see the tablets to historic incidents in the history of the College and to the alumni who have contributed to the history of the Nation.

Dr. Chandler has woven the history of the College into the pattern so that the new William and Mary is one of the same piece with the old.

Notwithstanding the immediate physical needs of the College when he came here, Dr. Chandler has not forgotten the value of scholarship and has constantly raised academic standards. It was a courageous decision a year ago in the face of a certain reduction in the College revenues to restrict matriculation to students who have graduated in the upper half of their classes. The quality of instruction and academic requirements of the students have reached a high standard under his administration.

Dr. Chandler's administration at William and Mary has been outstanding in the history of higher education in America and it has certainly been one of the most important in the history of the College.

In view of the celebration of his 15th anniversary at William and Mary to take place here on Alumni Day, June 9th, scores of letters of congratulation and appreciation are pouring into the Alumni Office. The dominant note in all of these letters is that of affection for him. Having a great heart himself he has found a place in the hearts of thousands of his friends and of the alumni of the College.

They will do him honor here in June and will share with Mr. R. M. Hughes, '73, an honored alumnus of the College, his hope that "may he live to scale the heights and not fall upon the breast-works on the eve of final triumph!"

## ALUMNI DEATHS

L. Hawley Darlington, '76, died at his home in Los Angeles, California on April 12th. Mr. Darlington, who is well remembered by the older citizens of Williamsburg, was born at Lancaster, Pa., in 1859, and entered William and Mary in 1875. For many years he was engaged in newspaper work after which he was office manager for a firm in Washington, D. C.

Fourteen years ago he moved to California where he was engaged in government work.

Mr. Darlington is survived by his widow and two children; a sister, Mrs. W. G. Jones of Richmond and a nephew, A. D. Jones, '10, of this city.

Mr. Darlington's death and that of Judge Ambler of Baltimore, removes two more of the survivors of Col. Ewell's period at William and Mary. There are only thirty-five of that period now living.

Judge J. M. Ambler, '72, of Baltimore, died on April 8th at the age of 79. He was a native of Frederick County, Virginia, and entered William and Mary in 1871 and later went to the University of Virginia to study law.

He taught school for seven years but in 1881 was admitted to the bar at Richmond, Virginia. Shortly afterward he moved to Baltimore where he continued to practice law. In 1910 the Governor of Maryland appointed him to the Public Service Commission.

In 1912 he was appointed to the Supreme Court of Maryland and served until 1924 when he was retired under the age limit law.

Judge Ambler was married in 1886 to Miss Eliza Randolph, a daughter of Bishop Alfred Randolph of Virginia, an alumnus of William and Mary.

While at William and Mary, Judge Ambler was a member of the Pi Kappa Alpha fraternity.

### 85,000 BOOKS IN LIBRARY HERE; PAINTINGS VALUED AT \$75,000

(Continued from page 1)  
buildings erected during Dr. Chandler's administration.

In 1920 Dr. Chandler secured the services of Dr. E. G. Swem as Librarian at William and Mary. Dr. Swem had been assistant librarian at the Virginia State Library for twelve years. His love for William and Mary, his interest in gathering treasures in books and manuscripts for the library and his long experience in the work, made him a valuable asset to the College. For the past two years he has been on a leave of absence doing some very important work in the Library of Congress. During his absence the library here has been very efficiently run by his assistant, Miss Margaret Galphin, a B. S. of Columbia University in Library Science and who has also practically completed all the work for her M. A. in Political Science at Columbia.

The present Library Building here has three floors of stack rooms for books and a main reading room, double the capacity of the original room. On the third floor is a special reading room for reserve books and the Library Science Department Laboratory and also a Library for the School of Jurisprudence.

The main reading room was furnished by Mr. William Lawrence Saunders and Miss Jennie Morton Saunders in memory of their uncle, Robert Saunders, one of the presidents of William and Mary.

There is a large basement room under the main building used for filing old newspapers, etc., and which also contains a large fireproof vault for valuable books and manuscripts.

