

THE

# Virginia Almanack

FOR THE YEAR OF OUR LORD

1820,

BEING THE SIXTH AFTER BISSEXTILE OR LEAP YEAR.

And the 27th of American Independence, after the 4th of July.

## Containing,

[Besides the Astronomical Calculations, by ISAAC BRIGGS.]

Judgment of Weather,  
 Length of Days,  
 Festivals and other remarkable  
 Days,  
 Tables of Interest at six and seven per cent.  
 Table of the weight and value  
 of Coins,  
 List of the different rates of  
 Stamp Duties,

Rates of Letter Postage,  
 Correct Lists of the times and  
 places of holding the differ-  
 ent Courts in this State,  
 Members of the Senate,  
 Directions for Gardening,  
 Large List of Roads, &c.  
 &c. &c.

## Also,

A VARIETY OF MATTER

*Curious, Useful, and Entertaining.*

IN PROSE AND VERSE.

HASTE to the Planter, little book with speed,  
 For he's thy faithful Friend in time of need.  
 Call softly there, and to his answer bow  
 Speak cheerfully, and say, GOD speed

Plough.

RICHMOND, VIRGINIA  
 PRINTED and SOLD WHOLESALE and RETAIL,  
 BY JOHN COURTNEY, J

## ECLIPSES in the Year 1802.

There will be four Eclipses this Year, two of the SUN,  
and two of the MOON, and a transit of MERCURY.

**T**HE first of the SUN, on the third of March, invisible in the United States.  $\delta$  at 11 h. 47 m. afternoon.  $\Delta$ 's lat. 42 1-3 min. South.

The sun will be centrally Eclipsed on the meridian, at 11 h. 15 1-2 min. afternoon, in long. 168 deg. 52 1-2 min. W. and lat. 58 1-3 deg. S.

**SECOND** of the MOON, on the 19th of March, partly visible, as follows: H. M.

Beginning at . . . . .	4	39	}	<i>In the Morning.</i>
Middle . . . . .	5	55		
Moon sets . . . . .	5	59		
Ecliptic $\delta$ . . . . .	6	4		
End . . . . .	7	12		

Digits Eclipsed 5 and 16 min. on the Moon's N. Limb.

**THIRD** of the SUN, on the 28th of August, invisible in the United States.  $\delta$  at 1 h. 51 min. in the morning.  $\Delta$ 's lat. 41 min. N. This Eclipse will be central and annular in the northern parts of Europe and Asia.

**FOURTH** of the MOON, on the 11th of September, partly visible, as follows:

H. M.		
Beginning - - - - -	4	3
Middle - - - - -	5	29
Ecliptic $\delta$ - - - - -	5	35
Moon rises - - - - -	6	11
End - - - - -	6	54

Digits Eclipsed 9 and 12 min. on the Moon's S. Limb. The transit of Mercury, over the Sun's disk, will be on the 9th of November: H. M.

Beginning at - - - - -	1	18	}	<i>In the Morning.</i>
Middle - - - - -	4	3 1-2		
End - - - - -	6	49		

The Sun will rise to the inhabitants of the district of Maine, in New-England, a few minutes before the end of the transit, but in every other part of the United States, it will be invisible.

*A safe and efficacious remedy for the CANCER.*

Take the narrow-leaved Dock root, and boil it in water, till it be quite soft; then bathe the part affected in the decoction, as hot as can be bore, three or four times a day. The root must then be mashed and applied as a poultice.

The root has proved an effectual cure, in many instances. It was first introduced by an Indian woman, who came to the house of a person in the county, who was much afflicted with the cancer in her mouth. The Indian, perceiving something was the matter, enquired what it was; and on being informed, said she would cure her. The woman consented to a trial, though with little hope of success; having previously used many things without receiving any benefit.

The Indian went out, and soon returned with a root, which she boiled and applied as above; and, in a short time a cure was effected.

The Indian was very careful to conceal what these roots were; and refused giving any information respecting them; but happening one day to lay some of them down, and step out, the woman concealed one of the roots, which she planted, and soon discovered what it was.

Not long after, a person, in that neighborhood, being afflicted with the same complaint in her face,

we informed her of this remedy; and, in two weeks, she was cured.

