### 'blader left black, blue

I came. I saw. I conquered. Well, OK. It was more like: I lost my balance. I saw pavement. I fell. About 10 times.

I went Rollerblading for the first

THE RESERVE OF THE PROPERTY OF

time Tuesday It wasn't My friend Marjorie took

me out to the Hall parking lot after finding out
NATHAN I was behind the times in outdoor HUNLEY recreational

She lent me her purple Rollerblades with the special brakes and even let me wear her "Bone Shieldz" wrist protectors, which resemble some kind of ninja weapon with their hard plastic shells covering your wristbones. These were key because I figured if we saw anyone making fun of my lack of coordinaon, I could just roll over to them and

knock them upside the head. Now my previous experience with roller-skating consisted of going to the rink and playing video gar while everyone else skated, and I haven't ever been ice-skating, so you can imagine how well I fared in this couldn't even stand up on the Rollerblades. Consequently I plades. Consequently, I tried to in myself either near cars that looked like they wouldn't have alarms or were owned by people I don't like, so if I slammed into them it wouldn't be a problem. This turned did indeed smack into both foreign and domestic models about 600 times. Fortunately, the one Cadillac I came upon didn't have an alarm.

Anyway, after poor Marjorie explained the Rollerblading basics to me for about the 10th time, I was able to skate like a champ except for one

I couldn't roll properly.

First, I had trouble picking up my feet to push off. Then when I was able to pick my feet up, I couldn't roll in a constant motion. Mariorie said I was the only person she had ever seen who walked in Rollerblades.

Then there were those individuals ugh the lot and I'm sure said to iselves that in their day there weren't such things as Rollerblades everyone just rolled around in

Another guy strolled by me just as I fell square on my behind. I hope

#### ale students give up protest - for now

NEW HAVEN, Conn. - Four orthodox Jewish Yale University students are temporarily halting their fight against campus housing regulations. The students had protested a policy that dictates they live in a coed dormitory, an arrangement they believe runs counter to religious laws dealing with matters of sexuality.

The university had given the students until early this week to make housing payments or leave the school. That led the students to back down on their demands Wednes-

day, at least for the time being.

"Lawyers representing the students are, however, threatening to challenge the school if action is not taken to

Yale requires all of its freshman and sophomore stu-dents to live in on-campus housing. Such housing is, for the most part, co-educational.

#### ugoslav democracy suffers reversal

BELGRADE — In a staggering blow to the fledgling Yugoslav democratic movement, Serbian President Slobodan Milosevic and allies forced the elected mayor of Belgrade out of office Tuesday.

The dramatic action on the part of the former Commu-nist made gains by the movement that followed last winter's pro-democracy protests largely irrelevant or

Mayor Zoran Djindjic had been the first non-Cor nist to hold that post since the second World War.
Milosevic's government grudgingly allowed him to take
office following weeks of of pro-democracy rallies that
took place last December and lasted into the first few

About 20,000 protesters gathered in the Serbian capital again Wednesday, condemning the recent crackdown on democracy. They were promptly dispersed by state riot

#### oman's life unfolds before Web surfers

WASHINGTON — Ever get the sneaking suspicion that someone's watching you? For one woman, the Washington Post reported this week, this is always the case.

Capturing every moment of Jennifer Ringley's life is a carnera perched atop her computer, which sends pictures to her increasingly popular Website. Here, for an annual fee of \$15, Web watchers can download photos at about three

Ringley, 21, is a Web page designer who hails from the nation's capital. She first placed the all-seeing camera well over a year ago while a student at Dickinson College in Carlisle, Penn. When she moved to Washington upon completion of her studies, the camera followed.

The site, which is located at www.jennicam.org, is visited by approximately 5,500 subscribers who pay the

annual fee.

Moreover, spinoff sites are being established by those who enjoy such ventures. There's a "Planet Jenni" site, where downloaded photos of Ringley are posted, as well as numerous others that feature people who share a passion—for being watched by an audience of thousands.

For those who would charge that such work constitutes

pomography, Jenni stoutly defends her practices. She describes it as simply letting the general population in on the life she leads. Even so, her site continues to receive

#### College projects garner grants National Science Foundation rewards researchers

By Jane Eisinger Flat Hat Staff Writer

Two ongoing research projects at the College were recently awarded grants by the National Science Foun-

One grant of \$300,000 was given to faculty members sponsoring research in computer science. The grant will create new opportunities for under-graduates in the field of computational

Another grant for \$320,000 was awarded to researchers in the physics department, who are testing the stan-dard model of particle physics, which may lead to a greater understanding of

the "Big Bang" theory.

Stephen Park, a computer science professor contributing to the computaonal science research project, explained the grant's impact.

"The NSF grant supports under-graduate research experiments in an area called computational science. The objective is to have students engage in a three-course sequence with research emphasis towards the end," he said.