The tremendous growth of the library during the past 15 years is reflected in the fact that in 1919 only about \$1200 per year was required for its maintenance whereas now its

## ALUMNI DAY PROGRAM—JUNE 9, 1934

- 8:00 A.M. Alumni Office Open for Registration.
- 10:30 A.M. Alumni Association Meeting—Phi Beta Kappa Hall.
- 11:30 A.M. Alumni Address by Ashton Dovell, '08.
- 12:30 P.M. Memorial Service to Col. Ewell and to alumni who have died since last June, at Col. Ewell's grave.
- 1:00 P.M. Outdoor Dinner on Campus.
- 2:30 P.M. Class Reunions—1920 to 1933, inclusive; Class of 1892 and Class of 1909, in the Wren Building and the Brafferton.
- 3:30 P.M. Sightseeing—Williamsburg.
- 5:00 P.M. Music and Singing in front of the Wren Building. Immediately after this program alumni will form a circle around the Wren Building and sing the Alma Mater song.
- 8:00 P.M. Reception and Informal Dance to Alumni—Blow Gymnasium.

### —DANCES—

Cotillion Club Dances will be held in Blow Gymnasium on the nights of June 7th and 8th.

ROOM RESERVATIONS—A dormitory on the Richmond Road and one on the Jamestown Road will be reserved exclusively for alumni and alumnae, respectively. It is very important that you send in your request for reservations at once. We will appreciate your cooperation in this matter.

operating cost is \$17000 per year. The amount spent for books in 1919-20 was \$2100 and during last session \$11,415.44 worth of books was purchased. The number of books in the library in 1919 was about 28,000 and today there are 85,000 volumes.

This library is the most used of all the facilities of the College added during Dr. Chandler's administration. It is open every day of the year except on Christmas Day and the hours are from 8:30 A. M. to 12 o'clock at night, leaving out the hours for lunch and dinner. On Sundays it is open from 2 P. M. to 6 P. M. and 7 P. M. to midnight.

The library staff has been increased from one full-time person with a student assistant in 1919 to a head librarian, Dr. Swem, with seven full time trained assistants, three full-time untrained assistants and five other student assistants. The average number of students using the library in one full day is 500.

A collection of portraits, paintings and engravings, worth approximately \$75,000, adorn the walls.

There are many valuable books and manuscripts in the library. Some gifts during Dr. Chandler's administration are: 140 letters of Thomas Jefferson to William Short; James Monroe papers, 95 items; the Journal of the House and Senate of Virginia from 1790 to 1860; and 300 volumes of the publications of the Carnegie Corporation. A valuable collection of Shakespeareiana containing 1000 volumes was purchased by the College in 1932 from the defunct Atlantic University.

The library is a great credit to the new William and Mary that Dr. Chandler has built in the past fifteen years.

### NEW INFIRMARY OPENED 1930 CONTAINS 20 ROOMS, 2 WARDS

(Continued from page 1.)

The Infirmary is open day and night to students, faculty members and all the employees of the College.

On the first floor is a large office where minor complaints are taken care of. An average of 75 students per day come to this office for treatment for ailments running all the way from scratched fingers to sprained ankles and from headaches to more serious complaints. An average of 10 bed patients are in the infirmary at all times.

Up until this session, being in bed in this hospital constituted a legal excuse for absence from lectures and it is said that around test time in the various classes the building was taxed to its capacity with bed patients

who were either very sick or were putting up a pretty good imitation.

The Infirmary is a big asset to the College, is efficiently run, and the parents of students at William and Mary may rest assured that the health of their sons and daughters is being well safeguarded.

**ATHLETICS AT W. & M. KEEP PACE WITH DEVELOPMENT DURING PAST 15 YEARS**

(Continued from page 1)  
 umni was created and put in charge of athletics.

"Billy" Gooch became Director of Athletics in 1928 and has handled our athletic affairs very successfully.

Since 1919 William and Mary teams have played 153 football games, winning 91, losing 51 and tying 11. Against our traditional rivals, the University of Richmond, the result is 9 won, 7 lost and 1 tied. But counting from 1923, when J. W. Tasker took over the coaching position here and remained until 1928, the record is 8 games won, 2 lost ('31 and '32'), and 1 tied.