Some time after, a man was cured of a confirmed cancer upon the back of his hand. After suffering much, unable to get any rest, being told of this root, it was procured and prepared for him. He kept his hand in the water, as hot as he could bear it, for some time. The root was then applied as a poultice, and that night he slept comfortably; and, in two weeks, his hand was entirely cured.

Daniel Brown's father, having had a cancer in his head, had it cut out and apparently healed; but, some of the roots remaining, it again broke out. His doctor then informed him, that nothing more could be done, except burning it out with hot irons. This being too harsh a remedy to submit to, he was much discouraged. The Dock-root was soon after recommended, and it cured him in a short time.

In the beginning of the winter of 1798, a hard lump appeared in the middle of my under lip, and in a short time became sore. It continued in that situation till spring, when it increased, and became painful. I then showed it to a person of skill, and soon found he apprehended it to be cancerous. — After two or three different applications, the complaint increased and spread rapidly.

Lottrip, having heard my complaint, mention-

ed this root. I called on him to know the particulars of it. He gave me the necessary information. The root was procured and used in the manner above mentioned; taking a mouthful of water, in which the root was boiled, and letting it drip over my lips as hot as I could bear it. This I did three or four times a day; and then kept the root to it day and night. In two days the pain entirely left it, and in two weeks it was cured.

### Receipt for the FLUX.

FIRST, cleanse the bowels with a dose or two of salts, and afterwards give two grains tartar emetic, every morning fasting.

Second, take a sheet of clean paper, cut it into slips, boil it into a point and an half of milk to a pint, to be taken at twice. For diet, use rice, milk, fat broths, and sharp ripe fruit.

To strengthen weak Eyes. Dip the face every morning in cold water, and rub the eyes with the fingers from the outside towards the nose.

For a cold in the Head. Pare very thin the yellow rind of an orange, roll it up inside out, and put a roll into each nostril.

For the Gripes. Take half a drachm of powdered rheubarb, and toast it a little before the fire. Then add a little powder of ginger to it, and mix it for one dose.— To be repeated as often as occasion requires.

For the Piles. Take black Wooll and black Soap, and bind it thereto.

## Valuable properties of the ELDER TREE.

THE Elder tree possesses the following valuable properties:—1. Saving turnips from the fly. 2. Preserving fruit trees from the blight. 3. Preserving cabbage plants from caterpillars. The fact has been ascertained by his British majesty's privy council, in their enquiries relative to the Russian fly. The dwarf elder has the most potent effluvia; and it requires no other trouble, than to strew the leaves over the ground, or to strike fruit trees with the twigs.

### A certain Cure, for the Distemper in Cattle.

THE first symptoms are, loss of appetite, holding the head lower than usual, and a drooping look—Begin immediately to give to those infected, three table spoonfuls of powdered brimstone and a quart of green plantain juice once a day, for several days, and feed them on green plantain leaves and peach leaves. You must not let them run out to water for several days after they appear to be recovered, for if you do, they will drink to such a degree, as to kill themselves; you must have them watered moderately in the lot where they are confined.

FOR WORMS. Take a spoonful of burned Hartshorn mixed with sugar.  
Or  
Take a spoonful of worm-feed, and treacle, for six mornings.

# MAY. Fifth Month.

## REMEDY for PUTRID FEVERS.

**Y**EAST, or barm, to the quantity of three or four spoonfuls, hath been exhibited in putrid cafes, with the most singular efficacy and success; so that patients, in the extremity of this very contagious and most fatal disease, have been seen almost instantly to have recovered from a dying state to perfect safety. Probably it will be expedient to use a little warm water to wash the yeast down the patient's throat; and to administer, at the intermediate hours, as useful auxiliaries, a few of the customary and most efficacious antiseptic cordials and draughts.

### To take Oil or Grease out of Cloth.

Take oil of Tartar and lay it upon the spot: After a while take it off again, wash it with luke warm water, then 3 or 4 times with cold water, and the cloth will look as neat and clean as if new.

### To take away Pimples.

Take wheat flower mingled with honey and vinegar, and lay on the pimples going to bed.

