Diary No 4

Saturday Aug 10th, 1861: another intensely hot day. A. W. called. He is 2^d Lieut. in a company now quartered at the Fair Grounds. They are to leave here on Tuesday next probably for Norfolk. Mr V. the lithographer tells me that 48 copies of the diagram of the battle of Manassas have been sold. They are sold by Mr X. a Scotchman & his son David who sell newspapers. Mr V. thinks that a plan of the battle-field with the position of the enemy the crossing places & would be a good thing. Something of this kind has been published in the N. O. Delta. The rail road junction was still uncompleted this

evening. The Engineer Mr
G— from Richmond says
that it will probably be ready
for the train to-morrow.
A short branch is to be made
connecting the South-side
Road with the bridge: the
gauge of the South-side
is however different from
that of the Richmond road.
an additional lateral rail
will enable the cars ^{of one road} to
run along side those of
the other & so shift the
freight without hauling.
This will throw out of employ-
ment certain carts, wains,
wagons &c a small matter
in comparison with the
immense advantages of
the connection of the roads

which ought to ^{have} been joined
many years ago. A soldier
died at Sarratts today:
3 have died in the hospitals
here & one at M^oB^o a
6th, killed by falling from
an open rail road car. This
seems a small number
considering the large number
that have passed through
Peteburg probably not
less than 35,000. The Confed-
erate Congress have passed
an act authorizing the Pres.
to accept 400,000 volunteers
that is 190,000 in addition
to the present number enlisted
210,000. Another act is for
the removal of ~~non-juring~~ aliens
refusing allegiance to the new
Government. Saw at Norfolk

depot a parcel of gun-carriages
made at the workshops of the
Rt & Danville R Road - to go
I suppose to Richmond; saw
wagons loading at Sarratto
with kegs of gunpowder,
also for Richmond. Some
one told me that a former
resident of Hampton says
that Hampton was burnt
by Mc Greder's orders. The
papers denounce the enemy
for having done it. Some say
that New Ports News is not eva-
-uated but has been rein-
-forced & that there are
5000 men there. Mr - is
of opinion that Beaupard will
take Washington by tomorrow
(Sunday) night. This seems
premature: W.A. large army

McDonnell's official report of
the battle of Aquia. He
says it was fought near a small
stream a branch of Bull Run.
He says he understands that our
army was commanded by "I. A.
Johnston" giving him no title.
But "I. A. Johnston" managed to
beat Gen. McDonnell. He gives
the number of his killed and
wounded a false statement
since he left the bulk of

them on the field of battle,
it was impossible for him to
know how many there were
as the dead were buried
by our people & the wounded
almost all attended to by
our surgeons. But McDowell's
report is clear & interesting
although in some points
false, in some one-sided,
in some disingenuous.
He appears to lay the blame
of his defeat very much
upon Patterson. The reason
why many of McDowell's
men were without food
during the day was either
that they had no stomach
for it or that during the
battle they threw away their
haversacks. J. P. tells me

The Richmond Dispatch says
that there are 13000 troops
now en route between Nelson

hardly be so. The Leesburg
news turns out to be a
monstrous canard: there
was one prisoner taken instead
of 1700. Saw to-day Capt. M.

that the Confederate army
on the Potomac amounts
now to 130,000 men. Many
of the troops at Washington
are mutinous. It is reported
that in a cabinet Council
Lincoln & Bates voted for keeping
the Confederate prisoners. The
Herald Bohemian has brought
news from England subsequent
to receipt of accounts of the
battle of Manassas. It is
probable that England & France
will shortly recognize the

in England. Read official reports of Col. Keyes & Barnard Federal officers in Battle of Manassas: both interesting & apparently fair. The officers appear to have thought that victory was on their side until they all ran away. The Regular Federal officers do not like McDowell's being superseded by McClellan Aug 28th. There is a hiatus of a week at this point: during the interim nothing very extraordinary has occurred: Soldiers have been occasionally passing through: several companies of cavalry have been quartered at The Fair Grounds. The men riding about the streets served to enliven them somewhat. Large cannon have been passing through mostly for the South & cannon balls.