Some outstanding games in football during this period are: William and Mary 27-King College 0; William and Mary 7-Navy 14; William and Mary 7-Harvard 14; William and Mary 13-Haskell Indians 14; William and Mary 6-V. P. I. 7; William and Mary 13-Harvard 13; William and Mary 6-V. P. I. 6; William and Mary 6-Navy 13; William and Mary 0-Washington and Lee 0; William and Mary 6-Navy 0; William and Mary 7 - Washington and Lee 0; William and Mary 20 - V. M. I. 0; William and Mary 14-V. M. I. 0; William and Mary 6-University of Richmond 0 (1933).

The various teams played in football since 1919 are: Lynchburg, V. M. I., University of Richmond, Randolph-Macon, Hampden-Sydney; University of Virginia, V. P. I., Gallaudet, North Carolina State, Duke, George Washington, Wake Forest, Catholic University, Penn State, Roanoke, Navy, Syracuse, Guilford, University of Delaware, King College, Albright, Lenoir-Rhyne, Harvard, Haskell Indians, Columbia, Chattanooga, Princeton, Marshall, Emory and Henry, Bridgewater, Concord, St. Johns, Washington and Lee, Army, Davidson.

In baseball William and Mary has played 290 games since 1919 winning 183, losing 104 and 3 resulting in a tie. Besides winning many victories from state teams the following out of state teams have been scalped by the Indians, Williams, University of Pennsylvania, Lafayette, New York University, Amherst, Harvard, Bucknell, Holy Cross, Tufts, Providence College, Dartmouth, Swarthmore, Yale, Princeton, Syracuse, Cornell, Navy, Boston College, and Vermont. The team of 1933 won 14 games out of 17.

261 games of basketball have been played since 1919. William and Mary won 153 and lost 108.

Track was officially established here about 1920 with Joseph C. Chandler coaching since 1925. Out of 73 meets our teams have won 47 and lost 26.

Track record holders at William and Mary are:

- 100 yds.—"Bill" Scott and "Monk" Little, 9 4-5 sec.
- 220 yds.—Little, 21.3.
- 440 yds.—G. Smithers, 50 sec.
- 880 yds.—L. Johnson, 1:55.
- 1 mile—L. Johnson, 4:23.6.
- 2 miles—S. Doane, 10:04.
- 120 yd. Hurdles—M. Baggett and L. Litwin, 15.5.
- 220 yd. Hurdles—A. Hart, 24.8.
- Discus—G. D. Grove, 133'.
- Javelin—E. Justis, 201' 10 1-4".
- High Jump—J. Bacon, 6' 3 3-4".
- Shot Put—E. Meade, 44' 6 3-4".
- Broad Jump—Little, 24' 4 1-4".
- Pole Vault—B. Flickinger, 12' 7".

**Team Captains Since 1919**  
**Football**  
 1919—R. W. Copeland; 1920—W. K. Close; 1921—J. F. Wilson; 1922—F. F. Chandler; 1923—John Todd; 1924—John Todd; 1925—F. R. Elliott; 1926—Arthur Mastu; 1927—M. C. (Meb) Davis; 1928—W. E. Carmichael; 1929—J. V. Bauserman; 1930—J. C. Murphy; 1931—Otis Douglas; 1932—Thomas Halligan; 1933—Gerald Quirk; 1934—Joe Bridgers.

**Baseball**

**TO THE CLASS OF 1909**

A quarter of a century! How Tempus "do" Fugit! Can any of you boys who left here that June, seemingly just passed, realize how the years have rolled by? But you are still young and you are entitled to "take time out" and come back here on June 9th for your 25th anniversary.

How about it "Hopper" Brent, Birkhead, Sulfridge, Isham Wilkinson, Fendal Garth, Creekmore, Lesslie Hall, Paul Gilliam, John Freeman, West, and the rest of you 66 nought niners?

Send us word that you will be here to join in the celebration of Dr. Chandler's 15th anniversary and in your own plus ten anniversary.

During the past 15 years William and Mary has won 61 per cent of its games in the four major sports.

The new stadium with a seating capacity of 12000 to be started here this year will be a great asset to the College and our athletic department, making it possible to bring some of the big games on the schedule to William and Mary.

**Colonial Revels Here May 10 to 13 To Start Unique Festival**

The William and Mary Music Festival which was started last year is in the process of development into a function which is likely to be of permanent significance in the educational life of Virginia. The real purpose of the festival is the encouragement of musical development in Virginia schools.