The project, entitled "Undergraduate Modeling, Simulation and Analysis," focuses on this "laboratory science where the laboratory instrument

is a computer," Park said.
"The basic idea is that computa tional science is a relatively new discipline, which is not represented at the undergraduate level now," he said.

The grant money goes toward the stipends for undergraduate students participating in research during a six to eight week summer program.

The physics project received a renewal of a five-year grant, which has been used to fund experiments at the Brookhaven National Laboratory on Long Island.
"We are trying to test the standard hysics." physics

way a particle might decay," physics professor John Kane said. "If it decays [the way we expect], it would show that the standard model is not correct in its prediction.'

Research has been ongoing for the past 10 years, the last three of which researchers have spent studying over 1,000 billion particles.

"We are coming to the point when we will have completed our analysis of

The money from the grant covers "the pay of research professors for 12 months and the stipends which graduate students get," Kane explained.

The NSF grants are awarded on an analysis with selected.

annual basis, with recipients selected from researchers who submit propos-

"We submitted a proposal along with dozens, maybe hundreds, of other schools," said Park. "Only a handful were awarded grants, and we were one

The NSF is a federal agency that invests over \$3.3 billion a year in re-

search and education programs.

Contributing professors to the computational science research include: Rahul Simha of the computer science department; Larry Leemis of the math-ematics department; and Shiwei Zhang of the applied science and physics de-

The researchers involved in the physics project include: Morton Eckhause, Kane, and Robert Welsh, professors of physics; research faculty Dayle Hancock and Yunan Kuang; and four

#### Sickness attacks student body 'Seasonal illness' blamed for sniffling, sneezing

By Mayur Patel

Got the sniffles? You're not alone. merous students have recently been afflicted with a strange flu-like illness. Symptoms seem to include headaches, fatigue, hoarseness and occasionally nausea. The majority of vic-

tims seem to be on-campus residents.
According to the King Student Health
Center, the illness is an upper respira-

"It's generally a seasonal illness," Dr. Moses, a health center doctor, said. "It's best prevented by lots of sleep, good hygiene, especially hand-wash-ing techniques, and avoiding those al-ready affected. This strain seems to be fairly contagious and has taken out a large number of W&M students."

Many students have begun to take

#### Research network honored Teacher training program given Eisenhower grant

CHARLES THE COLUMN SECTION OF THE COLUMN SEC

The State Council of Higher Education for Virginia and the Dwight D. Eisenhower Professional Development Program have awarded the College's School-University Research Network an Eisenhower Grant. The grant will be used to fund a program directed at training local teachers to instruct others in teaching pre-algebra. Since the state mandated student compe-

tence in algebra (as part of the new Virginia Standards of Learning) and set up statewide testing, area superintendents have been

clucational frameworks.

Their solution: To begin with pre-algebra concepts such as functions and pattern recognition at the elementary level in order to prepare students for instruction in middle school.

With this goal in mind, SURN developed an extensive proposal and implementation plan for a "Train-the-Trainers" program to be conducted at the College.

SURN is a board of College faculty

research on common educational issues and problems identified by the members, according to Jan Rozelle, visiting assistant professor and director of SURN. The team meets yearly to determine which areas of education need to be addressed, and then plans and conducts research in them.

plans and conducts research in them.

Sometimes, as in the case of the algebra
and technology program, it creates and
implements solutions to determined problems. The network also sets up research
teams which meet continually to discuss
specific educational areas, such as testing

ment.

"The School of Education has a partner-ship with area superintendents," Rozelle said. "The director of superintendents ap-proached us with a concern they were having. We saw in the Eisenhower Grant a

way to provide a solution."

Eisenhower Grants are competitive federal awards which provide funding for math and science improvement programs. Fund-

ing allocated through the grant for the College's algebra and technology program proposal totals about \$46,600.

Rozzelle is co-directing the project with visiting assistant professor Dana Johnson. Margie Mason, Robert Hancy and Bob Managery are among those working discovered the proposal proposal through the proposal proposal through the proposal prop

"We're hoping that the teachers will be able to take what they learn at the College back to their schools and teach others."

The College hosted a "summer institute"

July 21 to 31 and will hold follow-up: sessions on Nov. 5, as well as a confer in March 1998. About 27 teachers of gr K to 5 from nine local school districts attended the summer session. The districts included Chesapeake, Hampton, Isle of Wight, Newport News, Poquoson, Southhampton, West Point, Williamsburg/ James City County and York County.

According to Rozzelle, the program hopes to make a difference in student achievement in algebra.

### REACTION

the McGlothlin-Street family donated

"We are prostituting the school," Herman said. "If someone wanted their name on a sign, they should have donated enough money for a new build-

ing or dorm, because we need that."
Junior Aaron Greb was unhappy because the money contributed did not go to to the hall.