D. S. - has been appointed Assistant Surgeon. The Confederate govt is about to establish a hospital in Petersburg. It was found that the junction track between the railroads did not work the curve near the bridge being too sharp & they have altered it somehow. The Mayor now gives passes to Richmond & back. I was in that city last Saturday. Maine St is more animated than I ever saw it - inundated with military, politicians, strangers &c.: business appears lively. I took another look at the prisoners in the Tob. factories. observed some some of them rolling wheelbarrows with barrels on them with armed guard before & behind: also 2 of them with large baskets.

had been so long without
gaining any. From Northwest
Virginia the news is that a gen-
eral Tyler with 900 men has been
captured by Confederate forces.
Two companies of Cavalry arrived
this ~~even~~ afternoon from the
South & repaired to the Fair
Grounds. There is to be a Confed-
erate hospital established at
the Fair Grounds. Dr. Strachan
principal surgeon - Dr. Stockdell
assistant. White sugar is 25
cents per lb. Mr C - has been
to Yorktown & got a good number
of sketches of battle of Manassas
& of Bethel here. ^{Dr. Pennington} They were
daily expecting an attack from
the enemy. Copied to day another
sketch of battle of Bethel by
Mr G - who was present.

Sept 31. Saturday This
morning about 7 o'clock
saw the Jeff Davis Flying
Artillery Capt Montgomery
from Selma Alabama
160 men 116 horses: brought
only 1 gun; expect to get
them in Richmond. They were
going down Lynamore + extended
2 abreast from Powell's Tavern
Hotel (that was) to Bowling's
corner. The buyer was a
boy. The talk to-day
is about the capture of
Fort Hatteras + garrison of
Capt. Barson of 500 men:
+ of the probability of an
early battle near the Potomac
perhaps near Arlington
heights. Some say that
there has been a battle
there. The supply of soda

will be more ^{wool} ashes than
usual in the towns as
there is no hard coal
to be had now. Flour is
\$6.50 per boll. A good many
soldiers pass, South appa-
rently on furlough. Mr
C - sold good many of
sketches of Battle Ground of
Manassas & Battle of Bethel
at Yorktown &c. Mr R -
at Portsmouth sold 112
of the Manassas sketch
& wants to get 1000 more.
Such things serve to diversify
the monotonous still life
of camp. There are about
2000 Northern prisoners in
Richmond.

Monday Sept 2, 1861. Morning

& evenings uncommonly cool for
the season. The papers give
the details of the capture of
forts Hatteras & Clark - about 20
miles Nth of Cape Hatteras.
The odds at ~~Wax~~ ^{Fort} Hatteras
were 100 guns & 4000 men
to 20 guns & 500 men.
The fort made a stout defence.
Great excitement in Nth Carolina
women & children escaping
from Newbern. Fort Magon
threatened. Another battle
near the Roanoke is daily
expected. The locomotive
again ran off the junction
track near Pocahontas bridge.
There seems to be some fatality
about the business. The
buildings at the Fair
Grounds are to be got ready
for the new Hospital in
10 days. A good many

sick & wounded are to be
sent here. Mr Valory is
about to print part of the
engravings for the new work
on Bonaparte uniforms edited by
Col. Blanton Duncan of Kentucky.
The first 1000 copies to be plain
the 2^d edition to be elegantly
colored.

Thursday Sept. 5th. Saw this
afternoon at South Side depot
24 - 32 pounders & 4 64 pounder
of these last 2 painted red were
rifled. The guns were accom-
panied by gun-carriages. All
bound for N. Orleans to which
they can go with one
rehandling. An employe of
Adams' Express office here
has been committed on charge
of forging signatures to Treasury
notes; 4 other persons have been

arrested as accomplices. They
are to be tried in Richmond.

Besides the cannon at the
depot I saw a boat on
the cars which came with
the guns from Portsmouth Navy
yard & is destined to Aquia
Creek on the Potomac. Several
other boats have passed through
in the same direction recently.