### To take off Freckels.

Take either bean-flower water, elder-flower water, or May dew gathered from corn, four spoonfuls, and add to it one spoonful of oil of tartar per deliquium; mix it well together, and often wash the face with it; let it dry on.

For the RHEUMATISM.

1 TAKE a common glass tumbler and scrape it half full of  
2 borse radish. then fill it up with the best rum you can get  
3 bathe the parts afflicted keeping a flannel over them to keep  
4 them warm. You may bathe the places as often as you think  
5 proper.

For CONSTANT FEVERS

6 TAKE an ounce of Saltpetre and powder it, then divide it  
7 into four equal parts. and each of them into four others, for so  
8 many dos's. each of which will contain about half a dram  
9 one of these to be taken every three or four hours, dissolved  
10 in a large cup full of sage tea, sweetened to the palate. If  
11 there be any cough, twenty drops of balsom capivi, with  
12 powdered sugar, must be taken night and morning.

From the Gazette of the United States.

TO THE PUBLIC.

17 THE subscriber notifies, that for the benefit of the com-  
18 munity at large, he has for these few years past, been stu-  
19 dying a remedy, against the ravages of the Hessian Fly,  
20 and has at last found out an efficacious one, which is as  
21 follows: take one quart of Chamber-lie, and one quart of  
22 slacked stone lime, which mix with a bushel of wheat  
23 just as you are going to sow; mixing the chamber-lie  
24 first. This the subscriber recommended to a number of  
25 farmers who can vouch for the efficacy of it. The sub-  
26 scriber, therefore, thought it his duty to announce the  
27 same to the public. THOMAS C——K.

A Good remedy for the TOOTH-ACH.

28 TAKE a little cotton, and imbibe it in Lucatellus's bal-  
29 sam melted in a spoon, and put it in the hollow tooth.

W Caution—Written on a Boy who died by eating un-ripe Fruit.

READER, who'er thou art, beware  
Of eating apple, peach, or pear;  
In health like thee was I last year,  
But un-ripe Fruit has brought me here,

NATURE, tho' prompt her bounty to bestow,  
On Woman's face ordain'd no beard to grow,  
For, talking still, forever and for aye,  
He, who should shave, would slice their chins away.

Upon WIT and GENIUS.  
TRUE wit is like the brilliant stone  
Dug from the Indian mine;  
Which boasts two various pow'rs in one,  
At once to cut and shine.

A genius too, if polish'd right,  
With the same gifts abounds;  
Appears at once both keen and bright,  
And sparkles while it wounds.

An EPIGRAM.  
I'VE but one wife, says Hodge, and she  
A more than Vixen proves to me—  
But how liv'd men in days of Yore,  
When each was plagu'd with half a score?

The Doctor and the Patient.  
Sleep you well? "very well." My draught did good.  
"It did no harm; for yonder it hath stood"

FUXEAN STONDRELENDE.

EXTEMPORE.

Oh a Coach overturning going the Petersburg races.

By a stranger, who helped the Ladies out of their awkward situation.

AS in a hurrying pace,  
I went to the race,  
I heard this most sorrowful cry,  
"Whoever you are,  
"Catch hold *any where*  
"And help us out quick, or we die!"

I turn'd at the sound,  
And instantly found  
A Coach with its wheels in the air.  
The Goods it contain'd,  
In language unfeign'd,  
Next stanza shall partly declare.

Six legs stood upright  
All clothed in white,  
As taper as taper could be—

But the faces below  
Were cover'd up fo,  
Not one feature of them could I see—  
Whatever delight  
I took in the fight  
I freed the three Ladies from danger :  
Who blush'd as they rose,  
Then smooth'd down their clothes,  
And blest'd the kind aid of

The STRANGER.

Grace after Dinner at a Miser's.  
THANKS for this miracle ; it is no less  
Than finding manna in the wilderness :  
In midst of famine we have found relief :  
And soon the wonder of a chine of beef ;  
Chimnies have smok'd that never smok'd before,  
And we have din'd where we shall dine no more.

A Rhapsody.

