No. 2

INDIANS CAP CONFERENCE CHAMPIONSHIP

First Time in History of College

By IRA ESTES (SPIKE) MOORE, '39x

Four years ago, almost to the week, William and Mary engaged a brown-skinned, bushy-browed fellow to come in and resuscitate its down-trodden football fortunes. The fellow's name was Carl Marvin Voyles.

Voyles, formerly at Illinois and for eight years No. 1 assistant at Duke, made no promises, expressed no optimism. Instead, he went to work—working as probably no football coach at William and Mary ever had worked before.

And he built good football teams.

Today, after four years of tireless effort, Voyles is the man behind what is probably the greatest football machine ever to come out of the state of Virginia. These William and Mary Indians are playing big-time football, and they're winning games from big-time teams.

By whipping the University of Richmond, William and Mary now reigns as undisputed champions of the Southern Conference—the first time since 1934 that any Virginia football team has won a conference championship. Duke and North Carolina, those mighty grid powers of the past six or seven years, have given way to a new champion—William and Mary.

The Voyles-coached team also clinched its second State Big Six championship Thanksgiving Day, and, at the same time, kept intact its record of not having been beaten by a state opponent since Virginia turned the trick in 1939, Voyles' first year at William and Mary.

This was to have been the banner year for football at William and Mary, and thus far the Indian gridders have surpassed even the wildest hopes of its followers. If the Voylesmen can get by Oklahoma's Sooners on December 5, they will have swept through a tough 11-game schedule undefeated in college competition—and that's something no William and Mary team ever has accomplished before.

By now, though, winning football teams at William and Mary are no longer a novelty. Voyles saw to that as far back as 1939, when he took over a disorganized football squad which the year before had won only one game and which had been beaten even by the Apprentice School.

The new Indian mentor determined to make his first William and Mary eleven look like a good team, even though they might not play like one. So he dressed them up in shiny green uniforms, and began teaching them football fundamentals. And, amazingly enough, this team won six games, lost two, and tied one—beaten only by Navy and Virginia. The tie was with Virginia Tech, 6-6.

In 1940 the Indians wound up with an identical record—6-2-1—only this time they came out on top in the state Big Six race. Victims of the Tribesmen that year included Virginia (13-6), Virginia Tech (16-7), Richmond (16-0). Only losses were to N. C. State and Navy.

Came 1941, last year, and the Tribesmen were still on the warpath. The rampaging Indians ran over everything except Navy and N. C. State, a couple of jinxes from way back, and even got into the national grid limelight by upsetting a highly-favored Dartmouth team, 3-0. V.M.I., with Muha, Pritchard, Catlett, and Sotnyk operating in the backfield, was soundly thrashed here on Homecoming Day, 21-0. Both William and Mary and Virginia wound up their seasons undefeated in state warfare, so there was no alternative but to split the Big Six championship.

And now 1942, Voyles' harvest year. Composed mostly of seniors, the remnants of that famous Fabulous Freshman team of 1939, the Indian eleven has attracted more national attention than any other team in William and Mary football history. A great defensive

LATE NEWS

As we go to press it is announced that William and Mary has taken seven positions on the mythical All-State Football Team. It is the first time that any college in the State has taken as many places on the All-State. Those selected are: Backs: Forkovitch, Johnson, Longacre; Guard: Ramsey; Center: Warrington; End: Knox; Tackle: Bass.

NEW BOOKS

LANDMARKS OF RICHMOND
BY MARYLOU RHODES

Listing, describing, illustrating famous places, buildings, monuments, parks, and historic sites in this city so rich in tradition. Richmond today—and yesterday—modern Richmond with its wealth of historic background. 5½ x 8 inches; 168 pages; indexed; illustrations and maps. Binding: Full cloth, jacket in colors reproducing a famous old print of the city. PRICE: \$1.00.

THOMAS JEFFERSON'S COOK BOOK
BY MARIE KIMBALL

Jefferson's own recipes revised for modern use. This book gives a new and not-so-well-known view of this most versatile man. 6 x 9 inches; 120 pages; full cloth binding; jacket in colors. PRICE: \$2.00.

THE HERMITAGE: Home of Old Hickory
BY STANLEY F. HORN

A complete and graphic picture of the home and the home life of this early American statesman whose stature grows greater as the years go by. Reading this one gets a truer conception of the finer side of Andrew Jackson and a splendid picture of this wonderful old home with all the original furniture and furnishings just as the General left it in 1845. 6 x 9 inches; 250 pages; illustrations and drawings; full cloth binding; three-color jacket. PRICE: \$3.00.

CALLING ALL ALUMNI

The State of the College

• By JOHN EDWIN POMFRET

Instead of being able to contemplate with great satisfaction the approach of the Quarter Millennium celebration, Alumni know only that their Alma Mater, by a flick of the wheel of fortune, is confronted with one of those harrowing periodic struggles for survival that seem to be ever recurring in the history of the College of William and Mary.

The 'teen age draft law will render eligible for military service the majority of the men students on the campus. A small group of men in the enlisted army and navy reserve corps will remain for a short time, pending calls to active service. Likewise another small group of freshmen, not yet eighteen, will remain for varying lengths of time. Plans are being formulated in Washington to place some students of college age in a number of the colleges for training preparatory to military service. What these plans are and how many boys they will affect is as yet shrouded in mystery. At most this program will affect but a few colleges and a relatively small numbers of students.

The administration of the College will make an effort in the coming months to bring to the campus some cadet group, either Army or Navy, for special or technical training. Such units usually comprise from 500-1000 men. In some cases they are manned by their own instructors, in others the instructors of the guest institution are employed for this work. The College naturally would prefer an arrangement whereby its own instructional staff could help with the work.

At present the College is crowded with students. The total registration exceeds 1400, the largest number since 1931. Also for the first time in a decade the number of men students exceeds the number of women students. The number of men freshmen is approximately sixty per cent of that class. Thus a trend of some years has been reversed. The War Work Plan, involving more than 200 boys, most of whom are working at the Yorktown Naval Mine Depot, has had the effect of attracting many boys and strengthening the enrollment for the current academic year. In most of the colleges enrollment has fallen sharply.

In September the Board of Visitors adopted a resolu-

tion calling for the abolition of separate eating or dormitory arrangements for fraternities and sororities "as soon as practicable." With the opening of college this matter was laid before the Student Assembly for study. A committee, consisting of four fraternity and sorority

representatives and four not so belonging, was appointed to study the problem and make recommendations to the administration, to be submitted to the Board at its June meeting. Meanwhile the fraternities and sororities have conducted their rushing as usual, but the national crisis has tended to dwarf the fraternity problem. The war, as in 1917-1918, may force the fraternities to adopt an inactive status for the duration. Meanwhile, those who remain will have ample time to plan wisely for the future.

The administration has concerned itself with the restoring of the College to the approved list of the Association of American Universities.

Unless something untoward occurs this should take place within the next month. The lifting of this year-old suspension will be announced in the newspapers as soon as it occurs.

The situation in the town of Williamsburg is most congested owing to the presence of large numbers of Army and Navy men. The shortages of housing, transportation and labor have given rise to new and pressing problems. Until the termination of the war there will be little opportunity for Alumni to hold the usual gatherings on the Campus. They can rest assured, however, that every effort is being made to keep the College in the forefront of educational and war-service activities.

I am grateful for the cordial welcome I have received from Alumni at Williamsburg, Richmond, Newport News, Hampton, Petersburg, Norfolk, and other places where I have had occasion to speak during the past two months.

John E. Pomfret

John E. Pomfret

ernment subsidization of education for those who are qualified. For better or for worse, this proposal, if adopted, will mark the end of the higher educational system as we know it. Numerous studies prove that poverty keeps more top-flight brains out of college than all those now admitted. By and large, our system of higher education has existed for those who had the cash to plunk down on the college treasurer's "barrell-head." This system may become a memory.

With federal subsidization of brains, may also come control and in such an upheaval generated by such cataclysmic stresses, the institution that changes not shall die. The Federal Government can and may decide what institutions to maintain, magnify, shrink or destroy.

It is not likely that the colleges offering professional and technical training will suffer. It is more probable that these institutions will not only be able to maintain themselves as laboratories for the Government's much needed highly trained personnel but that they will be implemented and expanded by federal appropriations.

What of the others which are not specialized? Will they fit into this program? Or will they try to maintain themselves as at present with modest state appropriations and student fees, with a voluntary enrollment consisting of many who lack the aptitude for anything beyond the liberal arts? Will there be as many men and women who can afford the luxury of four years of cultural subjects? It is no surety.

Income from endowments is decreasing. State legislators, even now, are becoming wary and troubled with ever increasing requests for larger and larger appropriations for constantly expanding plants of multifarious state institutions, many of which are duplicating and overlapping each other in effort and program and engaged in a mad scramble to reach the public till.

More and more there is talk of consolidation, not only in the interest of economy but of efficiency. Perhaps in the end we shall see many colleges adopting the plan advocated by Chicago's Hutchins that will allow two years of liberal arts training for all and permitting only those who show aptitude for special training to go beyond. Presumably, the A.B. degree would be given at the end of the second year.

A readjustment of educational values is on the way. This must seem clear to anyone who will give it thought. What may not be apparent is that this readjustment involves a principle of whether the leadership of education in America will come from governmental agencies or from men and women who head our best educational institutions. It is a principle of democracy. It is a question in which alumni everywhere will have an interest at stake—the possibility of education for future generations.

Have we not too long accepted the platitude that education is the hope of democracy? Where is the sound documentation for this assumption? It may be an assumption that we have accepted blindly. *Time* magazine has suggested that "The urgencies of these critical times

demand of learning that it also prove itself an instrument of practical democracy."

What will the college of the future be? Are we concerned about it?

Now is the time for higher education, the colleges, the universities to reexamine themselves, their philosophy and their program, and to courageously and wisely reorder their houses. To conduct this examination, they must rely on fact, as well as on theory and thought. They must call in the alumni, seek their counsel, request their support. Curiously, they must sell education to their own alumni, and then the alumni must sell it to the American public. This will not be accomplished until educational administrators and college alumni cast off their indifference toward each other.

While the alumni have unquestionably been extended a formal invitation to lend their suggestions and criticisms to the colleges, they have rarely availed themselves of the opportunity. They consider that the problems of education are problems only for educational administrators. Perhaps the most pertinent reason that they have failed to cooperate actively with higher education is because they have not been informed of the problems that exist. But whatever or whoever has been responsible for the unhappy relationship which exists between the colleges and the alumni is of no import now. It is water over the dam. Education and its product must get together in a common front, merge their interests and pool their efforts, or answer to the future for their failure.

Our Eighth War—

There are few colleges in this country whose alumni have as many times shouldered arms in defense of their rights as have the alumni of William and Mary. A check with local historians would indicate that men of William and Mary are now participating in their eighth major conflict which is to say that they have fought in every war in which our Country has engaged since its inception. These eight are:

- French and Indian Wars, 1754-1763
- American Revolution, 1775-1781
- War of 1812
- Mexican War, 1845-48
- War Between the States, 1861-1865
- Spanish-American War, 1898
- World War I, 1917-1918
- World War II, 1941-

They doubtless fought in other less important conflicts, including numerous and continuous skirmishes with the Indians in the early part of the eighteenth century.

While war is nothing new to the men of William and Mary, World War II is the first, of course, in which the women of William and Mary are wearing the uniform and playing an important part that will reflect honor on their country and their alma mater.

JOHN BOYD BENTLEY, '19x

An Alumnus You Should Know

• By WILFRED COLLISON FILES, '30x

Wilfred Collison Files, 30x, formerly of Solomons, Maryland, attended the College of William and Mary three years, 1926-29, then entered the Emory University Theological Seminary. In 1937 he joined Bishop Bentley in Alaska as a lay worker. He was ordained to the diaconate in 1937, by Bishop Bentley, and is now minister in charge of the Mission of Our Saviour at Tanana. "Shorty" has been married since 1935 and has one child.

A dog team stopped in front of Alaska's Circle City roadhouse. The keeper of the house had known for several minutes that a team was coming because his own dogs had been whining in that expectant way which tells every musher something is coming. When the restrained whine gave way to wild barking, the keeper of the house knew the team had arrived. With no sign of hurry, but with the step of one who has to know what is happening, the roadhouse proprietor walked to the window overlooking the trail. Through the double-paned glass he saw the newly arrived team and, like all good Alaskans, noticed that the team was made up of five well-cared-for dogs. The lead dog, he saw, had three pompons on his harness collar, and the colors were green, gold, and silver. The driver was a tall, slender man whose ease of movement and assurance of step was easily discernible in spite of his outdoor clothing. The proprietor recognized the driver and hurried to the door to give Bishop Bentley, Suffragan Bishop of Alaska, welcome.