The boat would hold 30 men.
N.O. - told me that he had
seen a letter from Richmond
mentioning that Beauregard
had sent for 2 millions
of cartridges, also for hospital
tents & as many ambulances
as ^{can} ~~could~~ be found. West
& Johnson have published a
plan of battle of Manassas.
The engineer says that

It makes Bull Run straight
instead of being bending round &
makes the bluffs on the West
Bank instead of the East.

Friday Sept 6th, 1861. Mr C

has been twice to Yorktown
sold 500 sketches of Battle of
Bethel. A private soldier at
Camp Magazine Grove wharf
named Goulding has bought
228 of them for sale in 2
Louisiana reg. Mr C says
that there are 20,000 men
at Yorktown an overestimate
as I suppose. He visited the
field of Bethel: rode over
the ground there with
Maj. Randolph who pointed
out some errors in the sketch.
This morning I saw a company
of cavalry on their route to
Richmond by the turnpike.

one of the men was smoking
a pipe. six or eight. negroes
brought up the rear, some
of them leading horses. This
afternoon noticed some companies
arrive at Sarratt's army
with double-barrelled shot-
guns. They went to Poplar

Monday Sept 9th I left Peters-

on Norfolk & Petersburg R. Road.
Travelling rapidly - about 25
miles an hour. Intermediate
stations Disputanta, Waverley,
Wakefield, Ivos, Juni, Suffolk.
At the last place it seemed
as if the entire male population
came out to see the car arrive
& get the newspapers. Reached
Norfolk about 11. At a resto-

beefsteak, cole slough & stale

dessert bought a piece of
gingerbread at a bakery.

the rest of it in a mule drawn

tired & most reluctant to
move faster than a walk.
Stopped at the National Hotel.
Saw there some Petersburgians
engaged in the Quarter-master's
department. It is extremely
difficult now to get a permit
to visit the Navy-yard, particu-

publication in the newspapers
of a minute description of
the Merrimac by a Rev Mr

first in the Mobile Tribune.

Craney Island so called from
it's beach having been a favorite
haunt of Cranes - the water
being shallow for some
distance out they found
it a convenient place for
wading in or invading. I saw
one there. Sitting on a bench
at Head Quarters of Col. Smith
I observed the steamer Wm
Selden on her 2^d trip from
Norfolk run aground; as
she did not get off till
a late hour I had to stay
on the Island that night
(Tuesday) which I was pleased
to do to see the encampment
by moonlight. Saw Major

Crutchfield son of the late
Speaker of the Va. H. of Delegates
drilling the Norfolk company

of firing; lying down, loading

of 4 to resist cavalry. The

The Norfolk company A

Capt Krupp drilling his company

County Va. the same company
which I noticed when passing
through Petersburg healthy blond
robust mountaineers a very
fine company: drilling in light,
artillery, "limber up" "one!"
"two!" "three" &c. The men

I took supper with Capt.

sate No. 1 - a former scholar
of mine - now a sergeant
sergeant. After supper
Capt. G's company mustered
to call roll. The adjutant
called the roll from memory
remember. After the company
was dismissed the Capt.
distributed gas to some of
them. The Capt. & his 1st Lieut
held a short controversy as to
the comparative merits of 2
uniform coats. As it was
rather too dark to discrimi-
-nate between them, proposed

to adjourn the question
over till the morning which
was agreed to. Hearing of an
old Negro drummer who
had come down from
Roanoke county with
the Salem company &
to intimating a wish to
see him Capt. G obligingly
went in quest of him. He
had gone to bed it being
then about 9 o'clock but
he got up dread of come.
He is 72 years old, his
appearance ^{is} very prepossessing.
Was in this quarter in the
~~war~~ war of 1812-14 &
when on the eve of his
departure to men what whim-
sically buried a pipe
at Craney Island. On