For the present the field covered is no more than the eastern part of the state, substantially Tidewater Virginia. Even this limited field offers great opportunities for improvement in school music. In several lines the musical abilities of children are being drawn out and tested with the result that, at the expense of a beautiful final result which might be secured from greater selection, latent talent is being brought out which otherwise might never be known.

While William and Mary, within its own student body, trains musicians who are well qualified to become professionals; in its relation to the community it has quite another ambition. Professor Small considers a large part of his function as head of the Music Department to be that of making the whole district for which the college may feel a special responsibility music conscious. And this by no means solely in the sense of enjoying concerts. His vision is of an entire people who have made music a part of their lives, not merely by listening to it but by creating it. Music is to be an essential of personal culture. Music is both to create and to express the joy of life.

It is to this cultural end that the influence of William and Mary is being directed in the field of music. And this influence is being exerted largely through the grade and high schools. An understanding of these underlying motives gives one the desirable attitude for a thorough enjoyment of the forthcoming Music Festival. From the high school choruses to the use of band instruments by even comparatively small boys, the whole purpose is the enlargement of life through musical expression.

The climax of this musical self-expression will come in the joint concert of four college glee clubs on Saturday evening, May 12, and in the congregational singing in the

**TO THE CLASS OF 1892**

One of your classmates with whom you worked and played at William and Mary 42 years ago will be honored here on June 9th, Alumni Day. You are familiar with his achievements at William and Mary during the past 15 years and it is most appropriate that the class of '92 which produced a man of Dr. Chandler's ability should hold a reunion here on June 9th and join with the other alumni of the College in honoring him on the occasion of his 15th anniversary as president of our College.

Drop your cares and worries for this one day and come back to William and Mary.

To be here on June 9th will make you exactly 42 years younger.

churches the next morning and at Jamestown on Sunday afternoon where the whole through assembled to observe Jamestown Day will unite in song under the leadership of the glee clubs and glee clubs. The glee clubs will come from Richmond College, Randolph-Macon and Hampden-Sydney in addition to the William and Mary Club.

The active cooperation of Williamsburg - Jamestown - Yorktown Association, just this year organized, is making possible this second Music Festival. It is anticipated that in the years to come the festival will have added to it colonial sports and pageantry that will extend the entire celebration over a period of a week and make it a national institution, though always on a purely Virginia basis. This year the annual May Day celebration of the College will be an essential part of the program and it is to be hoped that there may be added a pageant in celebration of the three hundredth anniversary of the division of Virginia into counties.

The Music Festival opens on Thursday, May 10 with concerts by a Grade School Chorus under Miss Constance Leachman and a High School Chorus under Robert M. Griffey and John M. Starnes, followed by the May Day Celebration of the Women Students of the College under the direction of Miss Martha E. Barksdale. In the evening there will be a concert by the William and Mary Chorus and Women's Glee Club, assisted by Maurice L. Tyler, tenor soloist.

On Friday afternoon and evening there will be concerts by the Eastern Virginia High School Orchestra and Band, under Miss Eleanor Sherman and Mr. C. C. Briggs, respectively. Saturday afternoon will be devoted to a concert by the Massed Eastern Virginia High School Bands. In the evening will occur the Joint Glee Club Concert already referred to.

The churches of Williamsburg are inviting in the neighboring congregations for union services of song on the morning of Jamestown Day. The closing session of the four days will be held on Jamestown Island in conjunction with the Association for the Preservation of Virginia Antiquities. The singing together of thousands of people in that historic setting and led by the massed choirs of Williamsburg and vicinity and the four glee clubs should furnish an inspiring close to this important undertaking.

**OFFICERS OF CLASSES UNDER DR. CHANDLER'S ADMINISTRATION**

- 1920—W. H. Cheatham, President; V. F. Garrett, Jr., Vice-President; R. W. Copeland, Secretary.
- 1921—Herbert Lee Bridges, Jr., President; Ruth Etta Cashion, Vice-President; Edward D. Hudson, Secretary.
- 1922—Floyd Berl (Deceased), President; Emily Hall, Vice-President; Madeline Blakey, Secretary.
- 1923—C. R. Ball, President; Dorothy Terrell, Vice-President; F. R. White, Secretary.
- 1924—Joseph C. Chandler, Presi-

dent; Carolyn Kelly, Vice-President; J. C. Phillips, Secretary.