It is a long step from Alaska to Virginia, but a necessary one, if we are to see the birthplace of William and Mary's outstanding alumnus in Alaska, for it was at Hampton, Virginia, that John Boyd Bentley was born on February 9, 1896. He was the second of three sons of Charles H. Bentley and Susan Elizabeth Cake Bentley.

John Boyd Bentley prepared for entrance to the College of William and Mary by attending the public schools of Hampton and, when he was not busy with school work, for traveling in Alaska by boating on Hampton Roads. Little did he realize, however, that some day his knowledge of how to handle a boat would be so useful.

It was at the beginning of the fall term in 1915 that John Boyd Bentley entered the College of William and Mary. Here he became a member of the Kappa Alpha Fraternity, but before he could get his degree had to temporarily give up his educational endeavors. Trouble was brewing in Mexico, nations of Europe were at war, and the United States needed men in its army. During 1916 student John Bentley bade "goodbye" to his alma mater and enlisted in Uncle Sam's army.

Preparing for outdoor service.

For three stormy years the young recruit served his country with the 111th Field Artillery, Virginia National Guard. He had joined the army as a private, but before his discharge, after the World War I armistice, had passed through every grade from private to captain. As a captain, he commanded Battery B, 111th Field Artillery, 29th Division, A.E.F. Before giving up completely the idea of becoming a professional soldier, he was commissioned a major in the United States Field Artillery, Reserve.

Like so many of the young men who had joined the army just before and during World War I, John Bentley realized before he came home that he had become a man. He was now faced with the problem of finding his life's work. Alaska, about which he had become interested through his church, had a strong appeal, as did also the army. The orderliness, the discipline, and hard work of the army life had become a part of his life.

While he was more or less drifting, the future Suffragan Bishop of Alaska secured a job with the Newport News Shipbuilding and Drydock Company. The two years he spent there must have passed fairly quickly, too, because it was during this time that his attentions to Miss Elvira Wentworth Carr were favorably received. Miss Carr, like her suitor, was born in Hampton, Virginia, and had known John Bentley all her life. They belonged to the same church, went to the same parties, and had the same friends. By 1921 she had consented to become his wife, he had decided to become a missionary to Alaska, and both were preparing for their life and work in the frozen north. He returned to William and Mary but was a resident student for only several months. The need for intensive theological training caused him

(Continued on page 26)

INTRODUCING SARA WISE POMFRET

"First-Lady" of the Campus

• By ELIZABETH ANNE KNOLL, '41Ba

.....
While a student at William and Mary "Betty" Knoll was active in campus affairs. After graduation she accepted a position with the Baltimore Museum of Fine Arts and this fall returned to Williamsburg as Executive Secretary of the Bureau of Public Information at the College.

"I'm so glad to see you—isn't this a glorious day?" This greeting, which was addressed to us by Mrs. John Edwin Pomfret, wife of the president of the College, characterizes the "first-lady" of the campus by its very cordiality and enthusiasm.

Our most pleasant errand was to interview Mrs. Pomfret and to try to bring her to the minds and hearts of the William and Mary alumni. This, we found, is not altogether easy, for Mrs. Pomfret is such a warm and vivid personality that it is impossible to picture her very clearly by words alone. To meet her is to know her, and we hope that all of you will have an opportunity to do just that.

In appearance, Mrs. Pomfret is of slight stature, with fair skin, merry bluish-gray eyes and brown hair which she wears in a simple and becoming arrangement. When she smiles she smiles from the heart; and she smiles often. An easy laugh, a lovely speaking voice, a gracious, diplomatic manner and a facility for making you talk about yourself instead of talking about her—these are the things you remember later after having been with her.

We had tea in the lovely old eighteenth century

drawing room of the president's house where she is the first "first-lady" in over twenty-one years. Mrs. Pomfret spoke enthusiastically of her few weeks at William and Mary. "We both like it here very much," she said. "There is so much beauty in Williamsburg, and I think the campus is one of the loveliest I've ever seen."

This is Mrs. Pomfret's first time in Virginia, although she can readily qualify as a Southerner since her home is in Columbia, South Carolina. She graduated from the University of South Carolina, where, we have discovered since talking with her, she took an active part in campus affairs.

Her son, John Dana Pomfret, is fourteen and attends the Episcopal High School in Alexandria. She assured us, laughingly, that he usually "sets the house rollicking when he comes home with his friends." The next day Mrs. Pomfret was going to Richmond to meet Johnny who was bringing a friend home for the week-end. "I've been saving my gasoline ration stamps so that I could go," she said.

Speaking of the students who are living in the President's kitchen and over the garage, Mrs. Pomfret said: "It seems a great deal like home to have the students so near. They have such good times, and we enjoy having them as neighbors."

One of the most typical things about Mrs. Pomfret is an incident in connection with her young neighbors. She discovered that the students who are living over the garage didn't have very much furniture, so she donated a couple of easy chairs and a rug from her own personal furnishings to make it more comfortable for them. We got this information indirectly from the garage occupants, who have their quarters fixed up in fine style, thanks to her generosity.

Mrs. Pomfret says she has no hobbies, though she knits a little, likes gardening, and planning meals. We suspect that President Pomfret and son John (Jack and Johnny) are her two main hobbies, in addition to her rôle as hostess to the many guests who visit William and Mary.

In that rôle, she is one of the most gracious ladies we have ever known, for her complete naturalness and her interest in other people, in addition to her genuine charm, qualify her at once for the distinction of "first-lady," and will endear her immediately to the hearts of William and Mary's friends and alumni who meet her.

.....
The Alumni Office offers for sale several hundred 5½ x 3½ inch etchings of the Wren Building (west front). The folders may be used for Christmas cards or for informal notes. Price (with matching envelope) five cents each.

HOMECOMING

Those few alumni who found it possible to return to their Alma Mater for the annual Homecoming on October 24th, felt doubly grateful for the opportunity of again visiting the campus, reviewing old scenes and greeting friends and acquaintances. All accepted with good grace the curtailed program necessitated by the shortage of labor, food and materials, and many there were who voiced hearty approval of the lack of the usual gay decorations and activities in this wartime. The warmth and glow of the enthusiasm of the returning alumni did much toward dispelling the murkiness of the weather and brightening the day. Uniforms of all branches of military service were noted in the group and gave a patriotic air to the occasion.

Attractions of the forenoon were held at the Women's Athletic Field on Jamestown Road where there was a Lacrosse game and a Hockey game.

Beginning at 2:30 o'clock on Cary Field before a stadium crowd of 7,000 persons, about half of whom were officers and soldiers from nearby military camps, the Homecoming football game was played against George Washington University. Our undefeated "Indians" subdued the "Colonials" 61-0. From the very start the "Colonials" were outcharged, outplayed, and outclassed. Yet, there was no individual star on the well-coached "Indian" team—just the most powerful line in Virginia, and perhaps in the entire South.

Among the guests in the President's box at the stadium were the Governor of Virginia, Colgate W. Darden, Jr.; the Mayor of Williamsburg, Channing Moore Hall, '08; Chancellor of the College, John Stewart Bryan; the commanding officer at Fort Eustis, Brigadier General Forrest E. Williford; the new commanding officer of the Yorktown Naval Mine Depot, Captain R. D. Kirkpatrick; and other state, city, college and military officials.

Between the halves, in an effort to boost the sale of war bonds, the football used in this game was auctioned by Charles J. Duke, Jr., '23, Director of the Norfolk Division of the College, to the purchaser of the largest bond.

A bond and stamp booth was set up at the entrance to the stadium and student ushers circulated in the crowd to take bids. The original plan to announce the winner of the trophy over the "mike" went awry, due to mechanical difficulties of

the loud-speaker system. John Taylor, '18x, of Williamsburg, who pledged the purchase of a \$2,500 bond, was the highest bidder and President Pomfret presented him with the football, autographed by the captain of each team. According to the usual custom the ball automatically becomes a possession of the captain of the winning team but in this case Captain Marvin C. Bass gladly relinquished the treasure in the cause of "Victory." Funds normally used for floats in the Homecoming parade, cancelled this year, and other decorations were turned into stamps and bonds. The fraternities and sororities, as a unit, opened the bidding with the purchase of a \$100 bond in the name of the Student Activities Building. More than 300 stamp corsages were sold at the game.

The Fort Eustis band was highly entertaining during the half with their arrangement of swing-on-the-march music.

Immediately following the football game many of the fraternities and sororities held open house.

The alumni dance in Blow Gymnasium from 9 to 12 P.M., with music by the College orchestra, concluded the festivities of the day.

Left to right: John Edwin Pomfret, President of the College of William and Mary; Colgate W. Darden, Governor of Virginia; John Stewart Bryan, Chancellor of the College of William and Mary.

Quarter-Millennium Session Opens With Majority of Men

Total Enrollment 1424

The largest enrollment in ten years was established with the registration of 1,424 students for the 250th session of the College, which opened September 14th. Figures from the Registrar's Office disclose a total of 734 men and 690 women.

The freshman class is composed of approximately 60% men and 40% women; obtaining the goal set by the Society of the Alumni some years ago and recommended to the Administration.

An increase of 45% over last year's enrollment is shown in the Law Department and the influence of the war is noted in the greatly increased enrollment in the departments of Physics, Mathematics and Physical Education.

Approximately 250 men entered the College this fall under the War Work Plan, whereby men students are permitted to work three days a week, in non-hazardous occupations, at the

many defense projects on the Peninsula, approved by army, navy, and civil service officials, and attend classes the other three days. In such manner they are able to earn a large portion of their college expenses while they are working for victory and for an education.

Every dormitory is filled to its maximum capacity and the overflow of men students has been provided for in the guest rooms at Phi Beta Kappa Hall, the team room of Old Dominion Hall, and the top floor of the infirmary; even the kitchen of the President's house and the apartment over the garage, and the space above the old Post Office have been converted to dormitories.

Commenting on the registration figures, Mr. John Edwin Pomfret, president of the College, said: "It is very gratifying

(Continued on page 11)

STUDENTS TURN FARMERS TO AID HARVESTING

Salvage Dairy Crops in Labor Shortage

In every war involving this nation, William and Mary's students and alumni have responded to the call and done their bit. On occasion, the entire student body has answered the call. In the current struggle, alumni and students may be found in every phase of war work.

On the home front, students from the campus are engaged in working at nearby defense plants. Others

are engaged in helping stores of Williamsburg in their spare time due to the labor shortage.

The labor shortage has caused a serious hardship for farmers of James City County, particularly the dairy farmers, some of whom supply milk for the college. Dairy crops must be harvested at the proper time or considerable loss will result.

With few hands available, dairy farmers were at a loss and faced not only loss of crops but difficulty in securing feed on the market when several score college students, some of whom had hardly seen a farm, pitched in to aid in the fall harvest.

Since early September into late November, groups of students have been working on nearby farms each afternoon, cutting and shocking corn, filling the silo, and aiding the farmer in every way possible. For this they received the standard wage paid in the area.

Floyd Ayers, one of the farmers near Jamestown who employed the students, expressed his appreciation for the assistance given. "Without their help we would have been unable to harvest our crops," he said. Though no student was employed more than half a day at a time, their assistance saved the dairy farmer great loss.

Students harvesting crops in James City County

MEMORIAL BOOKS PRESENTED TO LIBRARY

Given In Memory of Faculty, Alumni and Friends

Since 1936, friends of the library of the College of William and Mary have presented to the library books in memory of their friends rather than sending flowers at the time of their decease. Two housemothers at the college, Mrs. W. B. Ball and Mrs. Etta May Barnes, began the custom by presenting books in memory of the late Mrs. Mary Alice Low of Williamsburg.

In addition to gifts of individual books, some memorial collections have also been started. Among those who have been remembered by such gifts are the late Dr. J. A. C. Chandler, Mrs. Agnes Hunt, Senator Guy D. Goff, Miss Beulah Russell, Charles P. McCurdy, Sr., Dr. John R. Fisher, James Hurst, John T. Davidson, and Miss Emily Christian.

Others who have been remembered with memorial books are the late Dr. W. A. R. Goodwin, Mrs. Ida Lybrook, Mrs. George Carter Bland, Mrs. Susan Taylor, George Carter Bland, F. A. P. Thornton and Mrs. John Lesslie Hall.

