My dear friend

The papers will be your departure from
Washington. I therefore conclude that you
are now at your seat in Albion and
shall direct this letter to Milton Street,
I am informed in your highest Post Office
we have very ^{rarely} ~~scarcely~~ seen a paper in our
town your polite and instructive, if you have
any thing to communicate and particularly
in relation to your negotiation with Gen
Forbes which is not secret. I shall be par-
ticularly gratified to hear it.

There seems to be but one settlement in-
terested in relation to the publication of
your production herewith and that is an
unfavorable to his reputation both as a man
of honor and of talents as his word being
worth nothing. I am sincerely sorry both on his

own account and that of his friends that he
should have expressed himself in the manner
he has done by his publication his papers have
certainly been expected in the extreme nor is the
publication of them calculated in any manner
to damage them however the fact may be as to
whether to write it retards the publication of the
views is a most rashly and treacherous thing
and you will pardon me for labring the labor
but to suggest that in my opinion ~~that~~
it would not only be a just but highly
wise and honorable step to discharge him
from his office immediately. My opinion
was formed by me as soon as I read their
publication and I find the same sentiment is
entertained by all descriptions of persons that
I have conversed ^{with} Mr Dawson who arrived at
his place ^{the morning} just perfectly concurs in this opinion
and says that ~~that~~ as he signed the Trenton
Town Paper Nelson expressed great anxiety that
this step might be taken in relation to them.

and that Nelson was most decidedly of an
opinion that the success of Colver would
have the happiest effects on the pending
Maryland Elections. The mail is about to
be immediately closed and I have only time
to present my respects to Mrs. Garrison and to
assure you that I am dear for with the
most sincere respect & affection your friend &c