According to the William and Mary ome page, the McGlothlin-Street's ontributed to the renovation of the Wren building, the expansion of Swem Library and the expansion of the Marshall-Wythe law library.

"The money they gave in no way ontributed to the building, Greb said. "If they were going to rename it [for donors] they should have renamed it for Sony or some of the computer companies who donated computers for the labs."

00000000

The building has a special place in the hearts of many computer science majors, who attend class there and spend hours in the labs developing

spend hours in the labs developing programs.

"We've grown to love the building, working there all the time," senior computer science major Gavin Macelwee said. "It feels like we're being cheated in our year of graduation. I guess the College has to become innovative in hard money times, but it seems like anyone now can walk up and give the College some money and have a building renamed after them."

In a sign of protest, an unknown

the College has had with the sign. The first sign placed in the ground before the building read "McGlothain-Street Hall."

"A professor walked by and joking said, 'It's misspelled, '... and when the sign was pulled away from the building, 'My God, it was misspelled, Gerald Johnson, chair of the geology department, said

epartment, said.
The sign was replaced before the

rededication ceremony.

"I am still going to call it T-Hall,"
Greb said. "For those who do try to ing renamed after them."

In a sign of protest, an unknown person or persons changed the new sign by scraping off almost all the letters in "McGlothlin-Street." The changed sign read "T-Hall."

Herman had not heard of the vandalism, but laughed and applauded when ism, but laughed and applauded when what our sense what o

### Lockman finds key to piano CD

By Michael Culpepper

Friends and professors always unior Justin Lockman to write and perform a full-length compact disc

of original piano music.
"I was sitting at the piano after my
a capella group Double Take fin-ished practice," Lockman said, "and one of the guys said 'Did you write that? I'd pay to listen to that.' So I called up Avalon Sound Studio in Maryland, booked some time and a few months later I was recording my

sold 60 copies since its release last

Recorded over winter break last arks the first time in the studio for

the 13-year piano veteran.

Lockman, a biological psychology and music double-major, has been writing his own music since age 14.
Lockman calls "Origins" "kind of jazzy, kind of new-age."
"One of my friends actually said it

anded a little like George Winston, which is quite a compliment,"

The Maryland native involved himself in every facet of the record, including production, distribution and even the artwork.

The CD coasts through 12 distinctly melodic tracks, all show casing Lockman's polished composi-

Intricate embellishments pepper the straightforward chord progressions with sustained emotion and characterize his polished style of playing. Left-handed arpeggios com-pliment his subtle jazz stylings, ending classical and pop influences into delicate, winsome study music.

The first track, "Foggy Bottom," haunt featuring phrases with consum-mate precision. The song highlights "Origins" with a catchy riff and

Lockman's girlfriend, junior Meghan Cropper, named the song after returning from the Washington, D.C. subway, where she passed a station called Foggy Bottom. The song has since retained its officeat name and is touted by Lockman as one of his favorite songs on the disc. Another favorite is "Dreams." a

#### FAMILY Continued from Page 7

ship over the College and they're

ship over the College and they're using the random canons lying around campus to shoot at anyone who tries to infiltrate their city!

Plan B: Repel the attack quickly.

Plan A didn't work, your parents are going to come down to see you in a hummer and said they'd run over every colonial just to visit. Now what? I is in well. You must be seen what? Lie in wait. You must be very patient about a delicate situation like this because the more you protest, the more your parents will threaten to do. Well, how exciting is a weekend in Williamsburg? I guess it all depends on if the ice cream machine in the Caf is working or not, but as chances are it won't be, why not you reverse your parents' tactics and invade them. Yes, a counterattack! As soon as they arrive, shower them with affection as you quickly toss your bags into the back seat of the car and say that you're ready to go home now. At all costs deny all knowledge of the fact that they were coming to visit you, not pick you up. Think of it as your

own personal taxi service. Plan C: Living under enemy occupation. Plan A and Plan B failed and your parents are not going to go home without taking at least six tours of Colonial Williamsburg. All right, what to do. Well, first off, use your secret service agents to figure out where exactly they think they're going to stay for the weekend. This could be of great importance because some parents — for reasons which astonish me - actually want to stay in your dorm room. Can you believe it? Someone actually wants to live in a room built for one that has three people crammed into it. If they are going to stay, take immediate action: decorate. Yes, what we're thinking is a nitty-gritty neoclassical feel for the room. Start by pairing piles of stinking laundry with half-eaten food. Add toilet paper and old notes for a more ic look. Appeal to the senses: Collect animal feces and stack them in a corner. What you're trying to do is create atmosphere that is not too flashy, yet not pale. Before you know

it, your room will just scream collegiate hell and your parents will be spending their time in HoJo.

At least with the 'rents camping out at a reasonable distance from your room, that'll give you a little bit more space, and with luck the most they'll want to do is call you locally.