This circumstance, which
in the long interval had
escaped from his memory
some curiosity being excited
on the subject or some
incredulity being expressed,
the old drummer remarked
that he could easily find
it again. Upon repairing to
the spot he in a little time
came to a large chip of
cinder it, the identical
pipe which he had buried
there 47 years before. The
stem (of reed) was gone having
decayed but the pipe remain-
ed unharmed by the interment
~~of~~ save a little defacing of the
glazing. The old drummer
rather unthinkingly gave it
to a negro boy who asked him
for it: but on finding afterwards

how much interest some
of the officers took in it
he sent word to the boy by
a woman that he would
give him \$2.00 for the pipe
& the old man remarked to me
that he would give \$5.00
to get it back. Some of the
officers of the garrison had
told him that he ought to
have sent it as a present to
Jeff Davis: but I rather think
that as the President has no
time for such curious relics
just now, that the old drummer
had better if he recovers it
keep it to take back home
with him to Noank; or if
not, give it to me. The old
man has been free from
his birth: is a hatter by
trade. Says if there should

be a fight here he must
lay aside his drum &
take a hand in it. He has
no partiality for the Yankees
& believes they are not the
people to give the negro his
rights: thinks the Southern
people treat them far better
than the Yankees would.

In the evening observed
the camp-fires: walked
on the ramparts & looked
over the quiet waters
lit by a somewhat hazy
moon towards Fortress
Mouroe & Newport News.

To-night, Tuesday Sept.
10th is the night when
according to the writing
on a shingle picked up
on the James an attack
is to be made on Norfolk.

During the night heard
several times the voice
of the sentry on guard on
the rampart hard by.

Capt. G. gave me a grape shot
much rusted away dug up
here & no doubt a relic of
the battle of Craney Island
in last war with Great
Britain. Wednesday morning

I returned to National: walked

bought some figs & Scuppernon
grapes & sent them by Express
to A. in Petersburg. The
basket I sent them in
bought from an Irishman
in a cellar near the Market
who manufactures them - a
nice basket with a cover to
it; cost 90 cents the figs cost
50 & grapes 40. They were
damaged by a delay of 24
hours the Express having failed
to deliver them. About the
streets observed groups of
soldiers with their guns
a military police. Noticed 4
horses drawing a cannon:
one of the horses becoming
refractory an artillerist
beat him & kicked him
which only made him more
obstinate: the 2 horses in

front were then detached
& the other 2 carried off
the cannon. Walked to
the Norfolk & Portsmouth Ferry
landing place. Saw Gen. Huger
on horse-back ride out from
the ferry-boat followed by
a youth on another horse.
The general a fine dignified
looking officer. He rode on
to Harrison's Farm & reviewed
the regt there & expressed
himself much pleased with
them as I heard. I crossed
over to Portsmouth. The boat
crosses in about 10 minutes.
Walked about Portsmouth.
Met Rev. Mr. Humix Chaplain
to Col. Pryor's regt at Burnell's
Bay. He says the proper
name of the place is Bay's
Hack so called after a

former resident there.

No Permit is necessary in
visiting the Marine Hospital.
Went at night to Theatre
to hear concert of amateur
musicians of Alabama

both. 2000 persons present.
The music was good & the
performance entertaining
but I should have been
better pleased with it if
it had not been done in
the style of Negro minstrels.
which in Norfolk they
use rain-water which is
abundant this season.
Norfolk which promises to
be an important city in
the new Confederacy ought
to be supplied with water
from Lake Drummond.

Sept 21st I have of late neglected
this diary. In the meanwhile
nothing of extraordinary interest
has occurred: Soldiers have
continued to pass through
Petersburg. 2 regiments have
passed through from Richmond
on their way to Norfolk: one
of South Carolina the other of
Alabama sent to take the
place of 2 regiments sent
from Norfolk to N. Carolina
in consequence of the Hatteras
affair. ~~Last~~ ^{day before} yesterday Mr
S. read me an extract
of a letter from Charleston
dated 17th saying that
a ship sailing under British
colors from England via
Nassau New Providence
in the West Indies had
run the Blockade & reached

Savannah bringing 32
rifled cannon 6,500
rifle guns - leather, percus-
sion caps &c. The papers
have been requested
to say nothing about it.
It is said to-day that the
Govt had directed the Express
paper here which had "set
up" the intelligence not to
publish it & it is said that
5 more ships with similar
cargoes are expected. The
captain of the ship also
reports that Genl John Russell
had announced that he
was ready to hear the
propositions of the Com-
missioners of the Confederate
States. But it does not appear
clear how a sailing vessel
could have brought that

news for if known it
would have come by
the Steamers. The shipment
of the contraband cannon
etc was probably worked at
by the British Government
by so it spurs strongly
at raising the blockade
of recognition of the inde-
pendence of the Confeder-
ate States.