A bookplate is placed in each memorial book on which is the name of the donor and the person in whose memory the gift is made. The books are given the

largest circulation by being placed in their proper locations and not in separate memorial collections.

A card is sent to the family of the deceased when the gift is made.

Quarter-Millennium Session Opens With Majority of Men

(Continued from page 10)

that this ancient institution has again demonstrated its vitality in a national crisis. Great credit is due Mr. John Stewart Bryan, retiring president, whose administration prepared the way for present progress."

In keeping with the times, the College has speeded up its program by organizing special classes related to the war effort and by operating upon a twelve months schedule, its summer term having been made a full semester.

Under the accelerated program, about fifty seniors are expected to be graduated from the College, January 30th. The exercises will take place at 2 o'clock, P.M., so that parents may arrive on the morning train and leave on the evening train since accommodations are so difficult to obtain either at the College or in overcrowded Williamsburg.

PHYSICS AT WILLIAM AND MARY

• By ROSCOE CONKLING YOUNG, '10Ba-Bs-M

(This is the seventeenth of a series concerned with the various departments at the College. The next of the series will be on the Department of Fine Arts and will be written by Edwin C. Rust.)

Until 1905 the sciences at William and Mary were all in one department. The Biology department was established in 1905, and the Chemistry and Physics departments in 1907.

Before these dates certain of the scientific teachers were primarily Biologists, others primarily Chemists, and still others primarily Physicists. We shall discuss those scientists before 1907 who were primarily Physicists.

In the catalogue of 1855 a short history of the college is given. It states that there were thirty students in 1703. It says that "within the last few years large additions have been made to the philosophical and chemical apparatus, both of which are now amply sufficient for all the purposes of instruction in the sciences."

The chair of Natural Philosophy and Mathematics was established at William and Mary in 1712. Of the first six occupants of this chair we know very little. The first outstanding occupant of this chair was William Small, who occupied it from 1758 to 1764, and who was undoubtedly one of the ablest scientists of this period. Jefferson says of him, "he fixed the destinies of my life." Dr. Lyon G. Tyler says, "His physical apparatus, which he selected for the college, was perhaps the best and most complete of any in the colonies."

His scientific influence was felt not only among his students but at the court of Governor Fauquier and in the whole colony. It would seem that science was held in high esteem at this time in Virginia, due largely, no doubt, to the influence of Professor Small.

When he left Williamsburg for England in 1764, he was commissioned by the college to purchase certain scientific apparatus, a partial list of which is known to have cost over 300 pounds sterling. An inventory of this apparatus shows that it was what we would regard today as physics apparatus. It may have been due to the influence of Small that Benjamin Franklin, the best known scientist in the colonies, was awarded an honorary Master of Arts degree by the College in 1756.

The next outstanding scientist at the College was James Madison, who later became President of the College and Bishop of Virginia. He was Professor of Natural Philosophy

and Mathematics from 1773 to 1784, and Professor of Natural Philosophy from 1784 until the time of his death in 1812.

We can judge the nature and subject matter of Madison's teaching by the notebooks and testimony of his students. The best notebook on his lectures is "A compendium of Lectures" on Natural Philosophy, compiled by Robert D. Murchie, a student at the College in 1809. Judged by the subjects treated in this book, Madison's interest must have been in subjects which, today, we would call Physics. The subjects treated are matter or bodies in general, chemical affinity, gravitation, magnetism, motion, central forces, bodies falling perpendicularly, mechanical forces, compound mechanics, wheel carriages, electricity, galvanism, pneumatics, evaporation, winds, hydrostatics, densities and specific gravities, hydraulics, optics, microscopes, telescopes, and sound.

Thomas Griffin Peachy's book presented by his friend G. Croghan contains much the same material, and likewise does W. N. Edward's notebook and Jno. Croghan's notebook.

By a careful examination of these notebooks one is impressed with the careful and orderly way in which Madison organized his material and with the clearness of his presentation.

The esteem in which Mr. Madison's lectures were held and the apparatus for experimental work in science existing at that time at William and Mary is shown in a letter written in 1804 by William Taylor Barry, afterward postmaster-general of the United States. He says, "I attend Madison's lectures on Friday; they are at once improving and highly gratifying. I thought at first that I would not attend them, but give all my attention to law, as Natural Philosophy is a subject not so immediately interesting, but I concluded that one day in the week would not be much and it would serve as a relaxation from my other studies. Besides I might not have such another opportunity of extending my knowledge in that department of science. I imagine no person is better qualified to lecture on Natural Philosophy than Madison, and there is no College on the continent that has such extensive apparatus as this."

William Barton Rogers after he had left William and Mary and had become Chairman of the Faculty of the University of Virginia, says: "Within her venerable precincts liberal methods of instruction found a home before they were adopted by the thronged and applauded colleges of New England, and in her halls were delivered by Bishop Madison the first regular

William Walter Merrymon

Roscoe Conkling Young

HALL PROMOTED TO REAR ADMIRAL

Recipient of Medals

John Lesslie Hall, Jr., '29Bs-PBK, was nominated October 9th by President Roosevelt to be a Rear Admiral.

Rear Admiral Hall was born at Williamsburg, on April 11, 1891, and was appointed to the Naval Academy from Virginia in 1909. After graduation in 1913 he served on the U.S.S. *North Dakota*, U.S.S. *Reina Mercedes*, U.S.S. *Hannibal*, U.S.S. *Utah* and on the U.S.S. *Illinois* in 1918 in connection with training engineering personnel at the Philadelphia Navy Yard. Also during 1918, he was ordered to duty in connection with fitting out the U.S.S. *Phillip*. In 1919 he was Assistant Engineer Officer aboard the U.S.S. *Pennsylvania*, Executive Officer on the U.S.S. *Duncan*, and was on duty in connection with fitting out the U.S.S. *Dahlgren* at Newport News. He was also Executive Officer of the U.S.S. *Schenck* and, in 1920, he was ordered to duty with the Bureau of Navigation, Navy Department. In 1922 he

courses of lectures on physical science and political economy given in the United States."

Patrick Kerr Rogers, Professor of Natural Philosophy from 1819 until his death in 1828, was primarily a Physicist although he was designated as Professor of Natural Philosophy and Chemistry. He published "An Introduction to the Mathematical Principles of Natural Philosophy" in 1822. This book treats dynamics, the doctrine of free motion of masses, the laws of impulse, the laws of pressure, and the laws of machines. Jefferson thought highly of this work. Dr. Rogers' letter to Jefferson indicates that he did not believe in the wave theory of light, first set forth by Huygens and brought into almost universal acceptance by the interference experiments of Sir Thomas Young. He was learned; he kept up with the scientific developments of his day; and he was a careful teacher and successful experimenter.

William Barton Rogers succeeded his father as Professor of Natural Philosophy and Chemistry at William and Mary in 1828, and he occupied the chair for eight years until he resigned to accept the chair of Geology at the University of Virginia. Though later a Geologist, he taught courses in physics during his stay at William and Mary. He was quite

served as Engineer Officer on the U.S.S. *Olympia*. He was ordered to duty at the Charleston, South Carolina, Navy Yard in 1925 with additional duty as Aide to the Commandant, Sixth Naval District. In 1927 he was Executive Officer of the U.S.S. *Camden* and in 1928 was in command of the U.S.S. *Childs*.

In 1933 he was Navigator of the U.S.S. *Wyoming* and in 1934 was First Lieutenant and Damage Control Officer of the U.S.S. *Augusta*. He commanded the U.S.S. *Asheville* in 1935 and in 1936 was Commander of Destroyer Division Fifteen. In 1938 he completed the senior course at the Naval War College, Newport, Rhode Island, and for the next two years was on the staff of the college. On June 3, 1940, he assumed command of the U.S.S. *Arkansas* and in 1941 reported for duty as Operations Officer on the staff of the Commander, Battleship Division Five. He has had duty as Chief of Staff, Commander, Battleships, Atlantic Fleet, and at present is a Headquarters, Commander in Chief, United States Fleet.

Rear Admiral Hall has received the Victory Medal and the American Defense Service Medal, Fleet Clasp.

John Lesslie Hall, Jr. attended the College of William and Mary from 1905 to 1909 but did not complete the requirements for his degree until 1929. While in college he was a member of the football team and the Kappa Sigma social fraternity.

He is a son of the late Dr. John Lesslie Hall, former dean of the faculty and professor of English Language and Literature at the College of William and Mary, and brother of Channing Moore Hall, '08, Joseph Farland Hall, '12, and Emily Moore Hall, '22.

On December 5, 1940, he was initiated into Phi Beta Kappa, Alpha of Virginia.

a successful lecturer and demonstrator. He is most noted perhaps for his founding of the Massachusetts Institute of Technology in 1861. The impression which he made at William and Mary is attested by the fact that the present Physics and Chemistry Laboratory at the College is named for him.

It is safe to say that there have been few, if any, more successful teachers of science in American Colleges. He seems to have been interested in every branch of science.

The College Catalogue for 1829-30 states that the Physics taught in the senior year was dynamics, mechanics, optics, magnetism, steam engines, and certain subjects that would now be taught in an engineering school.

In 1836 William Barton Rogers left William and Mary and Dr. John Millington became Professor of Chemistry, Natural Philosophy, and Civil Engineering at the College. Dr. Lyon G. Tyler states that Professor Millington was trained in the best schools in Europe and that he was the author of famous scientific works. According to the College Catalogue of 1836-37 his Chemistry included heat, light, electricity and galvanism, which we would now call physics. His Natural Philosophy was almost all what we would now call physics.

(Continued on page 29)

ALUMNI RELATIVES

Registration cards of new students who entered the College of William and Mary this fall show many alumni relatives, including one great-great-great grandfather, one great-great grandfather, a great-grandfather, several grandfathers, great uncles, fathers, mothers, uncles, aunts, brothers, sisters, and cousins; covering a period of more than two hundred of the two hundred and fifty years the College has been in existence.

We shall attempt here to list only those whose parents or grandparents preceded them as students at this venerable institution:

Jean Olive Beazley, daughter of Wayland Lee Beazley, '09x.

Elizabeth Rowe Caro, daughter of Elizabeth Rowe (Caro), '22Bs.

Lady Margaret Cary, daughter of Martha Larabee Suter (Cary), '25x.

Josephine Woodford Chisholm, daughter of Walter S. Chisholm, '21x, and Lucille Woodford Brown (Chisholm), '21Ba.

Leigh Allison Crockett, son of Cecil Clinton Crockett, (a).

Dewey Lee Curtis, grandson of Eppa Preston Kirby, '03x.

Russell Carlyle Dey, Jr., grandson of Bascom Dey, '82x.

Laurence Willis Dickerson, son of Laurence Major Dickerson, '24Bs.

Peggy Francis Boutwell Edwards, granddaughter of Oscar Thomas Edwards, '93x.

William Breckenridge Grymes, great-great-great-grandson of Edmund Jennings Randolph, 1838Ba.

Joanne Lillian Hall, great-granddaughter of John H. Dillard, 1840L.

Surry Parker Harrison, son of William Mortimer Harrison, '12x; grandson of Thomas Randolph Harrison, '74x.

Jerrie Ewart Healy, daughter of Joseph Ewart Healy, '10Ba.

William Stebbins Hubard, great-great-grandson of Miles Cary.

Kenneth LeGrand Jones, son of Plummer Flippen Jones, '96Ba.

Laurie Pitts Jones, son of Plummer Flippen Jones, '96Ba.

Gladys Fairbanks Kyger, daughter of Robert William Kyger, '08x.

Eli Merrick Leonard, son of Eli Leonard, '26M.

Spencer Milton Overton, son of Marvin B. Overton, '26x.

Russell Hoover Quynn, Jr., son of Russell Hoover Quynn, (s).

Sally-Lou Smith, daughter of Rex Smith, '20x.

Manuel Francis Torregrosa, Jr., son of Manuel Francis Torregrosa (a).

Susan Katharine Whitehead, daughter of Robert Edward Whitehead, '94x.

BLIND GIRL TAKING GRADUATE WORK AT TULANE

Studies to Bring Light to Others

In September, 1940, a pretty, dark-haired girl from Fort Worth, Texas, wearing thick lenses, entered the junior class at the College of William and Mary. So normally active was she that few people realized she was blind.

Determined that "the blind shall lead the blind" into a more understanding world, Lollar Frances Smith, '42Ba, PBK, having majored in sociology, is attending Tulane University's School of Social Work.

Six years ago, while a student at the University of Texas, Frances was stricken with an eye ailment. She was taken to a hospital in Baltimore but complications set in which made restoration of sight impossible. Though she has some light perception, she cannot see enough to be physically independent.