Plan D: They don't want to just call you locally. They're here, they miss you and they got a list of activities going on during family weekend and in the 'Burg. Family weekend activities are like spiraling black holes: you go to one activity, you'll end up going to them all. I can offer no help here, except that Margaret, the Lady Thatcher is a great speaker and during suggest that the whole group skips the rest of the day and has mock naval battles in Crim Dell.

battles in Crim Dell.

But what if your parents have been just longing to see Colonial

Williamsburg and they would love to have you come with them. OK, we can do this. Just get into the car with them and start directing them out to the Pottery Factory. When you arrive, when that you me sure the governor's claim that you're sure the governor's palace is around here somewhere and that maybe you should go inside and ask for directions. This is all you need to do. Once inside the Pottery Pactory it is humanly impossible to leave in under 48 hours. And as a bonus you can get a lot of nifty looking items you never thought you'd be able to find, like a 15-foot ceramic deer covered in a mosaic of glass with antlers made out of tin foil - I am not making this up. There is actually a pair of these deer and they are, in fact, for sale at the Pottery Factory for about \$1,000. If you ever make it out of the Pottery Factory, not only will your parents be broke from buying a lot of random stuff. they don't really need, but also they'll be tired beyond belief and will obey all you tell them to do.

These strategies are guaranteed to succeed and amuse. Of course, they're not limited to the ones I've listed, but these are a start. Anyway, don't think of it as a battle with your parents. Think of it as just a different type of bonding that'll help you better inicate in the future . . . as long as you get your own way.

### Series returns with variety

By Chris VandenBussche

The Ewell Concert Series is back. sponsored by the music department, slightly larger than last year's event," said James Armstrong, choir director and director of the Ewell Concert Series. "It's free and open to public."

This year's series consists of 10 events in four different locations: Ewell

Recital Hall, Wren Chapel, The Great Hall and Bruton Parish Church. Each venue complements the event taking

The events include silent film music. piano and saxophone recitals, jazz, classical, Middle Eastern music and more. Students can pick up a 1997-1998 schedule at Ewell Hall or visit http:// weeble.home.ml.org/ecs.html.

The series begins this year with "Mu-

The series begins this year with "Music for Two Countertenors" tonight at 8 p.m. at Bruton Parish Church.

Ruth van Baak Griffioen, director of the College's early music ensembles coordinated the event and also plays the recorder. Also participating is Paul Walker, director of the University of Virginia's early music ensemble, on violin/viola and College keyboard professor Torn Marshall on harpsichord.

"Perhaps of particular interest is that

WEIRD SCIENCE . . .

the ensemble also includes two Will-iam and Mary students — Amanda Ingram [senior biology major, playing recorder] and Sarah Glosson [senior music major, playing viola de gamba]," van Baak Griffioen said. "In other words, these two students have mas-

so well as to be able to play in an ensemble consisting of professionals who specialize in the performance of early music on period instruments. This is quite unusual and speaks highly of Amanda and Sarah's musical and intellectual abilities. Both of them becomes ectual abilities. Both of them began their study of old instruments only upon coming to William and Mary." The vocals are also unusual. Coun-

"The skill much prized in earlier centuries throughout Europe . . . [and] has been revived in the 20th century. Because countertenors are not exactly a dime a dozen, let alone a pair of countertenors, the concert offers a chance to hear rarely-performed music of extremely high quality and musical interest," van Baak Griffioen said. Two of the composers whose works will be featured, Henry Purcell [1659-1695] and Claudio Monteverdi [1583-1643]

### Performance to aid Coon fund

By Scott Cissel

The Michael Coon Memorial Endowment Benefit, first held last October, will return Oct. 23.

The benefit will raise funds for a scholarship established in the memory of Coon, a student who drowned in an undertow at Cape Hatteras, N.C., during his junior year at the College. Coon was 20.

This year's benefit is expected to attract record crowds.

Last year, The Gentlemen of the College, the Stairwells and Improvisational Theatre performed to an audience of more than 800 people in Phi Beta Kappa Memorial Hall. Nearly 50 people were turned away from the doors due to lack of seating. This year's performance — which is fast become a Homecoming Week tradition - will see the Accidentals added to the list of performers.

Coon's parents established a scholarship fund in conjunction with his high school in Syracuse, N.Y. as well as one established at the College. This year's benefit is expected to raise enough money to activate the The endowment must reach a cer-tain level of funding before applications and qualification criteria are developed for the need-based schol-

A government major, Coon was active in many campus organizations, in-cluding The Flat Hat, the International Relations Club and The Monitor.

He was also a tutor with the Col-lege Partnership For Kids and a lec-tor and eucharistic minister at St. Bede's Catholic Church.

Coon hoped to serve in the foreign service after graduation. A recipient of a 1995 Wilson Cross-Disciplinary Scholarship, he also planned to study in St. Petersburg, Russia, in the 1996 spring semester.