While in Norfolk I visited
the Navy yard. It was
very difficult to get in
but I succeeded by the
courtesy of Mr B — who
introduced me to Capt.
Robert Yerram. I went
^{about 9. A.M.} over in a boat ~~about 9. A.M.~~ rowed by
negroes in uniform. Some

on the dangers of the Hatteras

the Yankees had had great
luck: that their ships
could hardly get ^{down} inside an
equinoctial near that
coast. Landing at the
Navy yard I proceeded
with Capt P. to the
head-quarters of Commodore
De Forest an aged officer
who has sacrificed a
fortune of \$100,000 at
Alexandria by joining the
Southern Confederacy. The
Commodore was not in: I

Capt. O kindly took me
with him through the yard

the foundry where they
were moulding things: saw
there the manner of making

are like the Minnie

at one end: the base of
the cylinder is leaded

In another room saw beautiful instruments destroyed by the Pandal Yankees. In another saw the process of rifling cannon: they turn out one per diem. In another place saw them making bands for cannon a new invention.

Sept 20th Saturday. Saw at Peachontas Depot 2250 Yankee prisoners under guard of 70 soldiers. The prisoners were

they are fighting at Arlington

events will occur within
48 hours: i.e. there will
be another great battle
near Washington. But
the Equinoctial storm
appears to be brewing & it
is raining this evening
so that it is hardly probable
that there will be any
pitched battle within a
week. It is to be hoped
that some of the U.S. ships
at Matanzas will be foundered

shortly & that the forts
there may be recaptured.

to see his mother and so
he brings her only son, not
yet ^{wholly} recovered from the effects
of the wound rec'd at Manana.
The quid nuncos, gossips
of croakers "chimney corner
knives" as Washington
styled them continue

to criticize the conduct of
the Government & the Generals:
& to censure them for not
making an onward move-
-ment upon Maryland &
Washington. It is hard for
any one to refrain entirely
from this querulous carping
vein. A writer in the Engineer
vindicates Commodore Barson's
conduct ~~in 1862~~ at Fort
Matteras against the attacks
of those who accuse that
gallant officer of cowardice.
This writer states that the
number of the enemy
landed at Matteras was
~~supposed~~ supposed to be 2500
instead of 300 & they were
protected from assault by
the guns of ^{a large} the greater
part of the enemy's ships.

The Examiner opposes the
re-election of Vice. Pres.^t
Stephens on the ground that
he was a supporter of Douglas
& stood out strenuously to the
last against secession. Salt
is very dear: ragged skin-plasters
abound: specie is banished.
Mrs Morton wife of Senator
Morton of Florida has arrived
in Petersburg: she came under
a flag of truce from Washington
where she has been for some
time under arrest: her baggage
was twice searched on her
way from Washington to Andrew
Monroe: yet she brought 2
revolvers. She is in feeble
health & on that account
was allowed to bring with
her a slave. It is said,
that Mr B. merchant

of Petersburg lately returned
from the North where he
had been since the commenu-
-ment of the war had all
his money taken from him
except enough to pay his
travelling expenses. The huts
for the Soldiers it is said are
to be built by them. T. T.
a carpenter then out of
employment has been to
portsmouth looking for work:
found none there: was offered
\$2.00 per diem if he would
go to N. Means. He proposes
to undertake the tanning
business being offered \$1. per

this business to him some
time since. An early peace
is not desirable: a premature
peace prematurely patched up

would probably be soon followed by a renewal of hostilities. Nor is an early raising of the blockade desirable. Mr G. thinks that the independence of the Southern Confederacy will not be recognized by England & France before Feb'y 1862 when the Confederate Govt will be put upon a permanent basis. A French Corvette the Lavoisier has arrived at N. Orleans bringing a mail. Prince Dignac has been appointed an officer under Beauregard. The Richmond Cosmopolitan of the Charleston Mercury announces that the Armstrong gun is about to be made in Virginia. This perhaps is problematical.