AS I walk'd by myself, I said to myself,  
And myself said again unto me,  
' Look to thyself, take care of thyself,  
' For no body cares for thee.'  
Then I said to myself, & thus answered myself,  
With the self same repartee,  
' Look to thyself, or look not to thyself,  
' 'Tis the self same thing to me.'

## REPAREE.

**A** CORDELIER, preaching on the merits of St. Francis, exalted him, in his discourse above all the other Saints in the calendar. After exaggerating his merits he exclaimed, "where shall we place the seraphic father, St. Francis? He is greater in dignity than all other faints.—Shall we place him among the prophets?—Oh! he is greater than the prophets.—Shall we place him with the patriarchs? Oh! he is greater than the patriarchs."—In like manner he exalted him above the angels, archangels, cherubim, seraphim, virtues, thrones, dominions and powers; and still he exclaimed, "Where then shall we place him, where shall we place this holy faint?" A sailor in the Church, tired with the discourse, stood up, and said, "If you really don't know where to place him, you may place him in my feat, for I am going."

A SCHOLAR, wanting money, sold his books, and wrote to his father in the following manner: "Rejoice with me, my dear father, for now my books maintain me."

*Sum total of a lord Mayor's Talents.*

**KING** James the Second passing thro' Colchester, it was resolved, that the Mayor should compliment him on his arrival. It so happened, that this chief magistrate was eminently stupid (which

is looked upon as no strange thing in England) —

1 The town clerk was appointed to attend him at his  
 2 back, and whisper what he was to say to the King.  
 3 When they came into his majesty's presence, the  
 4 clerk, desiring to encourage the mayor, whispered,  
 5 'Hold up your head and look like a man.' 'Hold  
 6 up your head and look like a man!' did the mayor  
 7 bawl to the king. The clerk astonished, whisper-  
 8 ed, 'What the devil do you mean?' The mayor  
 9 bawled out, 'What, the devil do you mean?' The  
 10 clerk, sweating with fear and vexation, 'By  
 11 Heaven! you will ruin us all.' The mayor imme-  
 12 diately repeated, 'By Heaven! you will ruin us  
 13 all.' The clerk, in a violent rage, said, 'Oh! you  
 14 blundering puppy, I wish you had never come  
 15 here.' The mayor again bawled, 'Oh? you blunder-  
 16 ing puppy, I wish you had never come here.' The  
 17 clerk on this immediately took to his heels, and  
 18 the mayor followed him, leaving the king in a vi-  
 19 olet fit of laughter, though not without rage.

A certain Mr. W—, surgeon of remarkable eminence in Edin-  
 24 burgh, usually known by the name of Long Sandy, and remarkable  
 25 for his eccentricity of character, and peculiarity of expression, meet-  
 26 ing with Lady Wallace coming out of church one day, bluntly ac-  
 27 costed her with "Eh! my lady, you grow as fat as a Whale!" "Yes,  
 28 Sandy," replied she immediately, "and how would you like to be a  
 29 Jonah?"

A Child being lately taken to church to be baptized, was so much  
 30 disconcerted at the minister's sprinkling his face, that he interrupt-  
 31 ed him by exclaiming, "have done! I won't play!"

Of the four Quarters of the YEAR, and first of the  
S P R I N G.

**T**HE spring, or vernal quarter, the most delightful season of the whole year, sticks so close to the heels of exorbitant winter that it would puzzle the wisest conjurers to thrust their knife betwixt them.

Now gilded Titan gathers force and strength,  
And days and nights are of an equal length.

At this season Lady Flora clothes our grandam earth with a new livery, dapered with various flowers, and chequered with most delightful objects. This quarter brings shoals of fine fish, green pease, cherries, gooseberries, custards, cheesecakes, &c. all of which are to be had by those who have money; but without money you can have nothing. Hold! here I had like to have made a blunder! for poverty is so cheap you may have it for nothing; nay, several now a days purchase it with laziness, which is worse than nothing. But during this pleasant season, one would imagine wealth were a burthen, for none are so merry as those that are free from it. Now shepherds pipe merrily for the departure of winter; the nightingale sings the sun asleep, and a wild, but charming chorus, is echoed from every bough.

Thus do the choir of chirping minstrels bring,  
In triumph on the stage the youthful spring.

M A R C H.