Last year's benefit is remembered enthusiastically by those who at-

tended and performed.

The grand finale featured The Gentlemen and the Stairwells singing a song from each other's repertoire, and ended with both groups joining Improvisational Theatre for a joint singing session.

"Last year's show was a great success — especially when each group be sold at came together at the end," senior Chad 7:30 p.m.

said. "It's also really good to know that we are raising money for a really

scheduled to perform new material. Currently in the works, but tenta-tively scheduled for the benefit, are songs by George Michael, Elvis Costello and pieces from Michael Cohen's "Ghost Train."

In addition to benefit performance groups, members of Mortar Board, the Knights of Columbus and the International Relations Club will assist in the benefit through publicity. ticket sales and ushering.

The show will take place Oct. 23 at

Tickets are \$5 and will be sold in advance at the U.C. and Campus Center during October.

Starting Oct. 20, tickets may also be reserved by leaving a message at x3027, but must be paid for at the PBK box office by 7 p.m. on the evening of the concert.

Unpurchased reserve tickets will be sold at the box office starting at

### Boyz evolve into men in new CD

By Gary Plunkett Flat Hat Staff Writer

Overcoming the sophomore recording jinx with their "II" album, Boyz II Men are back with their celebrated four-

Their new album, "Evolution," represents maturity within themselves and their music. Boyz II Men have helped write or produce nine of the 13 songs on the album and have acquired the aid of big-time producer/songwriters like Babyface, Sean "Puffy" Combs, James

Harris and Terry Lewis. "Evolution" picks up where "II" left off and brings it to another level. Boyz II Men have quit being the boys of apologies and "forgive me's" and have ecome the men of "I am aware of my feelings, I have given you all that you

The first song on the album, "Doin' Just Fine," documents the initial difficulty of moving on after a relationship

ken his heart. Shawn Stockman croons

"you can save your tired apologies cause it may seem hard to believe/but I'm doin' just fine."

The will to move on is demonstrated in "Never," where the message is 'never/never let a broken heart take a chance of love away."

In finally finding that love, however, the Boyzrefuse to settle for a fairweather lover. They establish this point in an a capella rendition of New Edition's "Can You Stand The Rain:" "On the perfect day I know that I can count on you / when that's not possible / tell me can

There are a number of gems on the album, but the one that sparkles above the rest is the first single released, "Sea-sons of Loneliness." James Harris and Terry Lewis (who wrote "Can You Stand The Rain" for New Edition) wrote and produced this number and show they still have the "money-making" recipe Ron Devoe credits them for hav-

The song has a magical quality about Addressing the woman who has broen his heart, Shawn Stockman croons

away upon clouds, drifting back and forth between the good times and the bad times of a relationship lost. It brings

you down just to pick you up. You remember the good times and smile, but then you are sad at the thought that

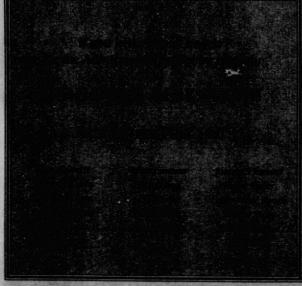

those times are no more.

The final conclusion is sadly "my heart belongs to you / no matter what I try / when I get courage up to love somebody new / it always falls apart

'cause they just can't compare to you."
On this album Boyz II Men explore On this album Boyz II Men expiore love and relationships. They give tribute and praise to the Lord in "Dear God" and show a wealth of appreciation to their mothers in "A Song For Mama." The four upbeat songs on the album show Boyz II Men are still able to give their fans up-tempo tunes while managing to keep you slow dancing to their love songs.

As a whole, the album is wonderful.

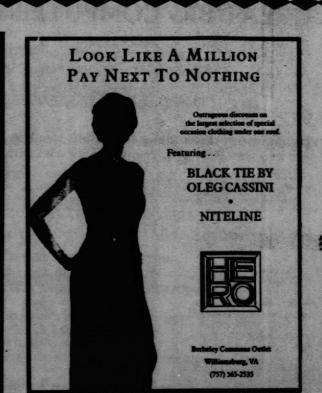

The only dull spot is the Babyface-penned "Girl In the Life Magazine." The song is nicely arranged, but the content is rather dull and confusing. The Faceman is experimenting with his music and should be commended for fails to be anything more than the one you always skip over when you listen to the album.

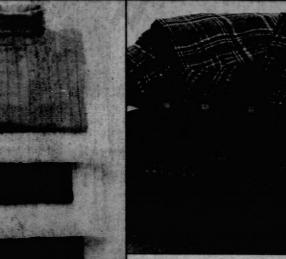

The Variety Section: an official supporter of the Orioles' (inevitably successful) quest for the Kelli Alces would also like to say hi to future hus-band Brady Anderson.