At the hospital she learned to read Braille and, having learned the touch system of typing before her illness, she decided to return to College to prepare herself to act as a liaison between the blind and the outside world.

"College life after I became blind was different, but I got a great deal more out of college than before. Students read to me and I took notes on the typewriter," said Frances. "When I reentered school I also had a definite objective in view—that of becoming an eye medical social worker—I guess that gave me a greater incentive," she said. "I'd like to be able to help establish a more progressive policy in dealing with the blind. There are many positions that blind people can hold, and work which they can do efficiently but because of popular

(Continued on page 15)

NEW MEMBERS OF THE FACULTY

Thirteen Appointments

Thirteen men and women have been appointed to the faculty for the session 1942-43 to take the places of some who are in the military forces or engaged in other defense work. These new members are:

GEORGE M. MOORE

Assistant Professor of Biology and Assistant Biologist at the Virginia Fisheries Laboratory; Bachelor of Science, Otterheim College; Master of Science and Doctor of Philosophy, University of Michigan.

MARCELITE MAE WALLACE

Acting Assistant Professor of Secretarial Science; Bachelor of Science in Education, Ohio University.

GEORGE HENRY HAINES

Acting Assistant Professor of Economics; Bachelor of Arts, Ursinus College; Master of Arts, Clark University.

ROBERT WINSTON MENZEL

Instructor in Biology and Assistant Biologist in the Virginia Fisheries Laboratory; Bachelor of Science, College of William and Mary.

KENNETH B. RAWLINSON

Instructor in Physical Education; Bachelor of Science, University of Illinois.

ARMINA ELIZABETH CROSBY

Instructor in Library Science; Bachelor of Arts, College of William and Mary.

MARIE HOFFMEYER (TUTTLE)

Acting Instructor in Physics; Bachelor of Science and Master of Arts, College of William and Mary.

ELIZABETH HARRIS

Acting Instructor in Fine Arts; Bachelor of Arts, Randolph-Macon Woman's College.

MILTON CRANE

Acting Instructor in English; Bachelor of Arts and Master of Arts, Columbia University; Master of Arts and Doctor of Philosophy, Harvard University.

WALTER ROGER BUCK, III

Acting Instructor in Chemistry; Bachelor of Science, University of Richmond; Master of Arts, Duke University.

HABIB ARMIN KURANI

Lecturer in Government; Bachelor of Commerce, Bachelor of Arts, Master of Arts, American Uni-

versity of Beirut; Doctor of Philosophy, Columbia University.

HENRI A. JORDAN

Acting Assistant Professor of Mathematics; Doctor-Philosophiae-Naturalis, University of Frankfurt a Main.

ADAM JOSEPH SMITH

Acting Assistant Professor of Mathematics; Bachelor of Arts, Master of Arts, Doctor of Philosophy, University of Pennsylvania.

Blind Girl Taking Graduate Work at Tulane

(Continued from page 14)

prejudice against hiring a handicapped individual, they are not given the opportunity."

Pointing out that the blind "are making their way more and more with the public and what most of them need is not sympathy but understanding," Frances is a living example of her theory.

She lives with her roommate-companion-guide and reader at 805 Broadway, New Orleans, Louisiana, and is already doing work in her chosen field at the Charity Hospital.

We wish to thank the following patrons of the GAZETTE and call to your attention the fact that these advertisers are giving their support to Alma Mater. It proceeds from fair play that we recognize this interest by giving them our wholehearted support:

ALUMNI NEWS

Classification of an alumnus is indicated by letters following the name and class of the alumnus as follows:

| | |
|--------------------------|-------------------|
| A—Academy (only) | H—Honorary Degree |
| Ba—Bachelor of Arts | L—Law Degree |
| Bc—Bachelor of Chemistry | M—Master Degree |
| Bs—Bachelor of Science | S—Special Student |
| G—Graduate Student | X—Non-Graduate |
| PBK—Phi Beta Kappa | |

1896—

William Temple Mooklar, '96x, is trial justice for King William County and for King and Queen County. Mr. Mooklar was admitted to the State Bar in 1901 and has practiced continually since that time. He has been a member of the Board of Supervisors of King William County for almost 22 years; is president of the Aylett Public Library and chairman of the Home Service Committee of the King William County Red Cross work.

1898—

The Shawen Athletic Field, adjoining Thomas Jefferson High School in Richmond, was dedicated November 25th with Ernest Shawen, '98Ba, PBK, for whom the field was named, as guest of honor.

1902—

James Gordon Bohannon, '02Ba, PBK, is a member of the State Bar Association's War Service unit.

1908—

Ashton Dovell, '08Ba-'39H, PBK, is a member of the State Bar Association's War Service unit.

1912—

George Pierce Arnold, '12Ba, is Assistant State Conservation Commissioner, in charge of public relations.

Charles Chapman Snow, '12Bs, is professor of Chemistry at Doane College and he lives at 638 Forest Street, Crete, Nebraska.

1916—

Frederick Deane Goodwin Ribble, '16Ba, Dean of the Law School at the University of Virginia, has been granted a leave of absence because of his appointment by President Roosevelt to serve as an alternate member of the Board of Appeals in VISA. The VISA is the agency charged with the duty of recommending to the Secretary of State aliens to be admitted to the United States during wartime. Ribble also holds degrees from the University of Virginia and Columbia University. He has been on the law faculty at the University of Virginia since 1921. During World War I he was a private in the United States Field Artillery.

H. Wilson Thorpe, '16Ba, is volunteer fuel oil and rationing officer for Hampton.

1920—

Justin Windsor Addington, '20x, is branch manager of the Abbott Laboratories, nationally famous wholesale druggist, at Madison, Wisconsin.

1921—

Katy V. Anthony, '21Ba, PBK, is president of the classroom teachers of the National Education Association.

1922—

Miles C. Burcher, '22Bs, is principal of the Turbeville High School.

1924—

Lawrence Major Dickerson, '24Bs, PBK, who has been for several years with the soil conservation service of the United States Department of Agriculture as acting chief of the Biological Division in the Ohio Valley region has been transferred to the Southwestern region at Spartanburg, South Carolina.

1925—

Durwood Earl Denton, '25Ba, is in foreign service with the American Red Cross.

Henry Irving Willett, '25Ba, has been appointed Acting Supervisor of the Norfolk County Schools to succeed James Hurst, '99, deceased.

1926—

William Franklin Lawson, Jr., '26Ba, is principal of the Clover High School.

1927—

Alex Scott Noblin, '27Ba-'34M, PBK, is the Virginia representative for Row, Peterson & Company, textbook publishers. He lives at 1408 Jefferson Park Avenue, Charlottesville.

Edward Cotton Rawls, '27Bs, passed the American Board of Surgery examinations and is now a Diplomat of the American Board of Surgery.

1928—

Lawrence Warren I'Anson, '28Ba, resigned last May as Commonwealth's Attorney for the City of Portsmouth to accept appointment as Judge of Hustings to fill the unexpired term of K. A. Bain. This appointment was confirmed by the General Assembly and I'Anson was also elected to an 8 year term beginning February 1, 1943.

1929—

J. Raymond Long, '29x, is manager of the Hampton bureau of the Daily Press, succeeding Alonzo F. Colonna, '25x, who volunteered for military service.

1931—

Norvelle Winston Goodwin, '31Ba, is teaching social studies at the Blackstone College for Girls. She has a master of arts degree from Duke University.

William A. Trumbley, '31x, is with the W.P.B. in New Haven, Connecticut.

1932—

Roy Randolph Charles, '32Bs, has been appointed by Governor Darden to his staff of aides.

Aubrey M. Keese, '32Ba, is principal of the high school at Volney.

Elizabeth Vernon Hope (Urban), '32Ba, and her two-year-old son are living at Wytheville while Major Urban is on duty overseas.

Mary Gladys Smithers '32x, is superintendent of public welfare for Culpeper County.

1933—

Robert Beck Deckert, '33x, is supervisor of warning posts for Winchester and for Frederick County.

Francis William Hull, '33Bs, is with the Bristol Aeronautical Corporation in New Haven, Connecticut.

Elizabeth Fallin Squires, '33Ba, is teaching commercial subjects at the Waynesboro High School. She received her secretarial training at the Smithdeal-Massey Business College.

1934—

Frances Louise Bray, '34Ba, is assistant principal at the Westhampton High School, Richmond.

Alice Lee Cox, '34Ba, is Librarian at the Fairfax County Library.

Helene Adelaide Donnelly, '34Ba, is assistant dean of women at the Rhode Island State College, Kingston, Rhode Island. She received her M.A. degree from the University of Pennsylvania.

Price Goodson, '34x, is trial justice of Grayson County. He studied law at Cumberland University, Lebanon, Tennessee.

Gerald Quirk, '34Bs, received his master's degree from Boston University last August.

1936—

William E. Miller, '36x, was graduated last May from the University of Alabama with a B.S. degree in civil engineering, and is now working for the Tennessee Valley Authority in the Project Design Department at Knoxville, Tennessee.

Violet Ramsey (Harwood), '36Ba, is elementary school library supervisor at Norfolk.

Margaret Ella Thompson, '36Bs, is writing all instruction books that are sent out with the instruments—mostly meteorological but some ordnance—made by the Julian P. Friez Division of the Bendix Aviation Corporation.

1937—

October 29th the New York Alumni Chapter held a meeting at the Midston House. A few members of our class were there: Martha Schifferli, Anne Reynolds, and Evelyn Murley.

Martha Louise Schifferli, '37Bs, is now the assistant buyer in the resident buying office of the William Van Buren Company in New York City.

Anne Reynolds, '37Bs, PBK, is teaching in the Lincoln School of Teachers College, Columbia University, and living at Whittier Hall, 1230 Amsterdam Avenue.

Margaret Louise Vass (Radcliffe), '37Ba, is living in Greensboro, North Carolina.

Helen Elizabeth Weigand (Hogge), '37Bs has joined the WAVES and is taking officers training at Smith College, Northampton, Massachusetts.

John Alexander Harrison, '37Bs, is principal of the King William High School at West Point.

Walton Robert Lawson Taylor, '37Bs, PBK, has been appointed technical assistant in the State Budget Office.

Send me more news.

MARTHA LAETITIA FAIRCHILD, '37Ba, PBK,
Permanent Secretary,
72 Barrow Street, Apt. 4U,
New York City, N. Y.

1938—

Mary Virginia Flanary, '38Ba, is teaching English and History at the Dryden High School.

Eleanor Elizabeth Gentry, '38Ba, and Rebecca Williams, '38x, are engaged in Foreign Service for the American Red Cross. Rebecca is doing Hospital Recreation Work in London.

Ione Murphy, '38Ba, is working for the War Department in Detroit, Michigan, and lives at 610 Blaine Street, Apartment 1006.

Another alumna in defense work is Ethel Amelia Weiss, '38Ba. PBK, a precision observer at the Wall Street laboratories in the gauge division of the Inspection Board of the United Kingdom and Canada.

1939—

Greetings from a class secretary who wonders what her classmates are doing, and who also wonders what they are doing to keep up a certain secretary's morale? I'm beginning to develop a kind of complex about lack of news—and when I look at the other letters I bow my head in shame. Since letter writing is the thing to do these days I'm expecting to hear from more of you.

Lucille Edna Harder (Langbauer), brightened my existence with a nice long letter telling me that her husband, Eldon Neal Langbauer, '39Ba, is now in the Navy as an Ensign. He took

a six weeks' training course at Notre Dame and then left for points unknown. Lucille begs for news of Gertrude Morton Shaffer, '39Bs, Anna Lucille Eldridge (Harkless), '39Ba, and Frances Natalie Eels (Martin), '39Ba,—so will expect news of them in the next issue.

James Charles Pye, '39Ba, his wife and baby daughter are living in Chicago, where Jimmy is stationed with the Marines. Audrey Gardiner Smith (McHenry), '39Ba, is also living there.

Thank you, Lucille, it was swell of you to write.

Jane Chase, '39x, is working in the Office of Price Administrator in Brooklyn, and lives at 445 West 22nd Street, New York City.

Armina Crosby, '39Ba, is instructor in the department of Library Science at the College of William and Mary. Others engaged in library work are Rebecca Timberlake, '39Ba, at the Hand Junior High School, Columbia, South Carolina; and Carroll Hutton (MacGahan), '39Ba, at the Luray High School.

How about a card from those of you in the service? Let's try to keep track of each other. It's a difficult thing to do, I know, and I think that the column would be a good way of doing it.