1925—Thomas W. Evans, President; John B. Todd, Vice-President; Suzanne Garrett, Secretary.

1926—C. Howard Cain, President; Louise Sale, Vice-President; Winston Irwin, Secretary.

1927—F. James Barnes, II, President; E. Cotton Rawls, Vice-President; Maxwell Brockenborough, Secretary.

1928—W. H. Elliott, Jr., President; Marjorie Lacy, Vice-President; E. C. Macon, Secretary.

1930—John H. Waters, Jr., President; Eleanor Williamson, Secretary.

1931—William L. Scott, President; Howard Roche, Vice-President; Ellen Ticer, Secretary.

1932—Binford Sykes, President; W. Brooks George, Vice-President; Josephine Habel, Secretary.

1933—C. P. McCurdy, Jr., President; Margaret M. Clark, Vice-President; Flora E. Wilcox, Secretary.

1934—O. C. Southern, President; Elizabeth Toler, Vice-President; Mary Abbott, Secretary.

**TO INAUGURATE CUSTOM OF ENCIRCLING WREN BUILDING ALUMNI DAY**

(Continued from page 1)

would become traditional to carry out this custom.

The idea has been advanced that sometime during each Alumni Day the alumni form a circle around the Wren Building and sing the Alma Mater song. The suggestion has a great deal of merit and this custom will be inaugurated here on Alumni Day, June 9th. Immediately after a song and music program in front of the Wren Building to start at 5 P.M. on the above date, the alumni will form around the building.

The merits of the suggestion lie in the fact that nearly all of the history and traditions of William and Mary are centered in or around the Wren Building and that all alumni have fond memories of this structure. It has the further merit of carrying an appeal to alumni to come back to William and Mary on Alumni Day so that the circle will not be broken.

It will be a moment when alumni can express in both silence and song their love for William and Mary.

**HERE AND THERE AT WILLIAM AND MARY**

In 1890 the Philomathean Society found itself in need of a water pitcher and a glass. A formal resolution authorizing the purchase was passed and a committee of three members was appointed to handle the affair.

This same year at a meeting it was moved "that a committee of three be appointed to go into the Phoenix Hall and with a bill of .07 1-2, and with interest allowed, amounted to 15 cents, which they claimed to be due them. The committee was authorized to obtain a receipt for the said payment.

In 1698 the President and Scholars of William and Mary addressed a letter to the Speaker and Gentlemen of the House of Burgesses thanking them for their interest in the College as displayed by their attendance at "the last May Day Scholastic exercises."

The Burgesses acknowledged the letter by sending Major Custis and Capt. Wilson up to the College, who delivered the following verbal message: "The house have sent us to acquaint you that they have read your address. It is received mighty kindly and they hope you will always merit their esteem."

In 1795 there were about 40 students in College, taking Philosophy or law. About the same number were enrolled in the Grammar School where both Latin and Greek were taught. Students in Philosophy and Law boarded and lodged in town while the Grammar School boys lived at the College.

### FIFTEEN YEARS OF PROGRESS SHOW PHENOMENAL DEVELOPMENT AT WM. & MARY

(Continued from page 1)

um, \$175,000; Monroe, Old Dominion, Taliaferro, Jefferson, Barrett and Chandler Halls (dormitories), \$1,128,000; Washington Hall, \$200,000; Trinkle Dining Hall, \$140,000; Power Plant, \$150,000; Infirmary, \$75,000; Laundry, \$55,000; Marshall-Wythe, \$192,000; Students' Activity Building, \$278,000; Athletic Stadium, \$100,000.

In addition to these magnificent buildings, Dr. Chandler has invested nearly \$400,000, gifts to the Endowment Fund, in improved real estate on the Richmond and Jamestown Roads. This is one of the most far-sighted acts of Dr. Chandler's administration. It not only secured valuable real estate for the College, protecting the College at points strategic to the campus, but the rate of income from the property is probably treble that of the income of any college endowment in the United States.

Since 1919 about 900 acres of land, including the beautiful Lake Matoaka tract, have been added to the College campus making the total holdings now 1200 acres. In 1888 the College owned less than 20 acres of land.