Sept. 27th. Friday. To-day
we have had apparently
the beginning of the Equinoce-
tial storm: but the sun
set nearly clear, & to-night
the stars are shining. The
wind was high this afternoon
& evening. It is to be hoped
that the U.S. armada which
lately sailed south, probably,
will be or has been damaged.
5 U.S. ships were announced
in this morning's paper as having
arrived at New port N.C. & 2
others on same coast: curious
time for the expedition! Mr
R — an Italian told me
two days ago that a few
days before Commodore ^{Bea}rest
at the Navy yard told
him that the Merrimac
would be at Baltimore

within a month! a singular ^{rather} communication to be made
by the commodore. I have not
been out to day owing to the
weather. At Princeton college
N.J. my alma mater - the
Union Students have ducked
under the pump a secession
student named Dubois
from Newark: 3 of the sisters
were dismissed by the
faculty & were escorted out of
the town in a carriage
with flags & music by 200
victorious Union Students & a
crowd of citizens. They
cheered the Union professors
& groaned at the houses
of secessionists. McLean
the President, known among
the students as "Johnny"
threatens to punish all

Coute que coute - even if

so also Daniel Dickinson.

Mrs Norton it is said
reports 170,000 soldiers in
Washington. The Washington
papers deny that there
is any battery at Matthias
Point. The Northern Goths &
Vandals are committing great
outrages in Nth West Virginia.
In Kentucky the Confederate
forces are seizing strong
places on the Mississippi.
We may expect to hear of
disasters at sea owing to the
Equinoctial storm. General
Walter Gwin has published

a letter vindicating his
conduct in the construction
of coast-defences in Nth
Carolina: his intemperate
habits are well known
at Norfolk: otherwise he
is an able & efficient engi-
neer. A Mrs Whitaker is
the authoress of some fine
verses on the battle of
Manassas. The allusion
to Barton's death is very
fine. Beauregard although
inferior in abilities to Johnston
is the popular favorite. Sherman
appears ^{to be} the real hero of
the battle: he & his brigade
bore the brunt of it 3 hours
without giving way: the
"Stone Wall" brigade.

Sept 28th. Saturday. The
paper this morning contained

news via N. York & Washington
of defeat of G. S. Mulligan ~~is~~
at Lexington Missouri: 3500
Federals by their own account
killed wounded & captured.
3000 horses taken, with guns
supplies &c. 2000 prisoners said
to be released. The Confederates
commanded by Price. He is said
to be a Virginian from Prince
Edward. Fremont censured
at Washington for not having
reinforced Mulligan. In Kentucky
Genl. Buckner said to be at
the head of 20,000 knights
of Golden Circle - probably
a great exaggeration. There
is probably also a mistake
as to ^{the} 3000 horses captured
at Lexington: as the number
seems too great for the Federal
forces there. A party went

down yesterday from Pe-
terburg to present a flag
to Rayland Guards at
Sewell's Point. There were
200 of them & they requested
of Gen. Hayes the use of the
Steam-boat Wm Selden. He
somewhat doubtfully let
them have her advising
that she should keep
close under the guns of
the battery at Sewell's Pt.
The equinoctial gale
came on & the Wm Selden
could not land the passengers
& was blowing towards Fort
Monroe: she cut anchor &
it dragging towards that
Fortress they could not
raise the anchor & had
to cut the chain cable
with a chisel & so lost

the anchor & narrowly escaped
from the jaws of the enemy.
Mr. Butchfield editor of
the Express was one of the
party. Capt. Laurens' company
is to go to Norfolk next
Tuesday. There is a report
that Seward has promised
L^d Lyons to raise the
blockade in November. An
arrangement has been made
for the British to communicate
with their consuls in the
Confederate ports by means
of a war-ship. The position
of these consuls is singular
as they are in a government
to which they are not
accredited & with which
they can hardly communicate.
According to the theory of
the Lincoln administration

no State has seceded: all

the Union: the Confederate
States are in rebellion but
not waging war: The U.S
are blockading the Confederate
States & invading them with
large armies & have been
defeated in several battles
but still there is no war!
The operations of the U.S
army & navy are not to
~~keep the~~ restore the Union
because it has not been
dissolved: all these battles
are only to preserve the
integrity of the Union! Mr
Madison said long ago when
you under pretence of preserving
the Union wage war upon
a part of it you ipso facto
defeat your own object &

throw the state warred upon
out of the Union: because
war of necessity dissolves
the Union.