Closing with a wish from the class of 1939 for the best of luck to all of you in the Army, Navy, and Marines.

FRANCES LOUISE GRODECOUR, '39Ba,
Permanent Secretary,
810 Howard Street,
Monongahela, Pennsylvania.

1940—

Airmail, from Ireland, dated October 14th, signed Captain J. S. Hudson, USMC, MB—USNOB, Londonderry, N. Ireland, c/o P.O. N. Y. C., brings news of all kinds about John Stuart Hudson, '40Ba, PBK, and other W. & M's Jack has run across in his travels which have been extensive. After finishing at Quantico he did duty with the F. M. F. at New River, North Carolina; Headquarters in Washington, D. C.; back at Quantico; and now at Londonderry. Jack said he couldn't add any details about his duty in Ireland, but he sounded happy—and we are too to hear that he is now a captain in the Marines and has been appointed to the regular Marine Corps from the Reserves, subject only to confirmation by the Senate. Jack was married on May 10th to Miriam Cason, sister of Arthur Caldwell Cason, '40Ba. Caldwell is an aviator in the Navy and has seen plenty of action. Lenny Goldberg, is in Jack's outfit in Ireland, but hopes to soon return to go to officers training school at Quantico. Fred Lesner, who drops in on Jack every once in a while, is a lieutenant (j.g.) in the U. S. Naval Reserve. To make the round of the services complete, Jack met Mac Fox, who is a corporal in the Army. Jim Pye writes Jack on occasions from his station in Chicago, where he is doing recruiting duty. Jack said they heard with great interest of W. & M's defeating Navy. Too bad the Marines don't play football in our league. Thanks, Jack, for such a grand letter, and good luck wherever you go!

Ensign Thomas B. Cartwright, USNR, '40Ba, wrote us last September 10th from Seattle just as he was about to leave for "up north." He promised to drop us a card and let us know his address. In the meantime, he sends his regards to everyone.

The girls are getting in the fight now—Frances G. Jourdan, '40Bs, wrote on September 10th, that she had been sworn in for appointment to Class V-9, Women's Reserve, USNR, or the WAVES. She's probably at Smith or Holyoke by this time taking her four months' midshipmen's training and when she finishes she'll become an ensign in the Navy! (This is a wonderful opportunity for college graduates and if you want more information about the WAVES write Fran or me. I wasn't able to get into them, but I work for them at the Office of Naval Officer Procurement in Richmond.) Fran also added that Marie A. Harris (Young), '40Ba, and George Young, dropped in to visit her in Meriden, Connecticut, while George was on leave from the Navy.

Marjorie Barnes, '40Ba, dropped us a card on the first of

this month to say that she had changed her address in Jacksonville, Florida, to 2614 St. Johns, Apt. 2.

The following are in library work: Margaret Edwards, '40Ba, Extension Division, State Library, Richmond; Mary Holmes, '40Ba, Junior Librarian, Newburgh, Public Library, Newburgh, New York; Doris Locke, '40Ba, Senior Assistant, Elizabeth Public Library, Elizabeth, New Jersey; Emma Harrison, '40Ba, Amherst High School; Rebecca Bates, '40Ba, Thomas Jefferson Junior High School, Arlington; Edith Rogers, '40Ba, Mathews County High School.

Ordination services were held for Alfred Lenoir Alley, '40Ba, at Bruton Church, Williamsburg, September 19th. The candidate for the deaconate was presented by the Reverend Francis H. Craighill and the service was conducted by the Right Reverend William A. Brown, Bishop of the Diocese of Southern Virginia. "Al" will graduate from the Virginia Theological Seminary in January and will become assistant to the Rector and the associated parishes and chaplain to the Episcopal students at the College.

Lucille Edna Harder (Langbauer), '40Ba, is head of the claim department of the Northern Mutual Casualty Company in Detroit, Michigan.

Nathan B. Hutcherson, Jr., '40Ba, passed the Virginia Bar examinations in July.

Dorothy Edwards Walling, '40Ba, is first grade teacher at Toms River, New Jersey, and lives on Barnegat Boulevard, Beachwood, New Jersey.

Our class president, John Henry Garrett, '40Ba, is now in Alaska with the Navy. Ann and Lucy Ann are both here in Richmond keeping the home fires burning and wondering if the photography is as good up there as it was at Williamsburg and in Richmond.

Come on, gang, write in so that we can try to stick together in these hectic times!

ROSA L'ENGLE ELLIS, '40Bs, Permanent Secretary,
c/o E. C. Hudgins, 2416 Bryan Park Avenue,
Richmond, Virginia.

1941—

Haven't much news to give you this late day in October. The date sort of crept up on me before I knew what was happening and so, the only news I have is gleaned from the three or four letters I have had from you.

The first response I had from my last letter came from the father of James Hepburn Hargis, Jr., '41Ba, telling me that Jimmy was commissioned second lieutenant, Army Air Force, July 4, 1942, at Kelly Field, Texas. He was sent overseas in August, and is now on active duty as a navigator in England, where he expects to be based for the duration.

Abner Charles Fox, '41x, sent me a lot of news of boys in the service, but most of them were in classes before and even after ours. Abner said that he had been moving around for the past two years. He started in Delaware and is now a Lieutenant—Assistant Adjutant of the 7th Tank Destroyer, Camp Hood, Texas.

Now for the WAACS and the WAVES. Mary Katherine Edinger, '41Ba, is in the WAACS, and the last I heard was waiting to be called for training at Des Moines. Jean Margaret Klinefelter, '41Ba, PBK, is up at Smith College, where she is working hard for a commission in the WAVES; and I'm hoping that by the next time I have to write a letter that I'll be up in Northampton doing the same thing!

Richard Wadams Earle, '41Ba, writes that he and Nancy Jane Edds (Earle), '43x, are now living at 302 Argyle Place, Arlington, New Jersey, so that he can be near duPont's, where he is presently engaged in development work on a vital war material.

Gertrude Augusta Gerth Van Wyck, '41Ba, PBK, is a primary teacher at the Bolton School, Westport, Connecticut; and engaged in library work are Myrtie Elizabeth Davis (Hartman), '41Ba, at the Library of Congress; Idell Baker (Hund-

ley), '41Ba, with the Tidewater Regional Library; Ruth Littleton Brisco, '41Ba, with the Taylor Memorial Library at Hampton; Ann Galusha, '41S, with the Fork Union High School; Myra Birchett, '41Ba, with the John Randolph Public Library at Hopewell; and Frances Paul, '41Ba, Assistant Librarian and Secretary of the Sperry Research Library, Garden City, New York.

Astrid Margareta Riffolt, '41Bs, is doing graduate work at the University of Wisconsin.

Clifton Holland Kreps, Jr., '41Ba, PBK, has taken a Master of Arts degree at the University of North Carolina.

Margaret Hull Mitchell, '41Bs, is test construction analyst, psychology division, Army Air Surgeon's Office in Washington.

Flora McLaughlin Kearney, '41Ba, has received her M.A. in English at Radcliffe and is continuing the study there.

I didn't make Homecoming, although I wanted to. But plenty of work to do, and all for the war, kept me at Langley Field. So, no more news. Please write me, even if I don't always answer, you see that I receive your letters, and need the news.

MARJORIE TAYLOR GILDNER, '41Ba,
Permanent Secretary,
33 Forrest Road,
Springfield (Delaware County), Pennsylvania.

1942—

To those of you as unfortunate as I not to have returned for Homecoming let me quote from an eye-witness, Florence Yachnin, '42Ba. "In spite of the changes, it was grand to get back and to see those of '42 who were able to make it." Florence is working at the Bendix Airplane Factory in Brooklyn. Her address is Essex House, New York City.

Thanks, Flossy, for the grand thumb-nail sketch!

I also want to thank Eleanor Robinson Graham, '42Bs, for her letter about herself and Homecoming. Eleanor is working with a pension company. Her firm is sending her to a class in higher algebra so that she may study for an Actuary exam coming up in April. She says that Charles Robert Butler, '42Bs, made the trip from Boston. Chuck has a scholarship to M.I.T.

Shortly after the first GAZETTE was out, I received a nice letter from Paul H. Gans, '42L. He is now an assistant in the Government department teaching a couple of sections of American government. Paul also informed me that he along with Burt Morewitz, '42Ba, and others passed the Virginia Bar Examination.

Edgar J. Fisher, Jr., '42Bs, is still at the Naval Hospital in New York, but is now working in the office of the Executive Officer of the hospital.

Doris Berg-Johnsen, '42Ba, seems to have a very interesting, but at the same time worthwhile job. I'm sure she's to be envied, for you see, Doris is at the Army YMCA at Fort Monroe where she has charge of keeping the canteen in order, buying supplies, keeping all the books, and many other things—including eating at the Bachelor Officer's Mess!

Lucy Middleton McClure, '42Ba, PBK, and Virginia Anna Lyons are working at the Naval Base in Norfolk.

Thanks ever so much for your grand note, Dorothy Jean Ross, '42Ba. Jean tells me that she is running the Rockefeller Foundation in the guise of assistant in the Foundation's library. Here's some news for those of you who are wondering when the March of Time pictures of Williamsburg are coming out. Jean said (at the time of writing) that the script had to be written and the music had to be tacked on before it was completed.

Doris Charles Smith, '42Ba, is working for the Metropolitan Life Insurance Co. in Red Bank, New Jersey.

Remember Harold Lazaron, '42x, of the '40 Varsity Show fame? Well, Harold writes that he is trying to get into the entertainment field of the army and is waiting to hear from the Special Service Corps. Good luck!

The young lady whose voice you sometimes hear in spot

announcements over WRNL is Ethel Virginia Teal, '42Ba. Terry is handling the control board "as well as any man" says the staff manager. In addition to her job, Terry is also studying to secure a radio-telephone operator's license.

Sena Lucile Jennings, '42Ba, is doing her part these days by working in a defense plant at Kingsport, Tennessee.

Eleanor Ely, '42Ba, and Louise DuBose Gordon, '42Ba, are with the cryptologists in Washington.

Virginia Baker Doepke, '42Ba, is working at the office of Public Instruction in Harrisburg, Pennsylvania.

Shirley Rea Hoffman, '42Bs, writes that she has a graduate service scholarship in the psychology department of the University of Chicago.

Mary Ruth Black, '42Ba, PBK, is teaching French and Latin in Harbrack High School in Tarentum, Pennsylvania, and is also doing supervisory work for the Pittsburgh Girl Scout office.

Jean Rhodes Edwards, '42Ba, is writing letters for Henri Bendel in New York.

When last heard about, Lucy Carter Dority, '42Ba, was working the night shift in Washington correcting civil service examinations.

Elizabeth Jane Wakeman, '42Bs, writes that she is doing bacteriology work for the Pease Laboratories in New York. Betsy says that she is doing some research on germicides and antiseptics at present.

"For my bread and butter," writes Emilie Joyce Bonyng, '42Ba, PBK, "I am doing publicity work in the Publications Department of the Prudential Insurance Co."

Virginia Lee Markle, '42Bs, PBK, is working as a statistician in the American Telephone and Telegraph in Philadelphia.

Alice Lillian Walton, '42Ba, is combining work with pleasure—working in the Personnel Department of the New York Central Railroad System and seeing all the best plays.

Charles Malcolm Sullivan, '42Ba, our illustrious president, just got his orders to report for officers training at Northwestern in the V-7 school.

Heard that Janet Euphemia Campbell, '42Ba, is going to Columbia Law School.

James Edward Howard, '42Bs, and Newell (Red) Irwin, Jr., '42Ba, are helping Mr. Voyles with his coaching problems.

Jean Esther Outland, '42Bs, is teaching Physical Education classes at the Norfolk Division.

Elizabeth Louise Bull, '42Bs, is at Fort Omaha in the chemistry lab testing the food that goes overseas.

Elizabeth Irene Beck, '42Bs, is studying Laboratory technician work at the Moses Taylor Hospital.

Claude Kelso Kelly, '42Bs, is at the Medical College of Virginia in Richmond.

Cleo Elizabeth Tweedy, '42Bs, is teaching Physical Education in Hampton.

Virginia Ann Longino, '42Ba, I hear, is a secretary in Washington.