3-0 (15-13, 15-4, 16-14)

A rubber floor is substantially cheaper than a hardwood floor in the short run, and when the Rec Center was first built, the state gave the College a set amount of money. In order to stay within the budget without cutting back in other areas, the decision was made to put down a synthetic floor.

"When the Rec Center was being built," Byrne said, "we were faced with a decision over whether to put in a wood floor or, for example, a couple extra racquetball courts. We decided to go ahead and put a synthetic floor in at first, because it would be easier to change after a couple of years. It would be very difficult to try to install more racquetball courts at this

In order to ensure a long life for the new floor, rules regarding footwear will be heavily enforced. Absolutely no street shoes will be allowed in the gym, and students are asked to help enforce this rule.

"We know we've got a good product," Byrne said, "and we want to make sure it stays in great shape for everybody's use.

### Garnett's big contract

I just don't understand what owners, players and agents are thinking about when they negoiate many-year, large-sums-of-money contracts.

I heard yesterday Kevin Garnett signed a six-year, \$125 million contract with the Minnesota Timberwolves. That

averages out to just over \$20 million per season. There's 82 games in a season (barring injuries and playoffs). That's \$243,902.44 a game. JUST

Right now, in the last year of his existing contract, Garnett is paid only \$2.1 million. Over the summer, he rejected \$103.5 million. How would you get up enough nerve to say, "No, I don't think you're giving me enough money. I

Yes, he's even paid more than Shaq (\$17 million per season). Amazingly, the deal is ex-pected to be worth at least \$32 million more than what owner Glen Taylor paid for the whole Minnesota Timberwolves franchise in 1995.

I can only imagine what Garnett must be thinking. Three years ago, he was playing in a run-down high school gymnasium in South Carolina. Now, he packs stadiums of fans just to see him play.

When Garnett announced that he was bypassing college and heading straight for the NBA, everyone told him he was crazy.

Now this 21-year-old has more money than he can handle. What in the world do you do with \$125 million dollars? It's not like you can hide it

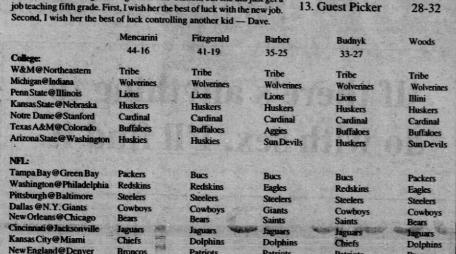

underneath your pillow at night. He might be able to pay out-of-state tuition to come here when he

s his NBA career

And once a student, he could get a big-name band to come play at William and Mary Hall. No, even Kevin Garnett couldn't do that. That takes someone to finally say, "Yes, let's do this thing," and actually follow up on his word.

Or maybe he can donate some (or all of it) and rename the College after himself. The College of Kevin Garnett. Sort of has a ring to it. I'm sure King William and Queen Mary won't mind.

I know I'd go to that school. Maybe it'll have an actual good basketball team. Garnett will still have his years of eligibility, so he could still play. The guest picker this week is Brynn Woods, my brother Dave's fiancee. She doesn't get the big bucks like Garnett, but she did just get a job teaching fifth grade. First, I wish her the best of luck with the new job.

### Nationally ranked opponents leave field hockey at a loss

"Despite the unbalanced score, we had some scoring chances in the first

half and pressured the ball very well,"

Sunday W&M's traveled to Chapel

Hill to face No. 3 North Carolina (7-2

0-1 ACC). Utilizing a number of long passes and speed on the frontline, UNC

maintained a 3-0 advantage at the break.

W&M mustered only one shot on the

Gavaghan tallied seven saves, while

head coach Peel Hawthorne said.

By Andrew Polly Flat Hat Music Editor

THE PERSON NAMED IN COLUMN TWO IS NOT THE PERSON NAMED IN COLUMN TWO IS NOT THE OWNER, THE PERSON NAMED IN COLUMN TWO IS NAMED IN COL

The William & Mary field hockey team met some tough competition last week, as it suffered defeats to the top three teams in the nation

> Friday, Tribe

For the second straight game the Tribe as held without a shot in the second half. Vargas made three saves for W&M, but allowed two goals, as UNC sent the Green and Gold back to Williamsburg with a 5-0 defeat.

Tar Heels' goal.

"We got off to a slow start, but really picked up our level of play during the end of the game," Hawthorne said.

The Tribe returned to Busch Field Wednesday to host No. 2 Virginia (10-1, 1-0 ACC). The Cavaliers hammered in a penalty corner midway through the first half to take a 1-0 advantage. Virginia extended its lead to two a minute later when U.S. national team member

Meridith Thorpe played the ball through Gavaghan's legs. Thorpe later gave UVa a 3-0 halftime lead on another score.