The GARDEN.—All sorts of grafting may be done this month; prune nectarines, peaches and apricots; set slips of sage, rosemary, lavender, thyme, &c. set willows and other aquatics; sow grass seeds; sow some carrots, also large peas, rouncevals and gray: if better ground, sow cabbage and favoys, also carrots and parsnips for a second crop; sow parsley, and plant mint; sow cos and imperial lettuce, and transplant the finer kinds; make asparagus beds; sow some French beans, &c.

A P R I L.

The GARDEN.—With the Farmer and the Gardner, this is the busiest month in the year, for now whatsoever you have a mind to plant or sow, the earth is fit to receive it. Hough your carrots, radishes, onions, &c. set French beans, plant asparagus, separate the layers of artichokes, and plant three of them in one whole; plant garden beans to succeed other crops; sow all sorts of salad herbs and spinage in moist places for the last time, sow turnips, & all sorts of cabbage lettuce, and transplant cos slesia lettuces that were sown last month; look to the fruit trees, &c.

M A Y

The GARDEN.—Sow cucumbers in the natural ground, also purslane and cabbages; sow peas and beans in a moist soil for a latter crop; plant kidney-beans for a second crop, and transplant cellery into drills; hough your winter crops of carrots, beans, onions, &c. sow turnips, with the hope of their soon getting rain; sow buck wheat and latter peas; weed young quick-sets and ivy; fallow your ground, and look well to your sheep for fear of a rot in wet weather, look over your vines, and stop every shoot that has fruit upon it to three eyes beyond the fruit, &c.

S U M M E R.

**T**HIS Quarter follows spring as close as that did winter, and according to the account of ancient Astrologers, mounts the stage on St. Barnabas day, namely, the 11th of June. Our modern minute splitters will needs have it enter a day or two sooner; but, not to exasperate the disputants, we shall at present allow them both to be in the right (for even Conjurors themselves like to be flattered. We say therefore it does begin some time there about, for a day or two can break no great squares. This Quarter is naturally hot and dry, according to that of the poet:

When as the Sun mounts on the Lion's back,  
And makes the parched earth with furrows crack.

Now Phœbus's darts burn with offensive rage, which causes Idleness, and Idleness causes fond Love. Both these put together make the nice Gallant and gaudy Slattern seek the cool shade, there to spend their time in, wanton dallying and laziness, whilst the more industrious, in hopes of a golden harvest, endure the heat of the day. Curds, cream, custards, cheesecakes, and other *Fruits* mentioned in the Spring Quarter, are still in use, and very proper for this season of the year.

And Dick the plowman thinks himself well paid,  
With now and then a kiss of the dairy maid.

For our Astrological predictions on this quarter, we shall give you some, and those merry ones; for mirth, says one, is the daughter of Christmas, and spirit of shrove tide. Rich men shall die of hunger, poor men of surfits, and those which have no heirs, of cold. Some men shall commit matrimony as they commit murder, out of a frolick; and are ready to hang themselves, or to be hanged by the law, the next morning. A man that is married, is no more like another man than a galley slave is like a free sailor; he is chained to an oar all his life, and may, perhaps, be forced to tug at a leaky vessel into the bargain.

## J U N E.

The GARDEN.—Sow brocoli for a second crop; transplant celiery for blanching (always have an eye to the celiery, as it is one of the most wholesome articles in the garden); transplant favoy and cabbage plants for winter use; sow kidney beans and brown Dutch cabbage lettuce for a late crop; gather such herbs for drying as are now in flower, and dry them leisurely in a shady place; sow all sorts of small salad herbs, every three or four days; weed your garden and your corn, and sow rape, cole-seed, and turnip seed; repeat taking off fore-right shoots from wall and espalier trees, &c.

## J U L Y.

The GARDEN.—Sow turnips and onions to stand the winter; also carrots, colewort, and cauliflowers; gather such seeds as are ripe, as also flowers, and dry them in the shade, and then in the sun: when well hardened, tie them up in paper bags, and do not take them out of the pods till they are to be sown; sow lupins, larkspurs, and the like, on the warm borders, to stand the winter, and flower early next year; innoculate roses and jessamine, and any other flowering shrubs; innoculate apricots, and do it in a cloudy evening, &c.