We have heard of the following appointments for members of our class who majored in Library Science: Catherine Abernathy, '42Ba, Senior High School, High Point, North Carolina; Arlie Virginia Alexander, '42Ba, Pulaski High School; Margaret Lee Alexander, '42Ba, Waynesboro High School; Christel Ammer, '42Ba, Coast Artillery School, Fort Monroe; Katherine Barden, '42Ba, Teacher-Librarian at Franklin High School; Annie Virginia Bruce, '42Ba, Wytheville High School; Emalee Ewing, '42Ba, Cocke Memorial Library, Hollins College; Isabel Chandler Oliver, '42Ba, Oceana High School; Lois Jacqueline Phillips, '42Ba, Montpelier High School; Dorothy Jean Ross, '42Ba, Rockefeller Center Foundation, New York City; Elizabeth Latane Stiff, '42Ba, Washington and Lee High School, Arlington.

Janice Elizabeth Harvey, '42Ba, is attending the Boston University School of Social Work. Her present address is South End Settlement House, 20 Union Park, Boston, Massachusetts.

Seigniora Tabb Taylor, '42Ba, PBK, is teaching at the Marshall High School, and Wallace Stephen Sanderlin, Jr., '42Ba, PBK, is teaching social studies at the Hopewell High School.

Audrey Lee Wallace, '42Ba, is working with the Federal Housing Administration at Newport News.

Sara Elizabeth Moore, '42x, is working at Langley Field.

Nancy Jordan Parker, '42Bs, is working the Health Department Laboratory in Norfolk. Her chief job consists in doing blood tests for the draft boards in eastern Virginia.

Constance Raboteau Curtis, '42Ba, writes that she is teaching at a junior high school in Norfolk.

Frances Virginia Sterne, '42Ba, is just outside of Norfolk teaching seniors at Norview High.

Got a card from Belvin Herman Robin, '42Ba. Belvin enlisted in the Army Air Corps for flight training and while waiting to be called is working in Norfolk.

Joseph Howard Summerell, '42Ba, writes that he has been ordered to report November 17, to Northwestern for the naval V-7 course.

Etta Louise Wallace, '42Bs, PBK, tells me that she is working as a chemist in one of the Eastman Kodak Company's lab-

oratories. Louise is also going to school one night a week to study elementary sensitometry.

I hear that Mary Turner Morgan, '42Bs, is teaching school in Martinsville.

Lucy Burke Allen, '42x, is teaching in a girls' school near Charlottesville.

Phyllis Anne Hile, '42Ba, writes that she is enjoying the busy city of Washington where she is working with the U. S. Maritime Commission. Thanks for the news, Phil.

Betsy Lee Hooper, '42x, is working for the Treasury Department.

Eleanor Cook Mabry, '42Ba, wrote covering the William and Mary-Harvard game which she attended on her vacation. She said that among the many alumni there to cheer the "Indians" on were Nancy Elizabeth Ryan, '42Ba, Charlotte Elise Steitz, '42Ba, Douglas Robert Robbins, '42Ba, Samuel Burt Robbins, Jr., '42Ba, John George Rinklin, Jr., '42Ba, and Mary Henderson (Merritt), '42Ba.

Emma Elizabeth Bourquin, '42Bs, is training at Mount Sinai Hospital in Cleveland to be a medical technologist.

Jan Wiegand, '42Ba, dropped me a card, after having a wonderful time at Homecoming, to tell me that she is about to start work in New York.

And now for more news of our classmates in the service! First, look at the girls who are going to be wearing a uniform! Irene Jessie Buchan, '42Bs, has joined the WAVES, and is at Smith in officer's training school. Margaret Marie Lucas, '42Ba, PBK, enters the WAVES in February and then will go to Smith for her four months' training course. And to complete this list we have Geraldine Bear Koteen, '42Ba, who is threatening to join the WAVES!

Frank Acosta, '42x, is a sergeant in the Marines. He also takes over the job of news reporting for them, going on expeditions and then writing them up. It seems that Hansford Oliver Foster, '42Bs, James Benton Hickey, '42Ba, and Vincent Alfred Lascara, '42Ba, are now at Columbia Midshipman's School. Thomas Frederick Crane, '42Ba, has donned Navy blues preliminary to going into flight training. Bernard Itzkowitz, '42Ba, is in the medical corps doing social service work. Robert Stephen Knight, '42Ba, PBK, is studying meteorology at New York University as an air corps cadet. Laurie Reid Burgess, '42Bs, is in the ground school of the Army Air Force.

As to what "yours truly" is doing I can tell you only so much. After turning down a kindergarten job, and a society reporting job for something more exciting, I decided to get a defense job. I am in a special department of the Naval Ordnance division of the Hoover Co. What I am doing is a military secret, but I can tell you this much—I am not sweeping the floors!

I would like to write you all long letters and answers to your nice letters, but with so many of you I'll just have to confine my writing to the GAZETTE. My column goes in to the Alumni Office the first of *September, November, February, and April*, so any news that I receive after that has to wait for the next issue.

Keep writing!

MARY MARGARET FIGLEY, '42Bs,
Permanent Secretary,
North Market Extension, Canton, Ohio.

Special—

Foxhall Thornton Parker (s) is Rector for Christ Chapel in Groveton and the Wellington Villa Mission at Alexandria.

Reported Missing in Action—

Samuel Walter Laughon, '38x, of Amherst, has been reported missing in action. He was commissioned an Ensign at Northwestern University in May of this year and was assigned as assistant navigator on the heavy cruiser, U.S.S. *Quincy*, recently reported lost. Laughon was graduated from the University of Richmond in 1938 and had almost completed work at Johns Hopkins University for his Ph.D. degree.

Correction—

The GAZETTE for October, 1942, announced the marriage of Mollie Eloise Waters, '38Ba. The Editors have learned that the GAZETTE was misinformed and, therefore, wish to correct the announcement and express apology for any embarrassment that such an announcement may have caused.

Born

1927—

A son, Edward Cotton, Jr., June 1, to Edward Cotton Rawls, '27Bs, and Mrs. Rawls.

1931—

A son, November 3, to Frank Harmon Beard, '31Bs, and Mrs. Beard.

1933—

A son, Stephen Lawrence, July 25, to Victor R. Galea and Alice Beatrice Herzberg (Galea), '33Ba. A daughter, Elaine, was born February 11, 1939. Under date of August 17, Alice wrote: "We are still in Malta. In March we were 'blitzed' out of our home and became 'refugees' for the second time since the war began. Am writing a book about our experiences since Italy entered against us."

1934—

A daughter, Carol Williams, in August, to Cecil Carlisle Harper, '34Bs, and Dorothy May Allen (Harper).

1935—

A son, George Bland, Jr., October 18, to George Bland Hoke, '35x, and Agnes Padgett (Hoke).

A daughter, Rebecca Leola, September 24, to George Samuel Oldfield, '37Ba, and Dorothy Douglas Prince (Oldfield), '35Ba.

A son, Allen Garnett, October 1, to H. Garnett Snead and Mary Elizabeth Allen (Snead), '35x.

1937—

A son, William Edward, Jr., August 10, to William Edward LeGrande, '37Ba, and Helen Gudebrod (LeGrande), '40x.

1938—

A daughter, Carol Jane, July 23, to Harvey A. Shuler, '38Ba, and Sally Brooks (Shuler).

1939—

A daughter, Sallie Scott, May 31, to Archie B. Berkeley and Jeannette McDaniel Haydon (Berkeley), '39Ba.

A daughter, Janet Fielding, August 6, to Thomas F. Scholes and Clementine Samsel (Scholes), '39x.

1940—

A daughter, Sara Morse, September 28, to Burton Morse Guilford and Sarah Safford (Guilford), '40x.

A son, October 18, to Eldon Louis Nurnberger and Alvene Louise Eppinger (Nurnberger), '40Ba.

A daughter, to Lyman Hall Robertson and Constance Bainbridge Truxton (Robertson), '40Ba.

A daughter, Barbara West, August 26, to Richard P. Scott and Margaret Boals West (Scott), '40Bs.

A son, February, 1942, to Robert Vincent and Helen Beard (Vincent), '40x.

A daughter, Lurania Morris, June 22, to Gordon Winfield Hanna, '40Bs, and Carrie May Turner (Hanna).

1942—

A son, Matthew, Jr., July 25, to Matthew Whalen and Edith L. Davies (Whalen), '42x.

Deceased

1893—

Charles Smith, '93x, October 10, at his home "Prospect Hill" near Bird's Nest. Mr. Smith attended the College one year, 1889-90, and engaged in farming in Northampton County.

Chastine Gillespie Williams, '93x, October 3. He attended the College two years, receiving the L.I. in '91, and was graduated from the Medical College of Virginia. Dr. Williams had been engaged in the practice of medicine in Westmoreland and King George Counties thirty-four years. Prior to that time he was located in Florida. Active in civic and church affairs he was a member of the vestry of Saint Peter's Church, served on the Board of Directors of the Bank of Westmoreland and was also vice president of that institution; and a member of the school boards of Westmoreland and Richmond Counties.

1899—

James Hurst, '99Ba, Φ Β Κ, October 14, at a Norfolk hospital less than one hour after he was stricken with a heart attack while en route to his office. Mr. Hurst was born in Northampton County in 1879 and since July 1, 1917, had been superintendent of the Norfolk County Schools. From 1926 to 1932 he was a member of the Board of Managers of the Alumni Association; serving one year, 1928-29, as President of the Association. On June 8, 1935, he received the alumni medallion. In addition to being prominent in educational circles, Mr. Hurst was also active in Masonic and church affairs, having been past master of his lodge, and chairman of the Board of Stewards of the Epworth Methodist Church.

Thomas Burton Snead, '99x, October 15, at his home in Richmond after a long illness. Mr. Snead was born in King William County on March 10, 1878, and at the age of sixteen entered the College for three years, 1895-98. After two years of teaching he enrolled at the University of Virginia Law

The Largest and Best Place to Eat
in Williamsburg

School where he was graduated in 1902. For more than thirty-seven years he was Referee in Bankruptcy of the United States District Court for the counties of Chesterfield, Powhatan, Goochland, and Henrico.

1925—

William Randolph Kinser, '25x, September 15, at his home in Mount Airy, North Carolina. A native of Hillsville, he attended the College the session 1921-22.

1926—

Leigh Tucker Jones, '26Bs, professor of Physical Education, died December 1st, after a brief illness.

1938—

Cecilia M. Moreback, '38x, September 18, at Newark, New Jersey.

1939—

Stanley Alan Hecker, '39Ba, Φ A, killed September 2, in plane accident at McDill Field. Buried with military honors in Saint Augustine National Cemetery. On August 5, Stan, received his wings and a commission as second lieutenant in the Army Air Force at Albany, Georgia, and was sent to Tampa, Florida.

1943—

James Gilmer Heath, '43x, Δ X A, killed September 16, in the crash of a plane near Delhi, Ontario, Canada. After leaving College Jimmy became a member of the Royal Canadian Air Force and received his commission as instructor on July 25.

Honorary—

Dice Robins Anderson, who received the honorary degree of Doctor of Laws from the College of William and Mary in 1924, died in Fredericksburg on October 23. He was professor of History and Government at Mary Washington College and former president of Randolph-Macon Woman's College, Lynchburg, and of Wesleyan College, Macon, Georgia. Dr. Anderson was president of the Virginia Association of Colleges in 1923 and president of the Georgia Association of Colleges in 1936-37. He was the author of several historical and biographical studies.

 Pitts, George C., Supervisor Teacher in Mathematics, USA.
 Ross, Arthur, Instructor in Fine Arts, USNR.

John Boyd Bentley, '19x

(Continued from page 8)

to apply for entrance to The Protestant Episcopal Theological Seminary in Virginia, where he was accepted as a special student.

On May 28, 1921, John Boyd Bentley and Elvira Wentworth Carr were united in holy matrimony in St. John's Church, Hampton, Virginia. Their application for service in Alaska was accepted by the Board of Missions of the Protestant Episcopal Church, and the bride and groom soon left for Christ Church Mission, Anvik, Alaska.

Bishop Peter Trimble Rowe, Bishop of Alaska, met the Bentleys as they were on their way to Anvik, and was very favorably impressed. He could see that John, as he affectionately refers to his Suffragan, had the physical strength necessary to combat the intense cold and primitive living conditions, but Mrs. Bentley was such an attractive Virginia lady, and he had his doubts about her. He was wise enough not to express his misgivings and is glad now that he did not. Like all really big people, both the Bentleys made their adjustments with good grace. They did not give up their Virginia culture but adapted it to Alaskan conditions.

The Bentleys arrived at Anvik during the height of the mosquito season, and were warmly greeted by swarms of the pesky insects as well as by the staff and children of Christ Church Mission. From the early explorers to Alaska to the comfortable traveling tourist of 1940, mosquitoes in the interior have been either a nuisance or an outright bother. To the Bentleys they were unbearable during their first few hours in their new home.