#### Faculty, Curriculum, Academic Standards

When Dr. Chandler came to William and Mary in 1919 there were only 12 departments in the curriculum. He developed the curriculum to meet the needs of a new age and there are now 25 departments. Four distinct schools have been added during his administration. These are the School of Economics and Business Administration, the Marshall-Wythe School of Government and Citizenship, the School of Education and the School of Jurisprudence. Some of the other courses established are: Library Science, Public Speaking and Dramatics, Journalism, Italian, Physical Education for prospective teachers, Religion, Secretarial Science, Sociology, Premedicine, Pre-Pharmacy, Pre-engineering, Pre-forestry, and Aeronautics.

This broadening of the curriculum attracted a great many students to William and Mary.

Improvement in academic standards has shown a steady growth. In 1919 students with only 14 entrance units were accepted. Now 16 units and graduation from an accredited secondary school in the upper half of the class are required.

Degree requirements in 1919 were 122 credits. This has been raised to 126 credits of which 60 must be of grade 83 or better. More concentration is required of the student by the selection of a major and two minor courses at the end of the Sophomore year. At the end of the Junior year each student's credits are carefully checked so that there are no irregularities in entering the Senior Class.

Requirements for entering the several classes have been raised so that now 18 credits, 5 of which must be of the grade 83 or better must be shown to enter the Sophomore class. To enter the Junior class 50 credits, 20 of quality (83) mark are required. To enter the Senior class the student must present 85 credits of which 40 must be of grade 83 or better.

Transfer students are not allowed any definite credits until they have demonstrated the quality of their work.

Since 1919 the College has become a member of the following organizations: American Association of Colleges and Secondary Schools, Southern Association of Colleges and Secondary Schools, National University Extension Association, American Council of Education, National Association of Adult Education, and the American Association of University Women. It is also on the list of accredited colleges and universities of the American Medical Association.

The School of Economics and Business Administration is on the accredited list of the New York Board of Regents and the course in Jurisprudence is approved by the American Bar Association and is registered by the Board of Regents of the University of the state of New York. The course in Library Science is approved by the Southern Association of Colleges and Secondary Schools.

There has been a tremendous growth in the faculty in 15 years both in numbers and in the quality of their preparation for teaching. There were only 14 professors and 3 laboratory assistants here in 1919 and today the faculty numbers 68 plus 12 who are doing part time teaching.

Of the 68 regular members of the faculty, 27 hold Doctor's degrees taken in residence; 22 hold Master's degrees only; 17 hold Bachelor's degrees only, and 2 have honorary degrees only.

The faculty has long since outgrown the original Blue Room as a meeting place and now hold sessions in the historic Great Hall in the Wren Building.

#### Athletics

A special article in this issue of the Gazette tells of the development in this department. It has certainly kept pace with the wonderful growth of the College and alumni are used now to hearing of more victories than defeats which is a distinct change from other years. At the same time a high moral tone has been preserved. Our teams have shown good sportsmanship in both victory and defeat.

#### Enrollment

Enrollment by years since 1919 is shown elsewhere in this issue. It has grown from 131 for the session of 1918-19 to a peak of 1632 for the session of 1931-32. Economic conditions and the restriction of matriculation to those graduating in the upper half of their class has reduced the enrollment to 1269 for this year.

More than 4000 men and women have attended William and Mary during Dr. Chandler's administration. 2172 degrees have been awarded in 15 years and there are 247 applicants for degrees in June. Thus by June of this year approximately 2400 degrees have been awarded here in 15 years which is more than in the entire previous history of the College.

#### Operating Expenses

The operating budget of the College in 1919-29 was \$55,320. It has reached more than a million dollars a year since then but during the last two years Dr. Chandler, due to economic conditions, has cut it approximately \$300,000. An outstanding achievement in meeting the present economic conditions is that during the session of 1932-33, Dr. Chandler so managed this that the income from the College was \$165,000 in excess of its expenditures.

#### Extensions and Divisions

One of Dr. Chandler's theories of educational administration has always been that education should be carried to people who could not afford to matriculate at the College. Carrying out this idea he extended the services of the College to a dozen or more communities. The most concentrated efforts were made in Richmond and Norfolk. The results are the school of Social Work in Richmond and the Division in Norfolk which has developed into a big asset to that city and vicinity. Regular college work of the freshman and sophomore grade is given in the Norfolk Division. The regular enrollment there is between four and five hundred. This Division is now directed by Dr. W. T. Hodges, '02, whose energy and executive ability have greatly increased the usefulness of the school.