## A U G U S T.

The GARDEN.—Sow cauliflowers, spinnage, onions, cabbages, coleworts, lettuce, cresses, chervil, and corn salad, for winter use; transplant brocoli into the ground, where it is to remain for flowering; plant slips of savory, thyme, sage, hyfop, rosemary, lavender, mastic, and other aromatic plants; continue to sow radish, cresses, and turnip seed; sow anemonies, ranunculuses, fritillary, tulip, and narcissus seed; dig a border for early tulip roots, and others for hyacinths, &c. sow annuals to stand the winter, and shift auriculas into fresh pots, &c.

## A U T U M N.

**T**HIS quarter begins at don Phoebus's entrance into the equinoctial Libra, which Rablantis would have to be a pair of heavenly scales to weigh usurers consciences, and, old Letchers.

And both of them, put in one scale together,  
Will be o'erpois'd even by one single feather.

Now for what we shall descant upon this quarter, take as followeth. Men shall be very indulgent to themselves in their own faults, and very severe to others in theirs; which made the wise Seneca to say, that the nature of man is very

apt to use spectacles to behold other men's faults, rather than looking glasses to behold our own. Good housewifery in a young lady is scandalously old, quite out of fashion; and to ask a madman whether he be mad, is but an idle question. From the tooth of a mad beast, and the tongue of a slanderer, preserve thine honor; and from the coarce of an old bawd, and the pride of a fussy waiting woman, good Lord deliver me—He that is out of cloths is out of the fashion, out of countenance, and out of wit.

Fine feathers make fine birds, and dainty bits,  
Do fill the paunch, but lumber out the wits;  
Yet golden calves are every where ador'd,  
But wit in tattered rags, scorn'd and abhor'd.

It was in this quarter of the year that Lucian went down into his feign'd purgatory, where he found Alexander the great cobling shoes, Pompey taging points, Julius Cæsar making hair buttons, Hannibal selling backing, Augustus crying garlick, Charlemain selling lists by the dozen, and king Pippin crying apples in a cart drawn with one horse. These were persons who, by spilling other men's blood, fought to immortalize their own names; but,

Let guilty men remember their black deeds  
Do lean on crutches made of slender reeds.

## S E P T E M B E R.

The GARDEN, &c.—A new kind of work begins this month, which is, by preparing for next season. Tear up all the annuals that have done flowering, and cut down such perennials as are past their beauty; bring in other perennials from the nursery-beds, and carefully plant them at regular distances; plant tulips and other flower roots; slip clyanthuses, and set them in rich shady borders; sow lettuces of various kinds, and, when they come up, shelter them carefully. The fruit must now be gathered; do it with care; the best time is, an hour after sun rise, &c.

## O C T O B E R.

The GARDEN.—Transplant brown Dutch and common lettuce to warm borders to abide the winter; sow all sorts of salad herbs upon decayed hot-beds, such as lettuce, cresses, radish, mustard and spinage; earth up celiery, chardons and the stems of brocoli plants, to protect them from the frost; make plantations of brocoli plants, to protect them from the frost; make plantations of the suckers of gooseberries, currants and raspberries; cut artichokes with long stalks, which you may preserve in the house in sand; plant all sorts of forest trees that shed their leaves, &c. Avoid being late out at night, or in foggy weather; cold caught now may last you the whole year.

## N O V E M B E R.

The GARDEN. If the season is mild, you may continue to prune apple-trees, whether standards, wall-fruit, or espaliers, but beware of rains or frosts when the wounds are fresh; trench your ground, by laying it up in ridges to mellow; set crab-tree stocks to graft on; continue to plant suckers and cuttings of gooseberries, currants and raspberries; make hot-beds for asparagus; fell coppices, and lop trees; plant timber and fruit trees, if the weather be open, &c. The best physic this month is, smart exercise, warm clothes, and wholesome diet, &c.

## W I N T E R.

**T**HIS being the last and worst quarter of all the four, like a dish of chubs at the latter end of a feast, brings up the rear.

Now hiems binds the Floods in silver chains,  
And hoary frost hath candied all the plains.