In the second half, Virginia kept the pressure on, but W&M's defense kept the Cavaliers shut out for the final nza. With a minute left, freshman Katie Uhran scooped a shot toward the goal, which was deflected by UVa's goalkeeper. Senior Anita Sim crashed

made

the goal and tipped in the Green and Gold's first score in three games.

Gavaghan made nine saves against UVa. Although she and Vargas allowed 22 goals over the weekend, the two

posted 38 saves during three games.
"Both Bridget [Gavaghan] and Erika [Vargas] have improved tremendously over the past couple of games." Hawthorne said. "In just the past three games, both goalkeepers and the rest of the defense got practically a season's worth of work."

Four of the Tribe's seven losses have come against top-10 field hockey programs. To date, W&M's schedule is the most difficult in the nation among Division I schools.

"It's been a tough stretch against these last couple of teams," senior cap-tain Amanda Golding said. "Playing the best will make us better, though unit. In the long run, this stretch w pay off."

The Tribe looks to get back on the winning track Saturday against CAA fee Radford at 1 p.m. on Busch Field Last year W&M beat Radford 3-1 dur last year week bear kadiora 3-1 during the season, but the Highlanders later evened the score, tallying a last minute goal to knock the Green and Gold out of the CAA tournament. During that game, the Tribe kept possession of the ball, but could not take advantage of the season of the season of the ball, but could not take

advantage of its scoring opportunities
"We're looking for a chance to turn
this season around," Golding said.

THE COURSE OF THE PERSON OF THE PARTY OF THE

Bao Nguyen/The Flat Hat in the Flight A finals.

### Tribe cleans up at Maryland

By Helene Bilis

That's the one-word explanation of at the Marlyland Invitational last week-

It's easy to underwhy the

Tribe is ranked No. 8 considering all four players representing the Green and Gold tennis played in championship

· In fact, the squad was so powerful that sophomore Carolijn van Rossum and junior Tari Ann Toro played against each other in the Flight A champion-

"Playing against Carolijn is like playing against any other opponent," said Toro. "We both played excellent tennis, especially in the last set."

Van Rossum echoed those thoughts. "When you play against your teamate, there's a really good atmosphere," she said. "Once the match starts, you forget you're on the same team and you play to win."

The two Tribe players played agressive tennis and remained mentally tough despite having to move to indoor courts halfway through the match.

new courts, I had to get back into the game," van Rossum said.

The finalists agreed the match could

have gone either way. They both fought for every ball and came up with strong offensive baseline shots, making sure to move each other around and keep the oponent working.

"I go into every match wanting to in, but I take it point by point," van

Senior Maya Klavora had a stellar performance as well, making it to the championship game of Flight B. She lost a vigorous three-set battle to Nicole Volato of Ohio State (4-6, 6-2, 4-6).

"I stopped being aggressive and got complacent," Klavora said. "It was a very frustrating game. I had played well and smart through the tourns but in the finals I drifted away from attacking, I didn't stay in the point, and

Klavora recovered in doubles play as she and Toro words Flight A champi-onship. The pair are undefeated this season and have made it their goal to

"We hung well together," Klavora said. "Although we started slowly, we didn't let it get us down. We went out and did what we had to do."

Sophomore Elizabeth O easily won the consolation Flight A final over Mandy Yeley of Ohio State (6-2, 6-1). The Tribe next takes the courts on Oct. 10 to 12 for the Tribe Classic.

ranked No. 7, and Michelle O, No. 37, are competing in the Intercollegiate Ten-nis Association Clay Court Championships, the first of four ITA Collegiate Grand Slam events.

Nikolaus, the defending singles champion, knows she will have some steep competition, since seven of the top 10 players in the nation will be there, including No. 1 Agnes Muzamel

of Mississippi.
Nikolaus will seek revenge against Vanessa Webb of Duke, to whom she lost in the finals of the W&M Invita tional two weeks ago. Webb already holds one Grand Slam title.

As a doubles team, O and Nickolaus are ranked No. 13 and believe they have showing. They look forward to playing together on clay, which is a surface they

### Swaffin, Bezek lead W&M

By Philip Woodward

This past Monday and Tuesday, the illiam and Mary women's golf team landed in a fifth-place tie out of 10 eams competing at the Appalachian State Invita-

After score by seven strokes to finish with a two-day total of 699.

Senior and co-captain Susan Swaffin paced the Green and Gold, finishing tied for 12th overall with a two-round total of 170.

According to head coach Ellen McGowan, sophomore Jill Bezek "made a complete turnaround" by shooting an 82 in round two after a score of 92 in the opening round. Bezek carded a 174 to tie for 19th

Freshman Anne McFadden, senior co-captain Olivia Wright and freshman Laura Pinkerton shot 177, 178 and 187,

respectively.

After rain canceled the practice

the squad "hung in under some very windy conditions." McGowan said.