The Reverend John W. Chapman, the first Protestant Episcopal missionary to Alaska, and founder of Christ

Church Mission, was still the priest-in-charge when the Bentleys arrived. He and his staff had renovated the little building which had been built for an infirmary but used as the school. The building was to be the Bentleys home and Dr. Chapman quite proudly showed them to it. No mosquitoes were visible as they entered, but Dr. Chapman had hardly left before those which had come in on their clothing and through the door each time it was opened began to make life miserable. The novice missionaries swatted one mosquito after another but all the time seemed to be fighting a losing battle. There was nothing they could do and no place they could go to get rid of the little pests. In desperation, John Bentley went to Dr. Chapman and asked if anything could be done to ease the situation. Dr. Chapman advised him to try burning a spoonful of Buhach insect powder, a can of which had been placed in the Bentley's home. To their joy and comfort, the Buhach had been burning only a few minutes when every mosquito had mysteriously disappeared. Immediately the Bentleys decided they would never be without Buhach as long as they lived in Alaska. Thus began four years of a happy and successful ministry to the native Indian population of the Anvik community and the surrounding area.

While Mrs. Bentley was learning to cook with one-year-old eggs and powdered milk, her husband was learning to be a good Alaskan missionary. He was given the Mission boys as his major responsibility and in the long winter evenings sat around the friendly stove and told Biblical stories to them and listened to stories they had to tell. The slightest sound outdoors would often start the boys on a story of the Stick men. These little invisible men who lived in the woods and kidnapped children were very real to the Mission boys and their monitor had to use all his ingenuity to show them that no such men existed. He would remind them that mice, weasels, and even birds made tracks in the soft, fluffy snow and then asked how a Stick man could walk without leaving tracks. From the stories the boys told and from conversation with the older people John Bentley learned of the animistic beliefs of the Anvik people.

Mushing dogs, hauling water and wood and emptying the Mission garbage all became a part of John Bentley's daily chores. He learned, as all Alaskan missionaries have to learn, that in order to live in the Interior, much physical strength is required, but the joy and privilege of telling the message of Christianity to the superstitious, but friendly natives compensates for any hardships.

One year after the Bentleys' arrival at Christ Church Mission, Bishop Rowe made his annual visit to the Mission. While he was there he ordained John Bentley to the Diaconate, the first of the three orders in the ministry of the Episcopal Church.

After his ordination, John Bentley assisted Dr. Chapman in administering the sacraments of the Church and made regular visits by dog team to Shageluk and Hologochacket, two native villages on the Shageluk

Slough, twenty-two and sixty miles, respectively, from Anvik. These trips were not especially hard or long for a strong young man but they were an excellent prelude to the longer, harder dog team journeys John Bentley was to make later in his ministry.

Four happy years quickly passed and the Bentleys found themselves about to return to the States. To many people who live in such isolated spots as Anvik, the prospects of seeing one's own folk—the drinking of a Coca-Cola and attending a movie are things to anticipate, but if the Bentleys missed them, the idea of leaving their Alaskan friends was harder. The Anvik people proudly tell how Mrs. Bentley wept the day the Government river boat stopped to take them on the first lap of their journey outside.

Mrs. Charles H. Bentley, the mother of John Bentley, was ill when her Alaskan son came home. In order to be near her during the closing days of her life, John Bentley gave up his missionary work and became a master in Charlotte Hall School, a military preparatory school in Maryland. Here he was known to the students as Captain Bentley, and again enjoyed for a season military life.

In 1926 the Reverend Mr. Bentley was called to be the assistant minister of Bruton Parish Church in Williamsburg, Virginia, where he served four years. Dr. W. A. R. Goodwin was rector and having dreams of a restored Williamsburg. In 1927 Dr. Goodwin's dreams began to materialize and a great deal of his time was given to the Restoration. A large share of the work of Bruton Parish Church fell on his assistant. William and Mary students who sat in the tall boxed pews of Bruton and listened to John Bentley's sermons will recall that nearly every address contained some reference to his pet theme, Alaska.

In addition to his work in Bruton Parish Church, Mr. Bentley served as minister-in-charge of Hickory Neck Church, Toano, Virginia; Grace Church, Yorktown; Chaplain to the Robert Hunt Memorial Shrine, Jamestown; Chaplain to Episcopal students at the College of William and Mary; Chaplain, Eastern State Hospital, Williamsburg.

In connection with his work in the Eastern State Hospital there is one incident which tends to show the stature of the man. On one of his regular visits to the hospital, the superintendent of the institution invited him to see a violently insane patient. As Mr. Bentley stepped into the padded cell the inmate jumped to his feet and stood rigidly at attention. The inmate had been John Bentley's stable sergeant during the first World War.

In 1929 John Boyd Bentley was advanced in the ministry of the Episcopal Church to the Priesthood. His mother died during William and Mary's Christmas holiday that year, and the following summer he and Mrs. Bentley returned to Alaska, where he was appointed Archdeacon of the Yukon.

Before the Bentleys left Williamsburg, a friend reminded Mr. Bentley that he was doing a good work,

that his opportunity for service was great and that he seemed well qualified to do the work he was doing. For this reminder the friend received the following reply: "Yes, I think you are right, but there are other capable men anxious to do the work I am doing here. There are not so many who want to serve in Alaska. I must go where I feel it my duty to go." He gave up a salary approximately double that of an Alaskan missionary to obey the dictates of his conscience.

On arriving at Nenana, Alaska, Mr. Bentley took up his duties as Archdeacon of the Yukon with zeal, and although he traveled almost constantly, saw only a small portion of the vast territory whose spiritual oversight he was directing under Bishop Rowe's supervision.

During the month of May, 1931, while he was waiting for the ice to go out, prior to continuing his travels by boat, Mr. Bentley prepared a commencement address to be delivered at the University of Alaska in Fairbanks. He made arrangements at the Nenana Railroad Station to be notified of the movements of trains going to Fairbanks in time for the speaking engagement. The stationmaster promised to telephone him in time to catch a freight train, but neglected to do so. During the night Mr. Bentley heard the train rumbling by on its way to Fairbanks. The next morning, dressed in walking boots and with a pack on his back, he too, started for Fairbanks and walked every step of the fifty-nine mile journey. The graduating class, the faculty and others declared that year's commencement address the best ever delivered at the University of Alaska. One young man remarked that he would have been glad to walk fifty-nine miles to hear Archdeacon Bentley.

On September 30, 1931, John Boyd Bentley was consecrated Suffragan Bishop of Alaska, and enjoyed the distinction of being the youngest bishop in the Episcopal Church for several years.

To visit his widely scattered missions in Interior Alaska requires constant travel by dog team or plane in the winter and boat during the summer. Mrs. Bentley accompanies her husband as he makes his visits along the great muddy Yukon and its tributaries. Each summer Bishop and Mrs. Bentley travel over three thousand miles, mostly in their twenty-eight-foot Yukon poling boat, the *Discovery*. This little craft is powered by an outboard motor.

One year (1936) as they were on their way up the Koyukuk River to Allakaket's St. John's-in-the-Wilderness, the only mission station which serves both Indian and Eskimo people and one of the two interior stations within the Arctic Circle, Mrs. Bentley had a very harrowing experience. They had traveled most of the five hundred lonely miles from Koyukuk Station to Allakaket and were landing at the first Allakaket fish camp when their engine caught fire. Bishop Bentley, fearing their supply of gasoline might explode, shouted for Mrs. Bentley to jump. She did, and landed in over six feet of icy-cold glacial water. Fortunately, there were native men near who succeeded in helping Mrs. Bentley out before any permanent harm was done. Having

seen Mrs. Bentley safely ashore out of the corner of one eye, Bishop Bentley devoted the next few seconds to the fire, which he succeeded in extinguishing before too much harm was done to the *Discovery*.

Each year the Bentleys have their experiences, but they are the type who can take the bad with the good. Bishop Bentley has won the respect and confidence of his staff and the native people. He is still one of the younger bishops of the Church and we believe he will become more deeply loved and better known with each passing year. Interior Alaska is fortunate in having such an outstanding man of God for its leader.

Added to Bishop Bentley's many duties and responsibilities is that of editor of *The Alaskan Churchman*, the official quarterly Alaskan missions' magazine.

Bishop Bentley has been honored by both his Alma Maters. He received his Doctor of Divinity degree from the Episcopal Theological Seminary in Virginia and was given his Phi Beta Kappa key from William and Mary's Phi Beta Kappa Chapter, the Alpha Chapter of Virginia.

Physics at William and Mary

(Continued from page 13)

The set-up was very much the same until 1842-43 when private medicine was added.

In 1843-44 the catalogue states that two new rooms were added—a chemistry laboratory and a philosophical lecture room. These were described as "more capacious and replete with every modern improvement and convenience and furnished with very extensive apparatus for illustration."

In 1830 before Professor Millington came to the College, he wrote a book on Mechanical Philosophy, which treats mechanics, pneumatics, hydrostatics, hydraulics, and the steam engine. He also wrote a two-volume manuscript textbook for his chemistry class at William and Mary for the session 1844-45.

He was a man who kept abreast of the times scientifically, as is shown by scientific articles in his possession and by reports he made to the Royal Institution from time to time.

In 1848 Mr. Benj. S. Ewell was elected Professor of Natural Philosophy, Chemistry and Mathematics. The catalogue of 1874 still lists him as Professor of Natural and Experimental Philosophy and Mathematics, but the subject which absorbed most of his attention throughout his tenure from 1848 until 1888 was Mathematics.

When the college reopened in 1888 with Dr. Lyon G. Tyler as President and Dr. Van F. Garrett as Professor of Natural Science there was practically no laboratory equipment that had escaped the fires and ravages of war which the College had encountered. Of the Physics equipment the catalogue of 1888-89 says, "The Physics laboratory is furnished with charts and blackboards, and apparatus for illustration in Physics." Not only was the laboratory equipment inadequate, but there were no suitable rooms for scientific instruction until 1905.

The new "Science Hall," later called "Ewell Hall," and torn down in 1928, was built in 1905. It housed the departments of Biology, Chemistry, and Physics for a number of years. The department of Biology was housed on the second floor, and the departments of Chemistry and Physics on the first floor.

The catalogue for 1905-06 gives the following description of this building: "A new science Hall has been recently added to the college, and is a handsome building. It is thoroughly equipped with lecture rooms, laboratory, and apparatus. The

departments of Physics and Chemistry occupy the first floor of the science building. . . ."

"The Physics lecture room provides for sixty students. It has lecture table, folding seats, electric lights, steam heat, and water. The apparatus room adjoins the lecture-room and is well supplied with apparatus for lecture experiments; and being convenient also to the laboratory is used for storing some of the larger pieces of students' apparatus."

Though primarily a Chemist, Dr. Van F. Garrett taught what physics was given at the College between 1888 and 1907. He was a fine Southern gentleman of the old school and was greatly beloved by his students.

Professor W. H. Keeble, the first head of the Physics Department, served the College from 1907 until 1919. During this period the department had a substantial growth. Due to his enthusiasm and the logical way in which he organized the subject matter in his own mind, his capacity for clear exposition was unusual. He had a genius for making difficult things seem simple and dark things clear. He was thorough, logical, and conscientious in his teaching. He was quite popular with the students in spite of the fact that most students had to work harder in his courses than in most other courses.

He was trained at the University of Tennessee and at the University of Chicago under such men as Michelson, Millikan, and Gale.

With the aid of a student assistant he gave two years of physics each year—a year of general physics and a year of more advanced physics. From 1909 until 1912 he included a course in astronomy in his teaching program.

In 1919 Mr. Keeble resigned and Roscoe C. Young became head of the Department with Herbert Lee Bridges, Jr., as student assistant.

At this time the College began a rather rapid growth due largely to three things. In 1918 women had been admitted; in 1919 a new President, Dr. J. A. C. Chandler, took office and became quite active in building up the College; and the war had given a new stimulus to education.

Physics continued to grow along with other departments, though not as fast as some, since much of the increased enrollment was due to women, and women do not take to Physics as readily as men. Yet the Department has always had some very strong women students in it, students who do quite as well as the men students.

The William Barton Rogers Hall was erected in 1927 as a memorial to the Professor of Natural Philosophy at William and Mary who later founded the Massachusetts Institute of Technology. The first floor of this building houses the Department of Physics. The department has laboratories for general physics, mechanics, electricity, light, sound, heat, and a photographic darkroom. In addition there are two lecture rooms, a stock room, reading room, shop, switchboard and battery room, and two offices with private research laboratories attached.