This quarter used to be welcome to poor people, when good house-keeping was in fashion, because it always brings Christmas along with it; but now pride, gaming and whoring, have turned good house-keeping out of doors.

If your high topp'd Ladies should go to sea in a great wind, with so much sail on their head, top and top gallant, they may chance to run the risk of being overfet, and carry their keel above water. Spare diet and fasting whets a man's understanding, but he that loves to gormandize will not believe it; and yet, when his belly is full, falls a railing against gluttony. Gold is the court card which the devil turns up trump, and he that has store of it need not live long a batchelor, though he stinks worse than a fish-monger's sleeves, or carrier's hands, has a parboiled visage, and that his face looks like a dier's apron, a fodden head, and his whole brains a posset curd.

Gold, Cupid weareth on his arrow's head,  
And when he shoots with it that party's sped.

The like may be said of the female sex; for most maids, now a days, are for a good estate with any man, and for any man with a good estate, sway bears lady Pecunia. Speak to a lawyer in any other language than money, and he will as little understand you as if you spoke Hebrew. There is no musician makes better melody than the jingling of money; it is the metal which most men love as naturally as a woman loves a fiddle and a fool.

Money buys all things which a man doth lack,  
It feeds the belly, and it clothes the back.

But to conclude (as the parson says, and that sometimes perhaps before he hath half done) but to conclude, I say again, during this season, good fires, warm clothes, a mug of cyder and a toast in the morning, a shoulder of mutton and a fowl for dinner, and a good sack posset for supper, are very excellent things to keep out the cold. And so much for the four quarters of the year.

More might be said, but then more must be spoke;  
Words are but words, and words but a mere joke.

## D E C E M B E R.

The GARDEN.—Set all sorts of stones, kernels, &c. plant vines, and stocks for grafting; trench ground, and dung it for borders; towards the end of the month, sow radishes, carrots, and lettuce on warm borders; sow cresses and other sallad herbs on a moderate hot bed, and cover them with mats; plant all sorts of trees that shed their leaves, &c. —Remember old Parr's maxims (who lived 150 years,) viz. Keep your feet warm by exercise, your head cool by temperance, never eat till you are hungry, and never drink till you are thirsty.

## J A N U A R Y.

The GARDEN.—Sow hotspur peas, put fresh earth to your sage, thyme, and other sweet herbs; transplant young fruit trees, prune vines; trench and fill ground for the spring, cover the roots of new planted trees with dung, to prevent frost biting; cut off all dead branches of fruit trees; plant quicksets, and cleanse trees from moss; sow cresses, mustard, radish, lettuce, and other small herbs in warm rich soil; plant out endive seed in warm borders; earth and blanch cellery; dig up the ground that is to be sown with spring crops, in order that it may mellow, &c.

## F E B R U A R Y.

The GARDEN.—Plant beans, and sow peas: sow a new crop every fortnight, in order that you may have a regular succession of new peas: plant kidney beans upon a hot bed for an early crop: transplant cabbages, and plant out Silesia and cos lettuce, from the beds where they grew in winter: and plant potatoes and Jerusalem artichokes. Remove grafts of former years grafting: cut and lay quicksets: vines may be planted the beginning of this month, and fruit that grows in bunches: set all sorts of kernel and strong trees &c.

## Friend's General Meeting.

THE General Meetings of Friends are held, at PHILADELPHIA, the fourth first day in the ninth month; at WILMINGTON, the next first day after the spring meeting in Philadelphia, which is held the fourth first day in the third month; at SALEM, the third first day in the fifth month; at WAINOAK, and BLACK WATER, in Virginia, alternately the third seventh day in the fifth month; at NEW YORK, the fourth first day in the fifth month; at LITTLE EGG HARBOUR, the first first day in the sixth month; at N. RHODE-ISLAND, the second sixth day in the sixth month; at BALTIMORE, for MARYLAND, the second first day in the tenth month; at DUCK CREEK, the fourth seventh day in the fourth month; at SHREWSBURY, the fourth first day in the tenth month; at MARTINICOCK, on LONG ISLAND, the last first day in the tenth month; at NEW-GARDEN and SYMOND'S CREEK, NORTH-CAROLINA, alternately, the fourth sixth day in the tenth month.