Sunday Sept 29. A quiet day:
no news. Children say that

a skirmish at Memon's

3000 Confederates: enemy
repulsed. Gen. Scott said
to be breaking down physically.
Wool reported to be in his dotage
memory failing. It is said
that the Merrimac will
try her strength in Hampton
Roads shortly. The arrival
of an iron-plated steamer
with cargo at Savannah
published in the papers.
The steamer belongs to the
Confed. govt. 5 others expected.
Monday Tuesday Oct. 15th 1861. The
papers bring a report that the
Confederates have abandoned
Memon's Hill &c and fallen
back upon Fairfax. It is also
reported that the Federals are
occupying the abandoned

posts & advancing upon the
Confederates: but this last
is only rumor. Johnston &
Burginard are not probably
^{merely} repeating the rumor of retreat
which succeeded so well ^{seen}
at Manassas. That would
to be too transparent. Both
armies are composed mainly
of Volunteers & the leaders
are on both sides very
cautious. President Davis
& an aide de camp have
gone to Manassas. A
great battle is expected but
upon what ground does not
appear. Capt. Laurens' ^{of}
company the Confederate
Guards numbering about
70 started this morning
by rail for Norfolk. The

was disabled from preaching
by a throat affection. The
U.S. lines opposite Washington
extend 16 miles - 12 miles
in a direct line. The Potomac
there is the arc of a circle
Washington city being on
the $\$$ outside of it. The
fortifications are numerous
& strong as also on the Maryland
side of the City. The Engineer
justly denounces the Shingplaster
currency as an intolerable
nuisance. Mr J. J. Campbell
has been appointed Receiver
 $\$$ for Petersburg under the
Sequestration act. The
office is worth it is said $\$$ 5000
per annum. The appointment
is made by Judge Halyburton.
Mr S - is dressing boards
at his planing machine for

the new hospitals here.
He is still making wooden
shoes for shoes. There is much
talk of the speculators
engrossing provisions and
charging exorbitant prices.
Messrs Mason & Hildell
Commissioners to England
have left Richmond for
Europe. Gen. Wise has
been recalled from the
North West & is to go elsewhere.
Vice President Breckenridge
is said to be on his way
to Virginia. Met this evening
at the depot Dr. R. assistant
Surgeon just starting for
Yorktown: his pay is \$40
per month. He is a brother
of Beverley R. of the
Confed. army. Mr L.
showed me a letter

from the Commissioner of
Patents - patenting his
new cannon. Mr L is
getting one made in
Petersburg by J & L - at
their foundry.

Weddy Oct 2. To-day warmish
cloudy & rainy. I have not
been out & have heard
no news. According to the
papers a great battle on
the Potomac is imminent.
It may be again fought on
Bull Run. The Indegar
works made 1200 cannon
for the U.S. Govt. every one
of which stood the test.
The papers publish a long
letter from Prince Napoleon
giving an account of Washington
the army, government & c.
It appears to be sensible & candid.

He describes Lincoln as a man
~~and~~ elevated from obscurity:
physically a giant - with
a pleasant face: stoop shoulders
with an air of embarrassment
& timidity. ~~He says~~ The
Prince says that Sevard
is small - with an expression
of cunning, intelligence, &
some conceit: that he has
however some sterling qualities:
The prince however does
not mention what they are.

He describes the U.S. Govt
as a mobocracy governed
by men of low grade.

Thursday Oct. 3. No news. Saw Dr
D & Dr K - examining surgeon
from Norfolk: going to Yorktown.
The enemy have burnt the
dry dock at Pensacola, also
the Privateer Judith with 5 guns.