In 1927 William Walter Merrymon joined the Department as Associate Professor, and in 1935 a graduate assistant was added.

Three things happened around 1930 that tended to cut the enrollment in Physics. First, the depression cut the demand for people trained in physics; second, since that time (until very recently), there has been very little demand for physics teachers in secondary schools in Virginia, and third, physics students from Norfolk and vicinity have gone to V. P. I. rather than to William and Mary due to the fact that the Physics and Mathematics Departments at the Norfolk Division were turned over to V. P. I. for operation.

In spite of these handicaps the enrollment since 1930 has remained about constant and the quality of students has been uniformly good.

Students who graduate at William and Mary with concentration work in Physics have many fields of work open to them.

Some of its graduates are teaching Physics and related subjects in high schools and preparatory schools. Some have completed advanced degrees in universities after leaving William and Mary and are now teaching and doing research in universities, or are doing research in large industrial plants.

Many have gone into scientific service with the Federal and State Governments, such as the Bureau of Standards, the Army, the Navy, the Weather Bureau, and other bureaus which concern themselves with the welfare of business and industry. In more recent years many have gone into aeronautical work in the N.A.C.A., and into laboratories maintained by the manufacturers of aeronautical parts, accessories, and completed planes.

Many go at once into business and manufacturing since practically every industry now has its research and control laboratory. A great variety of work is found in these laboratories, such as x-ray work in hospitals or in industry, photographic work, metallurgy, work with lamps, vacuum tubes, and a large number of mechanical, thermal, electric, and optical appliances. The foundation for all kinds of engineering being physics, it is not surprising that concerns like General Electric, Westinghouse, Western Electric, and the American Telephone and Telegraph Company prefer men with training in Physics.

Some of our graduates have found their life-work in more specialized fields of engineering and science, such as mineral and oil prospecting and refining. Others, some of whom now have their own businesses, have gone into work in air conditioning, refrigeration, and radio.

In addition to its many practical uses the department believes that training in Physics is well worthwhile for its own sake; for training the powers of observation and deduction; and for cultural reasons.

The Department of Physics at the College of William and Mary has had a rather unusual unity and continuity of purpose. There have been only two heads of the department in the thirty-five years of its existence. The aim of both of these men as well as of those who have worked with them has been to give their students a thorough grounding in undergraduate Physics.

Before closing this article it should be said that the present school year has seen an increase in the enrollment in general physics of over one hundred and forty per cent. Likewise there has been a substantial increase in the enrollment of the department in the intermediate and more advanced classes. This has been due mostly to the war effort.

The members of the Department at present are: Roscoe Conkling Young, Head of the Department and Professor of Physics since 1919; A.B., B.S., A.M., College of William and Mary; Ph.D., University of Chicago. Trained under Michelson, Millikan, and A. H. Compton. Special fields of interest are Alternating Currents, Kinetic Theory of Gases, Thermodynamics, Electronics, Modern Physics, and Theoretical Electricity.

William Walter Merrymon, Associate Professor of Physics since 1927; A.B., University of Missouri; A.M., University of Illinois; Ph.D., University of Chicago. Trained under Michelson, A. H. Compton, and W. F. G. Swann. Special fields of interest are Mechanics, Optics, Astronomical Physics, Aerodynamics, Meteorology, and Experimental Physics.

Mrs. Marie Hoffmeyer Tuttle, Acting Instructor in Physics; B.S., A.M., College of William and Mary.

Our Eighth War

(Continued from page 6)

And so, elsewhere in this issue, for the first time we list the alumni who are presently wearing the uniform of the armed forces. It represents a total of 559 reported to the Alumni Office. The GAZETTE hopes that you will

read these names carefully and advise the editor of any not reported so that they may be included in subsequent listings which will follow. The College and the Alumni Office want a record of every alumnus in the armed forces—every William and Mary man and woman who is in OUR EIGHTH WAR.

Indians Cap Conference Championship

(Continued from page 1)

team, the Indians at one stage of the season led the nation in total defense. More important, though, has been an impressive string of victories over both state and out-of-state teams.

Only blemishes on William and Mary's record in ten games this season were a 7-7 tie with Harvard, and a 14-0 defeat by the powerful North Carolina Pre-Flight eleven. One more game remains on the Indians' schedule—an intersectional battle with Oklahoma at Norman, Okla., on December 5.

That 7-7 deadlock with Harvard was just one of those things. William and Mary pushed the Crimson around a great deal, but, unfortunately, most of the pushing was done between the two 20-yard lines. Harvard scored in the first minutes of the final period on a deceptive pass to pull up even with the Tribesmen.

In going down, 14-0 before Carolina Pre-Flight, the Indians played magnificently against a hand-picked team of former college and professional stars. The score should, and could, have been 7-0, but when the Tar Heel Cadets finally scored their first touchdown in the last five minutes of the fourth quarter, the tiring Indians resorted to long and desperate passes in an effort to score themselves. The inevitable happened. A pass interception, a long runback, and bang! Another touchdown.

After the game, many of the Pre-Flight boys told William and Mary players that the Indians were the best team they had played all year—better even than Boston College's powerhouse, which whipped the Pre-Flight eleven, 7-6.

Two of William and Mary's most prominent triumphs this year were over Navy (3-0) and Dartmouth (35-14). Harvey (Stud) Johnson, the Indians' great fullback, kicked the field goal that sank a fine Navy team which proved its true strength in later games this season. The rout of Dartmouth came as a stunning surprise to William and Mary supporters, most of whom figured the Hanoverians as the toughest college team the Tribesmen would play this year.

Within the state, Coach Voyles' boys achieved marked success, first by beating Virginia Tech, 21-7 and later by routing V.M.I., 27-6. The score against V.M.I. might have been considerably higher, inasmuch as the Indians scored all their points in the first half, then played a cozy second-half game, obviously with an eye cocked on the game with Carolina Pre-Flight the following Saturday.

Marvin Bass, captain and left tackle on the William

and Mary team, proved himself an able leader this season, and he ranks with the best and most popular captains ever chosen to lead a William and Mary eleven. Certainly no other William and Mary captain excelled him in either native football ability or in gentlemanly qualities.

The 1942 season in retrospect:

WILLIAM AND MARY 27, HAMPDEN-SYDNEY 0

The Indians launched their 1942 campaign against Hampden-Sydney in a night game at Norfolk. Bob Longacre, Johnstown, Pa., tailback, romped 37 yards for the first touchdown. Johnny Korczowski and Harvey Johnson tallied one each, and Jackie Freeman whipped a 45-yard scoring pass to end Glenn Knox for another.

WILLIAM AND MARY 3, NAVY 0

Ten years had passed since a William and Mary football team had beaten Navy, but this was the year to do it again, if any. Harvey Johnson booted a 20-yard field goal in the first period and that was all the scoring for the day. Navy threatened several times, but always the tough Indian line held the Middies at bay. Navy had a slight statistical edge; William and Mary had the scoring edge.

WILLIAM AND MARY 21, VIRGINIA TECH 7

Up in the hills of Blacksburg, Virginia Tech's big Gobbler eleven figured to give the Indians fits, but the Tribesmen won this one with comparative ease. Bob Longacre scored the first touchdown from five yards out, passed 20 yards to Glenn Knox for another. Then Tech broke Foltz away for 63 yards and a tee dee, but the Indians clinched the game early in the fourth period, sending Al Vandeweghe 17 yards on an end around for the third score.

WILLIAM AND MARY 7, HARVARD 7

In Virginia, the Indians were an even bet to take this one. Up North, Harvard was an 8 to 5 choice. The Tribesmen muffed two scoring opportunities in the first half, finally cashed in on a 26-yard march in the third period. Korczowski and Johnson carried on straight power, with Korczowski going over. Johnson kicked the extra point. Harvard pulled up even on the first play of the fourth quarter on a deceptive eight-yard pass, O'Donnell to Perkins. One little five-yard offside penalty, allowing Harvard to retain possession of the ball just before its touchdown drive, cost the Indians this game.

WILLIAM AND MARY 61, GEORGE WASHINGTON 0

This was one for the books. William and Mary starting tackles, Captain Marvin Bass and Harold Fields, scored the first two touchdowns of the game, Bass on a blocked punt and Fields on a pass interception. If a couple of tackles could score, what could you expect from the backs? Longacre tallied twice, once on an 80-yard punt return, Korczowski counted twice, and Johnson, Freeman, and Hubbard each crossed once.

WILLIAM AND MARY 35, DARTMOUTH 14

What generally was believed to be the Indians' toughest opponent to date turned out to be not so tough, at all. Bob Longacre ran wild, scoring three times—once from 43 yards out. Freeman carried the ball once and scampered 47 yards for a touchdown. Korczowski bucked over for still a fifth. Johnson kicked all placements and that's all there was to it. The Tribesmen were simply "hot."

WILLIAM AND MARY 40, RANDOLPH-MACON 0

The Jackets from Ashland couldn't hope to keep pace with the powerful Indians, and the game went "according to plan." The Tribesmen played conservatively, with no desire to run up a big score. Korczowski and Johnson went over twice each, and Bucher and Klein counted once each.

WILLIAM AND MARY 27, V.M.I. 6

V.M.I., the underdog, scored on a pass in the opening minutes of the game, but lived to regret it. The Indians roared back and racked up all their 27 points in the first half, then settled back and dreamed of beating Carolina Pre-Flight the following week. Knox scored twice for the Indians on passes from Longacre, and Johnson and Korczowski tallied once each. Muha played a great defensive game for V.M.I., but had a zero net rushing gain.

WILLIAM AND MARY 0, CAROLINA PRE-FLIGHT 14

Winning or losing this game was supposed to make or break the Indians, but, as a matter of fact, it did neither. If anything, the Indians were "made" in the eyes of their supporters, for they played terrific ball against a collection of college and professional stars whose only advantages over the Indians were speed and experience. But for 55 minutes the Tribesmen gave the

Cloudbusters a knock-down, drag-out battle. You'd have had to see this one to realize just how good the Indians were against a great team. Reserve talent finally told the tale. Carolina Pre-Flight had 37 men on the bench, all as good as the starting eleven. William and Mary used what reserves it had, but they couldn't keep up with the Cloudbusters.

WILLIAM AND MARY 10, RICHMOND 0

The old pep obviously was missing in this one, but to the credit of the Spiders, Richmond played a powerful ball game against our Indians. This, combined with William and Mary's inevitable let-down after the Pre-Flight battle, made for a low-scoring game. Then, too, four Indians were out with injuries—Al Vandeweghe, Tex Warrington, Pappy Fields, and Jackie Freeman. The Spiders were always a threat with their spread passes, but fancy frills never were a match for straight power, and power told in the end. William and Mary marched 83 yards for its touchdown in the third period with Korczowski scoring from the one-foot line. Johnson added the placement, then teed off again in the fourth quarter with a 20-yard field goal to clinch the game.

SEASON'S SUMMARY

| | |
|---------------------|--|
| William and Mary 27 | Hampden-Sydney 0 |
| William and Mary 3 | Navy 0 |
| William and Mary 21 | V.P.I. 7 |
| William and Mary 7 | Harvard 7 |
| William and Mary 61 | George Washington 0 |
| William and Mary 35 | Dartmouth 14 |
| William and Mary 40 | Randolph-Macon 0 |
| William and Mary 27 | V.M.I. 6 |
| William and Mary 0 | Carolina Pre-Flight 14 |
| William and Mary 10 | Richmond 0 |
| William and Mary — | University of Oklahoma, December 5 at Norman, Oklahoma. |

Johnson (50) flants off tackle against VMI; Longacre (33) watches play from tail-back position.

ELECTRICITY FOR YOUR HOME STILL SELLS AT PRE-WAR PRICES!

During the past year or two, nearly everything you buy has steadily gone up in price—except your Electric Service—and all electric servants in the home still work at peacetime wages. *(World War I and World War II).

In the past few months, Uncle Sam has stepped in to halt the most recent rise in the cost of living by fixing "ceiling prices" on many commodities. Although prices have obviously increased in the production of electricity, NOT ONE PENNY has been added to rates for Electric Service. Instead the average price of residential electricity in the United States has continued d

o
w

n through the years (as the above chart very clearly shows).

In connection with this unusual nation-wide record, it is appropriate to call attention to the fact that in the year 1931 the average rate for residential Electric Service throughout the territory served by Vepco dropped below the National average and has remained below the National average ever since. In fact, our average rate per Kwh for this type of service has *decreased 58%* since 1927.

VIRGINIA ELECTRIC AND POWER COMPANY