The Richmond Division is for Women only and at present aside from the usual enrollment of undergraduates there are 33 women with Bachelor's degrees from some of the best colleges in the country working in this school for the Master of Science degree in Social Work.

The peak enrollment in the Wil-

liam and Mary Extension Schools and Divisions is 1980 for the session of 1931-32. More than 5,000 students have taken work in these Extensions and Divisions, making the total number instructed at or through the College over 9,000 in fifteen years.

#### PROGRESS IN SCIENCES

##### AT THE COLLEGE REACHES HIGH POINT SINCE 1919

(Continued from page 1)

the work of William Barton Rogers gave the remainder.

The first floor was chosen for the physics laboratories because it is comparatively free from disturbing vibrations which would be likely to throw delicate apparatus out of adjustment. For the most delicate experiments piers are built up from the ground, and are separated from the rest of the building by mastic joints. Also the floors of the rooms where there is likely to be the most vibration are separated from the rest of the building by mastic joints to keep the vibration from being transmitted to the building.

The physics department has a lecture room with seating capacity for 177 students, a laboratory for general physics, a mechanics laboratory, a constant temperature room, a sound proof room, a photographic dark room, a motor and dynamo room, a reading room, and two offices with private laboratories adjoining them. In the basement there is an air compressor and transformers.

The switchboard and a selector system permit the distribution of single phase alternating current, three phase alternating current, and direct current from the storage batteries to any of the physics laboratories, and to the chemistry laboratories on the second and third floors. In addition to electricity the various physics laboratories are supplied with water, gas, compressed air, and cases for apparatus. A special feature is a pendulum shaft extending from the first floor to the roof for a Foucault pendulum. By means of this pendulum students are able to observe the rotation of the earth on its axis. This pendulum has not been installed at the present time.

The department has standard apparatus for performing all of the experiments usually done in undergraduate courses in physics, and for beginning graduate courses. The department is unusually well equipped for work in oscillating circuits.

There is a chapter of Sigma Pi Sigma, national honorary physics fraternity, in the department. Four professors from the physics staff and related departments and from twelve to fifteen advanced students belong to this chapter. The chapter meets twice a month for the discussion of current research in physics.

There are now about 125 students registered in the various physics classes during the regular session. About twenty-five of these are taking the more advanced courses, which consist of work in oscillating circuits, physical optics, kinetic theory of gases, thermodynamics, electron theory, theoretical mechanics, theoretical electricity, and advanced physical measurements. Students who major in physics are prepared to teach high school physics, to enter industrial work in physics, and to pursue graduate study in the universities.

At the beginning of President Chandler's administration, nearly fifteen years ago, there were about thirty students registered in the physics department. These were housed in one lecture room and in one laboratory room. Thus it is seen that there has been a wholesome growth of the department, both in the number of students and in the physical equipment.

The second and third floors of Rogers Hall house the department of Chemistry. In this department there are two lecture rooms, two laboratories for general chemistry with cap-

acities for forty-eight and sixty students, one organic chemistry laboratory with capacity for thirty students, a qualitative laboratory with capacity for thirty students, a quantitative laboratory with a capacity for thirty students, and a biochemical laboratory with capacity for twenty-five students. In addition there is an advanced organic laboratory, an advanced quantitative laboratory, an advanced inorganic laboratory, a laboratory for physical chemistry, two research rooms, and offices for the staff.

Laboratory desk space is adequate for the present demands. The laboratory desks are equipped with water, gas, steam, compressed air, alternating current, and direct current. Over 500 students are registered each semester in the various courses in chemistry. More than 100 of these are pursuing the more advanced courses.

There is a chapter of the Theta Chi Delta chemical fraternity in the department. This chapter was installed in 1926. It has been very helpful to the department in promoting an interest in scholarship in chemistry. Its members consist of the teaching staff of the department and about twenty of the more advanced students. The chapter meets twice a month. At these meetings the members read and discuss short papers on chemical topics. Twenty dollars is offered as a prize for the best paper read during the year.