"The first day we stumbled a little bit but improved [on] the second day despite some tough wind conditions," she

Although the Tribe's score of 699 is not its best so far this year, the fifth-place finish indicates the squad's progress after ranking lower in its past

The Tribe enjoys a two-week break from tournament play to prepare for the ECAC championships to be held Oct. 18 and 19 at Kiskiack Golf Course in

#### MEN

Continued from Page 13

Woodworth broke from the trailing pack after about two-and-a-half miles. finishing third (24:40). Senior Howie Townsend closed in fast (24:41) to place fourth and classmate Brent Colburn ran a strong final mile to fin-ish seventh. Mike Brown, another senior, rounded out the Tribe's scoring with his ninth-place effort (24:50).

The Tribe was a little disappointed that its competition didn't race their complete teams.

"I wanted to use the meet as a meauring stick," head coach Andy Gerard said. "UNC held out one of their guys and Ohio University [third place, with 78 points] held out two of their key runners, so it gave less of a bench mark than I hoped. But whenever you win a race on your home course, it's a good

The Tribe, however, was not at full-

strength itself.

"I think it was the first time for a lot of us that we raced together," Lane said. "But unfortunately, Kevin [Hill] and Geoff [Williamson] were sick, so we still haven't raced the full squad." After taking this weekend off, the Tribe races at the Maine Invitational Oct. 11. There it will face top-level competition including Michigan, Ari-zona, Alabama, Purdue and Iowa. "Hopefully, Maine will give us a

little more exposure," Gerard said. "I'm not too concerned with the national rankings, but doing well in a meet like this will help."

Lane will also be pushed harder

against impressive individuals.
"I'm looking forward to Maine," he said, "to see how I stack up against guys who are consistently All-Ameri-

impolite guests as they are hosts, the Green and Gold should stack up well.

### WOMEN

Van Rossum said. "They're probably

Sophomore Tressa Breindel (17:38) placed tenth for the Green and Gold, and Sturgell finished 13th (17:45). Though she didn't score in the meet, Kerr finished ahead of Michigan's fourth runner to give the Tribe the placement it needed to win.

from Ten

"We drew it up almost exactly as it appened," Van Rossum said. "We put six in before their fourth and seven before their fifth."

Beating Michigan, even when some unners had off days, gave the women a lot of confidence.

"It's very exciting to beat them," Newberry said. "It made us realize how deep and strong our team really is."

The Tribe rests this weekend before raveling to Furman for the NCAA Preview meet on Oct. 11.

If there's anything to do with sex, I'll find it.

ingina

re-

fifth-

place

Once again, the Tribe was paced by sophomore Wes Cothran, who carded an 80 Monday and a final day 79 to come in with a 159 and a solid 16th place finish.

Freshman Mark Urbanek posted the next lowest two day total for the Tribe, stepping up with a steady pair of 81s to finish at 162.

Assistant coach Scott King said, "I was happy with what I saw from Mark these two days. He made a lot of bird-

ies, particularly on the par fives." Also contributing to the team score for the Green and Gold were seniors David Rizzo and Tom Engler and freshman Tom Long. Rizzo shot 165 (86-79) and Engler posted a 171 (85-86) for the two-day tournament. Long, playing in his first collegiate event, struggled to a 94 Monday, but rebounded with a solid 82 Tuesday.

This year's tournament was hosted by Stoneycreek Country Club, marking the first time in more than 30 years that the championship has been held away from its longtime venue, the Homestead Resort. Stoneycreek proved

to be a challenging test, with fast, unde lating greens that gave players trouble over both days.

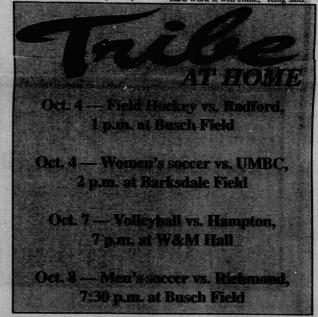

This already difficult course was made even harder by the fact that Sunday's scheduled practice rounds were washed out. The weather was indeed a big factor in the Tribe's poor showing on Monday, particularly since only Cothran had experience on the challenging layout.

Head coach Joe Agee summed up the Tribe's difficulties

"It's just the type of course you need to play once or twice before you compete on it," he said. "The rain made that impossible. Look at our Monday score pared to our score on Tuesday. We cut off 11 strokes after we had played the course once and figured out the layout. It's really too bad to miss a practice round like that, but it was good to see how everyone pulled together and came back strong on Tuesday.

King was also disappointed with the squad's slow start, but he insists on looking forward rather than dwelling

-all we need is some continuity. hard work it will come," King said.

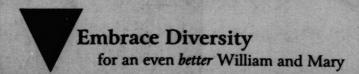

The William and Mary Gay and Lesbian Alumni Association

Conflicting studies estimate that gays represent between 2% and 10% of the general population.

(At William and Mary, this would include about 160 to 800 people.)