*Duties to be paid annually on the following Carriages, viz.*

**C**OACHES, 15 dollars. Chariots, 12 dollars.— Post Chariots 12 dollars. Post Chaises, 12 dollars. Phaetons, with or without tops, 9 dollars. Coaches, 9 dollars. Other carriages, having pannel work above, with blinds, glasses or curtains, 9 dollars. Four wheel carriages, having framed posts or tops, with steel springs, 6 dollars. Four wheel top carriages, with wooden or ironsprings or jacks, 3 dollars. Curricles with tops, 3 dollars. Chaises with tops, 3 dollars. Chairs, with tops, 3 dollars. Sulkeys, with tops, 3 dollars. Other two wheel top carriages, 3 dollars. Two wheel carriages, with steel or iron springs, 3 dollars. All other wheel carriages, 2 dollars. Four wheel carriages, having framed posts and tops, and resting upon wooden spars, 2 dollars.

### The Comparison.

JACK eating rotten cheese did say,  
 'Like Sampson, I my thousands slay.'  
 'I vow, quoth Roger, 'so you do,  
 'And with the self same weapon too'

### Lord Littleton's EPITAPH.

GAYLY I lived, as ease and nature taught,  
 And spent my little life without a thought;  
 And am amaz'd that death, that tyrant grim,  
 Should think of me, who never thought of him.

THE other day, says Ned to Joe,  
 (Near Bedlam's confines passing)  
 'Whene'er I hear the cries of woe,  
 'My hand is always open.'

'I own,' says Joe, 'that to the poor,  
 '(You prove it every minute)  
 'Your hand is open to be sure;  
 But then, there's nothing in it.'

THE Militia of Virginia is divided into four grand divisions, each of which is commanded by a Major General—Nineteen Brigades, each commanded by a Brigadier General—making in the whole, one hundred and eight Regiments of Infantry, four Regiments of Cavalry, and four Regiments of Artillery—each Regiment is composed of two Battalions, and commanded by a Lieutenant, Colonel Commandant and two Majors.

### Maxims,

Of nations, as of individuals, the first blessing is independence.

Death, says Seneca, falls heavy upon him who is too much known to others, and too little to himself.

JOHN TAYLOR,  
*Coppersmith, Brass Founder, and Tin Plate  
Worker,*

ACKNOWLEDGES with gratitude the favors conferred on him, in his line of business, by his friends and generous public, for these ten years past; and begs leave to inform them that he has constantly on hand, a complete assortment of very STRONG COPPER, suitable for large Whiskey Distilleries, and small Fruit Stills; and has workmen regularly bred to the PEWTER WORM MAKING business, so that he can furnish Pewter Worms, and Crane Necks much more complete and cheaper than heretofore—or Copper Worms and Arms for those who may prefer them.

On hand as usual, an assortment of Large and Small *Stills, Castings, for Mill use, Skillets, Mortars and Bells.*

A liberal allowance will be made to those who purchase the above articles to sell again.

Cash given for *old Copper, Brass, Pewter and Lead.*

Old work repaired on the shortest notice.

Richmond, September 1st. 1801

*Payment may be made in Tobacco, Flour, Ginseng, or well Formed Young Horses.*

---

DR. LOZARUS,  
OF THE CITY OF RICHMOND,

TAKES this opportunity of returning his grateful acknowledgments to the public, for the flattering encouragement he has met with during a residence of 14 months in this City. The number of persons in Richmond who have been relieved by his *Antibilious Patent Stomach CORDIAL*, can well attest the utility of this invaluable Medicine, which is the most effectual and speedy cure for all internal complaints; corrects bile; instantly relieves all choleric pains, and prevents the Bilious Fever. His prepared CORDIAL and OPODELDOC, is a certain cure for the *Rheumatism, Acute or Chronic.*

The Doctor has also medicines ready prepared for private Families, with printed directions how to use them.

N. B. All diseases incident to the human body, the Doctor cures on reasonable terms.

The Doctor may be spoke with at H. Pace's Printing Office, near the Market-house; or at his apartment, near the bridge.