In addition to the regular B. S. degree with major work in chemistry, the department offers a special degree, that of Bachelor of Chemistry. This degree is planned to meet the needs of students who expect to go into industrial chemistry and for those who intend to teach chemistry in the high schools. The work is planned with the purpose of making the student familiar with the standard methods of attacking and solving chemical problems.

At the beginning of President Chandler's administration in 1919 there were about 100 students registered in the department of chemistry. These were housed in one small lecture room and in two small laboratories. There has been a corresponding growth in the physical equipment and teaching staff. The teaching staff of the department feels confident that the undergraduate instruction at William and Mary is as good as any in the State.

The courses in the department of biology are designed primarily to serve the needs of the general student. To this end, these courses, together with work in chemistry and physics, provide opportunity for that fundamental training in scientific thinking that is part of the cultural equipment of the educated person of the present day. They offer, too, biological materials suitable for building into the structure of one's intellectual life. To meet these cultural needs there is offered a progressive series of courses dealing with plants and animals, including man. Effort is made to lead the student, to such degree as his program as a whole permits, along the way of increasing understanding—understanding of himself, of the world of life around him and of his relation to these and to other features of his environment; and he is stimulated to apply this understanding toward harmonious, healthful, vigorous, effective and satisfying living.

A secondary, but important, function of the department is to contribute its part in training students of various vocational groups. Among these are premedical students, for whom all work required or recommended by medical colleges is offered. Other groups include prospective teachers especially those who plan to teach biology, students of physical education, and students of home economics. A few students proceed with biological work purposing to continue it as a life work and those who are highly qualified for it are encouraged to do so.

In 1919-20, the Department of Biology occupied a lecture room, two laboratories and an office on the second floor of the "Science Hall" which had been erected in 1905 and which was subsequently demolished (1928) in connection with the restoration of the colonial campus. In the fall of 1921, growth of the science departments made necessary expansion of their quarters, and the department of biology moved into a temporary building on the site now occupied by Trinkle Hall. By the year 1922-23 the registration in biological courses involving laboratory work was 149 (figured on a semester basis). The department faculty consisted of three full time members, and one instructor who divided his time between the departments of biology and physics.

In 1928, the department occupied the first floor of Washington Hall. With the increasing enrollment of the college as a whole the number of registrations increased until 1931-32 when 889 students were enrolled for laboratory work in semester courses. The numbers have since decreased by a little more than one-fourth. The average number of semester registrations for the last three academic sessions is 772.

Registration for the current semester is 366. The faculty of the department consists of three full time members and two student assistants. The quarters of the department on the first floor of Washington Hall consist of one rather large lecture room seating 256 and a small one with a capacity of 40 (both shared with other departments), four large laboratories (two of which are used also as lecture rooms), three small laboratories, storeroom, museum room, three combination office and laboratory rooms, animal room and greenhouse. The current value of laboratory equipment excluding furniture) and of supplies on hand is estimated at \$7500.

### ALUMNI DAY CELEBRATION JUNE 9th TO HONOR DR. J. A. C. CHANDLER

(Continued from page 1)

P.M. will conclude the program.

Over 4,000 students have registered at William and Mary since 1919 when Dr. Chandler became president. 2164 degrees have been awarded and there are 247 applicants for degrees this year.

It is anticipated, therefore, that there will be the largest number of alumni here on June 9th that ever gathered in the history of the College.

Special emphasis is being put on the reunion of the classes that graduated here under Dr. Chandler. There are fourteen of these classes. In addition there will be a reunion of Dr. Chandler's class of 1892 and the 25th anniversary reunion of the class of 1909.

Class presidents for the past 14 years are aiding the Alumni Office on these reunions and besides the team captains here under Dr. Chandler are urging their team mates to return for this celebration.

A dormitory on Richmond Road and one on Jamestown Road will be reserved for alumni and alumnae, respectively. It is important that you notify the Alumni Office if you wish a room for June 9th or for as long as you wish to stay.

Wide publicity will be given this alumni Day program. A committee of ten William and Mary alumni representing different newspapers are cooperating and this issue of the Gazette will go to the entire alumni group.

You are urged to return here for this occasion to see the old College in its new vigor and splendor, to meet your classmates, and to honor the alumnus who has made our Alma Mater one of the leading institutions of learning in America.
